		Warner Valley Secondary Highway. Improve to facilitate log hauling.
		Permit. Request of "Buck" Snyder to operate oversized equipment in transportation of stock between California and Oregon. Approved. Formal application to be made.
		Snow removal. Request of "Buck" Snyder for snow removal on county road south of Paisley; county to pay expense. Action deferred.
		Lake County. Lakeview. Requests for postwar projects(Cont.):
		Warner Secondary Highway. Improve Adel to Hart Mt.
		County Roads. Request for improvements.
		California state highway which connects with Fremont Highway south of Lakeview. County Court to furnish data so improvement can be discussed with Calif. officials.
		Award of contract. Engineer's award of contract for construction of Malloy Ranch-Hooker Creek Section of I.O.N. Highway to Morrison-Knudsen Co. confirmed.
11737		Inspection trip. State Parks and highways inspected enroute from Lakeview to Klamath Falls.

Page	Date 1943	Subject
11737	Aug.27	Klamath County. Klamath Falls. Conference with County Court, Chamber of Commerce, City Council and City Planning Commission re postwar projects. County Court and Klamath County C. of C. request following program:
		The Dalles-Calif. Hwy: Klamath Agency-Sand Cr. Sec., complete survey and construct; Algoma Hill-Barclay Sprgs. Sec., grade, surf. & pav.; Barclay Springs-Modoc Point
11738		Sec., widen and resurface; Terminal City-Hatfield, Calif. Sec., relocate and construct; complete survey for realignment from junction of US97 and Ore.66 to Terminal City, grade and surface; portion of US97 north of Sand Creek, widen and resurface.
		Willamette Hwy.: Goshen-Oakridge Sec., align, grade & surface; Oakridge-Salt Creek Falls Sec., surface & oil; Odell Lake to junction of US97, surface and oil.
		Lakeview Highway: Complete to modern standards.
		Relocate and reconstruct Terminal City-Hatfield, Calif. Section (via US97, OrE.66, OrE.39) in Primary System but not Federal Aid System.
		West Side Highway. Grade & surface Klamath Falls-Ft. Klamath Section and connecting with Secondary Market Road from Medford via Rt. 236 & Lake of the Woods;
		Midland Market Road. Reconstruct, grade and surface from present oiled surface SW to US97;
		Mack's Store-Midland. Grade and surface from Mack's Store to US97 via OrE.39;
11739		Malin-Poe Valley. Grade and surface unfinished portions; Olene through Poe Valley, connection with Malin-Poe Valley-Bonanza Road.
		Klamath County. Klamath Falls. Postwar projects requested by City Planning Commission and City Council.
		Establish and locate highway routes through Klamath Falls and its suburbs;
		S. Sixth St., Main St. to Klamath Falls-Lakeview Hwy. Jct. Reconstruct, including widening of new S.P.R.R. overpass, removal of power and telephone poles; install street lights and separation strip from Washburn Way to U.S.R.S. Canal;
		Secondary State Highway #421, realign and standardize within city limits;
		Acquire and use for state parks portions of property cut off by highway right of way acquisition.
		Klamath County. Klamath Falls. Postwar city projects requested by City Planning Commission within City limits:
11740		Widen and improve Eleventh St. (Commercial St.-Upham Sec.) and Upham St. (Eleventh St.-Calif. Ave. Sec.);
		Create through truck route from Alameda to Link River;
		Widen and improve Third St. (Klamath Ave.-Calif. Ave. Sec.);

Page	Date 1943	Subject
11740	Aug. 27	Klamath County. Projects requested by City Planning Commission (continued): Widen and improve Main St. (Alameda-Michigan Ave. Sec.). Chairman explains purpose of visit and mentioned that sale of bonds and collection of tolls have been suggested to finance highway improvements.
11741		Agreements. Modification agreement with Bennett Trust Co. covering acquisition of Simpson Property, "Shore Acres", Coos County, signed.

Portland, Oregon, April 6, 1943

The State Highway Commission met in regular session at 1:30 p. m. in room 615 (Imperial Room), Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Clough was unable to attend this meeting; however, was present on the following day. Mr. Merle R. Chessman, Astoria, newly-appointed Highway Commissioner whose appointment becomes effective April 8, 1943, to replace Commissioner Clough, was also present and participated in the discussions.

The Commission discussed matters concerning which delegations are to be present on the following day, as follows:

Claim of contractor Homer G. Johnson for extra compensation arising out of his contract No. 2390 for grading, surfacing and oiling the Siletz-Toledo Section of the Siletz Secondary Highway, in Lincoln County:-The matter was discussed thoroughly, but a decision relative thereto was deferred pending a conference with Mr. Johnson.

Removal of the Frank H. Hilton building from state highway property just north of the Alsea Bay Bridge at Waldport:-This matter likewise was discussed thoroughly, but a decision relative thereto was deferred by the Commission pending consultation with Mr. Hilton on the following day.

Request of A. F. Koppisch to purchase a small tract of timber in Short Sand Beach State Park:-It was recalled that this matter had the attention of the Commission at the previous meeting and Mr. Koppisch's request was denied, because the property was deeded to the state as a gift for park purposes by Mr. and Mrs. Samuel Reed of Manzanita, and the Commission felt that it would not be acting in fairness to Mr. and Mrs. Reed if the timber were sold. It now appears that Mr. Koppisch is cutting the timber on the property surrounding this tract, and particularly needs the state's property in order to facilitate his operations. It also appears that a letter has been received from Mrs. Reed approving the sale of the timber on the state's property, if the Commission considers that advisable. Chairman Banfield mentioned that this is a question of policy, and that the Commission may have to let down some of the barriers under which it has been functioning, in view of wartime conditions and the efforts of the Federal Government to secure timber products. The matter was discussed at some length, but a decision was deferred pending the appearance of Mr. Koppisch before the Commission on the following day.

The Assistant Attorney requested authority to purchase certain real property that is needed for certain highway improvements throughout the state. He submitted a list of such properties, together with offers that he recommended be paid for them. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution with regard thereto:

APR 6 1943

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

---

The matter of acquiring right of way that is needed for the proposed revision of the Oregon Coast Highway between Cannon Beach Junction and Cannon Beach was discussed, as was also the acquisition of timbered wayside strips adjacent to such right of way. A decision with respect to the purchase of such properties was deferred by the Commission pending inspection of the same by Mr. Chessman, and his report to the Commission at its next regular meeting. It was arranged that Mr. Chessman would inspect the property on April 13, in company with the Engineer and the Attorney.

The Commission discussed briefly and ordered filed a letter from W. H. Lynch, District Engineer, Public Roads Administration, advising that, acting upon the recommendation of his office, the Commissioner of Public Roads has approved an expenditure of $29,500 of federal funds to reimburse the state for expense incurred in connection with the repair of the Pacific Highway West which was damaged in connection with the construction of Camp Adair Cantonment. Mr. Lynch advised that this amount is being added to project DA-WR (5) as a contingency item.

The Secretary presented a report on violations that have been committed by carriers who are operating under emergency transportation permits. He explained that, under instructions from the former Commission, notification has gone to each violator to the effect that the Commission may see fit

to cancel his permit in the event he continues to overload his equipment. The Commission approved the action taken by the former Commission, and instructed the Secretary to circularize all holders of such permits, advising them that the present Commission has adopted the former Commission's ruling in the matter and will expect them to abide by the requirements; otherwise it may be necessary to cancel the permits. The matter is to be given publicity through newspapers.

In this connection the Engineer brought up for discussion weight violations committed by log haulers. He advised that the overloading of logging equipment is on the increase, and suggested a conference with the leaders of the logging and lumbering industries to discuss the situation, it being very apparent that something must be done to stop such overloading which is seriously damaging highway surfaces. After discussion the Commission approved the Engineer's suggestion, and instructed him to arrange for such a conference at the next meeting of the Commission. He was also instructed to furnish each Commissioner with full information with respect to the overloads for study in the meantime.

The Engineer requested authority to purchase four hoists equipped with brakes and roller bearings, for use in connection with paving-plant operations. He estimated that they would cost about $900 and advised that they are a labor-saving piece of equipment and are quite essential now, because of the labor shortage that the highway department is experiencing due to wartime conditions. The Commission approved the purchase of such equipment, if authority can be obtained from the War Production Board.

The question whether or not to continue the Allen's Press Clipping Service was discussed by the Commission. The Commission by unanimous vote approved the continuation of such service, notwithstanding that the rate has been increased one-half cent per clipping.

The Attorney reported receipt of an inquiry from Mr. Tom Holman, Seattle, Washington, as to the advisability of holding a joint conference between the highway officials of California, Washington and Oregon at some central location. He read aloud a letter suggesting such a meeting for a discussion of matters of mutual concern. The Engineer gave as his thought that such a conference would be beneficial to all parties. He advised that engineering contacts have been made in the past and much good has been accomplished from them. The Commission indicated a favorable attitude toward the holding of such conference, but deferred a definite decision pending further investigation. A report on the matter is to be rendered at the next meeting.

In this connection the Engineer requested authority from the Commission to attend called meetings of the Directors of the American Association of State Highway Officials, of which he is a member. He gave as his thought that this is particularly important at the present time, in view of many highway problems that are in the offing, and especially matters concerning postwar work. Chairman Banfield gave as his thought that the Engineer should keep in touch with developments through this Association. Commissioner Schaupp concurred, as did also Mr. Chessman. The Engineer was thereupon authorized to

attend such meetings at state expense, subject to further approval by Governor Snell.

The Engineer reported that in conformity with authority previously granted him by the Commission he awarded to Vernie Jarl, Gresham, on March 31, 1943, the contract for clearing the approach and side clearance zones of the Aurora Flight Strip, in Marion and Clackamas Counties, bids for which were taken by the Commission on March 17, 1943, Mr. Jarl being the low bidder, and the conditions of the award having been satisfied. The Commission confirmed the award as reported.

The Secretary presented a petition signed by numerous residents of the Pedee, Kings Valley and Hoskins community, in Polk County, in which the Commission is urged to construct a new road from a point near Pedee to the town of Airlie, following a location recently surveyed by highway department engineers approximately paralleling the Valley and Siletz Railroad. The Engineer advised that this is one of the roads that the Commission has had under discussion for some time as a possible outlet for the people who reside west of the Camp Adair Army cantonment, and whose previous outlet is now included within the cantonment boundaries. The Army authorities, he said, will not permit traffic over the old road and the Public Roads Administration will not approve an expenditure of federal funds to finance such road, although it will approve federal funds to pay 100 per cent of the cost of improving the McTimmonds Valley Road, along the westerly and northerly boundaries of the cantonment, when an agreement has been reached with respect to the encroachment upon the cantonment property. It was his thought, however, that a satisfactory location can be decided after further consultation with the Commanding Officer of Camp Adair and members of the Public Roads Administration. The Commission approved the report, and instructed the Secretary to inform the petitioners of the facts as explained by the Engineer.

Reconsideration was given by the Commission to the matter of joining with a Mr. Francis I. Northrup in securing the vacation of that portion of East 26th Street, Portland, which lies between Clackamas Avenue and the railroad right of way of the Pacific Northwest Public Service Company. The Assistant Attorney, to whom this matter was referred by the Commission at the previous meeting, advised that East 26th Street, north of Clackamas Avenue, has already been vacated and that a part of this street already is included in the right of way for the state highway. In the event the street is vacated, he said, the state will come into possession of the easterly half thereof, including a small triangular-shaped area outside of the standard-width highway right of way, which Mr. Northrup wishes to acquire in order to fill out his holdings. It was his thought that the Commission could join in the vacation and sell this small tract to Mr. Northrup without hurting the highway in any way, provided the deed of conveyance contains a clause depriving Mr. Northrup of right of access to the highway at this point, except such right of access as is now provided by Clackamas Avenue. The Engineer advised that such small triangular portion is of no value for state highway purposes. He also recommended that the street be vacated and that this small area be deeded to Mr. Northrup, with restrictions as to right of access to the highway, provided Mr. Northrup is willing to pay the state a reasonable sum for the area. After discussion the Commission approved the recommendation.

APR 6 1943

The Assistant Attorney reported on investigations relative to the ownership of an old house which occupies state property near South Slough Bridge on the Cape Arago Secondary Highway, in Coos County. He advised that from all of the evidence that he can secure, the house really belongs to Coos County, but was moved onto the state's property by mistake when the right of way for the improvement of the highway was acquired; also, that Coos County Court gave a Mr. Morrison permission to live in the house as long as he wanted to. Mr. Morrison, he said, vacated the premises some time ago, and his whereabouts are unknown. He further advised that he suggested to the county court that the Highway Commission might let the county have the building for further disposition, but the county court was unanimous in stating that the county didn't want it. He recommended, in view of the circumstances, that the offer of Mrs. Bertha M. Prelwitz, of Charleston, to pay $25 for the building be accepted. The Engineer stated that the building is of no value for state highway purposes, and declared his concurrence in the recommendation, provided Mrs. Prelwitz will remove the building from the state's property and will clean up the premises to the Commission's satisfaction. The Commission approved the recommendation by unanimous vote.

The Attorney reported receipt of an offer from C. W. Smith to pay the state $100 for the old Knapp Hotel Building at Port Orford. He requested instructions from the Commission relative to the sale of this building. In the discussion that followed, it was pointed out that the building is in fairly good condition, and that the state might receive a more substantial offer if the building were advertised for sale in the regular manner. It was also recalled that the Oregon Historical Society is interested in the preservation of the building because of its historical background. The Engineer advised that the building is of no value from the highway standpoint. It was the Commission's decision that the Oregon Historical Society should be contacted relative thereto, and that the building be sold in the event there are no serious objections from the society. It was also decided that, if the building is sold, the sale should be advertised in accordance with the usual practice. The Attorney was instructed to contact the Oregon Historical Society and to handle other details in conformity with the general practice.

The Assistant Attorney brought up for discussion a settlement with Mr. C. F. Campbell for an exchange of properties at Eugene. He advised that Mr. Campbell owns the property which lies just south of Eighth Avenue and west of the old railroad right of way which the state is acquiring from the Southern Pacific Company in connection with the realignment of the Pacific Highway between Eugene and Springfield, and that Mr. Campbell wants to enlarge his holdings to the extent of acquiring that portion of the old railroad right of way that fronts on his property. As a consideration, he said, Mr. Campbell has stated a willingness to deed to the state right of way that is needed for the proposed connecting roadway between Eighth Avenue and East Broadway, which roadway will have to be constructed in order to facilitate travel from Eighth Avenue to East Broadway (new route of the highway) in view of the fact that Eighth Avenue has been closed to public use at the railroad crossing; in other words, Mr. Campbell will deed to the state, without charge, the right of way needed for such connecting roadway with the buildings located thereon, if the Commission will deed to him the old railroad right of way in front of his

property and a small area that is included in the East Broadway intersection with this right of way. He gave as his thought that Mr. Campbell's request is reasonable and recommended approval of the same. The Engineer concurred in the recommendation, and explained in detail the need for the Eighth Avenue-East Broadway connecting roadway.

In this connection the Attorney advised that Mr. Campbell wishes to purchase some 500 feet of the old steel rails that the state acquired from the Southern Pacific Company as the result of the realignment of its trackage facilities by reason of the highway improvement, for which he is willing to pay the ceiling price of $600 for such commodity. Mr. Campbell, he said, wishes to use the rails in order to maintain railroad-sidetrack service to his property. The Engineer advised that the Southern Pacific Company has tendered an offer for the entire trackage at the ceiling price set by the government; however, recommended that the rails be sold to Mr. Campbell as a part of the transaction involving the exchange of real property, provided Mr. Campbell will pay the ceiling price for the rails. After considerable discussion the Commission approved the exchange of properties with Mr. Campbell, and accepted his offer to purchase the rails. The Engineer was thereupon authorized to advertise for bids for construction of the Eighth Avenue-East Broadway connecting roadway as soon as proper clearances have been secured from the War Production Board.

The Assistant Attorney also brought up for consideration a proposed modification of the Commission's agreement with the M & R Properties Company, Eugene, concerning the construction of two private-roadway crossings of the Southern Pacific Railroad. It appears that one of the considerations involved in the acquisition of right of way from this company was the construction of two such crossings, which work was to be paid for by the state, but the company has now stated a willingness to waive one crossing if the Highway Commission will construct the connecting roadway between Eighth Avenue and East Broadway which will serve its purposes. The Commission approved such modification by unanimous vote, in view of the fact that it previously authorized the Engineer to proceed with the construction of the connecting road.

The Attorney presented to the Commission for approval and execution deeds whereby the Commission conveys unto the Southern Pacific Company certain property that was purchased as right of way for the new location of the Southern Pacific Company's tracks between Eugene and Springfield. He explained that this transaction is in conformity with the agreement entered into between the former Highway Commission and the Southern Pacific Company, relative to the improvement of the Pacific Highway between such points, and that he has in his possession deeds whereby the Southern Pacific Company conveys unto the state the area contained in the old railroad right of way along which the new highway is being built. The Commission approved the transaction, and thereupon signed the deeds.

Consideration was given by the Commission to the question whether or not to authorize the Right of Way Department to complete unfinished right-of-way settlements along the Wolf Creek Highway between Portland and Banks and along South Sixth Street, Klamath Falls, where a widening project is

contemplated. The Attorney advised that negotiations were discontinued on both of these projects some time ago by orders of the Commission because of wartime conditions, and that the Commission at that time asked that the matter be brought up for reconsideration this spring. He explained the status of both projects in detail and requested instructions. The members of the Commission expressed a desire to inspect both projects personally before making a decision. Accordingly action on the matter was deferred until the next meeting of the Commission. The matter was reconsidered later in the session, at which time the Attorney was authorized to proceed with the negotiations for right of way along South Sixth Street, in Klamath Falls, and it was arranged that the Commission would inspect the Wolf Creek Highway Project personally just prior to the next regular meeting of the Commission. The Commission's instructions to the Attorney relative to South Sixth Street right of way included not only the purchase of properties involved, but payment of expense of moving buildings back off the newly-acquired right of way when the owners of the buildings desire them moved.

A letter was presented from Mr. M. A. Biggs, district attorney, Malheur County, in which the Commission was asked to reconsider the matter of deeding back to Malheur County two acres of land which the county deeded to the state for stock-pile site purposes, same being situate in Section 7, Township 18 South, Range 47 East, W. M. Mr. Biggs alleged that this tract was deeded to the state in 1934 by inadvertence or oversight, and the county now finds itself in an embarrassing position because it had already contracted for the sale of the property in 1931 to one Wm. H. Davis and his partner Ray Anderson, along with the balance of the 40-acre subdivision. It now appears that Mr. Davis has completed his payments to the county under the contract arrangement, and is demanding a deed from the county to the entire 40 acres. The Attorney advised that the tract was acquired from the county in good faith for the sum of $10.00. He gave as his thought, however, that $10.00 is not the actual value of the property. The Engineer advised that the site in question is now being used by the Highway Department, in fact a lot of road-building material has been stock-piled thereon. He suggested that the Commission retain title to the property, and that the county be paid an additional amount to represent the actual value of the property. The Commission approved such solution of the problem by unanimous vote, and referred the matter to the Attorney to handle the details.

The Commission discussed a petition from numerous users of the Canby-Marquam Secondary Highway (Cascade Secondary Highway) requesting appropriate action by the Highway Commission to require loaded logging trucks to stop before entering this highway, at a place known as Hamricks Corner. It was alleged that such trucks now enter this highway from the Woodburn-Sandy Secondary Highway at such rate of speed that loads of logs are frequently lost, endangering other highway traffic. The Engineer advised that investigation reveals a justification for this request. It was his thought, however, that the situation could be corrected by requiring traffic entering the Cascade Highway at this point to slow down to fifteen miles per hour, rather than to come to a complete stop. He recommended such disposition of the matter. After discussion the Commission approved the recommendation by unanimous vote, and adopted the following resolution with regard thereto:

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of Highway: Woodburn-Sandy Secondary

Highway No. 161

Location of Termini	Established Speed
From Mile Point 7.61 to Mile Point 7.91	15 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highway specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

APR 6 1943

A letter was presented from Charles O. Roe, Justice of the Peace, Forest Grove District, in which the Commission was asked to install a set of traffic scales at a convenient point in the western end of Washington County for the purpose of weighing loads of logs which are truck hauled from the Wilson River District through Forest Grove into Portland. Mr. Roe pointed out that there is a large volume of heavy log-hauling traffic in this district and that many of the loads weigh in excess of the statutory limits; also, that the condition is aggravated largely because there are no scales available for the use of weighmasters in that vicinity. It was his thought that the installation of scales would react favorably in the state's interest, and that the benefits received therefrom would fully justify the expense involved. The Engineer confirmed the statements of Mr. Roe, and recommended installation of the scales if they can be obtained, which he doubted in view of federal wartime regulations. After discussion the Commission instructed the Engineer to investigate the possibilities of purchasing two or three sets of scales and report back to the Commission at the next meeting whether or not they are obtainable and what they would cost installed.

The Engineer reported that the reduced load limit which has been in effect for some time past on the I.O.N. and Jordan Valley Secondary Highways, in Malheur County, no longer is needed in view of the improved condition of the road. He suggested that the Commission adopt an order lifting such reduced load limit, and authorize the taking down of the signs. The Commission approved the suggestion, and thereupon adopted the following resolution in regard thereto:

> WHEREAS, on the 17th day of March, 1943, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the
>
> > I.O.N. and JORDAN VALLEY SECONDARY HIGHWAYS from the Oregon-Nevada state line near McDermitt, Nevada, to the town of Jordan Valley, in Malheur County,
>
> and
>
> WHEREAS, subsequent to the passage of said resolution, conditions have changed so that it is no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on the said above-named highways;
>
> NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission, reducing the maximum permissible load limit on the
>
> > I.O.N. and JORDAN VALLEY SECONDARY HIGHWAYS from the Oregon-Nevada state line near McDermitt, Nevada, to the town of Jordan Valley, in Malheur County,

be and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on the said section of said highways hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that certified copies of this resolution be furnished the county clerk of Malheur County, in which county said highways are located, and the Superintendent of the Department of State Police for his information.

The Commission discussed the application of Mr. W. McDaniel, housemover, Klamath Falls, for permission to transport over state highways, from the old Long Bell Lumber Mill site on Klamath River to Klamath Falls, thirty houses ranging in dimensions from 16' x 24' to 24' x 30'. According to the plan outlined in the application, it is Mr. McDaniel's intention to cut in two all houses in excess of 18 feet in width, and to move all of the buildings on wheeled equipment. Mr. McDaniel agrees to furnish flagmen as an additional traffic-safety measure. He anticipates that the moving of any one building will not require more than ten-minutes' time on the state highway. The Commission discussed the matter briefly, but deferred a decision pending investigation by Commissioner Schaupp and the Engineer, whose report is to be rendered at the next meeting of the Commission.

The Commission discussed an offer from the Southern Pacific Company to purchase the steel rails and other track material which is to be released from the company's former main-line tracks at Eugene. The company offers to buy this material F.O.B. cars at Eugene, and to pay ceiling prices for the same, as follows: $28.00 per gross ton for all secondhand rail, one half of the new price for all other secondhand track material; $18.00 per gross ton for scrap; $0.50 per tie for all usable secondhand creosoted ties, including switch ties; $0.35 per tie for all usable secondhand untreated ties. The Engineer advised that the ceiling prices quoted have been checked and are correct. He recommended that the company's offer be accepted rather than go through the formality of receiving bids for the purchase of the material. The Commission approved the recommendation by unanimous vote and so ordered.

The Engineer requested instructions relative to the construction of a detour bridge to carry traffic during the repair of the old Baker Creek Bridge on the Scholls Secondary Highway, in Washington County, about 0.2 mile north of Scholls. He advised that the repair work is being carried on as a maintenance item, for which the sum of approximately $6,500 has been budgeted; further, that all of the material needed for the work has been purchased and is on hand, with the exception of nails. This road, he said, carries a considerable volume of local traffic, and, due to the fact that the existing bridge will have to be closed during the time that the repair work is under way, such traffic will have to be detoured approximately eleven miles by way of the Farmington Bridge if present plans are followed. The people of the district, he said, have protested the closing of the road, because of the large amount of farm traffic which crosses the bridge, which will be amplified during the coming harvest season. To correct such situation, he said, would

necessitate the construction of a detour bridge which would cost about $2500 in addition to the amount budgeted for the repair work. He gave as his thought that the additional expenditure is justified and requested authority to have all of the work, including both repairs to the old structure and the building of the detour bridge, done by contract. The Commission approved the request and authorized the Engineer to advertise the project for bids as soon as plans and specification can be prepared.

The Commission discussed the application of Mr. Mack Hand, Vale, Oregon, to transport loads of loose hay, involving an overall width of 12 feet, over the Central Oregon Highway from Ontario to a point about five miles west of Vale. Mr. Hand requested such privilege for a period of three months, and advised that it is absolutely necessary that he be granted this privilege, in order to feed his sheep. The Commission approved the request.

The Commission also discussed the request of the Hogland Transportation Company, Everett, Washington, to truck-haul forty airplane hangar doors, 15 feet wide, over state highways, from the Oregon-Washington state line near St. Helens to the Tongue Point Naval Base near Astoria. The company advised that it originally planned to enter the State of Oregon via the Astoria ferry, but it developed that the ferry slip on the Washington side of the river is too narrow to accommodate movements of this width, so its only recourse is to enter the state at another location, which will involve the use of state highways in Oregon for a greater distance. The Engineer recommended approval of this request, subject to the following conditions: that the movements are properly flagged to protect other traffic; that the company will furnish public liability and property damage insurance in the amounts of $50,000/$100,000 and $10,000, respectively, indemnifying the State of Oregon and the State Highway Commission in the event an accident should occur; that the company will use the following-described route for such movements: enter the State of Oregon via the Longview-Rainier Bridge; thence via the Lower Columbia River Highway to Portland; thence via the Wolf Creek and Tualatin Valley Highways to Forest Grove; thence via the Nehalem Secondary Highway to a junction with the Wolf Creek Highway near Banks; and thence via the Wolf Creek Highway and the Oregon Coast Highway to Astoria and Tongue Point Naval Base; and will obtain separate permits for the use of city streets from the proper authorities of each city or town through which the movements pass; and will comply with any other requirements that may be deemed necessary in the interest of public safety. After discussion the Commission approved the granting of the permit, subject to the conditions recommended by the Engineer, it appearing to the Commission that an emergency exists which cannot be avoided, and it being the desire of the Commission to aid and assist as much as it possibly can in the national defense effort.

The Commission adjourned at 5:15 p. m. to reconvene on the following morning in the auditorium of the Public Service Building.

Portland, Oregon, April 7, 1943

The State Highway Commission reconvened in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
Huron W. Clough, Commissioner
A. W. Schaupp, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Mr. Merle R. Chessman, whose appointment as State Highway Commissioner becomes effective on April 8, 1943, was present and entered into the discussions.

Bids, as follows, for highway construction projects were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the award of contracts would be made at 2:00 p. m. in the same room:

ALSEA HIGHWAY
ALSEA MOUNTAIN ROCK PRODUCTION

No bids received on this project

CENTRAL OREGON HIGHWAY
DRINKWATER PASS-JUNIPER ROCK PRODUCTION

Oscar E. Joelson	$25,400.00

THE DALLES-CALIFORNIA HIGHWAY
CRESCENT ROCK PRODUCTION

No bids received on this project

SWIFT SECONDARY HIGHWAY
VANPORT JUNCTION SECTION - GRADING AND PAVING

Porter W. Yett	$13,815.00
Edlefsen-Weygandt Co.	20,615.00
Nord & Stuart	21,650.00

SHERMAN HIGHWAY
MORO-WASCO COUNTY LINE ROCK PRODUCTION

E. C. Hall Co.	$48,635.00
Babler Bros.	52,850.00
D. C. & A. L. Williams	57,995.00

APR 7 1943

The Commission had under discussion the matter of increasing the highway department's revolving fund in the amount of $150,000, pursuant to authority granted by the 1943 Legislature. (Chapter 199, Oregon Laws, 1943) It was decided to take advantage of the new law, and accordingly the following resolution relative thereto was adopted by the Commission by unanimous vote, upon motion of Commissioner Clough, which was duly seconded by Commissioner Schaupp:

WHEREAS, by Section 100-126, O. C. L. A., provision is made for the creation of an emergency or revolving fund in the sum of $200,000; and

WHEREAS, pursuant to the provisions of said law said fund has been set up in the full amount of $200,000, and the necessary and statutory bond has been furnished as required by said act; and

WHEREAS, by the enactment of Chapter 199, Oregon Laws, 1943, the said revolving fund act was amended by increasing the same from $200,000 to $350,000; and

WHEREAS, it is the judgment of the Commission on recommendation of the State Highway Engineer that the full amount of $350,000 should be made available as a revolving or emergency fund, so that payrolls, travel expenses, compensation or payments for real property purchased or otherwise acquired and emergency claims may be taken care of promptly and so as to make it possible for the Department to take advantage of trade discounts; and

WHEREAS, based upon matters herein set out, it is the opinion of the Commission that the best interests of the State will be promoted by making available to the State Highway Engineer, under the provisions and requirements of said act and for the purposes therein stated, a revolving or emergency fund in the additional sum of $150,000, thereby making a total revolving or emergency fund of $350,000;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, as follows:

1. That the Secretary of State be and he hereby is respectfully requested to draw a warrant on any funds belonging to the state highway fund in the sum of $150,000, which said warrant is to be drawn in favor of the State Highway Engineer, R. H. Baldock, and the funds represented thereby are to be deposited by said Engineer and kept in a fund known as the revolving or emergency fund, there to be used by the State Highway Commission and the State Highway Engineer for the purposes approved and authorized by said law.

2. That said State Highway Engineer shall immediately, upon receipt of said warrant, deposit the same with the State Treasurer of the State of Oregon and said fund shall be disbursed by the State Highway Engineer in strict accordance with the provisions and

requirements of Section 100-126, O. C. L. A., as amended by Chapter 199, Oregon Laws, 1943.

3. That in addition to the $200,000 bond already provided by the said Engineer there shall be provided an additional bond in the sum of $150,000 in favor of the State of Oregon, conditioned upon the faithful and honest handling and disposition of all funds coming within the jurisdiction or under the control of the State Highway Engineer. The premium for said bond shall be paid out of state highway funds.

4. This resolution shall be attested by the Secretary of the Highway Commission and thereafter entered in the minutes and records of the Commission, and a duly certified copy thereof delivered by the Secretary of this Commission to the Honorable Robert S. Farrell, Jr., Secretary of State.

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is directed to disburse the said revolving or emergency fund totaling $350,000 pursuant to and within the express or implied provisions of said Section 100-126, O. C. L. A., as amended by Chapter 199, Oregon Laws, 1943.

The selection of a company or companies who shall participate in writing the bond that is to be furnished by the State Highway Engineer in connection with the administering of the fund was then discussed. The Commission decided to distribute a $50,000 portion of such bond equally among the ten companies that participated in writing the former $200,000 bond furnished by the Engineer, and to distribute the remaining $100,000 portion equally among five additional companies who are to be determined by lot. Commissioner Schaupp suggested that the names of ten of the eligible companies be placed in a hat and that the $100,000 be distributed equally among the first five names drawn therefrom. The suggestion was approved by Chairman Banfield and Commissioner Clough and the drawing made in conformity therewith. The first five names drawn were: The Home Indemnity Company, The Aetna Casualty and Surety Company, Maryland Casualty Company, United Pacific Insurance Company, and Royal Indemnity Company. The Commission ordered that each of these companies be given a $20,000 share of the bond.

A resolution was presented from the County Court of Douglas County requesting the designation as a state secondary highway of the short county road, one mile in length, which extends westerly from the town of Sutherlin to a connection with the Elkton-Sutherlin Secondary Highway. The Engineer advised that this road has been maintained by the State Highway Department for several years and has been recognized as a part of the state secondary highway system, although it has never been legally designated as such. He recommended approval of the request. The Commission approved the recommendation upon motion of Commissioner Clough which was duly seconded by Commissioner

Schaupp. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Douglas County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Douglas County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

A Section of the Elkton-Sutherlin Secondary State Highway No. 231:

Beginning at the intersection of Central Avenue and Calapooya Street in the City of Sutherlin, Douglas County; thence in a southwesterly direction to an intersection with the Elkton-Sutherlin Secondary Highway No. 231, being a distance of approximately 1.0 mile.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; and amendments thereof.

The Commission discussed briefly the adoption of a resolution declaring and designating certain state highways "through" highways, so as to legalize signs that have been placed requiring traffic to stop before entering the

same. Action on this matter was deferred by the Commission until its next meeting. The Engineer was instructed to furnish each member of the Commission in the meantime a copy of the resolution, together with a map showing the highways to be so designated.

The Engineer presented a request from Mr. J. T. Wadsworth, Woodburn, for permission to remove a tree that is standing on the highway right of way in front of his drugstore in Woodburn. He advised that it has been the established policy of the Commission for a long time to preserve trees on highway rights of way; however, in this particular instance the tree interferes with the operation of the bus station which has recently been established at this point. After discussion the Commission decided to defer action on the matter until the next meeting and in the meantime to inspect the premises, if possible The Commission approved the Engineer's suggestion that Mr. Wadsworth be informed that the Commission has had the matter under consideration, and that he be invited to be present at the Commission's next meeting, if he so desires, for further discussion.

The Attorney brought up for discussion the matter of purchasing fire and war-risk insurance covering the buildings recently acquired from L. J. Simpson at Shore Acres on the Cape Arago Secondary Highway, in Coos County. He recalled that the Commission recently agreed to lease this property to the United States Army, without charge, except that the Army was to pay the cost of insuring the property. He advised that investigation reveals that a $25,000 fire insurance policy may be obtained at a cost of $150 for one year or $300 for three years. He inquired whether or not it is the desire of the Commission to insure the property for the three-year period, and if so, how much of the expense should be charged to the Army, in view of the fact that the Commission's agreement with the Army for the lease of the property is on a one-year basis. He also inquired whether or not he should obtain war-risk insurance on the property, which would cost 10 cents per hundred dollars per year. After discussion the Commission instructed the Attorney to purchase both types of insurance on a three-year basis, and to bill the Army for one third of the cost thereof annually. He was authorized to divide the insurance among two agencies, one of whom is located in Salem and the other in Marshfield.

The Attorney rendered a status report on the proposed utilization of a portion of the park property that the Commission recently acquired from the Blacklock Sandstone Company, in Curry County, as a naval aircraft landing field. He advised receipt of a letter from the Civil Aeronautics Administration stating that the State Highway Commission is not qualified, under federal requirements, to act as sponsor or cosponsor for this project, and renewing its request that the property be deeded to Curry County, so that the county can sponsor it. He explained the history of this case for the benefit of Commissioner Schaupp and Mr. Chessman. The question now before the Commission, he said, is whether or not the Commission is willing to relinquish its title to the property by deeding it to the county. Chairman Banfield pointed out that the Highway Commission's concern is the establishment of a precedent with respect to projects of this kind, in view of the possibilities that this particular project may be only the first of numerous similar projects throughout

the state. The question arose whether or not the state is qualified, under the governmental regulations, to sponsor the project. The Attorney gave as his thought that the state could qualify as cosponsor along with the county, and if the project materialized on such basis the county would then be in position to do certain things which the state could not do, and the state would be able to do certain things that the county could not do. The question of benefits to the state was mentioned and in this connection the State Parks Superintendent advised that there is now no satisfactory road connection between the Oregon Coast Highway and the park property whereas, if the landing field were established in the park, the government would build a connecting road which would save the state approximately $15,000, the estimated cost to construct such road. Mr. L. G. Devaney, Director, State Board of Aeronautics, was present and entered into the discussion. He gave as his understanding that the state cannot be accepted as cosponsor of the project under the federal AP-4 Resolution, pertaining to projects of this kind.

After further discussion Commissioner Schaupp expressed himself as being in favor of the state retaining title to the property. He said, however, that the Highway Commission, in his estimation, should cooperate with the county to the fullest extent in other respects. Commissioner Clough said that he was reluctant to relinquish the state's title to the property, but favored cooperation with the county. Mr. Chessman similarly expressed himself, whereupon Chairman Banfield declared that the Commission would stand on the action taken at the previous meeting. The Attorney was thereupon instructed to follow the matter through in accordance with instructions given him by the Commission at that time.

This matter was discussed further later in the session when Mr. Elmer Bankus, Brookings, appeared before the Commission as representative of the Curry County Court. He declared that this project means a big development in Curry County, and that the county wants to sponsor it alone and is willing to pay the state for a deed to the property that they need. He alleged that the Civil Aeronautics Administration will not approve a cosponsorship of the project by the county and the state. Chairman Banfield advised that it is the desire of the State Highway Commission to cooperate with the county in every way that it can and is willing to act as cosponsor with the county if that can be arranged, which, according to the Commission's Attorney, is possible. The Commission, he said, has decided to proceed on such basis until it is convinced that the state cannot act as cospo sor; however, in the meantime the Commission has authorized the federal authorities to enter the property for the purpose of conducting surveys, et cetera, that may be required. He further advised that in the minds of the Commission the state should retain control of all landing fields that are constructed on state property, and the state should also have control over the roads leading to such properties and the maintenance thereof. It is not a personal matter, he added, but is one in which the entire state is concerned, and until such time as the differences in lines of thought have been ironed out the Highway Commission has decided not to sell the land, but will make every effort to cooperate in other respects. The first thing to be done, he added, is to have a meeting of minds between the state and the county, which it is expected may be accomplished within the next week or so.

The Attorney was thereupon instructed to contact the Curry County Court and others interested within the next few days in an endeavor to reach a satisfactory agreement.

Mr. Bankus inquired whether or not the Commission has reached a conclusion with respect to acquiring additional wayside strips along the Oregon Coast Highway in Sections 14, 23 and 36, Township 39 South, Range 14 West, W. M., Curry County. The Engineer advised that the property has been inspected by the State Parks Superintendent and by Division Engineer K. D. Lytle, each of whom recommends against purchase of the property at this time, because it has little value from the park standpoint, and the proposed revision in the highway alignment at this location in connection with which some of the property might be needed for right of way will not be undertaken for many years. He stated that he concurs in these recommendations. Motion was thereupon made by Commissioner Schaupp that Mr. Bankus's offer be declined. The motion was duly seconded by Commissioner Clough and was declared by Chairman Banfield to have carried by the unanimous vote of the Commission.

Mr. Frank Hilton, attorney, Portland, appeared before the Commission relative to the removal from state highway property of a building that he owns at the north end of the Alsea Bay Bridge at Waldport. Mr. Hilton advised that he has been notified on several occasions to remove the building, but has not done so because he has been unable to secure the services of a housemover. He gave as his thought that the building in its present location is not interfering with the use of the highway in any way, and is not particularly objectionable. He requested authority to let the building remain in such location for the duration of the war and for a period of six months thereafter when, he said, he would have it removed or would let the state have it without charge. After discussion the Commission approved the request under the condition stated by Mr. Hilton, and thereupon ordered that the matter be covered by written agreement.

Mr. R. M. Walker, Independence, came before the Commission in regard to the road difficulties created by the establishment of Camp Adair Army cantonment. He advised that the roads heretofore available to people residing in the Pedee and Airlie communities, and which are now included in the boundaries of Camp Adair, have been closed by Army authorities to general public use, and as a result thereof the people of these communities have no direct outlet to the east. He urged the Commission to give these people some kind of relief, and suggested the improvement of what is known as the McTimmonds Valley Road, which follows the western boundary of the Army cantonment and connects with another county road which leads to Monmouth. The Engineer advised that the Commission is cognizant of the road conditions in this vicinity and is endeavoring to remedy the situation; in fact, surveys are practically complete along the route suggested by Mr. Walker. It appears, however, that the alignment selected encroaches a little too far into the cantonment area to suit the Army officials, and the Public Roads Administration has also offered objections to such location. He also said that the matter is being given further study and that he is arranging for an inspection of the project on the ground for the following week with the Commanding Officer of the cantonment and with engineers of the Public Roads Administration, at which time it is hoped that the differences will be eliminated. This concluded the discussion.

Mr. Homer G. Johnson, contractor, came before the Commission in behalf of his claim for extra compensation, arising out of contract No. 2390, for the construction of the Siletz-Toledo Section of the Siletz Secondary Highway, in Lincoln County. He alleged that he was "lured" by the Engineer into the use of a certain gravel pit from which to obtain materials for this job, but the pit did not produce the quantity of rock required, and as a result thereof it was necessary for him to obtain material from another source, which entailed additional expense and consequent loss to him. The pit that he eventually used, he said, required an extra haul of some six miles over a poor county road. He asked the Commission to reimburse him for such expense at the rate of 10 cents per yard mile.. The Engineer refuted Mr. Johnson's allegations, stating that the specifications, as written, simply named certain available sources of material, but left it up to the contractor himself to select the source which he wished to use. He also said that from a careful study of the facts of the case, he is unable to justify any extra payment to Mr. Johnson, and accordingly recommended that the claim be denied. (For details of contractor's claim and Engineer's recommendation see letters in general files.) After considerable discussion Commissioner Clough recalled that the Commission previously denied this claim. He pointed out that the contracting business is hazardous, and involves a certain amount of risk which, in his estimation, Mr. Johnson should be required to assume in connection with this job, as in connection with any other job. The conference was concluded by Chairman Banfield, who stated that the Commission would discuss the facts further with the Engineer and would make its decision later.

This matter was reconsidered later in the session, at which time the Commission decided to take no action until its next regular meeting. The Attorney was instructed to advise the Commission, in the meantime, as to its legal responsibility with respect to highway specifications, and as to what the Commission's future action should be with regard thereto.

Mr. A. F. Koppisch, logging contractor, Astoria, was present in regard to the purchase of timber situate on a 20-acre tract of state-owned land included in Short Sand Beach State Park. Mr. Koppisch advised that he owns the timber on three sides of this tract, which he is now cutting. The timber on the fourth side, he said, has already been cut, so when his operations are completed, the state's 20-acre tract will be isolated and exposed to heavy windstorms that are prevalent in this district. He gave as his thought that timber so exposed could not survive severe storms, and urged the Commission to sell this timber to him, which would not only add a few dollars to the state highway fund, but would also greatly facilitate his logging operations and would expedite delivery of logs to market, which is important because they are needed badly in connection with the war effort. He estimated that the tract contains about 150,000 board feet of timber, which he said he is willing to purchase at the rate of $3.00 per thousand. He also said that, due to benefits that he would receive in connection with his operations, he would be willing to deed to the state, without cost, some 320 acres of his land, as soon as he has removed the timber therefrom, and he would also let the state have his logging road, which could be used as a park roadway.

Chairman Banfield advised that the Commission is faced with two problems: first, whether or not to dispose of property that has been presented to

the state as a gift; and, secondly, there is the question of the amount of timber that is standing on the property. The Parks Superintendent, who was present, advised that a cruise has never been made of this timber, so he is not in position to state just how much the tract contains. He also advised that he is in receipt of a letter from Mrs. Samuel Reed stating that she has no objections to the state selling the timber if the Commission is so inclined Mr. Koppisch stated that he is ready to start logging operations at once, and would like an early decision, if possible, and so far as accounting for the timber is concerned he would be glad to place a special brand on each log that is taken from the property, so that the quantity could be readily checked. He offered to pay for the timber on the basis of any scale that the Commission wants. Chairman Banfield concluded the discussion by informing Mr. Koppisch that the Commissioner would discuss the matter among themselves, and would give him an answer later in the day.

The matter was reconsidered by the Commission after Mr. Koppisch's departure. Commissioner Schaupp gave as his thought that Mr. Koppisch has made a good offer, and that it should be given serious consideration. Commissioner Clough concurred. He said that it might be well, if the Commission decides to sell the timber, to look into Mrs. Reed's financial condition, with a view of giving her the benefit of the sale, if it is found that she is not very well provided for. Mr. Chessman stated that in his estimation the timber would not stand up under the winter storms that are prevalent in this district, after the surrounding timber has been removed, and if it should fall it very likely would be of no value. It was his thought that the timber should be sold if that is agreeable with Mrs. Reed. Chairman Banfield stated that it appears to be the concensus of opinion of the Commissioners that the timber should be sold, in which opinion he concurs. It was thereupon decided unanimously to sell the timber. The question how much to ask for it was then discussed. Several suggestions were made, none of which were definitely approved at this time. The Engineer was instructed to contact Mr. Koppisch and ascertain his feelings in the matter.

Mr. Koppisch reappeared before the Commission shortly before adjournment, at which time he made the following offer: to pay the Commission at the rate of $2.00 per thousand for 30,900 FBM hemlock; $4.00 per thousand for 158,400 FBM spruce; and $4.00 per thousand for 18,000 FBM fir, making a total of $767.40. (See details of cruise as made in this offer in general office files.) Mr. Koppisch also renewed his offer to deed to the state 320 acres of land that he owns, as soon as he has removed the timber. After discussion the Commission accepted the offer by unanimous vote, subject to the condition that Mr. Koppisch will place his deed in escrow for delivery to the Commission at the time stated. Mr. Koppisch thereupon tendered the Commission his check for $767.40 to pay for the timber.

Mr. H. R. Williams, Traffic Manager of the Arrow Transportation Company and member of the Petroleum Advisory Committee of the Office of Defense Transportation, appeared before the Commission and requested permission to operate over state highways, in connection with delivery of petroleum products, equipment having an overall length of 60 feet. He advised that, under present wartime regulations, the petroleum transportation problem in Oregon is very

critical and there is every indication that this situation will not improve; in fact, the demand that the military authorities have placed on the industry has far exceeded the drop-off in transportation due to rationing, and all of the equipment that is used in such operations is now working on a 24-hour-day, 7-day-week basis. He also said that the situation will become even more critical when the Naval Base at Tillamook and the aircraft landing fields at North Bend and Madras are put in operation; hence the necessity to take advantage of every opportunity of securing maximum utilization of all available petroleum transportation equipment. The plan, he said, is to use equipment consisting of a three-axle truck and a two-axle trailer. The Engineer pointed out that special emergency permits are now being issued by the Commission, authorizing such equipment to be moved over state highways provided no more than one half of the traveled roadway is taken up thereby. He suggested that Mr. Williams file his application in writing, setting forth therein the highways over which he wants this special privilege, and, if any of such highways are not now included in the list of those over which combinations of equipment 60 feet long can be transported with safety, then he would have a test run made to ascertain whether or not it would be possible for equipment of such length to operate over them without creating a hazard to other traffic. The Commission approved the suggestion by unanimous vote. Mr. Williams stated his willingness to cooperate in every way, and agreed to file such written request.

Mr. Williams then asked the Commission to give the distributors of petroleum products a weight tolerance in the transportation of such commodities. Such request is made, he said, because the weight of a load varies according to temperature, and it may leave the distributing point at the proper weight but gain in weight enroute, and as a result an overload may be found when the equipment is weighed at the state's scales. He pointed out that the State of Washington allows a 2 per cent tolerance for such movements, and in case an overload is observed, the equipment is not allowed to proceed until the load has been reduced to come within the prescribed weight limit. He suggested either the adoption of such a tolerance in Oregon or a system of governing the size of loads by gallonage rather than by weight. The Commission denied the request for determination of the gross load by volume, and indicated that it would not approve the adoption of a weight tolerance in connection with such movements.

The Commission recessed at 12:00 noon and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

The Attorney presented a request from Mr. H. A. Dryer to rent certain state-owned lands adjacent to the relocated Columbia River Highway, immediately east of Rooster Rock, in Multnomah County, for grazing purposes. Action on the matter was deferred by the Commission pending receipt of more detailed information with respect to the property and the amount to be charged for such privilege.

At 2:00 p. m. Chairman Banfield announced the following awards of contracts, bids for which were taken at the morning session, such awards having previously been approved by the Commission by unanimous vote:

"Alsea Mountain Rock Production Project on the Alsea Highway, in Benton County. No bids were received for this project.

"Drinkwater Pass-Juntura Rock Production Project on the Central Oregon Highway, in Harney and Malheur Counties. The only bid for this project was submitted by Oscar E. Joelson, Eugene, in the amount of $25,400.00. The Commission awards this contract to Oscar E. Joelson at his bid of $25,400.00.

"Crescent Rock Production Project on The Dalles-California Highway, in Klamath County. There were no bids received for this project.

"Vanport Junction Section of the Swift Secondary Highway, in Multnomah County. 0.25 mile grading and paving. Porter W. Yett, Portland, submitted the low bid for this project, in the amount of $18,815.00. Edlefsen-Weygandt Co., Portland, submitted the second-low bid, in the amount of $20,615.00. Hord & Stuart, Portland, submitted the only other bid for this project, in the amount of $21,650.00. The Commission refers this bid to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Moro-Wasco County Line Rock Production Project on the Sherman Highway, in Sherman County. E. C. Hall Co., Eugene, submitted the low bid for this project, in the amount of $43,635.00. Babler Bros., Portland, submitted the second-low bid, in the amount of $52,850.00. D. C. & A. L. Williams, Portland, submitted the only other bid, in the amount of $57,955.00. The Commission awards this contract to E. C. Hall Co. at its low bid of $48,635.00.

General Charles A. Martin, former Governor of Oregon, in company with Mrs. E. A. Rockey and Mrs. D. C. Burke, representing the Oregon Roadside Council, came before the Commission regarding the preservation of certain timber tracts situate adjacent to the Oregon Coast Highway at Lake Tahkenitch, in Douglas County. General Martin headed the group. He explained briefly what the Association has in mind with respect to this property, and asked the Commission to give it consideration. He also said that the original intention was to make a strong plea for the preservation of this timber, but since coming to the meeting place and discussing the matter with the State Parks Superintendent, they have somewhat changed their attitude, and have decided to defer their plea until some future time. Chairman Banfield thanked the delegation for its appearance and its interest in such matters, and advised that the Commission will be pleased to consider their project at the proper time.

Following the departure of this group, the State Parks Superintendent advised that he is now working on a proposition for the exchange of land with the United States Forest Service, which owns the abutting property. If such plan materializes, he said, it will not only result in the preservation of this timber, but will also save the state considerable expense. He was

instructed by the Commission to continue his efforts in this regard, and if they are not successful then the Commission will give consideration to the purchase of the property.

The Engineer brought up for discussion the Cottage Grove controversy, having to do with the barricading of certain city streets at their intersection with the new state highway at this place. He recited the history of the case briefly for the benefit of the new Commissioners, pointing out that, in conformity with approved plans, traffic is not being allowed to enter certain streets; viz., Washington Street, Eighth Street, Jefferson Street and Seventh Street, and that barricades have been erected at these points to prevent access to the highway. The original plans for the project, he said, which provided for the closing of these streets, were approved by the city officials; however, since construction of the highway was completed, certain local residents offered objections to such closure, and when the Highway Commission refused to accede to their demands, took the matter to court with favorable results. The case was appealed to the Supreme Court, he added, whose decision was against the state. He pointed out that if the barricades are removed, and traffic is allowed to enter the highway at these points, a very dangerous condition will be created, and serious accidents very likely will occur, for which the Highway Commission may be held liable. In order to relieve the Commission from such liability, he said, the Attorney has suggested that the lower court be requested to say that the streets cannot be closed. He advised that he approves the suggestion, and thereupon requested authority to remove the barricades and to install "no left turn" signs at these locations, if andwhen the court's order has been received. After discussion, the Commission approved the securing of such court order. The Commission also authorized the Engineer to remove the barricades and to install the signs when the court order has been obtained; however, he was instructed not to remove the raised center stripe which was constructed in the pavement at these locations, inasmuch as it will assist in the control of traffic and the prevention of left turns on this important highway.

Consideration was given by the Commission to a request from the United States Army, presented by Lt. Col. B. R. DeGraff, Camp Adair, for permission to bivouac Army personnel in state-owned property located along the Salmon River Highway, particularly in Van Duzer Corridor. The Engineer advised that, according to information available to him, not more than 4,000 men will be bivouaced on the premises at any one time, and that these men will occupy the premises for three-day periods during the month of June, 1943. He advised that he has no objections to the use of the property for this purpose provided the area occupied, so far as is practicable, shall be confined to the outer fringe of the Corridor, and provided the Army will maintain sufficient patrols to extinguish or control fires which may be started on the property from any cause, and provided further that no trees or shrubs shall be cut or damaged. The State Parks Superintendent, under whose supervision the area is maintained, approved such occupancy subject to the conditions outlined by the Engineer. After discussion the Commission, by unanimous vote, authorized the granting of the permit to the Army for such use of the state's property, subject to the conditions suggested by the Engineer.

The Attorney brought up for discussion a right-of-way matter involving the acquisition of land for the Aurora flight strip. It appears that a Mr. W. P. Wurster owns some of the land that the state needs, and that it will be necessary to acquire the same by condemnation, the proceedings in connection with which are being handled by government attorneys. It also appears that the owner is now willing to deed the land without cost, but he wants the federal government and the state to guarantee him against future damage to his property, having particularly in mind that, when the flight strip is in operation, airplanes taking off and landing thereon will frighten his livestock, and may result in losses to him. He inquired whether or not the Commission wants to give such guarantee. The Commission, by unanimous vote, refused to assume any such responsibility.

Commissioner Schaupp brought up for discussion the matter of completing the construction work on the Klamath Falls-Lakeview Highway. He advised that the uncompleted portion over Quartz Mountain, which is under contract as a forest highway project, is in very bad condition, and traffic has a hard time going through; in fact in numerous instances cars have had to be pulled through with tractors. He gave as his understanding that the Public Roads Administration has authorized the termination of its contract with Sam Orino, in view of wartime conditions which have handicapped the contractor in securing labor and equipment, so if the road is left in its present condition, it quite likely will have to be closed to traffic, at least part of the time. In the discussion of this matter the Engineer suggested that it would be advisable to direct a letter to Mr. W. H. Lynch, District Engineer, Public Roads Administration, inquiring just what plans the government has for the completion of this project. The Commission approved the suggestion and so ordered.

The Engineer reported orders received from the War Production Board for the cancellation of that portion of the Judkins Point Overcrossing contract at Eugene, which provides for pavement. He said that this contract is well along, and that considerable money has already been invested therein; in fact the grading of the approaches to the structure have been completed, but the structure itself cannot be used unless the oiling work is done. He also said that the detour which will have to be used in the event that the War Production Board cannot be induced to change its attitude is very bad, with crooked alignment, and involves the crossing of the Southern Pacific mainline tracks at grade. It was his thought that the Commission should file a protest with the members of the Oregon delegation in Congress, and that the people of Eugene should do likewise; also, that because of the seriousness of the situation, everything possible should be done in order to secure the completion of the project in accordance with the plans. The Commission concurred in the viewpoint of the Engineer, and thereupon instructed him to prepare letters to the Congressmen for the members of the Commission to sign. He was also instructed to ask the Eugene City Council to send similar letters. Mr. T. M. Davis, Senior Highway Engineer of the Public Roads Administration, who was present, advised that District Engineer W. H. Lynch has already taken the matter up with the Washington headquarters and that they are hopeful of favorable results.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission, and asked the Commission to confirm them

and the amounts allocated for each. After due consideration the Commission, by unanimous vote, authorized and instructed the Engineer to make such surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Location	11-1410	Gilliam	John Day River-Quinton Sec., Columbia River Highway	5th - $6,022.50 Total to date $8,550.00
Gravel Bar	15-1444	Jackson	Trail-Prospect Section, Crater Lake Highway	1st - $ 100.00
R/W	22-1444	Linn	Foster-Cascadia Section, Santiam Highway	2nd - $2,400.00 Total to date $6,000.00
Location	18-1441	Klamath	Barclay Springs-Terminal City Section, The Dalles-California Highway	5th - $ 900.00 Total to date $9,450.00
Plans	18-1443	Klamath	Klamath Falls-Merrill Jct. Section, The Dalles-Calif. Highway	4th - $1,000.00 Total to date $8,000.00
Plans	13-1421	Harney	Buchanan-Juntura Section, Central Oregon Highway	1st - $350.00

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

Averill & Corbin, contract No. 2585, for construction of a bridge over the Luckiamute River on the Pacific Highway West, in Polk County, requested an extension of time from November 30, 1942, to March 10, 1943, within which to complete this job. They gave no reason for failure to complete the project within the specified time limit. The Engineer advised that this is one of the projects for which the War Production Board would not authorize the use of structural grade lumber, so it was necessary to change the specifications to allow the use of No. 1 common grade. Such change, he said, delayed the delivery of materials, and was largely the reason that the contractors failed to complete the project within the specified time limit. All of the work in connection with this job, he said, was completed by January 7, 1943, except the handrail painting which could not be done until suitable weather obtained. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Averill & Corbin, contract No. 2589, for construction of the Helmick Undercrossing on the Monmouth-Suver Section of the Pacific Highway West, in Polk County, requested an extension of time from September 30, 1942, to May 31, 1943, within which to complete this job. They gave no reason for failure to complete the project within the specified time limit. The Engineer advised that the contractors experienced considerable delay in securing treated fir lumber that was used on the job. The contractors conducted their work diligently as soon as material was received and completed all of the work with the exception of a small amount of concrete surface finishing, by January 9, 1943. The surface finishing work, he added, cannot be done until the grading contractor on the adjacent section has completed his work. He recommended, in view of the circumstances, that the extension of time requested be granted without panalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contract No. 2585 has been completed according to the requirements of the contract or modifications thereof and that said contract is now ready for acceptance. The following resolution accepting the above project was offered, and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contract for the construction of a state highway project has been completed according to the terms and provisions of the contract, and that said job is now ready for acceptance:

Contract No. 2585, with Averill & Corbin, for construction of the Luckiamute River Bridge on the Monmouth-Lewisburg Section of the Pacific Highway West, in Polk County. Completed March 10, 1943.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contract for the construction of said state highway project be declared completed according to the terms of the contract, and said job is hereby accepted and final payment in connection therewith is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the City of Tillamook covering installation and maintenance of a traffic beacon at the intersection of the Oregon Coast and Wilson River Highways, in Tillamook.

Agreements with the following cities and towns covering improvements on city streets that are not on the state highway

system: Clatskanie, North Powder, Fossil, Waldport, Halfway, Arlington, Hines, Freewater, Hubbard, Enterprise, and Mt. Angel.

Agreement with Arthur Walker covering the grazing of sheep in Cape Sebastian State Park.

Contract agreement with E. W. Elliott covering rental of a state-owned Buffalo-Springfield 6-ton tandem roller, Dept. No.40-677.

Contract agreement with Natt McDougall Company covering rental of a state-onwed Caterpillar tractor D-8, Dept. No. 40-810.

Agreement with the United States War Department providing for the encroachment of a war department troop shelter on the right of way of the Oregon Coast Highway near Waldport.

Bargain and sale deed conveying unto the City of Portland property in South Portland needed for the purpose of laying out and establishing Southwest Miles Court. Right-of-way file 9392-A.

Bargain and sale deed conveying unto the Huntington Rubber Mills two parcels of land in South Portland. Consideration $2,750. Right-of-way file 9392.

Quitclaim deed conveying unto the Southern Pacific Company certain properties described in agreement dated December 13, 1941, between the company and the state, having to do with the reconstruction of the Pacific Highway south of Eugene.

Bargain and sale deed conveying unto the Southern Pacific Company certain properties in Eugene described in agreement dated December 13, 1941.

Lease of stock-pile site from Weyerhaeuser Timber Co., in Sec. 3, T. 40 S., R. 6 E., W. M., Klamath County. Right-of-way file 4503.

The question when to hold its next regular meeting had the attention of the Commission and it was decided to hold such meeting on the afternoon of Tuesday, May 11, and on Wednesday, May 12, 1943. The Secretary was instructed to make the usual arrangements to hold the Tuesday afternoon meeting in the Imperial Hotel and the Wednesday meeting in the auditorium of the Public Service Building.

There being no further business to come before the Commission at this time, the meeting was adjourned at 3:30 p. m.

State Highway Engineer

Chairman

Secretary

Commissioner

Commissioner

APR 7 1943

Bend, Oregon, April 27, 1943

The State Highway Commission met in special session at 1:00 p. m. in the Pine Tree Inn, for discussion with local citizens of matters pertaining to the adoption of a postwar program consisting of state highway, county road and city street projects. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Merle R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Local citizens present were:-Members of the Deschutes County Court, C. L. Allen, County Judge, and E. E. Varco and O. W. Grubb, County Commissioners; Robert W. Sawyer, Bend Bulletin; and Don Peoples, Secretary, Bend Chamber of Commerce.

Chairman Banfield explained the purpose of the Commission's visit and at his request the Engineer explained the proposed Congressional legislation which has for its purpose the providing of federal funds to finance postwar projects. Judge Allen requested there be included in the program general improvements to The Dalles-California Highway, particularly between Terrebonne and Madras and between Lava Butte and Crescent, and improvements to the Central Oregon Highway and to the North Santiam and South Santiam Highways. He also asked for the immediate oiling of the Tumalo-Deschutes Secondary Highway, from Tumalo northerly about 2½ miles, to a connection with the Redmond-Bend Secondary Highway, and the oiling of a 3½-mile section of the Tumalo-Cline Falls Secondary Highway north from Tumalo. He mentioned the agreement between the State Highway Commission and Deschutes County, dated May 19, 1942, covering the construction of the Terrebonne-Lower Bridge County Road, and recalled that the state's obligation in connection therewith has not been entirely satisfied, there being a balance of state funds still obligated in connection therewith, in view of the surfacing work having been performed by the county. He asked the Commission to spend this sum for the oiling of some county road project this year. The Engineer confirmed Judge Allen's statement with respect to the state's obligation. He also advised that the former Highway Commission authorized the oiling of the two secondary highway projects mentioned by Judge Allen, but were precluded from the performance of such work because of wartime conditions. He recommended approval of these projects as soon as conditions are such that they can be undertaken. There followed a general discussion of highway matters, during which the local citizens expressed a desire for additional oiling work.

Chairman Banfield concluded the meeting by stating that the Commission is pleased to secure the information that has been given, and will consider the projects mentioned in the formulation of its construction program, although no commitments or promises can be made at this time, due to wartime restrictions and the uncertainty of funds.

APR 27 1943

The meeting was adjourned at 1:30 p. m., following which the Commission motored to Burns and disposed of the following routine matters enroute, all Commissioners, the Engineer, the Attorney and the Secretary being present.

The Engineer reported the amounts collected from contractors for the rental of state-owned equipment during the past nine months. He advised that the total amount collected was $58,015, exclusive of rentals due for the month of April, totaling $1,596. He also stated that there are no delinquent accounts. The Commission approved the report.

The Engineer also reported on the cost to purchase and install standard 30-ton truck scales. The purchase price of such a set of scales, he said, is $520, and the cost to install them ranges from about $1,500 to $3,000, depending on the amount of grading and paving that is required in the construction of roadway approaches and whether or not extra right of way has to be purchased. He recommended purchase of four sets of scales for immediate installation in localities where logging operations are under way. After considerable discussion the Commission, by unanimous vote, approved the purchase of four sets of scales, on motion of Commissioner Schaupp, which was duly seconded by Commissioner Chessman.

A letter was presented from Mr. F. H. Brundage, Western Log and Lumber Administrator of the War Production Board, regarding the stumpage value of timber that the Commission recently sold to Messrs. Donelson and Koppisch, in Short Sand Beach State Park. Mr. Brundage advised that the state would be fortunate to receive $3.00 per M-FBM for this timber. The Engineer recalled that the Commission obtained $4.00 per thousand for spruce and fir, and $2.00 per thousand for hemlock, which indicates that the Commission made a good deal, in view of the fact that the stand consisted mostly of spruce and fir. The Commission confirmed the settlement, and ordered the letter filed.

Reconsideration was given by the Commission to the matter of designating main-traveled or "through" highways, and to the adoption of a resolution embracing all of such highways heretofore designated as such, and others that have not been so designated but are considered to be important from that standpoint. The Engineer recommended approval of such designations from a traffic-safety standpoint, and to clarify the records. The Attorney advised that the adoption of a general resolution embracing all highways on the state highway system would be helpful in connection with litigation that arises from time to time. After discussion the Commission approved the recommendation and, by unanimous vote, on motion of Commissioner Chessman duly seconded by Commissioner Schaupp, adopted the following resolution with regard thereto:

> WHEREAS, by the provisions of Section 115-351, O.C.L.A., the State Highway Commission with respect to state highways is authorized to designate main traveled or through highways or sections thereof by placing at the entrance thereto, from intersecting highways, signs or markers notifying drivers of vehicles to stop before entering or crossing such designated highways, and
>
> WHEREAS, the Commission has heretofore by resolutions duly adopted and entered in the minutes and records of the Commission

designated as main traveled or through highways certain state highways and sections thereof enumerated in said resolution, and

WHEREAS, it is deemed at this time to be in the public's interest to include in one resolution all of the state highways which are to be designated as main or through highways or sections thereof and that all of said former resolutions be rescinded, and

WHEREAS, the highways herein enumerated are all state highways and therefore are parts of the Oregon state highway system, and

WHEREAS, all of the highways herein enumerated and each of them now carry large volumes of traffic, both local and through traffic, and many of the said highways are now carrying both military and civilian transport, and

WHEREAS, it is the judgment of the Highway Commission that all of the highways herein enumerated should be designated as main traveled and through highways and appropriate markers and stop signs should be erected and maintained at all places where intersecting roads or streets enter or cross the same.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the highways and sections of highways enumerated and defined in this paragraph hereby are designated and defined under the provisions of Section 115-351, O.C.L.A., as main traveled and through highways, to-wit:

PRIMARY
THROUGH STOP HIGHWAYS

HIGHWAY	HWY.NO.		FROM	TO
Pacific	1 & 1E		Washington State Line	California State Line
		Exceptions:	No stop shall be required for Pacific Highway West traffic at its junction with the Pacific Highway at Junction City.	
			South bound traffic on the Pacific Highway shall stop before entering the intersection of Main Street in Cottage Grove.	
Pacific West	1W		North Portland	Junction City

HIGHWAY	HWY. NO.		FROM	TO
Columbia River	2		Astoria	Washington State Line
		Exceptions:	No stop shall be required for Boardman-Stanfield Highway traffic at its junction with the Columbia River Highway.	
			East bound traffic on the Columbia River Highway shall stop before entering its intersection with Commercial Street in Astoria.	
Oswego	3		Portland	Oregon City
The Dalles-California	4		Its intersection with the Columbia River Highway	California State Line
		Exceptions:	No stop shall be required for Wapinitia Highway traffic at its junction with The Dalles-California Highway	
John Day	5		Arlington	Vale
		Exceptions:	No stop shall be required for Ochoco Highway traffic at its junction with the John Day Highway.	
Old Oregon Trail	6		Umatilla	Idaho State Line
		Exception:	East bound traffic on the Old Oregon Trail shall stop before entering its intersection with the Boardman-Stanfield Highway.	
Central Oregon	7		Vale	Cairo Junction
Oregon-Washington	8		Pendleton	Washington State Line
Oregon Coast	9		Astoria	California State Line
		Exceptions:	No stop shall be required for Wolf Creek Highway traffic at its junction with the Oregon Coast Highway.	
			North bound traffic on the Oregon Coast Highway shall stop before entering its intersection with the Wolf Creek Highway.	
Wallowa Lake	10		La Grande	Joseph

APR 27 1943

HIGHWAY	HWY. NO.		FROM	TO
McKenzie	15		Springfield Junction	Redmond
		Exceptions:	No stop shall be required for Santiam Highway traffic at its junction with the McKenzie Highway west of Sisters.	
			No stop shall be required for McKenzie-Bend Highway traffic at its junction with the McKenzie Highway east of Sisters.	
Santiam	16		Albany	Sisters
		Exception:	No stop shall be required for North Santiam Highway traffic at its junction with the Santiam Highway	
McKenzie-Bend	17		Its junction with the McKenzie Highway near Sisters.	Its junction with The Dalles-California Highway.
Willamette	18		Goshen	Its junction with The Dalles-California Highway.
Klamath Falls-Lakeview	20		Klamath Falls	Lakeview
		Exception:	No stop shall be required for Klamath Falls-Malin Highway traffic at its junction with the Klamath Falls-Lakeview Highway.	
Green Springs	21		Ashland	Its junction with The Dalles-California Highway
Crater Lake	22		Medford	Its junction with The Dalles-California Highway
		Exception:	Except that section within the boundaries of the Crater Lake National Park.	
Redwood	25		Grants Pass	California State Line
Mt. Hood	26		Portland	Hood River
		Exception:	No stop shall be required for Wapinitia Highway traffic at its junction with the Mt. Hood Highway.	

APR 27 1943

HIGHWAY	HWY. NO.		FROM	TO
Pendleton-John Day	28		Pendleton	Nye Junction
Tualatin Valley	29		Wolf Creek Highway via Beaverton and Forest Grove	Pacific Highway West
Salem-Dallas	30		Dallas	Salem
		Exceptions:	No stop shall be required for Pacific Highway West traffic at its junction with Salem-Dallas Highway.	
			Salem-Dallas Highway traffic shall stop before entering its intersection with the Pacific Highway West.	
Albany-Corvallis	31		Albany	Corvallis
		Exception:	East bound Albany-Corvallis Highway traffic shall be required to stop before entering Second Street in Corvallis.	
Three Rivers	32		Hebo	Valley Junction
Corvallis-Newport	33		Newport	Corvallis
		Exception:	No stop shall be required for Alsea Highway traffic at its junction with the Corvallis-Newport Highway.	
Siuslaw	34		Florence	Its intersection with the Pacific Highway
Coos Bay-Roseburg	35		Coquille	Its intersection with the Pacific Highway
Pendleton-Cold Springs	36		Cold Springs	Pendleton
Wilson River	37		Tillamook	Balm Grove
Oregon Caves	38		Caves Junction	Oregon Caves
Salmon River	39		Otis	Its intersection with the Pacific Highway West.

APR 27 1943

HIGHWAY	HWY. NO.		FROM	TO
Beaverton-Hillsdale	40		Its junction with the Pacific Highway West	Its junction with the Tualatin Valley Highway
		Exceptions:	No stop shall be required for east bound traffic on S. W. Capitol Highway at its junction with the Beaverton-Hillsdale Highway in Hillsdale	
			East bound Beaverton-Hillsdale Highway traffic shall be required to stop before entering S.W. Capitol Highway at Hillsdale.	
Ochoco	41		Redmond	Its junction with the John Day Highway.
Sherman	42		Its junction with the Columbia River Highway	Its junction with The Dalles-California Highway
Monmouth-Independence	43		Monmouth	Independence
Wapinitia	44		Its junction with the Mt. Hood Highway	Its junction with The Dalles-California Highway
Umpqua	45		Reedsport	Drain
Necanicum	46		Its junction with the Wolf Creek Highway near Necanicum	Its junction with the Oregon Coast Highway near Wheeler
Wolf Creek	47		Its junction with the Oregon Coast Highway	Manning
			Its junction with the Tualatin Valley Highway	Its junction with the Pacific Highway West
John Day-Burns	48		Through the townsite of Seneca	M.P.24.10--24.60
Klamath Falls-Malin	50		Its junction with the Klamath Falls-Lakeview Highway	California State Line
		Exception:	No stop shall be required for Hatfield Highway traffic at its junction with the Klamath Falls-Malin Highway.	

APR 27 1943

HIGHWAY	HWY. NO.	FROM	TO
Heppner	52	Its junction with the Columbia River Highway near Willows	Nye Junction
Boardman-Stanfield	54	Boardman	Its junction with Old Oregon Trail Highway.

SECONDARY
THROUGH STOP HIGHWAYS

HIGHWAY	HWY. NO.	FROM	TO
Nehalem	102	Astoria	Forest Grove
	Exception:	South bound traffic on the Nehalem Highway shall stop before entering its intersection with the Wolf Creek Highway.	
Swift	120	Its junction with the Pacific Highway	Its junction with Columbia Boulevard
Northeast Portland	123	Its junction with the Pacific Highway	Its junction with the Columbia River Highway
	Exceptions:	No stop shall be required for east bound traffic on Columbia Boulevard at its junction with Northeast Portland Secondary Highway.	
		East bound traffic on Northeast Portland Secondary Highway shall stop before entering its intersection with Columbia Boulevard.	
Hillsboro-Silverton	140	Woodburn	Silverton
Beaverton-Aurora	141	Beaverton	Tigard
	Exceptions:	All traffic shall stop before entering the intersection of the Scholls Highway with the Beaverton-Aurora Highway at Progress.	
		South bound traffic on the Beaverton-Aurora Highway shall stop before entering its intersection with First Street in Tualatin.	
		South of Tigard the Beaveron-Aurora Highway shall be a through-stop highway at its intersection with the following county roads:	
		Boones Ferry Road at Mile Point 8.57; Stafford Road at Mile Point 9.75; and Oswego Road at Mile Point 15.10	

APR 27 1943

HIGHWAY	HWY. NO	FROM	TO
Farmington	142	Its junction with the Hillsboro-Silverton Highway	Beaverton
Scholls	143	Shall be a through-stop highway at the following side road intersections: Side road Mile Point 0.29 Hazeldale Road at Mile Point 2.35 All traffic shall stop before entering the intersection of the Beaverton-Aurora Highway with the Scholls Highway at Progress	
Salem-Dayton	150	Dayton	West Salem
Cascade	160	Its junction with Northeast Portland Secondary Highway	Silverton
Woodburn-Sandy	161	At its intersection with the Canby-Marquam Highway at Mile Point 7.72	
		Exceptions: Woodburn-Sandy Highway traffic shall stop before entering its intersection with the Barlow-Monitor Road, Mile Point 5.26. Woodburn-Sandy Highway traffic shall stop before entering its intersection with the Cascade Highway at Mile Point 11.45. Woodburn-Sandy Highway traffic shall stop before entering its intersection with Molalla Avenue in Molalla.	
Silver Creek Falls	163	Salem	Its junction with the North Santiam Highway
Canby-Marquam	170	Canby	Its junction with the Woodburn-Sandy Highway

2. That there is attached hereto and by this reference made a part hereof a map, marked "Exhibit A," on which is shown colored in red all of the highways or sections of highways enumerated in the foregoing paragraph.*

3. That the State Highway Engineer be and he hereby is instructed to place or cause to be placed and thereafter maintain along the above enumerated highways or sections of highways at all points where streets or roads intersect or enter said highways or sections of highways, except at such points as are specifically noted in the foregoing list, signs or markers notifying drivers of vehicles to stop before entering or crossing said highways.

4. That the said Engineer is instructed further to place such signs or markers as nearly as practicable at the place or places where said cross or intersecting roads or streets meet a prolongation of the nearest property line of such through highways, and such signs or markers so placed or installed shall indicate or designate

*Map filed in "Through Highways" file - No. 4.

to all drivers of motor vehicles entering said highways from any of the said cross or intersecting roads or streets the place where the stop shall be made.

5. The said signs or markers shall conform in shape, design, size and other physical characteristics to the specifications and standards heretofore approved for such signs and markers and now hereby adopted.

6. That the resolutions heretofore adopted by this Commission and recorded in its records and minutes covering any and/or all of the highways hereinabove listed are hereby rescinded and held for naught as of this date.

7. That this resolution shall be entered in the minutes and records of the Commission as of the 27th day of April, 1943, and a duly certified copy thereof delivered to the Public Roads Administration and to the County Court of each County in which any of the highways or sections of highways are located.

The Engineer reported the award of the following contracts, in conformity with authority previously granted him by the Commission, the conditions of the awards having been satisfied:

Construction of the Denver Avenue Junction Section of the Pacific Highway East, in Multnomah County. Bids taken by the Commission on March 17, 1943; contract awarded on April 14, 1943, to Henry L. Horn, the low bidder.

Grading and paving the Vanport Junction Section of the Swift Secondary Highway, in Multnomah County. Bids taken April 7, 1943; contract awarded on April 14, 1943, to Porter W. Yett, the low bidder.

The Commission confirmed the awards by unanimous vote.

The Commission discussed a letter from the Natt McDougall Company, Contractors, Portland, requesting permission to truck-haul loads of cinders, involving overall heights of 12', over state highways in the vicinity of Bend, for use in connection with construction operations that they are conducting in Camp Abbott. The Secretary advised that there are no impaired clearances on any of the routes over which the loads are to be hauled. The Engineer recommended approval of the request, in view of the fact that cinders are very light, and the gross loads will not be in excess of the statutory weight limits. The Commission, by unanimous vote, approved the granting of such permit.

The Engineer requested authority for Assistant State Highway Engineer C. B. McCullough, and Bridge Engineer G. S. Paxson to attend at state

expense a meeting of the Suspension Bridge Committee of the American Association of State Highway Officials, in Seattle, Washington, from May 7 to 12, inclusive, 1943. He estimated the total expense involved would not exceed $80 for both engineers. He also requested authority for Mr. McCullough to accompany this committee to San Francisco and Pasadena, California, for further study of long-span suspension bridges, and inspection of such bridges in the state of California. He estimated that Mr. McCullough's expenses would not exceed $175. The Commission approved both requests by unanimous vote, provided the out-of-state travel expense is approved by Governor Snell.

A letter was presented from the Honorable Leslie M. Scott, State Treasurer, with respect to the continuation of his agreement with the former Highway Commission concerning the payment of the salary and expenses of a man to check the payment of traffic fines. Mr. Scott pointed out that under such arrangement, the office of the State Treasurer and the State Highway Department each pays one half of this man's salary and expenses. It was his thought that the arrangement should be continued, in view of the very satisfactory results that have been obtained and the fact that the State Highway Department benefits by the increased collection of the fines. The Engineer pointed out that fine collections had increased materially during the past few years, on account of the intensified program that has been instituted by the State Treasurer. He recommended continuation of the present working arrangement. The Commission approved the recommendation by unanimous vote; however, instructed the Engineer to submit to the Commission quarterly a statement showing the amounts collected by the State Treasurer under the arrangement.

The Commission had under discussion a request from Colonel W. F. Firth, Sector Engineer, Headquarters Northwestern Sector, Western Defense Command, Ft. Lewis, Washington, for a temporary permit of entry to Cape Arago State Park, Coos County, in order to construct a rifle range. The Engineer recommended approval of this request pending execution of a formal agreement covering occupancy of the park, under condition that army vehicles that enter the park will stay on the service roads that are constructed for park usage, that trucks conveying soldiers to the rifle range will park at the entrance gate, and that every precaution is taken to prevent fires through the use of tracer bullets. The Commission, by unanimous vote, approved the granting of such temporary permit under the conditions outlined by the Engineer.

The Commission also discussed a letter from F. W. Furst, Forest Supervisor of the Siuslaw National Forest, suggesting an exchange of properties at the Waldport Ranger Station, so as to facilitate Forest Service activities at such location. The Engineer explained that the Waldport Ranger Station is situate on the east side of the old Spruce Production railroad right of way at this point, which right of way is now owned by the state and is under the control of the State Highway Commission, and that in order to facilitate its activities, the Forest Service wishes to obtain possession of a short section of this right of way, about 400' in length; also, that the Forest Service officials have indicated a willingness to deed to the state a small area between this old right of way and the right of way of the Oregon Coast Highway, if the Commission will convey the old railroad right of way to

the Forest Service. During the discussion of the matter, the question arose as to the value of the two parcels of land that are involved in this proposed transaction. In view of this question, the Commission deferred its decision pending further report from the Attorney with respect thereto.

The meeting was declared adjourned at 5:00 p. m., upon arrival in the town of Burns where at 7:45 p. m. the Commission conferred with local citizens in the dining room of the Arrowhead Hotel, all members of the Commission, the Engineer, the Attorney and the Secretary being present.

The local group consisted of County Judge Nelson B. Higgs, of Harney County; Archie McGowan; Morgan Timms; Nic Monte, Regional Grazier, United States Grazing Service; E. Pluribus Tiller, Grocer; E. B. Bennett; Vern Gray, Manager of the Power Company; Thomas Wentz; William M. Carroll; Julian Byrd, Publisher, Burns Times-Herald; William F. Oltman, Mayor; and Rudy Reinertson. Judge Higgs presided.

Chairman Banfield explained the purpose of the Commission's visit, and, following remarks by Commissioners Schaupp and Chessman, called upon the Engineer to explain the demand of the Federal Government for the improvement of the I.O.N. Highway, and details with respect to the bill that is now before Congress, which has for its purpose the providing of federal funds with which to finance postwar highway projects. A detailed explanation of both subjects was made by the Engineer, who also advised that the Commission is now considering a program to take up the funds which the Commission hopes will be allocated to Oregon under this proposed legislation. Chairman Banfield then asked the local group to express their desires with respect thereto.

Judge Higgs made an urgent plea for improvements to state secondary highways, particularly the highway leading to the town of Diamond and that which extends from Princeton to a connection with the I.O.N. Highway, via Follyfarm. He stressed the need for the improvement of the Diamond Secondary Highway because of its importance from the standpoint of truck-hauling livestock from the Catlow Valley and the Steens Mountain districts. This road at present, he said, is in bad condition north of Diamond. He suggested the stock-piling of maintenance material along the Princeton-Follyfarm Section of the Princeton-Rome Secondary Highway, for the filling in of mud holes as they occur, and advised that there is a cinder pit near the town of Princeton, which is available for such purpose. Judge Higgs also asked for the improvement of the Burns-Crane Highway which, he said, is in horrible condition. He suggested that the Burns-Crane and Princeton-Follyfarm Sections should be carried on simultaneously, starting at both ends. The Hanley Lane Section of the Frenchglen Secondary Highway, he said, is in fair condition, but needs some improvement. Judge Higgs also asked for the completion of the John Day-Burns Highway north of Burns. In reply to an inquiry from Chairman Banfield as to which project is of most importance to Harney County, Judge Higgs said that the completion of the John Day-Burns Highway and the improvement of the highway from Burns to Crane, thence to Princeton and Follyfarm, are both of primary importance to the county, and that it is a matter of choice which one should be given preference over the other.

Judge Higgs then asked other members of the group to express themselves. Mr. Tiller urged the improvements mentioned by Judge Higgs, as did also Mr. E. B. Bennett, Vern Gray and Mr. West. Mr. Timms also spoke in favor of such projects. He pointed out that all livestock movements center in Burns, and the county is suffering from serious transportation problems to get the livestock to market, principally because of bad road conditions. He alleged that such conditions are partly responsible for the shortage of meat in Portland. He also spoke for the improvement of the roads in the interests of the agriculture, lumber and mining industries.

Mr. Monte stated that the United States Grazing Service has a six-year postwar plan which it is trying to coordinate with other governmental agencies. He advised that there has been appropriated the amount of $10,000,000 for this purpose, and that the Grazing Service wants to include in the program the improvement of county roads, as well as the carrying on of its grazing projects. The plan, he said, consists of work on the ranges during the summer season and work on roadways during the winter months. He inquired whether or not the Highway Commission would be interested in securing a grazing project for the improvement of the Princeton-Rome Secondary Highway. The Engineer was instructed by the Commission to look into the matter.

One of the group inquired what will have to be done in order to obtain financial assistance from the Federal Government in the repair of the road leading to the Burns Airport. He was advised by the Engineer to file an application with the Army authorities who have under their control certain access road moneys which could be used for this purpose.

After further discussion Chairman Banfield concluded the meeting by stating that there has been demonstrated the need for proper planning in order to do the most good efficiently and without waste; that in changing from the wartime to a peacetime economy it is essential that returning soldiers and others who are out of employment be taken care of. He asked the group to present a list of the projects in the Harney County district, in the order of their preference. These projects, he said, will be given due consideration by the Commission, along with those submitted by other counties, in the formulation of the Commission's construction program.

The meeting was adjourned at 9:00 p. m.

Commissioner

Commissioner

APR 27 1943

Vale, Oregon, April 28, 1943

The State Highway Commission conferred with the members of the Malheur County Court in the office of County Judge Charles S. Leavitt, Court House, Vale, at 10:30 a. m. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Merle R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Representing the county court were County Judge Charles S. Leavitt and County Commissioners C. A. Marshall and Irwin Troxell.

Following introductions, the Engineer explained the object of the Commission's trip, particularly with reference to the proposed improvement of the I.O.N. Highway. Chairman Banfield spoke briefly on matters pertaining to the proposed postwar construction of highway projects. He advised that the Commission is contemplating the arrangement of a postwar program of such projects, and would like to know what projects the county has in mind that might be included therein, notwithstanding that the Commission is not in position now to make any commitment of funds thereto. He called upon the Engineer to explain the bill that is now before Congress, which has for its purpose the appropriation of federal funds to finance postwar construction. The Engineer explained the proposed plan. He pointed out that if the bill is enacted into law, the Commission still would not be able to act until it has received rules and regulations from the Public Roads Administration governing the expenditure of the funds. He also said that he would have someone contact the county court at the proper time to discuss the selection of the projects.

Mr. Marshall stated that he resides in the vicinity of Nyssa, and his particular interest is the improvement of feeder roads which would facilitate the transportation of sugar beets to the sugar factory at Nyssa. Judge Leavitt concurred in the remarks of Commissioner Marshall. He added that the county court had no particular project in mind to submit to the Commission today, but will give the matter serious consideration. He did, however, mention the improvement of the road which extends from Nyssa south to a junction with the I.O.N. Highway, through Sucker Creek Canyon, and expressed the county court's approval of the Commission's plan to improve the I.O.N. Highway. The Engineer explained why the former Commission found it necessary to reject the Sucker Creek route, stating that to build such route was estimated to cost $1,000,000 more than the route that was finally selected, and the Commission did not feel that the extra expense was justified. Commissioner Marshall also expressed pleasure for the proposed improvement of the I.O.N. Highway.

Chairman Banfield concluded the meeting at 11:00 a. m. with appropriate remarks, following which the Commission motored to Ontario, where the Commission and party were guests of the Ontario Kiwanis Club for luncheon.

APR 29 1943

At 1:15 p. m. the Commission met with a group of local citizens representing the Ontario Commercial Club, in the Moore Hotel, all Commissioners, the State Highway Engineer, the Attorney and the Secretary being present. The local group was headed by Mr. W. R. Hollingsworth, President of the Commercial Club, and included the following: H. C. Boyer, Chairman of the Highway Committee; H. L. Peterson, furniture dealer; Elmo Smith, Mayor, and publisher of the Eastern Oregon Observer; Charles Black, Van Petten Lumber Company; N. O. Richards, Manager of the local Doctor's Clinic; J. F. Cooper, Manager of the Idaho Power Company; Frank Ryan, City Recorder; Earl Ball, Manager of the Armco Metal Products Company; Dyer Bennett, Ontario Grain Company; Clint Trow, City Engineer; Harold Hogue; and George Merritt and Harry Salisbury, owners of the Moore Hotel.

After opening remarks by Mr. Hollingsworth who presided, Chairman Banfield explained the purpose of the Commission's visit, stating that the Commission's primary object was to inspect the I.O.N. Highway, the completion of which the Commission has under contemplation, and to secure suggestions from local groups with respect to projects that are eligible for consideration in the formulation of a postwar program of highway improvements. He advised that while the Commission wishes to obtain ideas with respect to such matters, it is not possible at the present time to make commitments relative thereto, because of the uncertainty of funds to finance such projects. At the request of Chairman Banfield, the Engineer explained the prospects of receiving federal funds to help finance postwar work, advising that there is before Congress at the present time, a bill which, if it is enacted into law, will make available to the State of Oregon for highway work approximately $15,000,000 annually for a period of three years, provided the State of Oregon will furnish about $4,000,000 match money, which means a total working fund of $19,000,000 annually. He also explained briefly how the money will have to be spent under the provisions of the proposed law. In concluding his remarks he advised that the Commission wants to know what local projects are most desired.

Mr. Boyer advised that the project that they consider of primary importance is the construction of the proposed revision of the Old Oregon Trail Highway between Ontario and Huntington. He also asked for completion of the reconstruction of the John Day Highway, and the construction of a highway connection between Nyssa and the I.O.N. Highway. Mr. Peterson also asked for the construction of the Ontario-Huntington revision, and in addition thereto suggested the improvement of the present highway between Ontario and Nyssa. The Engineer advised that the Ontario-Nyssa improvement involves construction of a new bridge over the Snake River, which is a project for the distant future. He pointed out that the realignment of the Old Oregon Trail between Ontario and Huntington is a costly undertaking, and will involve an expenditure in excess of $1,900,000. The change, he said, is about 26 miles in length, and shortens the distance between these towns about seven miles. It was his thought that this is an important project, because it will save the Old Oregon Trail for the State of Oregon.

There followed a general discussion of the rerouting of the Old Oregon Trail on the Idaho side of the Snake River, as has been proposed and urged

by the people of Idaho. It appeared to be the concensus of opinion that the number-one project in Malheur County is the construction of the proposed Ontario-Huntington revision. At the conclusion of this discussion the proposed I.O.N. Highway construction was considered. At the request of Commissioner Chessman the Engineer explained the set-up of the special federal funds with which the Commission proposes to finance the work. He advised that the Army authorities want this improvement to facilitate the transportation of products that are essential in connection with the country's war effort. The government, he said, has available for this purpose the sum of $800,000, which will have to be matched with about $200,000 of state money, and if the Highway Commission does not take advantage of this fund, then it has been given to understand that the I.O.N. Highway Project must be constructed as one of the first projects after the war, and in that case the state will lose the $800,000 appropriation that the government has available now.

Mr. Boyer stated that the people of Ontario and Malheur County appreciate the position in which the Highway Commission has been placed, and are offering no objection to the improvement, notwithstanding that the road will not be of much benefit to Malheur County unless a connecting road is constructed on the west side of the Snake River between this highway and Nyssa.

The meeting was adjourned at 1:50 p. m., following which the Commission motored to Jordan Valley and conferred with a group of local citizens at 8:45 p. m., in the dining room of the Marquina Hotel, all Commissioners, the State Highway Engineer, the Attorney and the Secretary being present.

The local group included Dr. Walter William Jones, William R. Helm, Domingo Yturri and several others. Dr. Jones presided.

Following introductions, Chairman Banfield explained the purpose of the Commission's visit, and then called upon the Engineer to explain the details. The Engineer pointed out that while the Highway Commission has indicated a favorable attitude toward the completion of the I.O.N. Highway, it cannot promise construction, because final approval of the project has not yet been received from the Federal authorities, although indications are that such approval will be given.

Dr. Jones expressed the pleasure of the people of Jordan Valley for the information, and inquired whether or not the highway is to be routed through the town of Jordan Valley. The Engineer replied that two routes have been considered, one of which passes through the town of Jordan Valley, and the other by-passes the town and extends along Hooker Creek. The Highway Commission, he said, has expressed a preference for the Jordan Valley route, and is recommending such route to the Federal authorities, although the Army officials, who are particularly interested in the I.O.N. highway construction, may insist on the construction of the Hooker Creek route. After further discussion of a general nature, the meeting was adjourned at 8:30 p. m., with appropriate remarks from Dr. Jones.

APR 29 1943

The following morning the Commission inspected the I.O.N. Highway and the Rome Flight Strip, and then motored to Baker.

State Highway Engineer

Secretary

Chairman

Commissioner

Commissioner

Baker, Oregon, April 29, 1943

The State Highway Commission conferred with representatives of the Baker Chamber of Commerce at 8:00 p. m. at the Baker Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Merle R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Mr. James T. Donald, President of the Chamber of Commerce, presided. The local group included the following: County Judge Chas. E. Baird; County Commissioner R. M. Phipps; Linn Vermillion, Chairman of the Highway Committee; Representative R. C. Frisbie; Armand Perkins, member of the State Board of Agriculture; W. C. Calder; Carl Waltz; Joe Rodgers; Lucien Arant; H. Milton; Carl Sylvan; Jesse Duby; and C. T. Godwin.

Following introductions, Chairman Banfield explained the purpose of the Commission's visit. He advised that the Highway Commission is of the belief that Congress will enact legislation authorizing the appropriation of federal funds to finance postwar highway construction, in view of which the Commission wishes to be prepared and have its program outlined in advance, so far as is possible, so that no delays will be encountered when notification is received to proceed. The Commission would like to be informed, he said, of the highway projects in Baker County which are considered by the local interests to be of primary importance. Such projects, he added, will be given due consideration by the Commission in the formulation of the program that the Commission has in mind, but no promises or commitments can be made at this time. He called upon the Engineer to explain the details with respect to proposed improvement of the I.O.N. Highway and with respect to the bill that is now before Congress which has for its purpose the providing of federal funds with which to finance postwar highway construction.

Such information was then given by the Engineer, who also asked the group to furnish the Commission with a list of highway projects which are of primary importance from the local standpoint.

APR 29 1943

Judge Baird asked for the completion of the oiling of the Baker-Halfway Highway, between Ruckles Creek and Young's Bridge, as a project which should be given prior status over others. He also asked for the construction of a railroad grade separation structure on the Baker-Unity Highway at Dewey Avenue in the city of Baker, and for the construction of a short-cut highway from Baker to John Day, via Sumpter. He advised that these projects have been mentioned in the order of their importance from the county's standpoint. Judge Baird also asked for the improvement of some 98 miles of state secondary highways which he said are in need of repair and oiling, for the improvement of the Old Oregon Trail, and for the reconstruction of the railroad grade separation structures near Perry, Huntington and North Powder.

Mr. Vermillion endorsed Judge Baird's remarks and voiced his approval of the order in which the projects were presented, although he added that they would approve a revision of the order if necessary. He stressed the importance of construction of the short-cut highway from Baker to John Day, via Sumpter. The interests of the City of Baker, he said, include those of the surrounding cities and towns, which is their reason for appproving the projects as outlined. Representative Frisbie also endorsed the first three projects mentioned by Judge Baird. He particularly urged the construction of the short-cut highway from Baker to John Day.

After discussion of a general nature the meeting was adjourned at 9:00 p. m. with appropriate closing remarks by Mr. Donald.

State Highway Engineer

Secretary

Chairman

Commissioner

Commissioner

Enroute Baker to La Grande, Oregon, April 30, 1943

The Commission motored from Baker to La Grande, leaving Baker at 8:00 a. m., all members of the Commission, the State Highway Engineer, and the Secretary being present. The following routine matters were discussed enroute:

The Commission considered the following requests for extensions of time within which to complete highway construction projects:

Clifford A. Dunn and Frank Penepacker, contract No. 2503, for grading, surfacing and construction of bituminous macadam on the Algoma-Terminal City Section of The Dalles-California Highway, in Klamath County, requested an extension of time from June 30 to October 29, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to the following: delays necessitated by strict compliance with wartime rules and regulations, adverse weather conditions,

right of way difficulties which necessitated deferment of the award of the contract and prosecution of construction during a time when working conditions were bad. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

J. F. Johnston, contract No. 2574, for reconstruction of the Elodgett Overcrossing on the Corvallis-Newport Highway in Benton County, requested an extension of time from September 30, 1942, to April 6, 1943, within which to complete this job. He attributed his failure to complete the project within the specified time limit to difficulties in securing materials as needed. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct; that the C. D. Johnson Lumber Corporation, of Toledo, which was to furnish the lumber, could not deliver it until December 1, 1942, two months after the award of the contract, because of high priority government orders for material. After receipt of the lumber, he said, the contractor proceeded with his work with reasonable speed. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

J. F. Johnston, contract No. 2587, for construction of two pile trestle bridges on the Monmouth-Suver Section of the Pacific Highway West, in Polk County, requested an extension of time from September 30, 1942, to April 10, 1943, within which to complete this job. He alleged that his failure to complete this project within the specified time limit was due to difficulties in securing materials. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct, the facts being that the work was held up for a long period due to the contractor's inability to secure lumber. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Lindstrom Brothers, contract No. 2594, for construction of bridges on the Sunderland Avenue Project, Portland, requested an extension of time from October 15, 1942 to March 26, 1943, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulties in securing delivery of materials. The Engineer advised that the reason given by the contractors for failure to complete the project within the specified time limit is correct; that as soon as materials were received the contractors completed the job within a reasonable length of time. He recommended that the extension of time requested

be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contracts Nos. 2503, 2574, 2587, 2594 and 2620, for the construction of state highway projects, have been completed, according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2503, with Clifford A. Dunn and Frank Penepacker, for grading, surfacing and construction of bituminous macadam on the Algoma-Terminal City Section of The Dalles-California Highway, in Klamath County. Completed October 29, 1942.

Contract No. 2574, with J. F. Johnston, for reconstruction of the Blodgett Overcrossing on the Corvallis-Newport Highway, in Benton County. Completed April 6, 1943.

Contract No. 2587, with J. F. Johnston, for construction of two pile-trestle bridges on the Monmouth-Suver Section of the Pacific Highway West, in Polk County. Completed April 10, 1943.

Contract No. 2594, with Lindstrom Brothers, for construction of two pile-trestle bridges on the Sunderland Avenue Project, in Portland, Multnomah County. Completed March 26, 1943.

Contract No. 2620, with Cascade Construction Co., for grading and paving the S. W. Grover St. (Portland) Access Road Section, in Multnomah County. Completed April 6, 1943.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

Consideration was given by the Commission to the proposed agreement with Benton County, Polk County, and the City of Independence, with respect

to the improvement and maintenance of the Independence-Granger County Road. The provisions of this agreement were explained fully by the Engineer, who advised that the arrangement was consumated by the former Highway Commission and that the agreements would have been executed several months ago by the former members of the Commission, but for the fact that the papers were misplaced in the Independence city offices. The Commission expressed reluctance to enter into the agreement because of the precedent that would be established thereby. However, after considerable discussion, the arrangement was approved by the Commission by unanimous vote, upon motion of Mr. Chessman, which was duly seconded by Mr. Schaupp. The Commission indicated that it would not approve future agreements of this nature. The Engineer was instructed to endeavor to secure reimbursement from the Federal Government for expenditures made by the state in connection with the work involved.

A letter was presented from the State Parks Superintendent with reference to damage that has been done in Helmick State Park by Army trucks and personnel from Camp Adair. According to the report, Army trucks have been driven through this park indiscriminately, severely damaging grassed-over areas and natural terrain. Fox holes have been dug in various locations, and trees have been felled and otherwise marred. Furthermore, park benches and tables are missing. The Parks Superintendent estimated that it would cost $500 to replace the park in its original condition. He recalled that the Commission at one time offered to sell this park to the Army authorities for the sum of $550, the sale having been previously approved by the people that donated the park to the state. However, the sale has not been consumated to date. He suggested that the Army either be required to complete the acquisition of the park by the payment of the $550 heretofore established, or to pay the state $500 as damages. The Engineer gave as his thought that the Army officials should be given another opportunity to purchase the park, and if they will not complete the purchase then that action should be taken to collect damages. After discussion, the Commission approved the recommendation unanimously. The Engineer was thereupon instructed to write Colonel McCoy, who is in charge of Camp Adair, bringing the facts to his attention and requesting his cooperation, to the end that further damage to this park shall not occur. It was also the thought of the Commission that the Attorney should write the Army authorities renewing the state's offer to sell this property, and advising that the state will do what is necessary in order to collect damages, if the sale is not consumated. It was so ordered.

The Commission discussed informally matters pertaining to the construction of the cut-off highway between Baker and John Day, as has been requested by the Baker Chamber of Commerce, but no action was taken thereon.

The Commission discussed the I.O.N. Highway Project, which was inspected on the previous day. It was the opinion of the Commission that the building of this road and the expenditure of the state's funds in connection therewith is basically sound, inasmuch as it will reduce the cost to maintain the present road considerably. In view thereof the Commission, by unanimous vote, upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chessman, approved the construction of this project on the basis of the Federal Government contributing $800,000 toward the cost thereof.

The Engineer was thereupon authorized and instructed to do whatever may be necessary in order to secure governmental approval of the project and to advertise the project for bids as soon as plans and specifications can be prepared and governmental authority obtained. In this connection the Engineer advised that due to wartime conditions and uncertainties the work may require more than $200,000 of state money, depending on the bids that are recieved. The Commission, by unanimous vote, approved a reasonable overpayment of state funds, if necessary.

The Commission discussed the matter of allowing the use of the state park at Floras Lake in Curry County as an aircraft landing field. Commissioner Chessman suggested that the Commission should discuss the matter of leasing the property to the county on reasonable terms without mentioning how long a term of lease the Commission is willing to give. Chairman Banfield gave as his thought that the county should be informed that the Highway Commission wants to cooperate in every way possible and is willing to lease the property to the county on a reasonable basis. Commissioner Schaupp concurred. It was thereupon decided that the Attorney should prepare a letter to the county court advising the court of the Commission's willingness to lease the property for the purpose intended, and of the Commission's desire to cooperate fully insofar as is possible, having in mind the best interests of the state as a whole. This letter is to be read to the members of the Commission before it is mailed to the county court.

The Commission arrived in La Grande at 9:00 a. m., and immediately conferred with groups representing the citizens of La Grande, Union and Elgin in the city council chambers. Mr. Charles H. Reynolds, President of the Oregon Trail Association, presidad at this meeting, which was attended by all members of the Highway Commission, the Engineer and the Secretary. The following persons were present from La Grande and vicinity: Union County Court, consisting of County Judge C. K. McCormick and County Commissioners Chris Johnson and William Condit; S. B. Morgan, County Engineer; La Grande City Commissioners T. H. Gaither and B. A. Van Wormer; A. K. Parker, La Grande First National Bank; Fred E. Kiddle, President, Chamber of Commerce; Robert Ball, Secretary, Chamber of Commerce; J. H. Pease, Jeweler; J. B. Lumsden, United States National Bank; Colin R. Eberhard, Attorney; L. K. Kinzel, Mt. Emily Lumber Company; Fred Spauth, Plumber; Raymond Gray and E. R. Walder, Eastern Oregon Light and Power Company; Homer Lefelle, J. C. Penney Company; F. C. Perkins, Perkins Motor Car Company; Dr. William Pease, Optometrist; Foster Sims, Texas Oil Company; and Frank Shino, La Grande Evening Observer.

Representing the town of Elgin were: Jesse Crum and Hanford Reed. Representing the town of Union were: C. A. Caldwell, George Ferguson, G. I. Hess, and Merton Davis.

Following introductions, Chairman Banfield explained the purpose of the Commission's visit, explaining briefly that the Commission has in mind completion of the I.O.N. Highway and the formulation of a program of priority projects for construction during the postwar period. He asked the local group to furnish the Commission with a list of projects which they desire included in such program, and advised that they will be given due consideration, but the Commission is not in position at the present time to make any definite

commitments or promises with respect to any of them. He also mentioned the status of the highway funds, due to the decrease in gasoline tax revenues, difficulties encountered by the Commission because of the labor shortage, and because of priority and wartime restrictions. He called upon the Engineer to give further details with respect to the proposed postwar program.

The Engineer explained the provisions of the bill that is now pending in Congress, which will provide federal funds for postwar highway construction. He pointed out that under the bill as now written Oregon will receive approximately $15,000,000 annually for three years, which, with an annual appropriation of $4,000,000 of state match money, will provide a working program of $19,000,000. He also asked the delegations to submit to the Commission a list of projects, arranged in the order of their importance, for the Commission's consideration in the formulation of this program.

Mr. Reynolds advised that the groups have no definite program to present at this time, but will prepare one in the near future. He called upon members of the local groups for remarks.

County Judge McCormick stated briefly that the county particularly desires additional secondary highway improvements. County Commissioner Johnson endorsed the remarks of Judge McCormick. He said that the county hasn't received much secondary highway money during the past eight years, and that they feel they are entitled to fair consideration in this respect. He advised that the county has no program of highway projects arranged at the present time, but will submit one in the near future. Mr. Morgan stated that he came to listen and not to talk; however, mentioned improvements to the Cove-Union Secondary Highway and additional improvements for the Hunters Lane Road and the North Powder River Road, both of which are county obligations.

Mr. Calder spoke in behalf of the town of Union, stating that they have arranged no program, but will be pleased to cooperate with the Highway Commission in every way possible. Similar remarks were made by Mr. Hess, who, however, suggested the improvement of the Union-Medical Springs Secondary Highway.

Speaking in behalf of the town of Elgin, Mr. Reed and Mr. Crum suggested completion of the Minam Hill Section of the Wallowa Lake Highway, and asked that provision be made for keeping the Weston-Elgin Highway open through the winter months. They also stated that the town of Elgin has other projects in mind and will submit to the Commission a complete list at a later date. They offered full cooperation with the Commission.

Mr. Van Wormer, speaking as Chairman of the Building Committee of the La Grande City Council, advised that La Grande has no definite program outlined as yet, but will prepare one in the near future. His remarks were endorsed by Mr. Gaither, who also stated that any route leading out of La Grande is of interest to the city. Mr. Kiddle advised that the La Grande Chamber of Commerce has not yet prepared a program of projects, but will do so soon. He questioned whether the City of La Grande will receive much benefit from the federal postwar moneys, in view of the fact that the bill as now written limits

the expenditure of such funds to cities of 10,000 population or more, whereas the population of the City of La Grande, according to the last census, was only 8,000. Mr. Kinzel asked for the improvement of the Starkey Secondary Highway, and the extension thereof from its present terminus to a connection with the Pendleton-John Day Highway, near Ukiah. He alleged that the construction of such road would provide a short route to California for people of the La Grande district.

In concluding the presentation Mr. Reynolds advised that whereas the people of the La Grande district have not as yet decided on a postwar program, the matter will be given serious consideration, and an outline of projects will be presented to the Commission as soon as possible. He did, however, mention the following projects which he said would probably be included in the program: (1) modernizing of the Wallowa Lake Highway between La Grande and Wallowa, particularly the La Grande-Union Hill Section; (2) reconstruction of the Old Oregon Trail between North Powder and Union; (3) extension of the Starkey Secondary Highway to Ukiah; (4) modernization of the Old Oregon Trail; (5) construction of a road extending from Hunters Lane to Tollgate; (6) improvement of the highway between Union and Cove; (7) reconstruction of the Weston-Elgin Highway at the Weston end, and arrangements for snow removal during the winter season; (8) improvement of several other secondary state highways and county roads, which were not described.

Chairman Banfield concluded the conference by stating that although there are $57,000,000 which the Commission has visions of spending for road construction during the first three-year period following the war, there are a lot of roads to construct and the money will not go nearly as far as it would have some three years ago. He also said that it probably will not be possible for the Commission to approve all of the projects that are presented, although it will be pleased to consider them, and pointed out also that the federal moneys are not assured, inasmuch as the bill providing for the same has not as yet been passed by Congress.

The meeting was adjourned at 10:00 a. m. following which the Commission motored to Pendleton. The following matters were discussed enroute:

(1) Zoning of state highways for speeds:-The Engineer advised that the former Highway Commission authorized an expenditure for investigations relative to the zoning of highways, preparatory to the erection of signs limiting the speed of motor vehicles. He gave as his thought that now is not the time to start on a program of this kind, in view of the expense involved in the preparation and erection of the signs. The Commission concurred, and thereupon instructed the Engineer to let the matter rest until times return to normal, when further consideration will be given to the subject.

(2) Question of fire insurance coverage on highway department buildings:-The Engineer suggested that it might be advisable to carry commercial fire insurance coverage on buildings owned by the State Highway Commission, in addition to the coverage that is now furnished by the state under the Restoration Act. He pointed out

that one serious fire in one of the larger of the state's buildings, such as the buildings in Salem and at the University of Oregon and at Oregon State College, would just about deplete the fund provided under the provisions of the Restoration Act, in which event, if one of the highway department's buildings should burn at about the same time, no moneys would be available to restore it. It was the thought of the Commission that something should be done to fully protect highway department property, but no action was taken on the matter except that the Engineer was instructed to render a full report to the Commission at its next meeting.

The Commission arrived in Pendleton at 12:00 noon, and immediately following luncheon at the Pendleton Hotel, conferred with a group of local citizens who were headed by the Honorable Sprague Carter, Mayor. Present and representing the state highway department were all three members of the Commission, the Engineer and the Secretary. Local citizens present in addition to Mr. Carter were: R. H. Schwalbe, Hanley & Company, President of the Chamber of Commerce; John Kilkenny, Attorney; Sam Thompson, President of the Pendleton Roundup; Will Glass, Manager of the First National Bank; William R. Meiners, County Commissioner; Carl Ewing, U. S. Forest Service; Roy Raley, Attorney; James Johns, Abstractor; E. B. Aldrich, Pendleton East Oregonian, and former member of the State Highway Commission; and Rex Ellis.

Following introductions, Chairman Banfield explained the object of the visit, concluding with a brief statement relative to the I.O.N. Highway and a request for the submission of local projects for consideration by the Commission in the formulation of its postwar program. At the request of Chairman Banfield, the Engineer explained the provisions of the bill that is now before Congress that provides for an appropriation of federal funds to finance, with state cooperation, highway projects during the three-year period immediately following the war.

Brief talks were made by Mr. Carter and Mr. Aldrich. Mr. Raley, as Chairman of the Highway Committee of the Pendleton Chamber of Commerce, mentioned as their preference project the removal of the Old Oregon Trail bottleneck. He also asked for the completion of the proposed revision of the Oregon-Washington Highway between Milton and the Washington State Line. He suggested the following local projects in Pendleton: widening of West Court Street, route of the Old Oregon Trail; construction of a railroad grade separation structure at Dorian Avenue (West Webb Street); and construction of a highway connection between the Old Oregon Trail and the Pendleton-John Day Highway on 20th Street, including a railroad grade separation structure.

The Commission made no commitments relative to these projects; however, inspected them in company with Mr. Johns, immediately following adjournment at 1:45 p. m.

The Commission then motored to The Dalles, where a meeting was held with local citizens at 8:00 p. m., in the dining room of the Royal Cafe.

Present at such meeting were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Commissioner Chessman was excused from attending this meeting.

The local group consisted of some thirty members, including the following:- J. F. Gitchell, Chairman, City Planning Commission; J. C. Davies, President of the Chamber of Commerce; W. S. Nelson, Secretary of the Chamber of Commerce; Ray F. Kelly, President, Port of The Dalles; H. G. Miller, Secretary, Port of The Dalles; County Judge J. B. Kirk; County Commissioners A. H. McLeod and Mace Fulton; County Engineer Chris Fauerso; Acting Mayor Paul R. Weigelt; John Alden, of The Dalles Chronicle; Gus Carlson, Inland Navigation Company; and W. V. Daniels, L. E. Emerson, W. L. Kirk, V. E. Rolfe, R. R. Harper, H. L. Eddins, Frances Seufert, C. S. Hampton, F. M. Sexton, O. F. Sprickerman, L. L. Hicock, Roscoe E. Roberts, J. T. Barton, Lloyd Arnold, Geo. Edmiston and R. C. McGuire, all members of The Dalles Chamber of Commerce. Mr. Gitchell presided.

Following opening remarks, Mr. Gitchell called upon Mr. Nelson, Secretary of the Chamber of Commerce, to present an outline of postwar projects in which the various groups of the community are particularly interested. Mr. Nelson outlined a comprehensive plan for the development of the City of The Dalles as a port on the Columbia River. He presented a mimeographed report on this subject, which he read aloud with explanatory comments. Exhibits were also presented, consisting of maps and aerial photographs. In commenting on the plan, Mr. Nelson advised that the United States War Department will not approve their river-development project unless the people will provide the necessary facilities for the operation of the same, which will include not only facilities for the handling of river traffic, but also facilities to provide access to the river-front development, such as roads, bridges, etc. All of these facilities, he said, must be coordinated. He brought up the question of the building of a bridge across the Columbia River at The Dalles, and asked the Commission to settle this question. He pointed out that there is only one road leading from the business district of The Dalles to the water front, which is inaccessible from other city streets. Additional approaches to the water front, he said, should be provided. He envisioned a tremenduous increase in commerce within the next few years, and declared that the City of The Dalles must be in position to accommodate this traffic when it arrives. He called upon several local people for remarks.

Mr. R. F. Kelly, President of the Port Commission, stated his concurrence in the presentation as made by Mr. Nelson. He added that there is need in The Dalles for an extensive survey for properly locating the various facilities in this development. County Judge Kirk also endorsed Mr. Nelson's presentation. He added that the most pressing project, from the county's standpoint, is the reconstruction of the Columbia River Highway, from Portland to The Dalles, and through The Dalles. He offered full cooperation from the

county in anything that the Commission should undertake. Mr. Weigelt, as Acting Mayor, mentioned that one of their problems is the traffic problem on Second Street.

At the request of Mr. Nelson, the State Highway Engineer explained the purpose of the Commission's visit, and outlined briefly the provisions of the bill that is now pending before Congress, which provides for an appropriation of federal funds for postwar highway construction. Chairman Banfield complimented Mr. Nelson on his report, but advised that the project that he has outlined is not the kind of postwar work that the Commission has in mind. The Commission, he said, has under contemplation the preparation of a general postwar program, consisting of highway projects that will provide the greatest benefits to people of the local communities throughout the state, in order to take up the slack in employment when the war is over, and when the country returns from a wartime economy to peacetime activities. He gave as his thought that the project outlined at this meeting is not in the sphere of the Highway Commission to undertake; however, he said, the Commission will be pleased to give the plan due consideration in the formulation of the Commission's program of activities. He added that the Commission must consider all projects on a state-wide basis, and suggested the submission of a number of projects of a strictly highway nature. When the list of projects has been received from the various communities, he said, they will be arranged and presented to the Commission by the Engineer, with suggestions, and it will then be up to the Commission to decide where to spend its money. Commissioner Schaupp concurred in the remarks of Chairman Banfield.

In concluding the meeting, Mr. Nelson advised that the City of The Dalles has already provided river frontage for leasing to individuals who may desire it, and has also voted additional funds in the amount of $100,000 to assist in a reasonable amount of development.

The meeting was adjourned at 9:45 p. m.

State Highway Engineer

Secretary

Chairman

Commissioner

Commissioner

APR 30 1943

Portland, Oregon, May 11, 1943

The State Highway Commission met in regular session at 8:15 a. m. in room 615 (Imperial Room) Imperial Hotel. Present were:

T. H. Banfield, Chairman
Merle R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Schaupp arrived at 10:30 a. m.

The Assistant Attorney requested authority to purchase certain parcels of real property that are needed for various highway improvements. He submitted a list of such properties and suggested offers in connection with each. After careful consideration of each item the Commission approved the request and the offers recommended. The following resolution with respect thereto was adopted by the Commission by unanimous vote of the Commissioners present upon motion of Commissioner Chessman:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

*The Commission authorized the purchase of these properties at the prices mentioned, on the condition that the Federal Government approves the highway improvement and the project goes forward.

In this connection the Assistant Attorney requested instructions relative to the following properties: purchase of 4.67 acres from Wm. Buhrer for park purposes adjacent to the Oregon Coast Highway between South Beach and Beaver Creek; purchase of 0.36 acre from Josephine McClaskey for right of way along the Waldport-Big Creek Section of the Oregon Coast Highway; and purchase of 13.58 acres from Charles A. Huntington for right of way for the Judkins Point-Goshen Section of the Pacific Highway. The Commission deferred a decision with respect to the purchase of such properties pending further information which is to be reported by the Assistant Attorney at the next meeting. In this connection the Commission instructed the Assistant Attorney to report also on how much property the Commission is now buying for purposes other than right of way.

The Assistant Attorney also requested authority to acquire by condemnation the following properties which are needed in connection with the construction of the proposed revision of the Oregon-Washington Highway between Milton and the Washington state line:

File No. 10537 M. H. Wagner Recommended offer $125.00
File No. 10538 Marie F. Harris " " $800.00

After consideration of both properties the Commission approved the request and the recommended offers. The following resolution with regard thereto was adopted by the Commission upon motion of Commissioner Chessman which was seconded by Chairman Banfield:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and also access roads or other roads in which the Federal Government is interested, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by M. H. Wagner, which property is located in the west half ($W\frac{1}{2}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 1, Township 5 North, Range 35 East, W. M., Umatilla County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 10537, and which property is being acquired for right of way purposes in connection with the Oregon-Washington Highway;*

Real property owned by Marie Harris, which property is located in the west half ($W\frac{1}{2}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 1, Township 5 North, Range 35 East, W. M., Umatilla County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 2 and is further identified in the records of the Highway Commission as file R 10538, and which property is being acquired for right of way purposes in connection with the Oregon-Washington Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 35, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Attorney reported the need to amend the complaint heretofore filed in the Circuit Court of the State of Oregon for Malheur County, in July, 1942, with respect to the condemnation of certain land which the Highway Commission needs from the Western Loan & Investment Company and S. A. Swayne, in connection with the improvement of the I.O.N. Highway near Jordan Valley. He explained that since the filing of this complaint it has been found necessary to acquire from these defendants additional real property and, in his opinion, it would be advisable to secure a judgment with respect to both tracts under the same proceedings. He recommended, in view of the circumstances, the adoption of an appropriate order by the Commission. After discussion the Commission approved the recommendation. The following resolution with regard thereto was adopted by the Commission by the unanimous vote of the members present:

WHEREAS, the State Highway Commission on the twenty-third day of July, 1942, found it necessary to acquire certain real property owned by The Western Loan & Investment Company and by S. A. Swayne, and in which property one Ed Wilson had an interest as lessee, and said Commission, by a resoltuion made, adopted and entered in its minutes, declared the necessity for the acquistion of said real property and authorized the acquisition of the said property by agreement if possible, and if not then by condemnation; and

WHEREAS, pursuant to the provisions of said resolution, a complaint was filed in the Circuit Court of the State of Oregon for the County of Malheur, the purpose of which was to acquire the real property described therein by condemnation; and

WHEREAS, since the filing of said complaint, it has now been found necessary by the Commission to acquire from the said defendants additional real property;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the real property herein described is necessary for highway purposes and particularly for the purpose of procuring therefrom materials for road construction and road maintenance. The real property hereby declared to be necessary for such purposes is described as follows, to-wit:

A parcel of land lying in the Northeast Quarter ($NE\frac{1}{4}$) of Section 36, Township 27 South, Range 46 East, W. M., Malheur County, Oregon, and being a portion of the following described property: That tract of land which was conveyed by that certain deed to Western Loan & Investment Company, recorded in Book 45, Page 227 of Malheur County Record of Deeds, the said parcel being described as follows:

Beginning at a point on the North line of said Section 36; said point being 580.9 feet East of the North quarter corner of said Section 36; said point also being 75 feet distant easterly from (when measured at right angles to) the relocated center line of the I. O. N. Highway; thence North 89° 51' East along said section line a distance of 500.0 feet; thence South 12°12' East 796.1 feet; thence South 31° 40' East 608.3 feet; thence South 67° 48' West 250 feet; thence South 22° 12' East 100 feet; thence South 67° 48' West 194.4 feet to a point which is 75 feet distant easterly from (when measured at right angles to) the relocated center line of said highway; thence parallel to and 75 feet from said relocated center line on a spiral curve left(the long chord of which bears North 19° 42' 30" West 442.1 feet) a distance of 442.5 feet; thence North 22° 12' West parallel to said center line 1230 feet to the point of beginning.

The parcel of land to which this description applies contains 13.75 acres.

2. That the Commission does hereby find and declare that the above described real property is necessary and acquisition of the same by the State is required for the purpose heretofore stated.

3. That the resolution heretofore adopted by the Commission is hereby amended by adding thereto the real property described herein.

4. That the Chief Counsel of the State Highway Commission hereby is authorized and instructed to file an amended complaint and in said amended complaint include the real property herein described.

The Commission discussed matters pertaining to the proposed revision of the Oregon Coast Highway between Cannon Beach Junction and Cannon Beach with particular reference to acquisition of property for wayside-strip purposes beyond the limits of the 200-foot-width right of way. The Engineer gave as his understanding that Clatsop County Court is willing to donate a 200-foot right of way across the county-owned lands, but is reluctant to deed to the state lands beyond the limits of the right of way because it doesn't want to take this land off the tax rolls. Commissioner Chessman advised that he anticipates that County Judge Guy Boyington will be present at this meeting for a discussion of the matter. After careful consideration Chairman Banfield and Commissioner Chessman approved the survey of this section, as made by the Engineer, as the permanent location for the Oregon Coast Highway between the points under discussion. (Judge Boyington appeared before the Commission at 2:00 p. m. See ahead for details.)

The Attorney brought up for discussion settlement of a controversy with regard to the purchase of right of way from Alvin C. Spriggs and wife, in Cottage Grove. He advised that it has been necessary to condemn the property for which the Commission approved an offer of $200. However, it now appears that the Spriggs are willing to settle out of court if the Commission will pay the sum of $250. He recommended approval of such settlement, in view of the fact that the amount involved is not large, and in order to avoid further litigation which is rather costly. The recommendation was approved by the Commission by unanimous vote of the members present.

The Engineer rendered a supplemental report on the request of Mr. J. S. Burres, Moro, Oregon, for the improvement of the Cottonwood Grade Section of the Wasco-Heppner Secondary Highway. He advised receipt of a letter from Mr. Burres stating that all he is asking for is the widening of a few narrow points which are a hazard to the traveling public and where a number of accidents have occurred. He estimated that it would cost about $5,000 to do what Mr. Burres requests, and advised that in normal times he would recommend the project. He questioned whether or not the Commission would care to spend the money, in view of existing conditions, and expressed a doubt that the War Production Board would approve the expenditure. After discussion the Commission instructed the Engineer to make further investigations and, if he finds that the work can be done for $5,000, to proceed with the improvement, if the War Production Board will approve the expenditure. (See additional paragraph on the following day when Mr. Burres was present.)

The Engineer presented for the Commission's information a pay-roll report for the month of March 1943, showing the average number of people that were employed by the highway department during such period and the amounts expended for the various classes of employment as compared with the amounts expended during the month of March 1942. Such report reveals that there were 1,680 employees on the highway department's pay roll in March 1943, as compared with 2,105 during March 1942, and that the amount expended during March 1943 was $269,040.77, as compared with $287,708.28 during the month of March 1942. The Commission approved the report and ordered that hereafter a copy of the reports containing similar information be sent each month to the members of the Commission.

The Engineer presented for the Commission's approval a suggested press release advising the public of the penalty that the Commission may impose on truckers who are apprehended for transporting loads weighing in excess of the legal weight limits and tolerances allowed by the Highway Commission. The article was read aloud by the Secretary, but action thereon was deferred by the Commission pending the securing of information from the State of Washington as to how such matters are handled in that state. The Engineer was instructed to secure such information. (See additional paragraph on following day.)

A letter was presented from L. C. Stoll, Area Director, Office of Emergency Management, advising that, effective on April 15, 1943, the construction, repair and maintenance of highways in Oregon by the Oregon State Highway Commission crews were declared to be activities essential to the war effort

and further advising that this order will remain in effect for the duration of the war. The Commission ordered the communication filed after brief discussion.

The Attorney reported briefly on the Commission's claim against the Public Utilities Commissioner in the amount of $183.97 for reimbursement for expense incurred by the Highway Department at the request of the Public Utilities Commissioner, in connection with surveys conducted relative to the installation of a steam-heating system for the state capitol group of buildings in Salem. He advised that he has received information to the effect that the Board of Control has approved the payment of this claim.

The Engineer reported the results of an inspection of secondary state highways in Harney County by Maintenance Engineer E. A. Collier, at the instance of County Judge Nelson B. Higgs. He advised that, with the exception of the secondary highway which extends from Crane to Rome, via Princeton and Follyfarm, and the Diamond Secondary Highway north of the town of Diamond, secondary highways in Harney County are in good condition. The road between Princeton and Follyfarm, he said, has never been surfaced, and during the past winter was practically impassible at a number of locations on account of mud. The same condition, he said, obtains on the Diamond Secondary Highway immediately south of Crane, and at the Round Barn Reservoir where County Commissioner Jenkins has diverted irrigation water so that it covers the highway, necessitating traffic to use a detour road through a farm west of the reservoir. This latter mentioned condition, he said, could be remedied by raising the highway grade line, which would require some 5,000 yards of embankment material, and the surfacing of the section, but he could not recommend such work because there are possibilities that the dam would be raised to a greater height, in which case the highway would again be submerged. There are several other sections on the Diamond Secondary Highway, he added, where travel conditions are bad during the winter and spring months, particularly across Swamp Creek, just north of the town of Diamond, where some surfacing material should be placed.

He gave as his thought that the Diamond Highway south of Princeton really does not qualify as a state secondary highway, and suggested, in view thereof, the abandonment of this section and that responsibility for future maintenance of this road be returned to the county; and, if the county court agrees to such abandonment, that the Commission designate as a state secondary highway the county road which extends from the town of Diamond westerly to a connection with the Frenchglen Secondary Highway. As a consideration for this action, he said the state could then well spend approximately $10,000 for betterment of the highway between Crane and Follyfarm, which work could be done as a maintenance operation that would not need approval of the War Production Board.

The Commission indicated its approval of the suggestion, and decided to discuss the matter with Judge Higgs on such basis when he appears before the Commission on the following day. (See additional paragraph ahead covering Judge Higgs' appearance.)

The Engineer requested authority to advertise for bids for repairing the pier protection and drawrests of the Umpqua River Bridge, at mile post 224.83 on the Oregon Coast Highway at Reedsport, which was damaged by drift and high water during last winter's storms. He estimated that this work would cost about $7,500, and advised that, while the work could be done by one of the highway department's bridge maintenance crews, it would be necessary in that event to neglect the painting of steel bridges in the Coos Bay area. After discussion the Engineer's request was approved by the Commission by unanimous vote of the Commissioners present.

A letter was presented from the City Council of Sutherlin, requesting the widening of the Pacific Highway in this town between State Street and Calapooya Street to facilitate the parking of automobiles through the business section. The Engineer advised that Division Engineer K. D. Lytle, who investigated this matter, reports that the city's greatest trouble is the traffic problem that occurs on Saturday nights when loggers and other workers come to town and all try to park in this block; also, that the city has been unable to prevent the double parking of cars, which causes the blocking of the highway. Mr. Lytle also advises, he said, that the city wants the highway department to cut the sidewalks back about six feet on each side of the highway, and when this is done the city will then adopt an ordinance requiring the parallel parking of cars. He recommended against the improvement for the following reasons: when the highway is permanently located it will not follow this street; difficulties under present conditions in securing men to perform the work; widening of the street would encourage rather than stop the double parking of automobiles; the street as now constructed is adequate to serve all needs if properly policed; and there are many vacant lots nearby on which the city could establish free-parking areas. He estimated the cost of the widening work at approximately $3,000. The Engineer declared his concurrence in Mr. Lytle's recommendation, as did also Chairman Banfield and Commissioner Chessman. The Secretary was instructed to convey such information to the city council.

The Commission discussed a letter from the City of Reedsport requesting the landscaping and beautification of the triangular tract included within the wye formed by the intersection of the Umpqua Highway and the Oregon Coast Highway, in the city of Reedsport, as a priority project in the Commission's postwar program. The letter was read aloud by the Engineer, who advised that the project is a desirable one, and recommended that it be included in the construction program when the war is over as one of the projects which are to be financed with federal aid funds which the Federal Government has provided for such purposes. The Commission approved the recommendation, upon motion of Commissioner Chessman, which was seconded by Chairman Banfield, and instructed the Secretary to inform the city that, while the Commission is not in position to approve the project at this time, it looks with favor on the project and will be pleased to give it due consideration at a later date.

The Engineer reported on the condition of the Kings Valley Secondary Highway south of McTimmonds Road junction near Pedee, and on the condition of

the Dallas-Kings Valley Secondary Highway south of Dallas. He advised that both sections are being severely damaged by log hauling and are badly in need of repair, the fact of the matter being that the oiled surface, which was originally constructed, has been pounded to pieces so that no longer can either section be classed as an oiled roadway. Both roads, he said, are important state secondary highways and should be reconditioned as soon as possible. He estimated the cost to resurface the Kings Valley Highway at $45,000 and the cost to resurface the Dallas-Kings Valley Highway at $10,000, exclusive of oiling. He estimated the cost of oiling both sections at $35,000, making a total estimated cost of $90,000 as against a total of $55,000 if the oiling work is omitted.

This matter was discussed at considerable length, during which the members of the Commission expressed themselves in favor of the oiling work if oil can be obtained, particularly in view of the fact that both sections were previously oiled, that they are important roads, and that they would be very dangerous to travel during the dry season, because of dust conditions, if oil were not applied. As a result of the discussion the Commission approved the project for resurfacing and oiling by unanimous vote of the Commissioners present.

A letter was presented from P. M. Morse, County Engineer of Lane County, in behalf of the Lane County Court, in which the Highway Commission is requested to join with the county court in the improvement of a county-road connection with the McKenzie Highway at a point about three-fourths mile west of Vida. Mr. Morse advised that the highway at this point is so close to the river bank that loads of piling in excess of 75 feet in length cannot enter the highway from the county road without danger of injuring the county bridge (Good Pasture Bridge) over the McKenzie River. He suggested the widening of the McKenzie Highway approximately 30 feet in order to secure greater clearance, and that the state participate in the cost of doing this work. The Engineer advised that investigation by Division Engineer Lytle reveals that the county bridge has been constructed nearly at right angles to the McKenzie Highway and only a short distance therefrom, and, if the hauling of extra length piling is to be permitted on the highway from the county road, the road would have to be widened at least 30 feet, which would require the excavating of some 2,500 cubic yards of material, consisting of solid rock. The Engineer estimated the cost of such construction at approximately $3,000 of which the state's share would amount to about $500. He advised that in his opinion the expense is not justified, in view of the fact that practically all of the benefits would accrue to the loggers who now have no trouble in negotiating the turn with ordinary length loads. After discussion the Commission decided not to join with the county in this undertaking. The Secretary was instructed to inform the county court of its decision and to state further that if the court wants to do the work on its own account the Commission will be pleased to grant authority for the operations on the state highway right of way.

The Engineer brought up for discussion an agreement between the Commission and Deschutes County with respect to the improvement of the Terrebonne-Lower Bridge County Road. He recalled that when the Commission met with the County Court on April 27 in Bend, Judge Allen mentioned that the state is obligated to spend approximately $10,000 of state money for the improvement of a

county road, mutually agreed upon, because the county court spent county money for the surfacing of the Terrebonne-Lower Bridge Project which work, according to the original plan, was to be done by the state; further, that Judge Allen indicated that the county court would like to have the work done this year. He advised that inspection of the supplemental agreement covering the Terrebonne-Lower Bridge improvement reveals that the Commission is not obligated to complete the arrangement until the war is over, and an investigation of the cost records reveals that the Commission is obligated to spend only $5,800 to satisfy the arrangement, rather than $10,000 as mentioned by Judge Allen. The Engineer was instructed to convey such information to the county court.

Commissioner A. W. Schaupp arrived at the meeting at this time and participated in the discussions that followed thereafter.

The Attorney reported receipt of a letter from Mr. Thomas Holman, Chairman of the Highway Advisory Commission of the State of Washington, inquiring whether or not the Oregon State Highway Commission has reached a decision relative to a proposed joint conference among highway officials of the States of California and Washington for a discussion of matters of mutual concern. The Commission voted unanimously in favor of such conference if the highway officials of the other states want it. The question where to hold the conference was mentioned and upon the suggestion of Commissioner Schaupp it was decided to suggest to the other states that the meeting be held in Klamath Falls. It was left with the Engineer and the Attorney to work out the details.

The Commission recessed from 10:45 a. m. to 2:00 p. m., during which time the Commission inspected several properties in Washington County, portions of which are needed as right of way for the Wolf Creek Highway. All members of the Commission were present on such inspection, as were also the State Highway Engineer, the Attorney and the Secretary.

As a result of the inspection, the Commission by unanimous vote confirmed the proposed highway location as adopted by the former Commission, upon motion of Commissioner Schaupp which was duly seconded by Commissioner Chessman. The Attorney was instructed to secure appraisals of the properties remaining to be purchased, and which it appears may have to be acquired by condemnation.

Following the inspection trip the Commission returned to Room 615, Imperial Hotel, for disposal of additional routine matters.

County Judge Guy Boyington of Clatsop County was present and discussed with the Commission matters pertaining to the proposed revision of the Cannon Beach Section of the Oregon Coast Highway, particularly right of way matters and preservation of wayside strips adjacent thereto. Judge Boyington advised that the county court is offering no objections to the location that has been proposed for this revision, notwithstanding that it bypasses the town of Cannon Beach, if the Commission is satisfied that it is the proper location from the engineering as well as other standpoints. He inquired whether or not the Commission intends to maintain the present route through Cannon

Beach, particularly between the point where the new highway leaves the old highway just north of Elk Creek and the point where the new highway again connects with the old highway at Silver Point, south of Cannon Beach. The old road between these points, he said, must be maintained as a service road for the benefit of passenger busses and patrons of the beach district, in view of which the county wants the question of maintenance of the same decided before right of way matters are discussed. He stated that the county does not want a repetition of the case at Warrenton where the highway was rerouted and the old road was turned back to the county to maintain, notwithstanding that most of the traffic follows that route.

The Attorney advised that it is mandatory on the Highway Commission to maintain the old route, unless the county will agree to assume that responsibility. Chairman Banfield thereupon declared, "That is the answer. We will maintain the old road if the county will not take it over."

Judge Boyington remarked that the county is going to ask the Highway Commission to take over the old route through Warrenton at some future time. He then advised that, subject to concurrence of the other members of the county court, Clatsop County will donate a right of way 200 feet wide for the proposed revision of the Cannon Beach Section of the Oregon Coast Highway across county-owned lands, but will not deed to the state any land beyond the limits of such right of way, because the court doesn't want to take this property off the tax roll or do anything beyond the power of the taxpayers to pay. He suggested that it would be satisfactory if the Highway Commission would approve an arrangement such as the county has with the State Forester, whereby the county will receive 75 per cent of the returns from the sale of timber from lands which the county deeds to the state through the State Forestry Department. He was informed by Chairman Banfield that the Commission is not in position now to make a decision with respect thereto, but will be pleased to consider it from the state-wide standpoint, and will let him know when a decision has been reached. He also said that the Commission would inspect the property before making its decision.

The Commission then confirmed the action taken earlier in the session, approving the new location for this highway as disclosed by the Engineer's survey. Motion to that effect was offered by Commissioner Chessman and was duly seconded by Commissioner Schaupp. Chairman Banfield declared the motion carried by unanimous vote.

Judge Boyington advised the Commission that the people of Cannon Beach desire another roadway leading from the new highway to the beach at a convenient point between Ecola and Cannon Beach town. The Commission referred the matter to the Engineer for investigation.

The Engineer brought up for discussion the matter of renewing the contract for the furnishing of ferry service at the Enegren Crossing of Coos River on the Coos River Secondary Highway, in Coos County. He advised that the present contract with Andrew Stambuck expires October 1, 1943, and suggested that it would be advisable to take bids before the 1st of July for the renewal of this service, in order that the successful bidder, if it should be

someone other than Mr. Stambuck, might have time to acquire or build the necessary equipment before the effective date of the contract. He pointed out that the present contract provides for 20-hour service between 6:00 a. m. and 2:00 a. m. on the following day, and also provides that the contractor need not furnish ferry service for any vehicle or piece of equipment having a gross weight in excess of 10 tons. He recalled that the former Highway Commission at one time denied the request for increased loads, because of the expense involved, and for the further reason that the change would accommodate only one individual who was engaged in transporting lumber from a small sawmill to Marshfield, it being the thought of the Commission at that time that the expense was not justified. He requested instructions. After discussion the Commission voted unanimously to receive bids for this undertaking at its next regular meeting. The Engineer was instructed to prepare specifications for the furnishing of such ferry service on a 20-hour basis as before, and for alternate 10-ton and 15-ton gross loads.

The question whether or not to move the truck scales that are now installed on the Salmon River Highway near Grand Ronde was brought up for discussion by the Engineer. He advised that complaint has been made by some of the log haulers who are operating in this vicinity that the scales are improperly located and as a result they are required to go about one-half mile out of the way in order to be weighed. It would be possible, he said, to accommodate these haulers by relocating the scales some 3000 feet westerly from the present location, but it would cost about $2,540 to make the change. After discussion Commissioner Chessman suggested that the change be deferred until such time as there is more apparent justification for the expense. The Commission took no definite action on the matter at this time; however, when the matter was again brought up on the following day by the delegation representing the lumbering and logging industries Chairman Banfield advised that the Commission would give the matter consideration.

The Assistant Attorney reported receipt of several offers to purchase a small parcel of state-owned land situate beyond the limits of the standard width right of way at the intersection of Denver Avenue and Argyle Street in North Portland. He advised that, if the Commission decides to sell this property, it should receive 40¢ per square foot for the same, or a total of about $2,500 for the tract. The Engineer advised that the property is not needed for state highway purposes in view of the fact that a highway providing for six lanes of traffic has already been constructed in front of the property. He recommended sale of the property if a reasonable price can be obtained for it, and that the sale be advertised for competitive bids. After discussion, motion was made by Commissioner Schaupp that the property be sold and that the Commission receive bids for the purchase of the tract. The motion was duly seconded by Commissioner Chessman and was declared by Chairman Banfield to have carried by unanimous vote of the Commission.

The Assistant Attorney also brought up for discussion the matter of purchasing 10.55 acres of land at Lindsey Creek that is needed as right of way in connection with the construction of the new highway up the Columbia Gorge between Cascade Locks and Viento. He advised that the owner of the property, Mr. Dan Harper, has been maintaining an auto campground and service station

on the property but in view of wartime conditions has closed down his business and now wishes to dispose of the property. He further advised that an option has been secured to acquire it for $6,000, which he considers a very cheap price; also that, if the state does not buy the property now, the owner very likely will remodel it, and if so it will cost the state considerable more than the amount for which it can be purchased at this time. The Engineer stated that the highway at this point probably will not be constructed for several years; however, the property will be needed at that time, so in his estimation it should be purchased now, inasmuch as it appears to him that the state will be getting quite a bargain. After discussion the Commission, by unanimous vote, approved the purchase of the property at the $6,000 figure mentioned in the option. The Secretary was instructed to list this item in the real property resolution that was adopted by the Commission earlier in the session.

A letter was presented from C. J. Mortensen, Forest Grove, requesting the privilege of cutting into cordwood, for his own personal use, fallen timber that is lying on the right of way of the Wilson River Highway near Loyal M. Graham Bridge. In the discussion of this matter the Commission also discussed the adoption of a policy with respect to the cutting up of fallen trees on timbered wayside strips. The Engineer gave as his thought that it might be satisfactory to let private parties take this wood if it were for their own personal use and not to be sold commercially, provided the operations were conducted under the supervision of the District Maintenance Superintendents. The State Parks Superintendent, who was present, questioned the advisability of granting such requests, in view of the fire hazard that would be created and the possibilities that the operators would cause other damage, particularly in the wayside strips. He also mentioned receipt of a request for the gathering of fern from wayside strips for sale. Chairman Banfield expressed himself as being in favor of granting the request of Mr. Mortensen, and others who desire the same privilege, as an experiment, with the understanding that the operations would be stopped immediately if it developed that they were harmful to the state's property. Commissioner Schaupp concurred; however, added that he did not want to grant such privilege as a general policy, but simply favors it as a temporary proposition for a little cutting for home consumption. Commissioner Chessman likewise expressed himself, whereupon the Commission, by unanimous vote, approved the granting of permits for this privilege, subject to the following conditions: that the work be done under the supervision of a representative of the State Highway Engineer and to his satisfaction; that the operations be conducted during the season when there is no danger of starting fires, and that the operators remove the debris and clean up the premises when they are through. The Commission ordered that each request for this privilege be covered by separate written agreement.

The Commission also, by unanimous vote, decided not to allow the gathering of fern from property under its control.

The matter of allowing Mrs. Anna Barclay to maintain a building in Harris Beach State Park, Curry County, was brought up for discussion by the Engineer on request of the State Parks Superintendent. The Engineer recited the history of this case, advising that Mrs. Barclay has had seventeen months

within which to remove her building since the Highway Commission acquired the property but to date has made no pretense of compliance with the Commission's orders. He suggested, in order to dispose of any right that Mrs. Barclay might claim by reason of her occupancy of the state's property for seventeen months, that she be offered the sum of $200 for the building which, he said, could be used as a residence for the park caretaker, and, if Mrs. Barclay will not accept such sum, that the Commission take over the building as the state's property. The Commission approved the Engineer's suggestion and thereupon by unanimous vote authorized him to pay Mrs. Barclay $200 for this building.

A letter was presented from the County Court of Lincoln County, F.E. Gilkey, County Judge, in which the Commission is requested to deed to Lincoln County an old state-owned rock quarry situate adjacent to the Oregon Coast Highway in Brassfield Addition to Seal Rocks. Judge Gilkey advised that he has been given to understand that the quarry is no longer of value to the state, in view of the fact that all of the good rock has been removed therefrom; also, that the material that remains, while it is poor quality, is suitable for the maintaining of county roads and could be worked readily by the county which owns another quarry on adjacent property. The Engineer advised that the statements made by Judge Gilkey are correct, that there is insufficient rock remaining in the quarry to justify its use for state purposes. He recommended that the property be deeded to the county for its use. After discussion the Commission by unanimous vote approved the recommendation, upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chessman.

The Attorney rendered a status report on the sale to the United States War Department of a stock-pile site situate within the boundaries of Camp White Army Cantonment, Jackson County. He advised that this is a matter of long standing, and that he has finally obtained from the Army authorities a letter in which they offer to pay $45 for this tract. He pointed out that the Commission paid $125 for the property, and in addition thereto expended a considerable sum for fencing. Furthermore, the Commission has a lot of surfacing material stockpiled thereon. He recommended against acceptance of the offer. The Commission approved the recommendation by unanimous vote, and instructed the Attorney to inform the Army authorities that the Commission will not sell the property for such figure.

Messrs. Robert S. Farrell and Harry L. Idleman, both of Portland, came before the Commission at this time relative to the employment of a caretaker in Champoeg State Park. Mr. Idleman was principal spokesman. He pointed out that, by action of the 1943 Oregon Legislature, jurisdiction of this park has been transferred from the Provisional Government Park Board to the State Highway Commission, the effective date of such transfer being June 9, 1943. He also said that he has been given to understand that the services of the present caretaker, Mr. Ed Morgan, are to be dispensed with when the Highway Commission takes the park over. He urgently requested the retention of Mr. Morgan in his present capacity, because, he said, Mr. Morgan is well versed in the historical facts surrounding the park and has made more improvements in the park during the past year than others made in the fifteen years before he was employed. He also said that Mrs. Morgan is an able assistant

to her husband in the care of the park museum and that she receives no direct compensation for her services. Mr. Farrell also urged retention of Mr. Morgan's services, and advised that in his estimation it would be a "crime" to replace him. Chairman Banfield pointed out that the Commission has not as yet assumed control of the park and will not do so until June 9, 1943. The Highway Commission, he said, will probably spend a considerable sum in the maintenance and development of this park, and in view thereof must be very careful in the selection of the party who is to supervise the work. He thanked Messrs. Farrell and Idleman for their appearance, and advised that the Commission will give the matter serious consideration.

Following the departure of Messrs. Farrell and Idleman the Commission discussed the matter further with the State Parks Superintendent, who advised that an historian is needed in the park as well as a caretaker. The Parks Superintendent also said that from personal observations he could not see that Mr. Morgan has made any improvements in the park, other than the building of a few flower beds, and that in talking to parties who are acquainted with his work, he is led to believe that Mr. Morgan is not qualified to handle the work that would be required of him. He reiterated that the Commission should employ an historian as well as a caretaker, the historian to be someone who knows Oregon history and is able to disseminate information with regard thereto, and the caretaker to be someone who is able to take charge of all of the outdoor work. He suggested that the caretaker should receive $100 per month for his services, and a house to live in. The Engineer stated that from what he has heard of Mr. Morgan he does not believe that he is qualified to hold the position of caretaker. It was his thought that the Commission should employ someone who has had a lot of experience along that line, and is able to carry out instructions explicitly. He also said that he concurs in the suggestions presented by the Parks Superintendent with respect to the historian, and suggested that it would be advisable to secure the recommendation of the Oregon Historical Society with respect to the selection of such employee.

Chairman Banfield gave as his opinion that, if the Highway Commission accepts the jurisdiction of this park, it should also accept full responsibility for it in every way. His idea was that the Commission should employ an historian who is well versed in the background of the park, and a caretaker to do the outside work, maintenance, development, et cetera. Mr. Ralph Watson, political reporter of The Journal, was present and upon invitation of Chairman Banfield stated that the Commission, in his estimation, should employ a curator or historian as well as a caretaker.

After further discussion motion was made by Commissioner Schaupp that the Commission leave the entire matter in the hands of the State Parks Superintendent. The motion was duly seconded by Commissioner Chessman and was declared carried by unanimous vote by Chairman Banfield, who stated, in order to clarify any misunderstanding, that the Commission is holding the State Parks Superintendent fully responsible in so far as a caretaker is concerned and for the historian or curator after the Commission has passed on the selection of such employee.

Consideration was given by the Commission to the proposed acquisition of wayside timber strips along the Pendleton-John Day Highway between

Dale Ranger Station and the confluence of Camas Creek and the John Day River. The State Parks Superintendent recalled that the former Highway Commission authorized an expenditure of $10,000 to purchase the property belonging to the Pilot Rock Lumber Company, in the event that it is not possible to have the area preserved as an addition to the Whitman National Forest by an exchange of other government-owned timber land. He advised receipt of a letter from the United States Forest Service stating that it is inadvisable to attempt to extend the boundaries of the national forest at this time, due to wartime conditions, such letter being read aloud by the Secretary, and inquired whether or not in view thereof he should complete the acquisition of the property by purchase, in accordance with the ideas of the former Commission. He added that, if the property is purchased outright by the state at this time, there are possibilities that the United States Forest Service will at some future date include it in the national forest area, in which event the state would be reimbursed for its cash outlay. After discussion, and it appearing to the Commission advisable to preserve the timber along this scenic section of highway, the Commission voted unanimously, upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chessman, to purchase the area for $10,000, the amount authorized by the former Commission.

The State Parks Superintendent also reported to the Commission on the following matters:

Acquisition of Wallowa Lake Lodge property:-The Parks Superintendent recalled the offer of Mr. George L. Cleaver, La Grande, Receiver for the Wallowa Lake Lodge, to present to the state as a gift, for state park purposes, the lodge property which is located at the south end of Wallowa Lake. He questioned the advisability of accepting this offer, which includes some 50 acres of land, because of the fact that the United States Forest Service is now maintaining a recreational area on adjacent property, and it was his thought that possibly, in order to avoid confusion, the property should be under the control of the Federal Government. The Commission deferred a decision in the matter pending a physical examination of the property by the Parks Superintendent and his report thereon, which is to be rendered to the Commission at its next meeting.

Removal of cinders from The Cove State Park:-The Parks Superintendent reported receipt of a request from contractors Morrison-Knudsen Company for permission to obtain cinders from Round Butte which is located in The Cove Palisade State Park, in Jefferson County, for use in connection with construction work which the company has under way in Camp Abbot United States Army Cantonment near Bend. He advised that the company wishes to obtain this material from two different 40-acre tracts, one of which is owned outright by the state, the other being under lease from the Federal Government for park and recreational purposes; further, that the company wishes to obtain 200,000 cubic yards of material or more, for which it is willing to pay the state at the rate of 1½¢ per yard. He suggested that it would be advisable to accept the company's offer

because it would not be very harmful to the park, and would provide him with considerable working capital to pay for park improvements. It will be necessary, he said, to spend the money received for the material taken from the area leased from the government, for development purposes within the park area, as that is the only way in which the government would sanction the removal of the material.

The State Highway Engineer interposed objections to the sale of the material at the rate quoted, because he was fearful that it would establish a price for such material considerably in excess of what the state is now paying for similar material, and that it might have an adverse effect on future purchases by the state of material of this kind. He offered the suggestion that the material be sold to the contractor on a lump-sum basis, and suggested that perhaps $5,000 would be satisfactory, in view of the probabilities that the contractor will take more than 200,000 cubic yards. The matter was discussed at considerable length, but action thereon was deferred by the Commission pending further information. The Engineer was instructed to confer with Morrison-Knudsen Company with respect to the sale of the material on a lump-sum basis, and to report back to the Commission the results thereof.

The Engineer reported immediately following luncheon on the following day the results of his contact with the contractor. He stated that Morrison-Knudsen Company is willing to pay the state a lump sum of $4,000 for cinders that he takes from this area, and for the privilege of truck hauling the same across a small section of the park; further, that the company will limit its operations to a minimum area, and will comply with all requirements of the state with respect to the preservation of the sightliness of the park, including the leveling off of waste deposits and the cleaning up of the premises when the operations are completed. He recommended acceptance of the company's offer. The Commission approved the arrangement by unanimous vote.

A letter was presented from F. E. Landsburg, District Director, Bureau of Motor Carriers, Interstate Commerce Commission, reporting a complaint to the effect that private automobiles and taxicabs operating between Corvallis and Camp Adair are failing to dim their headlights when meeting oncoming busses transporting Army personnel to and from the camp. Mr. Landsburg asks the Highway Commission to erect appropriate signs with the wording "dim lights for oncoming traffic" at Corvallis and at the entrances to Camp Adair, which he thought would correct the situation and remove this hazard. The Engineer gave as his thought that this is not the concern of the State Highway Department, but is a matter of strict law enforcement. He pointed out that, if the Commission should erect such signs at this location, it would simply mean that similar signs would have to be maintained all over the state, which would necessitate an expenditure of a large sum of money. The Commission concurred in the viewpoint of the Engineer, and thereupon instructed the Secretary to advise Mr. Landsburg accordingly, and to suggest that he present his problem to the Superintendent of the Department of State Police.

The Commission discussed briefly and ordered filed a tear sheet from The Detroit Free Press of Sunday January 24, 1943, under the caption "Highway Bureau a Pawn of Politics."

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission, and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission, by unanimous vote, authorized and instructed the Engineer to make such surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Plans	226-1467	Multnomah	N. W. Front, Doane-20th Ave. Sec. Access Road	2nd - $ 700.00 Total to date $1,700.00
Test Pits	10-1439	Douglas	Sutherlin-Roseburg Section, Pacific Highway	1st - $ 100.00
R/W	21-1463	Lincoln	Siletz Bay-Newport Section, Oregon Coast Highway	1st - $ 400.00
Slide	1-1432	Baker	Weatherly Slide Section, Old Oregon Trail	1st - $ 500.00
Location	14-1420	Hood River	Cascade Locks-Viento Sec., Columbia River Highway	2nd -$13,500.00 Total to date $25,000.00
Plans	18-1443	Klamath	Klamath Falls-Merrill Sec., Klamath Falls-Lakeview Hwy.	5th - $ 500.00 Total to date $3,500.00
Prospect	123-1432	Malheur	Malloy Ranch-Jordan Valley Section, I.O.N. Highway	1st - $2,000.00

The Engineer reported that a number of surveys heretofore authorized by the Commission have been completed. He presented a list of such surveys and reported briefly on each. The Commission approved the reconnaissance survey of the Santiam Highway between Lebanon and Foster in Linn County, and the location survey of the McTimmonds Valley Section of the Dallas-Kings Valley Secondary Highway, in Polk County, but deferred a decision with respect to the following location surveys: Lorane-Anlauf Section of the Territorial Highway, in Douglas County; Forest Boundary-Jones Ranch Section of the Ochoco Highway in Wheeler County; and the Baker County Line-Ontario Section of the Old Oregon Trail in Malheur County. The Engineer was instructed to report more fully at the next meeting with respect to such location surveys, and to have on hand at that time maps of each for the Commission's inspection. The

following resolution approving the Lebanon-Foster reconnaissance survey and the McTimmonds Valley location survey was adopted by the Commission by unanimous vote, upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chessman:

WHEREAS, the State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make surveys on certain sections or portions of the highways of the State of Oregon; and

WHEREAS, pursuant to said authorization the State Highway Engineer has made and completed the said surveys and has filed the maps and plans of the said surveys in the files of the State Highway Commission, in Salem, Oregon; and

WHEREAS, the maps and plans of the said surveys have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission:

NOW, THEREFORE, BE IT RESOLVED that the surveys hereinafter designated and described, together with their identifying map-file numbers, as shown in the map-filing records of the State Highway Commission in its Salem office, be and they are hereby adopted and approved as the surveys of the various portions or sections of highways involved:

File No.	Prefix	County	Type of Survey	Section	Highway
6B7-13	22-1452	Linn	Reconnaissance	Lebanon-Foster	Santiam
6B7-11	127-1423	Polk	Location	McTimmonds Valley	Dallas-Kings Valley

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is authorized to make such minor changes in the said locations as may improve the standards of alignment and grades not inconsistent with the general location of the section of highway involved.

The Commission had under discussion the following requests for extensions of time within which to complete highway construction projects:

Berke Brothers, contract No. 2566, for grading and paving the North Unit, Antelope Creek-Medford Section of the Crater Lake Highway, in Jackson County, requested an extension of time from August 31, 1942, to December 22, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulties in securing all classes of labor, due to wartime conditions, and to extremely wet weather. The

Engineer advised that the principal reason for the delay in completing the work on time was due to the inability of the subcontractor on the paving work to finish another state job as soon as was anticipated, which work was hindered by lack of competent men and rainy weather. Labor difficulties, he said, had considerable effect on the work because it was being carried on in competition with the construction work that was being done at Camp White. Due to the abnormal conditions brought about by the war, he recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote upon motion of Commissioner Schaupp which was duly seconded by Commissioner Chessman.

D. C. and A. L. Williams, contract No. 2573, for furnishing materials for the Baker Rock Production Project on the Old Oregon Trail, Baker-Homestead and Baker-Unity Highways, in Baker County, requested an extension of time from July 31, 1942, to April 3, 1943, within which to complete this job. The reason given for failure to complete the project within the specified time limit was bad weather and other adverse conditions. The Engineer advised that this contract was awarded on April 30, 1942, but the contractor was not able to start work until July 15 because of another contract for paving the La Grande airport. Actual crushing operations, he said, were not completed until December 5, 1942, because of the smallness of the contractor's plant and the large percentage of gravel rejects. The work remaining to be done after December 5, he said, consisted of reshaping the piles of rejects, which work could not be done during the winter months because the piles were frozen and it was necessary to wait until spring for them to thaw. He recommended in view of the circumstances that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote, on motion of Commissioner Schaupp, which was seconded by Commissioner Chessman.

Parker-Schram Company, contract No. 2580, for grading and paving the North Portland Shipyard Access Road, in Multnomah County, requested an extension of time from October 15, 1942, to April 6, 1943, within which to complete this job. They attributed their failure to complete the project within the specified time limit to delays in the securing of necessary right of way, failure of the contractor for the construction of the S. P. & S. Railroad overcrossing structure to complete this job within the anticipated time which prevented completion of the paving work, and wartime conditions and regulations which delayed delivery of emulsified asphalt needed for the sealing of the pavement. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. Motion was thereupon made by Commissioner Schaupp that the

Engineer's recommendation be approved. The motion was seconded by Commissioner Chessman, and was declared by Chairman Banfield to have carried by the unanimous vote of the Commission.

Tru-Mix Concrete Company, contract No. 2598, for grading and topping the Seven Devils Chrome Mine Access Road, in Coos County, requested an extension of time from October 15, 1942, to April 13, 1943, within which to complete this job. They attributed their failure to complete the project within the specified time limit to an increase in the quantity of work to be performed, and to bad weather conditions. The Engineer advised that the materials specified in the contract were found to be unsuitable for use after the rainy season started and in view thereof it was necessary to obtain rock from another source. The change-over, he said, resulted in greatly increasing the amount of material that was furnished, which is the main reason that the work was not completed on time. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote, upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman.

The Engineer reported that contracts Nos. 2566, 2580, 2583, and 2598, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2566, with Berke Bros., for grading and paving the North Unit, Antelope Creek-Medford Section of the Crater Lake Highway, in Jackson County. Completed December 22, 1942.

Contract No. 2580, with Parker-Schram Company, for grading and paving the North Portland Shipyard Access Road, in Multnomah County. Completed April 6, 1943.

Contract No. 2583, with Barham Bros., for construction of the Judkins Point Overcrossing near Eugene, in Lane County. Completed April 16, 1943.

Contract No. 2598, with Tru-Mix Concrete Company, for grading and topping the Seven Devils Chrome Mine Access Road, in Coos County. Completed April 13, 1943.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission discussed briefly the following matters concerning which delegations are scheduled to appear before the Commission on the following day:

Reinstatement of log-hauling permit of Jerry Garris, which was cancelled for overloading:-The Commission decided to let Mr. Garris resume his operations if he will guarantee not to commit future violations in this respect.

Request of G. P. Wadsworth, Woodburn, for removal of trees growing on the highway right of way, in front of his store:-The Commission deferred a decision in this matter, pending discussion of the matter with Mr. Wadsworth.

Conference with representatives of the logging and lumber industries:-Action on this matter was also deferred pending the conference.

Conference with Curry County Court and Elmer Bankus relative to the use of a state park at Port Orford as a Navy aircraft landing field:-Chairman Banfield's suggestion, that the county be granted a 25-year lease to this property, subject to the condition that the county will comply strictly with its proposed agreement with the Navy Department, and will enter into an agreement with the Commission containing the same conditions, and will pay in advance the annual rental charge that the Commission may impose, was approved by the Commission, and it was decided to talk to the delegation on that basis. It was also decided that the area consisting of 40-acre tier of tracts fronting on the ocean should be retained for state purposes.

The Commission adjourned at 5:15 p. m. to reconvene the following morning in the Public Service Building.

Portland, Oregon, May 12, 1943

The State Highway Commission reconvened in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Merle R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction projects, sale of obsolete equipment and scrap materials located at the four highway department equipment plants, sale of tract of land near Medford, and sale of old Knapp Hotel building at Port Orford, were opened and read in conformity with previously published notices, following which Chairman Banfield announced that the award of contracts, sale of tract of land, and sale of Knapp Hotel building would be made at 3:30 p. m. in the same room, but that the bids for the purchase of obsolete equipment and scrap materials are being referred to the Engineer to tabulate, with authority to sell each item to the high bidder in each instance:

ALSEA HIGHWAY
ALSEA MOUNTAIN ROCK PRODUCTION

OBSOLETE EQUIPMENT AND SCRAP MATERIALS

Bids received for obsolete equipment and scrap materials at the highway department shops at Salem, Klamath Falls, Coquille and La Grande. (For details see blueprint tabulation of bids filed in general files.)

Mr. Jerry Garris and his attorney, Mr. Eugene Marsh, McMinnville, came before the Commission in regard to the reinstatement of Mr. Garris's log-hauling permit which was recently cancelled by the Public Utilities Commissioner, upon recommendation of the State Highway Commission, because of the numerous overload violations that have occurred involving Mr. Garris's equipment. Mr. Guy Haynes, owner of the Carlton mill which Mr. Garris was supplying with logs, was also present. Mr. Marsh was spokesman. He advised that Mr. Garris has been operating thirteen trucks in this service, and that the Carlton mill is depending on the logs which Mr. Garris has been supplying, and unless Mr. Garris is allowed to resume his operations the mill will have to close down because they have only a week's supply of logs on hand. The Engineer advised that there are no state traffic scales in the vicinity of Carlton, so the weighmasters have to depend on portable loadometers to check the loads. A study of the violations, he said, indicates that the overloads have been deliberate. Mr. Garris stated that he has instructed his truck drivers repeatedly not to overload. The men that are able to do this kind of work, he said, are scarce, and it is hard to keep them, so he has to be careful how he handles them, otherwise they will quit and seek employment elsewhere.

Chairman Banfield inquired in what way Mr. Garris can satisfy the Commission that overloading will not continue. He pointed out that the highway

have been constructed for general public use and must be maintained for such purpose. He further stated that the Commission does not wish to be arbitrary in the limiting of loads to certain weights, but it must protect road surfaces. Mr. Garris replied that the Commission would have to take his word for it; also, that there is no profit for him in overloading his equipment, and that he would try his best to keep the loads within the prescribed limits.

Mr. Haynes stated that he has plans to construct a trucking road on the old logging railroad grade out of Carlton, and if this materializes it will not be necessary for the truckers to use the state highway. The Alaska Junk Company of Portland, he said, has purchased the old rails, and it depends on when the rails are removed as to when the roadway will be constructed. The company, he said, has until July 31, 1943, within which to remove the rails.

Mr. Marsh made an urgent plea for reinstatement of Mr. Garris's permit. He alleged that this is the first time that overloading has been brought severely to Mr. Garris's attention, and he believed that this feature should be considered by the Commission.

In reply to the inquiry of Chairman Banfield, Commissioner Schaupp advised that he had no remarks to make. However, Commissioner Chessman stated that he is willing to give Mr. Garris another chance, provided he will "go and sin no more." He also pointed out that some of Mr. Garris's trucks have been observed "laying-out" when the highway department's weighmasters are operating in their vicinity, which indicates to the Commission that the operators were aware that they were overloaded. He cautioned Mr. Garris with respect to such feature.

After further discussion Chairman Banfield concluded the conference by pointing out that the legal weight limit for equipment such as Mr. Garris is operating is 54,000 pounds, plus a 10 per cent tolerance which has been granted by the Legislature in view of the variance in the weight of timber. He advised that the Commission from now on will have no sympathy for him whatsoever in the event that he is apprehended for additional overloads, and inquired whether or not Mr. Garris will respect the law if the Commission authorizes reinstatement of his permit at this time. He also advised Mr. Haynes that the Highway Commission is also holding him more or less responsible for Mr. Garris's actions. Mr. Garris stated that he would do his best to keep within the prescribed weight limit henceforth. Motion was then made by Commissioner Chessman that Mr. Garris be permitted to resume his log-hauling operations under the conditions mentioned by Chairman Banfield. The motion was duly seconded by Commissioner Schaupp, and was declared by Chairman Banfield to have carried by the unanimous vote of the Commission. The Secretary was thereupon instructed to arrange for the reinstatement of the permit at once.

County Judge Nelson B. Higgs of Harney County was present in regard to the improvement of the secondary state highways in his county. The Engineer advised that the Commission on the previous day discussed the report of Maintenance Engineer E. A. Collier on this subject which report indicates that for an expenditure of about $10,000 the secondary highway which extends from Crane to Princeton and Follyfarm could be put in good condition. The suggestion

was also made, he said, that the Diamond Valley Secondary Highway south of Princeton be taken off the state secondary highway system and control of the same be placed under the county, with the understanding that the Highway Commission would place on the secondary highway system in lieu thereof a road which extends westerly from the town of Diamond to a connection with the Frenchglen Secondary Highway. Such arrangement, he said, would eliminate the bad condition that exists at the Round Barn Reservoir where irrigation water has been diverted by County Commissioner Jenkins onto his property in such a manner that water covers the secondary highway, necessitating a detour through a farm to the west of the reservoir.

Judge Higgs did not look with favor upon such substitution of secondary highways, and declared that the only really bad place on this road, other than the section at the reservoir, is northerly from the town of Diamond about one mile. The county, he said, is now maintaining the detour around the reservoir and will continue to do so as long as the condition exists, and will be pleased to do what is necessary to properly maintain the section north of Diamond, if the Commission will reimburse the county for the expense thereof. He added that, while the section north of Diamond is the worst section, there is another short section near Happy Valley that also needs additional rock which the county will supply if the Commission will pay for it.

After further discussion the following arrangement was recommended by the Engineer; viz., that the Highway Commission authorize an expenditure of $10,000 for improvement of the Diamond Valley Secondary Highway and the Crane-Princeton-Follyfarm Secondary Highway, the work on the Diamond Highway to be performed by the county at state expense, and the work on the Crane-Princeton-Follyfarm Road to be done by the state when conditions are right next fall. The recommendation was approved by the Commission by unanimous vote, on motion of Commissioner Schaupp, which was seconded by Commissioner Chessman. Judge Higgs also voiced his approval of the arrangement and thanked the Commission for its commitment.

Mr. G. P. Wadsworth, Woodburn, came before the Commission at this time in regard to the removal of two walnut trees that are standing on the right of way of the Pacific Highway in front of his store building at Woodburn. He said that the bus station has recently been established at his store and the trees interfere with the operation of the busses, so he would like to have them removed. He also said that he wants to maintain a respectable looking place and one of the things that he expects to do is pave the area between the highway and the front of his store, but he can't do so properly while the trees remain in their present location. He stated further that his place of business is outside of the city limits of Woodburn, so the city couldn't require him to construct curbs, notwithstanding which he would be willing to put the curbs in if curbs were also installed on the opposite side of the street. The Engineer advised that it has been the policy of the Highway Commission for many years not to allow anyone to disturb trees that are growing on highway rights of way, and with respect to the trees under discussion the former Highway Commission took a very strong stand. He suggested that construction of standard highway approaches to Mr. Wadsworth's store buildings, confining traffic to certain lanes, would solve the problem.

After considerable discussion the Commission deferred a decision on the matter until its next meeting. The Engineer was instructed to contact Mr. Wadsworth in the meantime and try to work out a solution that would be satisfactory to all parties concerned. The Attorney was instructed to advise the Commission of its legal rights and responsibilities in the matter.

A group representing the logging and lumbering industries, headed by Mr. Orville Miller, President, West Coast Lumbermen's Association, conferred with the Commission in regard to the overloading of logging trucks. Others in the group were: George C. Flanagan, Portland, representing Ostrander Logging Company; R. A. Jeub, Coquille, representing Smith Wood-Products Company; H. J. Cox, Eugene, and Paul C. Stevens, Portland, representing Willamette Valley Lbrm's. Association; Faye Abrams, Eugene, representing Booth-Kelley Lumber Company; Elmer R. Worth, McMinnville, Lumberman; H. C. Patton, Portland, representing Hammond Lumber Company; L. H. Mills, Portland, representing Mist Logging Company; and Guy Haynes, Carlton, representing Carlton Lumber Mill. Mr. Miller stated that his group wants to register with the Highway Commission its sincere desire to cooperate with the Commission in its efforts to stop the overloading of logging equipment, which they appreciate is the cause of considerable of the damage that is occurring to state highways. He pointed out, however, the necessity to market the logs which are badly needed in connection with wartime activities, shortage of trucks, and shortage of men. Chairman Banfield explained that studies which have been made by the Highway Department indicate that the loggers are taking advantage of the tolerances that the Commission has granted in the matter of weights, and are conducting a sort of contest to see which one can get by with the biggest load. He also said that a lot of the truckers have been hiding out with their heavy loads, when they know that the weighmasters are operating in their vicinity. The overloading, he said, is causing considerable damage to the highway surfaces, and the Commission has found it necessary to take drastic action against the loggers, in order to preserve highway surfaces, which is very difficult to do under present wartime conditions, due to scarcity of material, equipment and labor. He pointed out that the highways have been constructed for general public use and not for any one class of traffic.

At his request, Mr. Loran Spaulding, Chief Weighmaster, who was present, cited instances where operators have been observed with overloads on numerous occasions. He particularly referred to certain operations on the Salmon River Highway and on the Three Rivers Highway. In this connection the State Highway Engineer pointed out that it is costing the state about $1,000 per mile annually to maintain these sections, resulting from excessive speed as well as overweight. The Highway Commission, he said, is not financially able to function on that basis; furthermore, the Highway Department is experiencing great difficulty in securing labor and materials, and is also short of equipment. Mr. Miller replied that his group will help all that it possibly can to stop overloading, advising that in his estimation such type of load should not be condoned. He called upon others of the group to express themselves.

Mr. L. H. Mills spoke in behalf of the Mist Logging Company, which is operating in the vicinity of Grand Ronde. He asked the Commission to move

the Grand Ronde scales which, he alleged, are now in a wrong location to accommodate truckers who are obliged to travel about one-half mile out of their way in order to get weighed. Chairman Banfield advised that the Commission will give the matter consideration.

Mr. Jeub, speaking in behalf of the Smith Wood-Products Company, Inc., offered objections to the holding up of trucks for weighing purposes. He alleged that the operators lose too much time in stopping at the scales. He also said that they are handicapped by a shortage of trucks and that they are trying to load the equipment that they now have so that it will not exceed the weight limits, although that is difficult, in view of the fact that no scales are available at the loading points. He alleged that the percentage of overloads is very small. In this connection, and in reply to a question from Mr. Miller, Mr. Spaulding advised that time lost at the scales is small compared with the time that is lost by reason of the "hiding out" of operators who know that they are overloaded.

Mr. George Flannagan advised that the Ostrander Logging Company has installed two sets of platform scales in the woods at a cost of between $10,000 and $15,000, and that all of the company's trucks are weighed at these scales by three men who are on the job continuously, and if an overload is observed the load is corrected accordingly. There is very little chance, he said, of any of the trucks being overloaded after passing these scales. It was his thought that the Commission should waive the requirement that the Ostrander trucks be weighed at the state's scales, if the driver presents a weight slip to the state's weighmaster showing that the load has been weighed on the company's scales and is within the allowable weight limit. An occasional weighing by the state's men, he said, would be satisfactory.

Chairman Banfield advised that reports concerning the operations of the Ostrander Company are favorable. He also said that this day's conference is simply to let the representatives of the logging and lumbering industries know how desperate the case is from the highway department's standpoint, and what the Commission intends to do if overloading continues. The Highway Commission is very sympathetic, he added, but the operators will have to exercise all care possible to avoid overloads. If the Commission finds it necessary to cancel permits, he said, that is just too bad, but the highways belong to all of the people, rather than to a designated few, and must be preserved for general public use. As to relieving the Ostrander Company's equipment from being weighed at the state's scales after being weighed at the company scales, he advised that the Commission will take the suggestion under advisement and will instruct the Engineer to work out a solution if possible. The Engineer suggested that such plan might prove satisfactory if the weight slips were worded properly. In practice, he said that the drivers would hand the weight slip to the state's weighmaster at the state's scales and if no overload were observed, the weighmaster would wave the driver on, and only an occasional load would be weighed on the state's scales, as a check.

Mr. Abrams spoke briefly for the Booth-Kelley Company, and Mr. Patton for the Hammond Lumber Company. Mr. Miller concluded the conference by stating that his group would help the Commission in every way possible in keeping the loads within the specified weight limits.

The Commission adjourned at 12:00 noon and reconvened at 1:30 p. m. in the same room with all members, the State Highway Engineer, the Attorney and the Secretary present.

The Engineer reported results of his contact with Morrison-Knudsen Company relative to the taking of cinders from The Cove Palisades State Park, advising that the company is willing to pay the state a lump sum of $4,000 for this privilege. The Commission approved the arrangement. (See further details in the previous day's record.)

Dr. L. I. Hewes, Chief, Western Division, and W. H. Lynch, District Engineer, of the Public Roads Administration, came before the Commission at this time regarding the following matters:

Approval of the state's request for permission to purchase oil for improving certain city streets that are not on state highway routes:-The State Highway Engineer advised that the Commission has budgeted funds to finance the improvement of certain city streets that are not on state highway routes, and that in connection therewith the Commission has entered into agreements with numerous cities and towns providing for such improvements, which include oiling work and, if the Public Roads Administration will not approve the state's application for the oil, then these agreements will have to be cancelled. He pointed out that the streets that are to be improved are those which are being severely damaged by heavy wartime movements such as log hauling, et cetera. Dr. Hewes stated that he was under the impression that the oiling work was to be done on residential streets that are not concerned with wartime movements; however, that appears not to be the case. He suggested that new applications be filed with more details as to what use the oil is to be put, and the necessity for the improvements. Such applications, he said, should be filed separately for each job, inasmuch as the Public Roads Administration cannot approve a blanket authorization. He indicated that the Commission's request would be approved if it were submitted in such form.

Governmental approval for the proposed improvement of the I.O.N. Highway:-The State Highway Engineer advised that the Highway Commission has approved this project and wants to know as soon as possible whether or not the federal authorities will approve it, because the job must be gotten under way soon if it is to be completed this year. Mr. Lynch advised that full information in regard to this project is now in Washington, D. C., and he is expecting definite action soon. He gave as his thought, however, that it would be satisfactory for the state to proceed with necessary surveys. Dr. Hewes stated that he could not guarantee that the War Production Board will approve the project. The highway must be constructed some time, he said, because it is an interstate highway and the main argument for building it now is its importance in the transportation of gasoline and oil products from California to the airports at Mountain Home and Boise, Idaho. He suggested that, if the War Production Board does not make its decision within a reasonable length of time, action be started through Oregon's delegation to Congress. Mr. Lynch, he said, will advise when the time is propitious to start such action.

The State Highway Engineer then asked the Commission for authority to complete the survey for this project, which he estimated would cost about

$3,000. The Commission approved the request by unanimous vote upon motion of Commissioner Schaupp which was duly seconded by Commissioner Chessman, it being understood that the expenditure shall not exceed the sum of $3,000.00.

Completion of construction of the Quartz Mountain Section of the Klamath Falls Highway:- The State Highway Engineer advised the State Highway Commission that the construction of the Quartz Mountain Section of the Klamath Falls-Lakeview Highway, under a forest highway contract held by Sam Orino under direction of the Public Roads Administration, was about 50 per cent complete, the contractor had quit working, and the section was in very unsatisfactory condition for traffic. The contract was let for approximately $200,000 the State of Oregon furnishing half of that amount. The Engineer recommended that the Public Roads Administration be requested either to compel the contractor to finish the job or call upon the surety to do the work. He stated that, under the new controlled-materials plan, it was his opinion that a high enough priority rating could be secured to do the job. The Engineer further recommended that, if the Public Roads Administration did not see fit to do either of these things, it be requested to do such work as would place the road in passable condition for the duration, involving an expenditure estimated to be about $15,000. Mr. W. H. Lynch, District Engineer of the Public Roads Administration, stated that the contractor has neither material nor equipment available, and cannot secure labor. Mr. Schaupp, Commissioner from Klamath Falls, stated that he did not believe the contractor would experience any labor difficulties in that vicinity. Chairman Banfield asked Dr. Hewes, Chief of the Western Region, Public Roads Administration, and Mr. Lynch what they could do about the situation. Dr. Hewes was doubtful if the government could force the contractor to complete the job. After further discussion it was agreed that the Public Roads Administration would give consideration to completing the work, and would look into all factors involving priorities, labor, etc. Mr. Lynch stated that in case the contract could not be completed the Public Roads Administration would at least do such work as to make the road passable for the duration.

Mr. W. J. Avison, Executive Director, Clackamas County Housing Authority, was present and requested permission to construct a service road connection with the Pacific Highway East (McLoughlin Blvd.) about midway between the north and south limits of the housing project north of Milwaukie. He advised that the Housing Authority has purchased a fire truck which it expects to house on the east side of the highway, but it is also to be used to extinguish fires that may occur on the west side of the highway, so the highway crossing is necessary. In order to safeguard highway traffic, he said, the Housing Authority would install a traffic signal over the intersection, which would be electrically controlled from the fire-engine house. The Engineer recommended approval of Mr. Avison's request, subject to the conditions that the state be not called upon to contribute toward the cost thereof, and that the traffic signal be installed by state forces. Mr. Avison stated his approval of the state's installing the traffic signal, which is to be purchased by the Housing Authority. After discussion the Commission by unanimous vote approved Mr. Avison's request, subject to the conditions mentioned by the Engineer.

County Judge A. H. Boice and County Commissioner Claude M. Clayton, representing the Curry County Court, and Mr. Elmer Bankus, Brookings, came before the Commission in regard to the use of the state park property at Floras Lake, in Curry County, as an aircraft landing field. Judge Boice headed the group and explained the object of the visit. He called upon Mr. Bankus to give the details. Mr. Bankus recited the history of the case. Chairman Banfield advised that the State Highway Commission from the first has been ready and willing to cooperate with the county and the federal authorities in the securing of this airbase, and is still willing to cooperate to the fullest extent of its ability, provided the property does not go into private ownership. He further stated that the Commission felt at first that it would be possible for the county and the state to act as cosponsors for the project; however, it appeared to be an impossibility, so the Commission offered to lease the property to the county on the same basis that the county expects to re-lease it to the Federal Government, and the Commission is still willing to do that. Mr. Bankus inquired how long a lease the Commission is willing to give the county. He pointed out that a 25-year lease is the minimum that the government will approve.

Chairman Banfield advised that the Commission will lease the property for 25 years if that is necessary, but such lease must be on the basis of the property remaining public property, and that the county will agree to maintain and operate the premises in strict accordance with its agreement with the Federal Government. The Commission, he added, has spent state funds to acquire this property, and doesn't want it to get into private hands. Mr. Bankus then asked if that meant that they could not re-lease the property, to which Chairman Banfield replied in the affirmative. Mr. Bankus then asked if the county could lease concessions, to which Chairman Banfield replied that the Commission does not object to that feature, provided the county will agree to comply strictly with its agreement with the state, the terms of which are to be the same as the terms under which the county expects to re-lease the property to the government under its AP-4 Resolution.

Chairman Banfield further stated that the Commission wants to retain the ocean frontage for its own uses, so any agreement that is reached will provide that the airfield must stay back away from the ocean a sufficient distance to provide at least a tier of 40-acre tracts between the ocean and the airfield. The area to be reserved by the state, he said, will be determined definitely by the Engineer and a description thereof will be incorporated in the agreement. He added that the agreement would also provide that if the airport is not built, then the lease is to become null and void. Commissioners Schaupp and Chessman concurred in the statements made by Chairman Banfield, making the action unanimous. The Attorney was thereupon instructed to prepare an appropriate form of lease agreement covering the matter, the contents of which are to be communicated to the members of the Commission before the agreement is sent to the county for execution.

Mr. J. S. Burres, Moro, appeared before the Commission at this time, and presented an oral request for minor improvements to the Cottonwood Grade Section of the Wasco-Heppner Secondary Highway. He was informed by the Engineer

that the Commission on the previous day authorized an expenditure of $5,000 to improve this section, if approval can be secured from the War Production Board for the expenditure, and if investigation reveals that the work can be done for such an amount. Mr. Burres inquired whether or not the Commission would allow him to do the work, in the event the War Production Board's approval cannot be obtained. He was informed by the Engineer that that would not be necessary, because the Commission has authority to spend up to $1,000 without approval of the War Production Board, and he would see to it that at least that much money would be spent on the project. (For further details see action taken by Commission on the previous day.)

At 3:30 p. m. Chairman Banfield made the following announcement with respect to the award of contracts, sale of land at Medford, sale of the Knapp Hotel building at Port Orford and sale of obsolete equipment and scrap materials, bids for which were received by the Commission at the morning session, such awards and sales having previously been approved by the Commission by unanimous vote:

"Alsea Mountain Rock Production Project on the Alsea Highway, in Benton County. No bids were received on this project.

"Trail Rock Production Project on The Tiller-Trail and Crater Lake Highways, in Jackson County. M. C. Lininger & Sons, Medford, submitted the low bid for this project in the amount of $35,000.00. The only other bid received was that of Tru-Mix Concrete Company, Medford, in the amount of $36,500.00. The Commission awarded this contract to the low bidder, M. C. Lininger & Sons, at their low bid of $35,000.00.

"Madras Rock Production Project on the Warm Springs and The Dalles-California Highways, in Jefferson County. No bids were received on this project.

"Crescent Rock Production Project on The Dalles-California Highway, in Klamath County. The only bid received was that of Clifford A. Dunn, Klamath Falls, at $39,000.00. The Commission rejected this bid.

"Clean and repaint the Yaquina Bay Bridge on the Oregon Coast Highway at Newport, in Lincoln County. Two bids were received for this project, the low one being that of George C. Clark, Portland, at $27,500 based on Alternate No. 1, and $25,000 based on Alternate No. 2. The other bid was that of Tower Sales and Erecting Company, Portland, at $34,000 based on Alternate No. 2. No bid was submitted based on Alternate No. 1. The Commission awarded this contract to the low bidder, George C. Clark, at his bid of $25,000 based on Alternate No. 2.

"Construction of a concrete base and erection of foremast of the Battleship Oregon, in the city of Portland, Multnomah County. Nine bids were received for this project, the low one being that of

Lindstrom Brothers, Portland, at $1,630.00, and the second-low being that of Hord & Stuart, Portland, at $1,780.00. The Commission referred all bids received to the Engineer with power to award the contract to Lindstrom Brothers, the low bidders, when certain conditions have been satisfied.

"Construction of the Baker Creek Bridge on the Scholls Secondary Highway, in Washington County. Eight bids were received for this project, the low one being that of Johnston Brothers, Newberg, at $8,619.00, and the second-low bid being that of O. N. Pierce, Portland, at $9,165.00. The Commission awarded this contract to the low bidders, Johnston Brothers, at their bid of $8,619.00.

Sale of tract of land near Medford:

"The only bid received for the purchase of this tract of land was that of Jesse L. Richardson, Medford, at $560.00. The Commission rejected this offer.

Sale of Knapp Hotel building at Port Orford:

"Two bids were received for this building, the high one being that of Walter L. Strain, Langlois, at $287.00, and the other being that of Sullivan Wrecking Company, Portland, at $27.97. The Commission has referred the bids to the Engineer and the Attorney, with power to sell the building to Walter L. Strain, the high bidder, at his bid of $287.00, in the event inquiry reveals that the building is not wanted by the Oregon Historical Society or any of the Women's Organizations, which are interested in its preservation from the historical standpoint, it being understood that the organization desiring the building must pay for its removal from the highway right of way.

Obsolete equipment and scrap materials:

"Sale of obsolete equipment and scrap materials at Salem, Klamath Falls, Coquille and La Grande. All bids received for the purchase of this material have been referred to the Engineer with power to sell the material to the high bidder in each instance, if the bids compare favorably with the appraised value of the items."

Reconsideration was given by the Commission to the claim of contractor Homer G. Johnson for extra compensation arising out of his contract with the Commission for the construction of the Siletz-Toledo Section of the Siletz Secondary Highway, in Lincoln County, contract No. 2390. Commissioner Schaupp stated that from his study of the facts he did not believe that Mr. Johnson is entitled to extra compensation. He thereupon moved that the claim be denied. The motion was duly seconded by Commissioner Chessman and was declared by Chairman Banfield to have carried by unanimous vote.

The Commission discussed overweight violations that have been committed by commercial haulers who are operating under the Highway Commission's emergency wartime permits. It was the order of the Commission that these violators be given the same treatment for overloading as is given log haulers. The Secretary was instructed to again notify operators who are consistent violators of the weight requirements that the Commission intends to cancel their permits if they do not stop overloading, and to convey similar information to other operators whose overloads are flagrant. The Engineer was instructed to telephone the individual members of the Commission for further instructions when an extra bad overload is reported.

In this connection, the Secretary inquired as to what action the Commission wishes to take against Peter Murphy and Leo Howard, who are consistent violators of the weight requirements in connection with the truck-hauling of logs. He was instructed by the Commission to warn these operators that their permits will be cancelled the next time that they are caught with overloads. He was also instructed to give the same notification to other violators of the log-hauling rules. In other words, all of such violators are to be given one letter of warning that their permits may be cancelled if overloads continue.

Commissioner Schaupp brought up for discussion the matter of purchase from the City of Klamath Falls of certain city-owned lots, portions of which are needed for the proposed improvement of the Klamath Falls-Lakeview Highway along South Sixth Street, in Klamath Falls. He said that the city has been asked for only enough of these lots to provide the standard width right of way, which leaves fractional lots which are of not much value from the city's standpoint, in view of which the city feels that the Commission should acquire the entire lot in such instances. After discussion the Commission decided by unanimous vote to acquire the entire lot in instances of this kind, and instructed the Attorney accordingly.

Commissioner Chessman tendered his oral resignation as a member of the Highway Commission's Advisory Committee on Travel and Information Matters, it being his thought that he no longer can serve on such committee, inasmuch as he is now a member of the State Highway Commission. The Commission accepted the resignation, whereupon Commissioner Chessman placed before the Commission the name of Mr. Arch B. Sanders, Executive Secretary of the Oregon Coast Highway Association, Marshfield, as his successor on the committee. He moved the appointment of Mr. Sanders in his place. The motion was duly seconded by Commissioner Schaupp, and was declared by Chairman Banfield to have carried by the unanimous vote of the Commission.

Commissioner Chessman also brought up the matter of election of a Chairman of the Highway Commission, pointing out that this is the first time that the present members of the Commission have met formally since taking office, and giving as his thought, in view thereof, that the election of a Chairman is in order. He moved that Chairman Banfield be continued as Chairman of the Commission. The motion was duly seconded by Commissioner Schaupp and was declared by Chairman Banfield to have carried.

Commissioner Chessman reported receipt of a petition from patrons of the Lewis and Clark Consolidated School District, Astoria, requesting the construction of a sidewalk along the Oregon Coast Highway between Miles Crossing and the Lewis and Clark Bridge, for the benefit of school children and other pedestrians. The matter was referred to the Engineer for investigation and report at the next meeting.

The Commission discussed the setting of a date for its next regular meeting to receive bids, and decided to hold such meeting in Portland on Wednesday, June 16, 1943. The Commission also decided to hold a meeting in the Imperial Hotel on Tuesday afternoon, June 15, to dispose of accumulated routine matters. The Secretary was instructed to make the usual arrangements for rooms in which to hold these meetings.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Southern Pacific Company providing for construction of an attachment for an overhead pedestrian walk on the railroad which spans the Pacific Highway at Milwaukie.

Agreement with Benton County, Polk County, and the City of Independence covering maintenance of the county road between Independence and Granger.

Agreements with the following cities covering work to be performed on city streets which are not on the highway system: Monroe, Myrtle Creek, Drain, Pendleton, and Umatilla.

Field agreement with the United States Department of Interior, Grazing Service, covering preservation of juniper wayside strips along the McKenzie Highway between Sisters and Redmond, and along the Ochoco Highway between Redmond and Prineville.

Letter directed to Thomas H. MacDonald, Commissioner of Public Roads, Washington, D. C., authorizing R. H. Baldock, State Highway Engineer, C. B. McCullough, Assistant State Highway Engineer, S. H. Probert, Office Engineer, and J. W. Nash, Assistant Office Engineer, to sign reimbursement vouchers chargeable to federal funds made available to the State of Oregon for construction and improvement of highways.

There being no further business to come before the Commission at this time the meeting was adjourned at 3:45 p. m.

State Highway Engineer

Secretary

Chairman

Commissioner

Commissioner

MAY 12 1943

Portland, Oregon, June 15, 1943

The State Highway Commission met in regular session at 1:30 p.m. in room 615 (Imperial Room), Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission by unanimous vote approved the minutes of the meetings held on April 6 and 7, April 27 to 30 inclusive, and May 11 and 12, 1943, upon motion of Commissioner Schaupp which was duly seconded by Commissioner Chessman.

Chairman Banfield approved the minutes of the meeting of the Commission that was held on March 16 and 17, 1943. Commissioners Schaupp and Chessman were not asked to approve this set of minutes, inasmuch as their appointments as members of the State Highway Commission did not become effective until later.

The Assistant Attorney requested authority to purchase certain parcels of real property that are needed in connection with various highway improvements throughout the state. He submitted a list of such properties, together with offers that he recommended be made in connection with each parcel. After careful consideration of the individual items, the Commission approved the request and by unanimous vote adopted the following resolution with regard thereto:

> WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and
>
> WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and
>
> WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;
>
> NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the

acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Assistant Attorney also requested authority to institute condemnation proceedings to acquire other properties which are needed in connection with highway improvements and which he has been unable to acquire by negotiation. He submitted a list of such properties, together with offers which he recommended in condemnation as follows:

File No.	Name	Purpose Required	Recommended Offer
Lewis & Clark Bridge-Warrenton Junction Section of the Oregon Coast Highway			
10881	Zilpha M. Taylor	Right of Way	$50.00
10882	Authur E. Davis	"	$50.00
10884	Edna Montgomery	"	$50.00
Molloy Ranch-Hooker Creek Section of the I.O.N. Highway			
10374	Frank Purser Estate	Right of Way	$700.00

After discussion the Commission approved the request and adopted the following resolution in regard thereto by unanimous vote upon motion of Commissioner Schaupp which was duly seconded by Commissioner Chessman.

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and also access roads or other roads in which the Federal Government is interested, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Mrs. Zilpha M. Taylor, which property is located in Lot 6, Block 92, Warrenton Park, Clatsop County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 10881, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway;*

Real property owned by Arthur E.Davis, which property is located in Lot 5, Block 92, Warrenton Park, Clatsop County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 2 and is further identified in the records of the Highway Commission as file R 10882, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway;*

Real property owned by Edna Montgomery, which property is located in Lot.1, Block 92, Warrenton Park, Clatsop County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 3 and is further identified in the records of the Highway Commission as file R 10884, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway;*

Real property owned by the Frank Purser Estate, which property is located in the northwest quarter ($NW\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 26, Township 28 South, Range 46 East, W. M., Malheur County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 4 and is further identified in the records of the Highway Commission as file R 10374, and which property is being acquired for right of way purposes in connection with the I. O. N. Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

---

*The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 36, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Commission confirmed by unanimous vote the resolution adopted at the previous meeting authorizing the Attorney to condemn certain real property that is needed from the Western Loan and Investment Company and S. A. Swayne, in connection with the proposed improvement of the I. O. N. Highway in Malheur County.

The Engineer discussed briefly with the Commission the following matters concerning which delegations are to appear before the Commission on the following day:

1. Reinstatement of log hauling permit of Leo Howard, which was cancelled because of violations of the overweight requirements.

2. Request for construction of a bridge over the Willamette River at Independence.

3. Request for state aid in construction of a proposed improvement of High Street in Eugene.

4. Request of J. P. Wadsworth for removal of two walnut trees growing on Pacific Highway in front of his drugstore in Woodburn.

5. Request of the City of Tillamook for repairs to state highways which are being damaged by heavy traffic in Tillamook County.

The Engineer reported on the insurance that is now carried on state highway department buildings and structures, as previously instructed by the Commission. He advised that the only insurance that is now carried other than that provided by the State Restoration Act, is War Damage Insurance as follows:

Policy	Coverages		Premium
1151-66-307	Interstate bridges	$1,000,000.00	$ 1,200.00
1151-66-308	Bridge structures	16,243,110.00	19,491.73
1151-66-309	Cars in storage	11,703.25	17.55
1151-66-310	Building schedule	671,684.15	604.52
1151-66-311	Storehouses	446,301.16	361.50
1151-66-312	Laboratory Building	129,469.71	77.68
		TOTAL	$21,752.98

Included under the bridge structures, he said, are the Coast Highway bridges and those located on state highways west of the Cascade Mountains that are valued at $50,000.00 or more. It was his thought that the insurance furnished under the State Restoration Act is not sufficient because, in the event of the burning of one of the large buildings in the state building group at the same time that one of the highway department buildings burns, the available funds would not be ample to restore both buildings. He recommended, in view thereof, the purchase of private insurance coverage on all the highway department buildings based on appraised values as follows:

Location	Original Cost Plus Improvements
Salem Shop Buildings	$ 292.057.20
Coquille Shop Buildings	33,460.02
Klamath Falls Shop Buildings	45,230.92
La Grande Shop Buildings	64,935.01
Division No. 1, Maint. Park & Office Bldg.	116,210.72
Division No. 2, " " " "	157,987.09
Division No. 3, " " " "	132,151.30
Division No. 4, " " " "	171,419.20
Division No. 5, " " " "	159,919.80
Truck Scale Houses, 49 at $500.00	24,500.00
TOTAL	$1,197,871.26

He also recommended renewal of the present war damage insurance coverage that is now in effect.

The Attorney advised that the Commission has authority to purchase private insurance coverage on these buildings if it so desires, regardless of the availability of the restoration act funds.

Mr. Leslie Wadsworth, President of the Oregon State Insurance Agents Association who was present, advised that the premium on the war damage insurance will be $21,753.28 annually. Also that the premium for fire insurance coverage on the highway department buildings for a period of three years will be $36,000.00. He further stated that if the Commission approves the purchase of this insurance, he would like to handle the business in behalf of the association that he represents, which, he said, includes eighty-five per cent of all of the agencies that are authorized to write insurance in the State of Oregon, each of whom would participate. After discussion motion was made by Commissioner Chessman that the war risk insurance now carried by the Commission be renewed for a one year period, and that the Commission purchase private insurance coverage on all highway department buildings on a three year basis; also, that the business be given to the Oregon State Insurance Agent Association. The motion was seconded by Commissioner Schaupp and was adopted by the Commission by unanimous vote. The matter was thereupon referred to the Engineer to handle the details.

The Engineer reported on investigations that have been made relative to the construction of a sidewalk along the Oregon Coast Highway between Miles Crossing and Lewis and Clark Bridge near Astoria, as has been requested by citizens of that vicinity in the interests and safety of school children and other pedestrians. He advised that the sidewalk would be about 0.8 mile in length and that construction would cost approximately $5,000.00. He pointed out, however, that the prevailing right of way width along this section is only 40 feet, so in the event the Commission approves the project it would be necessary to acquire additional right of way a portion of which he thought would be donated. Commissioner Chessman advised that there is urgent need for a sidewalk along this section, in view of the large number of children who are obliged to walk to and from school, which will be greater when the Federal Housing Project, which is now under construction, is finally completed. After discussion the Commission indicated a favorable attitude toward the project, but deferred a definite decision pending investigation as to the possibility of acquiring the extra right of way. The Attorney was instructed to contact the several property owners and to secure options if possible so as to give the Commission an idea what the right of way will cost. A report on the subject is to be made to the Commission as soon as the information has been obtained.

A letter was presented from E. L. Kramer, City Manager of Milton, requesting reconsideration by the Commission of its decision in the matter of cooperating with the city to improve drainage conditions along the Oregon-Washington Highway in Milton. The Engineer advised that the former Highway Commission authorized a contribution of $2,500.00 of state funds to assist in financing such project, but that Mr. Kramer feels that the state should

pay a greater share of the costs because of the benefits that the highway will receive. He gave as his thought that the contribution as previously authorized is sufficient, and recommended against Mr. Kramer's request. Motion was made by Commissioner Schaupp that Mr. Kramer's request be denied. The motion was seconded by Commissioner Chessman and was declared by Chairman Banfield approved by the unanimous vote of the Commission.

The Engineer reported that in compliance with telephonic authority given him by the Commission he has erected signs on the Little Nestucca Secondary Highway prohibiting the use of this road by logging trucks, either loaded or empty, between mile post 9.4 and mile post 5.2, because of the damage that such trucks have been causing this road. The Commission confirmed the action by unanimous vote.

The commission considered the advisability of penalizing log haulers that are operating with an insufficient number of binder chains around their loads. The Engineer advised that the permits issued by the Public Utilities Commissioner requires the operators to tie their loads with at least three binder chains, however, in numerous instances loads of logs are being transported over state highways with only one binder chain, and in some cases no binder chains whatsoever are used, which creates a hazardous condition for other traffic. The Commission instructed the Secretary to notify such operators that the Commission expects them to comply with the regulations and if violations continue they will be reported to the Commission for further instructions.

The Secretary reported on violations that have been committed by common carriers who are operating under the privilege of the Commission's emergency transportation permits. After considerable discussion the Commission ordered that such operators be given the same treatment that is given log haulers. The Engineer was instructed to telephone the individual members of the Commission for instructions when flagrant violations are reported. The Secretary was authorized to discontinue the practice of sending warning letters to the individual operators.

In this connection a report was presented from the Department of State Police concerning an overload involving equipment owned by Los Angeles Seattle Motor Express. It appears that the gross weight in this instance was 3,500 pounds over and above the tolerance allowed by the Commission. The Commission decided not to cancel the permit of this carrier for this offense, however, ordered that further violations by this company be brought to the Commission's attention.

The Commission discussed a letter from C. H. Watzek, Manager of the Roaring River Logging Company, in regard to extending the time limit of the company's agreement with the Highway Commission covering the maintenance of the Richardson Gap Road in Linn County. The Engineer explained that about a year ago the former Highway Commission entered into an agreement with this company and the Linn County Court for the improvement and maintenance of the Richardson Gap Road, whereby the company paid to the state the sum of $3,000.00 with the understanding that the State Highway Department would maintain the road in good condition for the operation of logging trucks for the 18 months

period ending December 31, 1943. The State Highway Commission, he said, entered into a contract with the Salem Supply Company for the improvement of the road, but because of war time conditions construction was delayed and the road was not maintained satisfactorily for log hauling traffic so it was necessary for the company to discontinue such operations in November after about one months hauling. Because of this condition, he said, and in view of the Company's $3,000.00 contribution, the Company now wants the original agreement amended to extend the maintenance work by the state from December 31, 1943 to July 1, 1944. He stated his approval of this request. The Commission approved such extension by unanimous vote.

The matter of sale of secondhand railroad signal material which was salvaged from the revision of the Southern Pacific car tracks in connection with the reconstruction of the Pacific Highway South of Eugene had the attention of the Commission. The Engineer advised that the Southern Pacific Company wishes to purchase this material and has offered to pay war time ceiling prices for the same, totaling $1,546.39. He recommended acceptance of the Company's offer with respect to all of the material, except one or more of the magnetic wigwag signals which the Commission may wish to retain for installation at other locations. After discussion the Commission approved the request by unanimous vote upon motion by Commissioner Schaupp which was duly seconded by Commissioner Chessman.

A request from the Oregon Lumber Company for relief from the maintenance of a flagman at the point where the company is hauling logs directly across the John Day Highway near Austin Junction had the attention of the Commission. Action on this matter was deferred by the Commission until its next meeting when a report is to be made as to how many other companies are operating under like or similar conditions.

The Commission discussed and approved a request from the United States War Department for the utilization of certain bridges on state highways in the vicinity of Bend for the purpose of training men in the demolitions specialty school which is being conducted at Camp Abbot. The action of the Commission in this regard was unanimous upon motion of Commissioner Chessman which was duly seconded by Commissioner Schaupp and was with the understanding that the bridges will not be damaged.

A resolution was presented from the County Court of Deschutes County requesting in behalf of the Commanding Officer of Camp Abbot, the establishment of a thirty-five mile per hour speed limit along The Dalles-California Highway between the city limits of Bend and Camp Abbot. The Engineer advised that under existing laws the Commission has the authority to zone highways for speeds based upon an engineering and traffic examination by the engineer and may reduce speeds below the speed limit allowed by statute if the examination shows that the geographic design or the traffic congestion warrants such speed reduction. He gave as his thought that it would be impossible to justify a thirty-five mile per hour speed limit for this section based upon those factors. He pointed out, however, that under proclamation by the President, which was approved by the former Governor Sprague, the wartime speed limit in Oregon is now thirty-five miles per hour.

He suggested that the Commission authorize the signing of the section under question for such war time speed limit, which in his estimation would satisfy the purpose. The commission approved the suggestion by unanimous vote and thereupon instructed the Engineer to erect and maintain signs in conformity therewith.

The Engineer brought up for discussion the question whether or not to purchase an additional supply of picture post cards for free distribution to soldiers and sailors through facilities of the United Service Organizations and similar agencies. He advised that under authority from the former Highway Commission 580,000 of such cards were printed at a cost of $2,656.00, but the demand for them has been so great that the supply is about exhausted. A re-run of the series of cards, he said, will cost $1,250.00, and if the Commission wants to continue the practice, it should place an order soon, as it takes quite some time to get them. He recommended favorable consideration by the Commission, and the increasing of the Travel and Information budget in the amount of $1,250.00 to cover the expense. After discussion, the Commission approved the recommendation by unanimous vote upon motion of Commissioner Chessman, which was duly seconded by Commissioner Schaupp.

The Attorney reported receipt of a letter from the Oregon Automobile Insurance Company, offering the sum of $200.00 as settlement in full of the Commission's claim of $277.61 against Mr. Peter Murphy, log hauler, for damaging the truck scale house at Grand Ronde. He recommended acceptance of the company's offer in order to dispose of the claim and to avoid a law suit. The Commission approved the recommendation by unanimous vote, on motion of Commissioner Schaupp, which was seconded by Commissioner Chessman.

The Attorney brought up for discussion the state's claim against J. F. Reading for damaging a traffic signal on the Pacific Highway, in Oregon City. He recalled that the claim was for $72.00 and that the former Highway Commission authorized settlement with Mr. Reading on a 50-50 basis, payments to be made by Mr. Reading at the rate of $3.00 per month. Mr. Reading, he said, has faithfully paid every month the amount due, but he is now asking to be relieved from strict compliance with the provisions of the settlement, because he is under heavy expense for other purposes. The Attorney recommended, in view of the fact that only a small amount remains to be paid, that the balance of the claim be cancelled. After discussion, theCommission approved the recommendation by unanimous vote, upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman.

The Engineer reported that in conformity with authority previously granted him by the Commission, he awarded to Lindstrom Brothers, on June 4, 1943, the contract for the erection of the foremast of the Battleship Oregon, in Portland, bids for which were taken by the Commission on May 12, Lindstrom Brothers being the low bidders, and the conditions of the award having been satisfied. The Commission, by unanimous vote, confirmed the award of this contract as reported.

The Engineer also reported that in conformity with authority previously granted him by the Commission, he had sold the obsolete equipment

and scrap materials for which the Commission received bids at its meeting on May 12, 1943. The sale was made to the high bidder in each instance, after a careful check of the proposals. The Commission by unanimous vote approved the action taken by the Engineer in this matter.

The Commission had under discussion matters pertaining to the use of state highway department equipment and the employment of highway department personnel in connection with defense activities. The Attorney explained that Governor Earl Snell, through the Office of Civilian Defense, has requested cooperation of the State Highway Commission and the state highway department, in connection with any public emergency or catastrophe which may be caused by air raids, sabotage, or any other acts of the enemy, and that it was the thought of the Engineer, if the Commission approved such cooperation, that some means should be provided for the safeguarding of highway department employees, particularly to maintain their status with respect to the protection they enjoy through the State Accident Commission. It was his thought that the Commission should make an appropriate order in regard thereto. After discussion, the Commission approved the suggestion, and thereupon by unanimous vote adopted the following resolution pertaining to the subject, upon motion of Commissioner Chessman, which was duly seconded by Commissioner Schaupp.

WHEREAS, the Governor of the State of Oregon, acting by and through the Office of Civilian Defense, has requested the cooperation of the State Highway Commission and the State Highway Department in connection with any public emergency or catastrophe which may be caused by air raids, sabotage or other acts of the enemy; and

WHEREAS, the Oregon Legislature enacted into law Chapter 140, Oregon Laws, 1943, Section 2 of which act reads as follows:

"Section 2. It is hereby found and declared that it is necessary, because of the war in which the United States of America is engaged, to grant to the governor certain emergency powers to provide for the health, safety and welfare of the people of the state of Oregon; and to provide for the creation of state and local defense agencies.

"It is further declared to be the purpose of this act and the policy of the state thereby to assist the president of the United States of America, as commander-in-chief of the army and navy, in the successful prosecution of the war; to cooperate with the federal government and other states in matters relating to the war effort; to meet the extraordinary conditions and problems resulting in this state from the war by establishing such organizations and taking such steps as are necessary and appropriate to carry out the provisions of this act; and,

generally, to defend the state, protect the public peace, health, and safety, and to preserve the lives and property of the people of the state."

AND, WHEREAS, it is the purpose of the Highway Commission to cooperate with the Chief Executive of the State of Oregon and with the President of the United States of America in all matters having to do with the prosecution of the war, the defense of the nation and the preservation of health, safety and welfare of the people of the State of Oregon; and

WHEREAS, it is not unlikely that the service of the Highway Department force and employes may be needed in emergencies or catastrophes caused by air raids, sabotage, or other enemy acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Oregon State Highway Commission, as follows:

1. That highway equipment and highway employes shall be deemed available and subject to the call of the Governor of the State of Oregon or defense agencies under the control and supervision of the Governor, and that said equipment and employes may be called upon to serve not only within the limits of rights of way or other properties owned and controlled by the State Highway Commission, but outside and beyond such limits, if such equipment and such service is necessary for the protection of the general public.

2. That in the discharge of any such duty or in the performance of any such work by any state employe such employe shall be deemed to be in the performance of his duty as a member of the Highway Department and shall be entitled to all protection now available to such employe while in the discharge of his duties or in the performance of his work.

3. This resolution shall be entered in the minutes and records of the Highway Commission and a duly certified copy thereof delivered to Honorable Earl Snell, Governor of the State of Oregon, and a certified copy to the Administrator of the Office of Civilian Defense.

The Engineer requested authority to purchase and install at Fort Klamath, one distant receiver and automatic ultra-high-frequency transmitter which is necessary to improve radio reception and to eliminate unsatisfactory conditions that are now causing considerable trouble at the Klamath Falls radio station. He estimated the cost involved at $1,500.00. The Commission approved the request by unanimous vote, upon motion of Commissioner Chessman, seconded by Commissioner Schaupp.

The Commission by unanimous vote confirmed the telephonic authority previously given the Engineer to purchase from the Coos Bay Dredging company a ½-yard Owens Clamshell bucket, at a cost of $350.00.

The Commission discussed briefly and referred to Commissioner Chessman a communication from Mr. B. F. Howard, Shedd, Oregon, transmitted through Mr. George K. Aiken, Executive Secretary to Governor Snell, with respect to the maintenance of a highway sign at Franklin, sometimes known as "Smithfield", on the Territorial Secondary Highway, in Lane County.

The Engineer brought up for discussion the advisability of joining with logging companies in the repair of state highways that are being severely damaged by log-hauling operations. He advised that he is in receipt of information to the effect that the Hammond Lumber Company, which is operating in the vicinity of Lebanon, is willing to furnish labor as may be required for such repair work, if the State Highway Commission will furnish the necessary materials and equipment. He gave as his thought that such an arrangement would work out to good advantage, due to the fact that the highway department is experiencing considerable difficulty in securing labor on account of wartime conditions. The matter was discussed at considerable length and as a result thereof the Commission, by unanimous vote, approved such an arrangement subject to the condition that the state will not be obligated to do more than carry on the usual maintenance work after the repairs are completed, and that the operators will not expect to receive weight concessions over and above the tolerances that they are allowed under the present rulings.

The Commission has under discussion a request from the City of Albany for the improvement of Geary Street at the eastern city limits of Albany, which street the city alleges is being severely damaged by logging trucks. The Engineer advised that the Commission's agreement with the city provides for an expenditure this year of $2,751.00, for the maintenance of several streets that are not on the state-highway system. Investigations reveal, he said, that it will cost about $875.00 to do the extra work that the city is now requesting. He recommended in view of the Commission's finances and the fact that it is hard to secure men to perform work of this kind, that the request be denied. The Commission approved the recommendation by unanimous vote.

The Commission discussed briefly a request from the Waldport Chamber of Commerce, William F. Keady, Secretary, for the opening of the driveway which leads from the Oregon Coast Highway to the beach at the end of the sea wall at Waldport. The Engineer advised that the Highway Commission for the past several years has reconstructed this driveway each spring; also, that the roadway is not very important, and there is a question in his mind whether or not there is justification for the improvement this year, particularly in view of the scarcity of labor and the necessity to perform only such work as is considered important. Action on this matter was deferred by the Commission pending personal inspection of the roadway when the Commission makes it trip down the Coast sometime in July.

The Commission considered and by unanimous vote approved an arrangement with the U. S. Forest Service for the use of the Marys Peak Forest Road, Benton County, in connection with the hauling of gravel from a state quarry for the improvement of the Alsea Highway. An agreement covering the matter was thereupon signed by the Commission.

The Commission considered and denied a petition from residents of Scio, Oregon, for the oiling of a one-half mile section of the Albany-Lyons Secondary Highway, immediately south of Franklin Butte Cemetery, between Scio and Crabtree. The reasons which prompted this action were the cost involved and difficulties in securing manpower and materials.

The Commission by unanimous vote confirmed telephonic authority previously given the Engineer to purchase from Babler Brothers, contractors, 2,000 cubic yards of oil rock at $2.50 per cubic yard, stock-pile measure, for use in connection with the repair of state highways in the vicinity of Redmond.

The Commission discussed a request from contractor C. J. Eldon for reconsideration of the amount allowed him as final payment in connection with his contract No. 2402, for the construction of the Davies Overcrossing on the Wolf Creek Highway, in Washington County. Mr. Eldon objects to the deductions that have been made for flagmen and watchmen services rendered by the United Railways Company and the Southern Pacific Company, totaling $2,436.75. After considerable discussion, during which the Engineer advised that he could not recommend the relieving of Mr. Eldon from the payment of this expense, motion was made by Commissioner Schaupp that the matter be referred to the Attorney for further study as to the legal features involved. The motion was duly seconded by Commissioner Chessman and was declared by Chairman Banfield to have passed by the unanimous vote of the Commission.

The Commission had under discussion the termination of its contract with the Jacobsen-Jensen Company for the construction of the Barbur Boulevard-Boones Ferry Road Section of the West Portland-Hubbard Highway, contract No. 2393. The Engineer advised that this contract which provided for grading and surfacing work, was awarded on November 28, 1940, and the completion date was specified as August 31, 1941. The contractor, he said, prosecuted the work with diligence in so far as the weather, war emergency conditions and priority orders would permit, until November, 1941, at which time adverse weather made working conditions so bad that it was necessary to discontinue operations. During the year 1942 and until April, 1943, he added, the contractor was working on contracts for the U. S. Army, which required his entire organization, it being necessary for him to give such work a priority, in view of the fact that it was considered more essential to the war program than the completion of the highway work. He further explained that in April, 1943, Mr. K. F. Jacobsen, President of the company, received notice to report for military service, which prevented the company from completing the contract as provided for in the specifications. Furthermore, the federal government has requested that the completion of this job be postponed for the duration of the war. There remains uncompleted on this job, he said, the finishing of 0.92 mile, including the surfacing and oiling of approach roads throughout the job. Such work he said, is estimated to cost about $23,423.15, whereas, if the job were completed under the unit prices of the contract, the work would have cost only $9,210.02. In order to final-out this job, he said, a check has been made of all quantities of work performed, and final estimate has been computed on the basis of the unit bid prices, such final estimate being $87,437.97, of which amount the contractor has been paid the sum of $66,996.34 on previous estimates, leaving an upaid balance due the contractor of $20,441.63. Such amount, he

explained, is inadequate to complete the contract, in view of which the contractor has agreed to pay the state the difference or $2,981.52, if he is relieved from further obligation with respect to the job. He recommended final settlement with the contractor on such basis. After discussion, motion was made by Commissioner Schaupp that the project be terminated and that final settlement be made with the contractor, in conformity with the Engineer's recommendation. The motion was seconded by Commissioner Chessman, and was declared by Chairman Banfield to have received the unanimous vote of the Commission. The Commission thereupon signed an agreement with Jacobsen-Jensen Company covering the matter.

The Attorney asked the Commission to confirm the oral telephonic authority granted him by Commissioners Schaupp and Chessman on May 17, 1943 to pay to Mr. Dewey Gault the sum of $1,800.00 for the moving of his boats and railroad track facilities as part payment of damages which will result by reason of the appropriation of a portion of Mr. Gault's property at the intersection of Denver and Union Avenues, Portland, in connection with highway improvement that the Commission has under way at this point. By way of explanation the Attorney advised that it was necessary to acquire Mr. Gault's property by condemnation in connection with which the Commission authorized an offer of $15,000.00 which amount included the sum of $800.00 for moving the railroad track and $825.00 for the moving of the boats; however, since then it has been ascertained that the cost of moving the boats will be $1,000.00 instead of $825.00, an increase of $175.00. After discussion, the Commission approved the payment of the sum of $1,800.00 to Mr. Gault for settlement in full of this particular item.

The Assistant Attorney reported the results of his examination of the Waldport Ranger Station property south of the town of Waldport which property the U. S. Forest Service wishes to deed to the state in exchange for adjacent state property in order to improve its facilities at that point. He advised that the tract contains 0.056 acre which is worth not less than $100.00 per acre or a total of $5.60, whereas, the tract that the Forest Service wants contains 0.442 acre which is valued at $10.00 per acre or a total of $4.42. It was his thought that this is a fair exchange of property and he recommended approval of the exchange without cash consideration. The Commission approved his recommendation by unanimous vote.

The Attorney brought up for consideration a claim presented by the Arch Cape Land Company relative to damages that the company alleges occurred to some of its property near Arch Cape Tunnel on the Oregon Coast Highway in Clatsop County. He advised that this is a controversy of long standing and that the former Highway Commission refused to settle with the company on the basis of the company's offer. Commissioner Chessman advised that he is familiar with this case and his opinion is that the company's claim is absurd. After discussion, motion was made by Commissioner Schaupp that the claim be denied. The motion was seconded by Commissioner Chessman and was declared by Chairman Banfield to have carried by the unanimous vote of the Commission.

The Assistant Attorney presented an offer from Wiley and Smith, Inc., Portland, to purchase certain state-owned property situated in lots 5 and 6

of Kerns addition to the City of Portland. He advised that the property has a 100 foot frontage on the highway and extends back from the highway a distance of 70 feet, that the property is considerably below the level of the highway but the company wants to acquire it in order to fill out its present holdings and has stated a willingness to pay $1,200.00 for the same. He recommended acceptance of the offer. The Commission approved the recommendation by unanimous vote.

The Assistant Attorney also presented an offer from Mr. J. R. Wanker to pay the sum of 75¢ per acre for a portion of the property that the former highway commission acquired from the E. A. King estate in Baker County for use as a quarry site. He explained that the Commission purchased 617 acres which was considerably more than was actually needed but in making the deal it was found that the entire tract could be acquired for very little more than the area needed for the quarry. Further, that the cost was less than $1.00 per acre. Mr. Wanker offered to pay the state 75¢ per acre for the land that the Commission does not need. The Engineer recommended acceptance of this offer with the understanding that sufficient acreage be retained by the state for quarry purposes and provided Mr. Wanker offers no objection to the state retaining the right to use the hauling road which leads from the highway to the quarry. The Commission by unanimous vote approved the sale of this property on such basis upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman.

The Secretary presented a renewal notice from the Civil Aeronautics Administration extending its lease of certain state-owned property situated on Sexton Mountain in Josephine County, Oregon, and its use of a roadway leading to such property. The Commission approved such lease renewal by unanimous vote.

The Commission had under discussion the advisability of petitioning the directors of the West Extension Irrigation District to exclude certain state-owned property from such district in Morrow County and of petitioning the directors of the Stanfield Irrigation District, for the exclusion of certain state-owned lands from such district, in Umatilla County. The Attorney advised that the Stanfield-Boardman section of the old Oregon Trail passes through these irrigation districts and unless the right of way is excluded therefrom there will be an annual maintenance charge, and charges for paying off irrigation bonds and interest. He recommended that inasmuch as no irrigation water is needed upon the highway that the Commission petition the districts for the exclusion of this property in order to avoid this annual expense. The recommendation was approved by the Commission by unanimous vote upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman. The Commission thereupon signed a petition directed to the respective irrigation districts with respect thereto.

The Commission had under discussion the sale of the peach crop from an orchard in The Cove Palisades State Park, Jefferson County. The State Park Superintendent, S. H. Boardman, who is in charge of this park, was present and advised that there will be a big crop of peaches which should not be allowed to go to waste. It was his thought that they could be sold locally at a good

profit, however, stated that he preferred that the picking be done under his direct supervision so as to make certain that the trees are not damaged. The Engineer suggested the taking of bids for the purchase of the crop, orchard run in crates, f.o.b. the orchard. The Commission approved the recommendation by unanimous vote and authorized the advertising of the sale of the peaches for bids to be received at its next regular meeting.

The State Park Superintendent also reported on the following park matters.

Gift from Mr. & Mrs. Ben Dorris, Eugene:- The Park Superintendent advised that Mr. and Mrs. Dorris have offered to deed to the state as a gift for State Park purposes an 80 acre tract of land situated along the McKenzie River and the McKenzie River Highway about 30 miles east of Eugene. The tract, he said, is covered with second growth fir, maple and alder with the usual undergrowth coverage, has a fine river frontage and a boat landing for fishermen. He recommended acceptance of this gift. The Commission approved the recommendation by unanimous vote and ordered that an appropriate letter of thanks be sent to Mr. & Mrs. Dorris.

Proposed park at Wallowa Lake:- The Park Superintendent advised that he investigated this matter and ascertained that the owner wishes to deed to the state some 50 acres of land exclusive of the lodge buildings and grounds. He further advised that if the Commission accepts this offer it should also purchase additional abutting property which will cost about $7,000.00. The matter was discussed at some length during which Chairman Banfield stated that he is not interested in paying out $7,000.00 of state highway funds in order to secure this gift. Commissioner Schaupp concurred. A definite decision in the matter, however, was not reached at this time. The matter was reconsidered on the following day when the Commission instructed the Park Superintendent to conduct further negotiations in respect to the property.

The Engineer reported the results of a traffic count that was taken at the Junction of the Woodburn-Sandy and Cascade Secondary Highways for proposed control of traffic. He advised that as the highways are now signed east bound and west bound traffic along the Woodburn-Sandy Highway is required to stop at this Junction, but traffic along the Cascade Secondary Highway is allowed to enter the intersection without stopping. The results of this traffic count shows, he said, that seventy-one percent of the traffic flows in an easterly and westerly direction, which is an indication that the stop signs are being erroneously maintained. He recommended, in view thereof, the reversing of the signs which would provide for the stopping of traffic along the Cascade Secondary Highway rather than that along the other road. The Commission approved the recommendation by unanimous vote upon motion of Commissioner Schaupp which was duly seconded by Commissioner Chessman. The Attorney was instructed to prepare an appropriate resolution covering the matter for adoption at the next meeting of the Commission.

The Engineer also recommended the following changes in the stop signs at the intersection of the Woodburn-Sandy Secondary Highway and the County Road leading to Wilhoit, about one mile east of Molalla. He advised that the Woodburn-Sandy Highway has been designated a through highway requiring traffic to stop before entering same, but the traffic count reveals that the flow of traffic on the Wilhoit Road is much greater than that on the Secondary Highway east of the Junction, which indicates that the signs should be changed. He requested authority from the Commission to change the signs accordingly. The Commission approved the request by unanimous vote and thereupon instructed the Attorney to prepare an appropriate resolution for adoption at the next meeting.

The Engineer requested authority to maintain stop signs at the grade crossing of the Southern Pacific Railroad tracks at mile post 0.85 on the extension of Elkton-Sutherlin Secondary Highway that was recently designated by the Commission. He recommended approval of this request from the traffic safety standpoint. The Commission approved the request and by unanimous vote adopted the following resolution in regard thereto upon motion of Commissioner Schaupp which was duly seconded by Commissioner Chessman.

WHEREAS, the Commission by an order made and entered as of July 23, 1942, designated certain highway-railroad grade crossings as hazardous crossings and directed the Engineer to erect and maintain at such crossings appropriate traffic signals or warning signs; and

WHEREAS, it is the judgment of the Commission that in addition to the grade crossings designated in said order the railroad-highway grade crossing of Southern Pacific Railroad over the easterly leg of the wye of the Elkton-Sutherlin Highway, which crossing site is otherwise designated as being located at mile post 0.85 in the town of Sutherlin, should be designated as a hazardous grade crossing and the Engineer instructed to erect at such crossing appropriate warning signs;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present, as follows:

1. That the grade crossing at mile post 0.85 where the Easterly leg of the wye of the Elkton-Sutherlin Highway, Secondary Highway No. 161, crosses the Southern Pacific Railroad in Sutherlin be and said crossing hereby is designated as a dangerous grade crossing.

2. That the Engineer be and he hereby is instructed to erect or cause to be erected and thereafter maintained the necessary or appropriate stop signs or signals to warn traffic using said highway at said crossing to come to a complete stop before crossing said railroad track.

The Engineer asked the Commission to designate a twenty-five mile per hour speed zone across the Hendricks Bridge at mile post 10.45 on the McKenzie Highway. He advised that this is a narrow bridge and that it is

being damaged considerably by heavy truck traffic which moves over it at excessive speed, and it was his thought that such damage could be avoided if traffic were required to slow down to twenty-five mile per hour in crossing this structure. The following resolution in regard thereto was adopted by the Commission by unanimous vote, upon motion by Commissioner Schaupp which was duly seconded by Commissioner Chessman.

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of Highway: McKenzie Highway

HIGHWAY NO. 15

Location of Termini	Established Speed
From Mile Point 10.17 to Mile Point 10.49	25 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places

in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

The Commission adjourned at 5:30 p.m. to reconvene on the following morning in the auditorium of the Public Service Building.

Portland, Oregon, June 16, 1943

The State Highway Commission reconvened at 9:00 a.m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for the construction of highway projects, sales of buildings in Eugene, sale of land in North Portland and for the furnishing of ferry service at the Enegren crossing of Coos River in Coos County were opened and read in conformity with previously published notices, following which Chairman Banfield announced that the awards of contracts, and sale of the properties would be made at 3:00 p.m. in the same room:

ALSEA HIGHWAY
ALSEA MOUNTAIN ROCK PRODUCTION

P. B. Doherty	$37,800.00

OREGON COAST HIGHWAY
UMPQUA RIVER BRIDGE, REEDSPORT

Building 9309-A	$29.65
Building 9309-B	26.77
Building 9309-C	26.53
	$82.95

The Engineer reported notification from the Army authorities to the effect that on July 1, 1943, the guards that the Army has been maintaining on the Interstate Bridge between Portland and Vancouver are to be taken off in which event the bridge will not be protected against sabotage unless guards are employed by the State Highway Department. He advised that this is a very important bridge structure in that it is the only direct connection between the states of Oregon and Washington for many miles and should it be damaged or destroyed, it would seriously effect the transportation problem between the two states, a large part of which consists of vital defense movements.

To provide the same amount of protection now furnished by the Army, he said, will necessitate the employment of nine guards who would work in eight hour shifts, three men on each shift, each of whom would have to be paid a salary of $150.00 per month. He pointed out that guards are also being maintained on all of the important Coast Highway Bridges because no detours are available, and on other bridges, some of which are not so important from the traffic standpoint because traffic could be detoured around them in the event that they might be destroyed. It might be possible, he said, to eliminate some of the guards on the latter mentioned bridges which would offset somewhat the expense for guarding the Interstate Bridge, although there is a question whether or not that would be advisable in view of protest that the Commission very likely would receive from the public. After considerable discussion of this matter the Commission voted unanimously to employ the nine guards that are needed to protect the Interstate Bridge provided the Washington Highway Department will pay 50% of the costs involved. The Engineer was instructed to take the matter up with the Director of Highways of the State of Washington and obtain his reaction. The Commission also decided to discuss on its trip down the Oregon Coast Highway in July, the question whether or not to remove any of the guards that are now being maintained on other bridge structures.

Mr. Leo Howard, log hauler, McMinnville, came before the Commission with reference to the reinstatement of his log-hauling permit which recently was cancelled because of numerous over-weight violations involving Mr. Howard's trucks. Chairman Banfield pointed out to Mr. Howard that state highways over which log hauling is being carried on are being severaly damaged largely because the operators are overloading their trucks and are driving at an excessive rate of speed, wherefore the Commission has found it necessary to take drastic action in an endeavor to preserve its highway surfaces and bridge structures. He also pointed out that Mr. Howard has been a consistent violator of the weight requirements, the records disclosing that he has been arrested some twenty three times within the last few months for such offences. The Commission has decided, he said, to recommend to the Public Utilities Commission the cancellation for a ten-day period of the permit of any operator who is reported with loads weighing in excess of the legal weight limits and tolerances allowed by the Highway Commission and under such ruling the Commission will not recommend a reinstatement of Mr. Howard's permit until such ten-day period has expired. Commissioner Schaupp and Commissioner Chessman concurred in the statements made by Chairman Banfield. Mr. Howard asked for a modification of this ruling so as to take out of service only the truck that is involved in the overweight. The Commission refused to take action to that effect because the Commission considers that overloading is a matter of mismanagement and that the desired results could not be obtained by penalizing a piece of equipment or an individual truck driver. Chairman Banfield also said that the Commission wants to help the operators as much as it possibly can if the operators will cooperate but the Commission is going to have to "crack down" on the consistent offenders as well as those who only frequently transport flagrant overloads. Following this discussion, motion was made by Commissioner Schaupp that Mr. Howard be penalized by the cancellation of his permit for a ten-day period. The motion was duly seconded by Commissioner Chessman and was declared by Chairman Banfield to have carried by the unanimous vote of the Commission.

A delegation from Independence representing the Independence Chamber of Commerce and the Salem-Independence-Kings Valley Highway Association was present and conferred with the Commission in regard to the building of a bridge across the Willamette River at Independence. Mr. E. L. Gray headed the group which included Messrs. J. H. Hart and R. M. Walker. Mr. Walker reviewed the history of the river road project between Salem and Independence. He said that the improvement of this road and the construction of the bridge are very important projects in view of the fact that they will provide a route of travel between Independence and Salem in the event of the destruction of the Willamette River Bridge in Salem, and because of the large volume of traffic that crosses the river at Independence which now has to depend on a ferry. He suggested approval of the work as a post-war project to be financed by Federal funds, augmented by County funds, and gave as his thought that Marion County and Polk County will contribute county funds to pay a portion of the expense. He asked the Commission to grant the county courts of these counties a hearing for discussion of the matter. Messrs. Gray and Hart concurred in the statement made by Mr. Walker. Chairman Banfield advised that the Commission appreciates the proposal as outlined but is not in a position today to make a definite commitment thereto. However, the Commission will be pleased to give it fair consideration in the formulation of its construction program for future funds. Commissioner Chessman pointed out that Federal post-war funds are not as yet a certainty, hence, the Commission can not obligate them now. Mr. Walker asked the Commission to tentatively agree to the project but his request was denied. After a further discussion Chairman Banfield concluded the conference stating that while the Commission is in sympathy with the project it is not in a position to make any commitments or promises at this time but must first decide definitely whether or not it is going to approve the project and then ascertain whether or not it is a priority project in the minds of the two county courts.

A letter was presented from the County Court of Josephine County in which the Commission was asked to join with the U. S. Forest Service and the Public Roads Administration in securing the redesignation as a Forest Highway of the Happy Camp-Takilma Forest Development road, a portion of which lies within the State of Oregon and the balance in the State of California. It was the thought of the Commission that the time is not propitious to make such change in view of the fact that there are no funds available with which to finance the work and for the further reason that the Commission considers that forest highway funds that become available should be expended for the reconstruction of roads now on the Forest Highway System before new roads are added to that system. The Secretary was instructed to so inform the County Court.

The Engineer requested authority to attend at state expense a meeting of the Directors of the American Association of State Highway Officials which is to be held in Chicago on Friday, June 25th, 1943, at which time matters now before Congress which are of vital concern to State Highway Departments are to be discussed. Chairman Banfield gave as his thought that it is essential that the Engineer attend this meeting. Commissioner Schaupp and Commissioner Chessman concurred making the action unanimous, subject only to the condition that out-of-state travel expense is approved by Governor Snell.

A letter was presented from the Portland Traction Company in which the Highway Commission was requested to make provision in the design of the ramps that are to connect Front Avenue with the Steel Bridge in Portland, for clearances as are necessary to permit the continuous operation of trolley coaches across the bridge after the Front Avenue Project is completed.

The Engineer advised that the company is asking that vertical clearances of 19 feet be provided. The understanding had with the Department of Public Works, Portland, he said, was that only gas-powered buses would be routed over this bridge which require a lesser vertical clearance than the electrically-powered trolley coaches. He pointed out that the traffic interchanges at both ends of the bridge require the construction of multiple-level ramps and advised, under the circumstances, that it is entirely impractical to provide the 19 foot vertical clearance requested by the company. Furthermore, even if such clearances could be provided the operation of the trolley coaches over the bridge would restrict the roadway widths on the main spans of the structure which would result in traffic congestion and in a large measure would destroy the usefullness of the project. He recommended that the request of the company be denied not only for the reason stated but because in his estimation the cost would be $50,000.00 or more for construction in order to accommodate the company. The Commission approved the recommendation by unanimous vote.

The Commission discussed a request from Mr. D. E. Alexander, Klamath Falls, for permission to construct two cattle guards across Klamath Lake Secondary Highway near the forest boundary, for the control of cattle. Mr. Alexander gave as the reason for his request the difficulty in securing the services of cowboys under the present war time conditions. Commissioner Schaupp advised that he is acquainted with this situation and that the highway at the points where Mr. Alexander wishes to install the cattle guards is unsurfaced, otherwise, it would be possible to paint stripes across the highway as was done on the Central Oregon Highway. After discussion the Commission voted unanimously to permit construction of these two cattle guards provided they are built according to a design to be prepared by the Engineer and are installed and maintained at no expense to the state. The matter was referred to the Engineer for handling.

The Engineer read a supplemental report on the proposed improvement of the Cottonwood grade section of the Wasco-Heppner Highway. He advised that recent inspection indicates that the work desired by Mr. Burres is the widening of three sharp narrow rock points about one mile west of the John Day River Bridge. He estimated that the work could be done for about $1,000.00 and advised that Mr. Burres has offered the use of some of his equipment if it is needed. The Commission approved the report.

The Attorney requested authority for Mr. C. W. Parker, right of way agent, to go to Kelso, Olympia and Tacoma, Washington at state expense in order to secure information with respect to the qualifications of a man who is an experienced golf course architect and whose services may be required in connection with the Commission's condemnation action to acquire land that is needed

from the Peninsula Public Golf Course Company in connection with the highway improvement at Denver and Union Avenues, Portland. He estimated that Mr. Parker's expenses would not exceed $40.00. The Commission approved the request by unanimous vote subject to confirmation by Governor Snell.

The Commission had under discussion the granting of authority to the Secretary to sign permits in behalf of the Commission, particularly permits involving minor engineering features that do not require special attention by the Commission. After discussion, motion was made by Commissioner Chessman that such authority be granted the Secretary subject to the condition that the Engineer shall pass on the engineering features before the permits are issued. The motion was seconded by Commissioner Schaupp and was declared by Chairman Banfield to have received a unanimous vote.

The Commission also by unanimous vote confirmed the telephonic authority previously given the Secretary to issue to the Kaiser Co., Inc., Portland, a permit to cut the concrete curb on the west side of Denver Avenue, Portland, in order to facilitate truck movements in connection with company's construction operations in this vicinity. (See permit in general files for details.)

A delegation from Eugene consisting of County Judge Clinton Hurd, William Tugman, and Howard Merriam came before the Commission at this time in regard to a proposed improvement of High Street in Eugene. Judge Hurd presented a letter with respect thereto which was read aloud by the Secretary. (See letter dated June 2, 1943) Judge Hurd advised that LaneCounty contemplates the construction of a new bridge over the Willamette River at the north end of High Street and that in planning for this structure, they believe that a study should be made of the improvement of High Street including the elimination of a grade crossing of the Southern Pacific Railroad and traffic congestion incident to the delivery of produce to the plant of the Eugene Fruit Growers Association. It was his thought that a survey and study should be made of the entire project based on the interests of the state and of the City of Eugene, so that a uniform plan for all concerned may be provided. He asked the Commission to assign one of its engineers to make surveys as may be required. The Engineer gave his thought that the Commission should cooperate in this undertaking in view of the fact that it involves the state highway route. He gave as his understanding that the state would not be required to contribute funds for construction inasmuch as the proposed improvement is beyond the limits of the Highway Commission's jurisdiction. Mr. Tugman inquired as to the possibility of securing Federal funds with which to finance construction. He was informed by Chairman Banfield that there is still an uncertainty as to the Federal funds but the Commission is making studies with respect to the funds that it hopes to get and is arranging a construction program for post-war performance so as to be in readiness at the proper time. He added that the Commission is not in a position at the present time to make any definite commitments. Mr. Tugman then advised that the state may be asked to contribute some money toward the cost of the improvement insofar as it is within the limits of the state highway, but that the county would pay for the bridge and the city would pay for the construction between the highway and the bridge.

He outlined an arrangement that the city planning commission has in mind to provide parking space for automobiles near the business district, which arrangement provides for the acquisition by the city of all of the property situated between 6th Avenue and 7th Avenue (State Highway Routes) for a number of blocks, and the removal of the buildings located thereon. Such plan also includes a revision in the present alignment to eliminate some sharp curves. He exhibited an airplane photograph of Eugene on which were shown the contemplated improvements, and also exhibited a chart showing the increase in the population that the City of Eugene has experienced since the Federal Census in 1940. According to this chart the population of the City of Eugene has increased 20.8 per cent since that time. Chairman Banfield gave as his thought that the making of the suggested surveys is essential, in view of the fact that the state highway is affected. He made it clear, however, that if the Commission authorizes the Engineer to make these surveys it is without obligation on the part of the Commission to spend state highway funds for construction. A decision in that respect, he said, must be deferred until the Commission has had the benefit of the Engineer's report. Mr. Tugman reiterated that they are not expecting the state to spend any of its money on the High Street Project or for the construction of the bridge, but in arranging their parking development it might be that the state would be asked to contribute somewhat. After further, discussion, the Engineer was authorized by unanimous vote to make the necessary surveys for the project, provided the cost involved is not unreasonable. He was instructed to phone the individual Commissioners with respect thereto.

The Engineer requested authority to enter into a price agreement with McNutt Bros., contractors, for the grading and paving of the Judkins Point section of the Pacific Highway at Eugene, contract No. 2582, for the construction of a spillway. He estimated the cost involved at $25,955.00 and advised that under ordinary circumstances the work would be accomplished under a separate contract but in this particular instance a considerable portion of the expense is for riprapping and hand-placed rock slopes, the rock for which must be taken from an excavation which is now being made by McNutt Bros. He further explained that the spillway is needed in order to avoid damage to adjacent private property which might result in the payment of costly damages, and also to eliminate the possibility of scour under the bridge structure. He pointed out that there is a possibility of securing Federal grade-crossing funds to finance the work or at least part of it. Mr. T. M. Davis, Senior Highway Engineer of the Public Works Administration, who was present, advised that this work might be considered as a part of the original contract with McNutt Bros., but he was unable to state whether or not there were Federal funds available at this time to pay the costs. He did state, however, that the Public Roads Administration would give the matter consideration if the Commission made a formal request for the Federal funds. In reply to an inquiry of Chairman Banfield, Bridge Engineer G. S. Paxson advised that when the Willamette River is in flood, the flood waters cover the whole area from Judkins Point to Springfield and in order to avoid damage that might result from the highway improvement, it would be necessary either to construct this spillway which would increase the flow of water beneath the structure, or to lengthen the bridge which would be much more costly. After further discussion, The Commission tentatively approved this project subject to the Federal governments participation in the costs. The Engineer was instructed to ascertain

whether or not Federal funds are available for the work and to telephone the individual commissioners with respect thereto. The Commission will then make its final decision.

The Engineer also requested authority to construct surface drainage facilities along the Siskiyou Mountain section of the Pacific Highway in Jackson County at an estimated cost of $45,000.00. He explained that the work consists of construction of tunnels and channels for drainage purposes which are absolutely necessary in order to preserve the high embankments; also, that, if the work is not done there is a possibility that the embankments will fail which would necessitate the closing of the highway to traffic. After discussion, the Commission approved the Engineer's request by unanimous vote.

A petition was presented from taxpayers of Lane County who reside along the Willamette Highway south of the Coast Fork Bridge requesting the construction of a causeway"at or about the crossing of the old highway with the new highway, adequate for carrying the run off in times of high water." The Assistant State Highway Engineer, C. B. McCullough, advised that he investigated this matter on the ground a short time ago in company with Bridge Engineer, G. S. Paxson, and ascertained that what these people want is some additional trestle to take care of the excess water. The point that they mention, he said, is a few hundred feet east of the new bridge where the grading is not as yet completed and where it would be possible to construct such a trestle for about $3,000.00. He questioned the justification for the expenditure in view of the fact that the main channel of the river at the site of the new bridge has been cleaned out so that it now has about 25% more cross section which will permit the passage of nearly twice as much watter as could pass through the old structure at the same high water elevation. He recommended against the improvement. After discussion, motion was made by Commissioner Schaupp that the petition be denied. The motion was duly seconded by Commissioner Chessman and was delcared by Chairman Banfield to have carried by the unanimous vote of the Commission.

The Attorney brought up for discussion the proposed sale of the Knapp Hotel Building at Port Orford for which bids were received by the Commission at its meeting on May 12. He recalled that the Commission at that time referred the bids to him with authority to sell the building to the high bidder, Walter L. Strain, for $287.00 in the event certain women's organizations who are interested in the preservation of the building from a historical standpoint are unable to arrange for the removal of the building from the state-owned property. He said that he has not as yet received final word from any of such organizations who are endeavoring to raise funds to pay the moving costs,in view of which he recommended that the sale of the building be postponed for a little while longer. The Commission approved the recommendation.

The Assistant Attorney reported an offer received from Mr. Leo White and his wife, Salem, to purchase for the sum of $1,500.00, 13.37 acres of land situated adjacent to the Pacific Highway a short distance south of Salem, being a portion of the old Ramseyer farm which the former Commission acquired in connection with right of way negotiations. He advised that this is a very fair

offer and recommended acceptance of the same. The Commission by unanimous vote approved the sale of the property at the price quoted and thereupon signed a deed conveying title to the Whites.

The Assistant Attorney also presented an offer from the J.L.Stuart Insurance Agency to purchase for the sum of $100.00 a portion of lots 5 and 6 of block 5, Monteith's Eastern Addition to Albany, which the Commission acquired in connection with a right of way settlement. He said that this is an isolated tract which is of no value whatsoever for state highway purposes and recommended acceptance of the offer. The Commission by unanimous vote approved the sale of the property at the price quoted.

The Assistant Attorney reported an arrangement with the General Petroleum Corporation with respect to the operation of its service station adjacent to the Pacific Highway near the Interstate Bridge. He advised that the Corporation is conducting a service station business on property that it has leased from the Kernan Live Stock Company at the intersection of Union and Denver Avenues, Portland, where the Highway Commission has contract work under way. In connection with the highway work, he said, it was necessary to build a detour for traffic across this property which blocked access to the station; however, a satisfactory solution of this problem has been worked out, whereby the Highway Department is to do certain things during the time that the highway construction work is under way, and the company waives any claim for damages if the arrangement is carried out. The Commission approved the report by unanimous vote.

The matter of abandoning a short section of the Pacific Highway (old route) between Williams Highway and Fruitdale Road south of Grants Pass, was brought up for consideration by the Engineer. He advised that on October 10, 1940, the former Highway Commission adopted a resolution abandoning such section of the old road in view of the fact that the highway had been rebuilt on revised alignment rendering the old route of no value for State Highway purposes. Further, that a certified copy of the abandonment resolution was sent to the Josephine County court with a request that the court take appropriate action to either retain the old road on the county's road system or to let the road revert to the abutting property owners. It now appears that the county court is willing to assume jurisdiction over this road if the Highway Commission will extend the limits of the abandoned right of way some 200 or 300 feet at the southerly end so that it will connect up with the right of way of the Pacific Highway. He explained that this short section was omitted from the original resolution because it was thought that the state should have jurisdiction over that particular portion. However, it is not particularly needed and in view thereof he now recommended approval of the county's request. The Commission considered it advisable to do what the county court has asked and thereupon by unanimous vote adopted the following resolution as a substitute for the resolution previously adopted, following motion of Commissioner Schaupp which was seconded by Commissioner Chessman.

WHEREAS, on October tenth, 1940, the Highway Commission adopted a resolution, which said resolution is entered in the minutes

of the Highway Commission in Part 2 of Volume 25, at pages 9804 and 9805, and by which resolution the Commission abandoned for highway or other public purposes a section of the former right of way of the Pacific Highway in Josephine County; and

WHEREAS, it is the purpose of the Commission at this time to amend said resolution by amending the description employed in said resolution;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and participating, that section 1 of the resolution adopted by the Highway Commission on the tenth day of October, 1940, and entered in the minutes and records of the Commission in Part 2 of Volume 25, at pages 9804 and 9805 be and the same hereby is amended as follows:

"1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Williams Highway-Fruitdale Road Section of the Pacific Highway but is now without the limits of the right of way of said highway as said highway has been relocated and contructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Josephine County for highway or other public purposes, as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

"All that certain section of the old right of way of the Williams Highway-Fruitdale Road Section of the Pacific Highway, in Sections 19, 20, 21, 28 and 29, Township 36 South, Range 5 West, W. M., Josephine County, Oregon, lying on the southerly side of the right of way required for the reconstructed Pacific Highway; said section also lying between Mile Posts 279.6 and 282 of said highway; the beginning and ending points with reference to the Engineer's Station of the said old highway being Station 19+60 on the westerly end and Station 152+75 on the easterly end.

"The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of K. D. Lytle, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated June 10, 1943, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red." *

That except as herein amended said original resolution shall be unchanged and shall remain in full force and effect.

The Engineer brought up for discussion a proposed modification of the Highway Commission's policy with respect to the granting of sick-leave benefits and casual-leave benefits to Highway Department employees, particularly those employees who are paid on an hourly basis. He advised that according to the present standard policy employees who are paid on the monthly salary basis have an accumulated sick-leave benefit under which they are carried on the payroll for a period of 90 days and in addition thereto such employees are allowed one day casual leave for each three months employment during the year with a maximum of three days during the entire year. Such benefits, he said, do not extend to employees who are paid on the hourly basis. He pointed out that a circular letter recently issued by the State Board of Control provides accumulative sick leave up to thirty days, which in his estimation is not enough, although, he said, if the Board of Control cannot be persuaded to increase the accumulative sick leave to ninety days, he believes that the Highway Department should change its present ruling to conform with the rulings of the Board of Control. This matter was discussed at considerable length and as a result thereof the Commission decided by unanimous vote not to make any change in the present policy until the Board of Control has made its final decision with respect to such matter.

The Commission adjourned at 12:00 noon and reconvened at 1:30 p.m. in the same room with all Commissioners, the State Highway Engineer, the Attorney and the Secretary present.

Mr. G. P. Wadsworth, and his tenant, Mr. C. W. Smith of Woodburn, came before the Commission with regard to the removal of two walnut trees that are growing on the right of way of the Pacific Highway, in front of Mr. Wadsworth's drug store, in Woodburn. The Engineer recalled that Mr. Wadsworth appeared before the Commission at its last meeting with regard to this matter and that the Commission at that time instructed him to try to work out a solution of Mr. Wadsworth's problem. He presented a plan for the proposed improvement which includes paving from the edge of the present pavement to the edge of the right of way; construction of a sidewalk and curb; and the improvement of the drainage facilities, all of which is estimated to cost about $3,400.00. However, it would be necessary to remove the trees,

*Map Filed Right of Way Abandonment and Retention File - No. 115

inasmuch as they constitute a traffic hazard; particularly for busses that stop at Mr. Wadsworth's store. He questioned the advisability of making this entire improvement, in view of the fact that it is a radical departure from the Commission's present policy; but, advised that the drainage situation is bad, and should be improved. He gave as his thought that the correction of the drainage situation is an obligation of the state, because state forces installed the pipe and the inlets, which were furnished by Mr. Wadsworth. He suggested, as a compromise arrangement, that the Commission authorize the improvement of the drainage facilities, which he estimated would cost about $500.00, and let Mr. Wadsworth remove the two trees, if Mr. Wadsworth will agree not to offer any objections to future highway-development work at this place when the Commission sees its way clear to perform the same, and will waive all right of access to the highway except at certain points to be designated by the Commission. This matter was discussed at considerable length, during which all parties concerned expressed their approval of the Engineer's suggestion. Action by the Commission was by unanimous vote, upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp. The Attorney was thereupon instructed to prepare an appropriate form of agreement to cover the matter.

A delegation from Tillamook, representing the Tillamook Chamber of Commerce and the North Tillamook Chamber of Commerce, headed by Mr. John Aschim, came before the Commission in regard to maintenance of state highways in Tillamook County, which are being severely damaged by heavy log-hauling traffic, and trucks hauling material to the Navy Blimp Base. Others in the group were: Ed H. Lindsay, County Commissioner; Warren A. McMinimee, President of the Tillamook Chamber of Commerce and District Attorney for Tillamook County; R. B. Miller, Secretary; George D. Riechers, Logging Contractor and insurance man; and Thomas B. Watt, Fuel Dispenser. Mr. Aschim advised that the Oregon Coast Highway and the Wilson River Highway, as well as other highways in the Tillamook district, are being severely damaged by heavy truck traffic, and that they are fearful that road surfaces will be utterly destroyed unless protective measures are taken by the Highway Commission. He urged the Commission to inspect these highways in the near future and to arrange for repairs. He filed with the Commission a statement prepared by the Sound Construction and Engineering Company which is building the Tillamook Blimp Base, showing the yardage of materials that the company is hauling over the Oregon Coast Highway from the Tillamook crusher site and from the Garibaldi crusher site.

The other members of the delegation endorsed Mr. Aschim's remarks. Mr. Riechers suggested the installation of traffic scales on the Oregon Coast Highway north of the City of Tillamook, to weigh logs and other loads which enter Tillamook from that direction. The Commission should install scales at this point, he said, in order to be consistent, in view of the fact that the Commission now has scales both south and east of Tillamook. He also suggested that the Commission approve the loading of logging trucks by scale measure, rather than by weight. After general discussion, Chairman Banfield advised that the Commission expects to confer with the Tillamook County Court in the near future, and at that time will view these highways, and if anything can be done to maintain them in a more satisfactory condition, the Commission

will be inclined to do what is necessary, but no promises or commitments can be made now. In the meantime, he said, truck loads must be kept within the legal weight limits and tolerances allowed by the Commission; otherwise, the Commission will be forced to cancel the permits of those who violate the regulations.

Following the conference, the Secretary presented a letter just received from Mr. P. S. Brundage, Western Log and Lumber Administrator, in regard to the letter dated June 8, 1943, directed to "Special Carriers Engaged in the Truck-hauling of Logs Over the State Highways." The Secretary read the letter aloud in which Mr. Brundage endorses the reasons that prompted the said letter of June 8, and gives as his belief that the tolerance allowed by the Highway Commission over the maximum gross weights allowed by law in entirely fair and reasonable; however, offers objections to the penalty that is to be imposed upon loggers for violating the weight requirements; viz., cancellation of the permit of the violator, "regardless of the number of trucks that are involved." He declared that the continuous operation of logging trucks is so important to the nation's war-production program that the trucks should not be taken out of service under any circumstances, and asked the Commission to give the matter further consideration.

Mr. Robert T. Conklin, who was present as Mr. Brundage's representative, presented oral arguments in support of this letter. He was informed by Chairman Banfield that the Commission has been very tolerant with log haulers, but the highways are going to pieces, largely due to heavy log-hauling traffic, and unless the log haulers will evidence a spirit of cooperation, by keeping their loads within the proper weight limitations, the Commission will be forced to cancel their permits, in order to preserve the highway facilities. The Commission wants to help the loggers in every way possible, he added, but there is a limit to what the Commission can do; in so far as weights are concerned that limit has been reached.

At 3:00 p.m. Chairman Banfield announced the following awards of the contracts, etc. for which bids were received at the morning session, such awards having previously been approved by the Commission by unanimous vote;

"Alsea Mountain Rock Project on the Alsea Highway in Benton County. Furnish 10,600 cu. yards of crushed rock in stock piles. The only bid received for this project was that submitted by P. B. Doherty, Portland, at $37,800.00. The Commission has awarded the contract to Mr. Doherty at his bid price.

"Reconstruct the pier fenders on the Umpqua River Bridge on the Oregon Coast Highway at Reedsport, Douglas County. The only bid. received by the Commission was that submitted by Tom Lillebo, Reedsport, at $14,535.00. The Commission has awarded this contract to Mr. Lillebo at the bid price.

"Madras Rock Production Project on the Warm Springs and The Dalles-California Highway, in Jefferson and Wasco Counties. Furnish

approximately 14,400 cu. yards of crushed rock in stock piles. The low bid received for this project was that submitted by D. C. and A. L. Williams, Portland, at $41,100.00. The next low bid was that submitted by E. C. Hall Co., Eugene, at $41,820.00. There were four higher bidders. The Commission has awarded this contract to the low bidder, D. C. and A. L. Williams, at their bid price of $41,100.00.

"Dallas-Fern Corner and Pedee-Wren Section of the Dallas-Kings Valley Secondary Highway, in Polk and Benton Counties. 7.40 miles of surfacing and 71.91 miles oiling; also furnish 5,200 cu. yards crushed material in stock piles. The low bid submitted for this project was that of R. O. Dail & Warren Brothers, Portland at $110,363.35 based on the use of tar. They submitted no bid based on the use of asphalt. The next low bid was that submitted by J. C. Compton, McMinnville, at $115,302.00 based on the use of asphalt. He submitted no bid based on the use of tar. There was one higher bidder. The Commission has awarded this contract to the low bidder, R. O. Dail & Warren Bros., at their bid of $110,363.35 using tar.

"Dallas-Burns Corner Section of the Dallas-Kings Valley Secondary Highway, in Polk County. 5.26 miles of surfacing. The low bid for this project was that submitted by J. C. Compton, McMinnville, at $14,230.00. The next low and only other bid was that submitted by O. C. Yocum, McMinnville, at $14,935.00. The Commission has rejected both of these bids.

"Weston Rock Production Project on the Oregon-Washington and Weston-Elgin Highways in Umatilla County. Furnish 5,000 cu. yards of crushed rock or crushed gravel in stock piles. The only bid received for this project was that submitted by D. C. and A. L. Williams, Portland, at $16,000.00. The Commission has accepted this bid and has awarded the contract to D. C. and A. L. Williams at the amount of their bid.

"Furnish free Ferry Service at Enegren Crossing of Coos River on the Coos River Secondary Highway, in Coos County. The only bid received by the Commission for furnishing this service was that submitted by Andrew Stambuck at $1,997.50 based on alternate (a); and at $2,097.50, based on alternate (b). The Commission has rejected this bid and has ordered the project re-advertised."

Sale of Buildings at Eugene:

"Building No. 8793, formerly owned by Mrs. Ann Lattin. The only bid received by the Commission for this building was that submitted by Mr. Harley Crandall, Eugene, at $15.00. This bid is acceptable to the Commission, which has sold the building to Mr. Crandall at the bid price.

"Buildings Nos. 9309-A, 9309-B, and 9309-C, formerly owned by C. F. Campbell. The Sullivan Wrecking Company, Portland, submitted the only bid for the purchase of these buildings. This company offered to pay $29.65 for Building No. 9309-A, $26.77 for Building No. 9309-B, and $26.53 for Building No. 9309-C, or a total of $82.95. The Commission has accepted this bid and has sold the buildings to the Sullivan Wrecking Company at the bid price.

Sale of Tract of Land in North Portland:

"Tract of land at the corner of North Interstate Avenue and North Argyle Street, in North Portland. The only bid received by the Commission for the purchase of this property was that submitted by H. W. Freeze, Portland, at $600.00, based on alternate No. 2. The Commission considers this bid unsatisfactory, and has rejected the same."

The Assistant Attorney brought up for discussion the claim of Mr. Thomas E. Brooks, of Eugene, for damages to his property that resulted from the reconstruction of the Pacific Highway at this place. He advised that when the right of way was acquired across Mr. Brooks' property, Mr. Brooks agreed to a certain settlement based on the grade line of the highway being about level with his adjoining land. However, subsequent thereto, the highway grade line was raised several feet, so that now Mr. Brooks' property is considerably lower than the highway, and he has alleged damages amounting to $1,060.00. Mr. Brooks, he said, is willing to divide this expense equally with the state, if the state will fill in his property, which work is estimated to cost $360, reducing the amount of cash to be paid to him by the state to approximately $170. He advised that there is justification in Mr. Brooks' claim, and recommended settlement with him on the basis of the offer, which he considers fair and reasonable. After discussion, the Commission approved the recommendation by unanimous vote.

The question whether or not to purchase a maintenance-headquarters site on the Mt. Hood Highway at Parkdale, was brought up for discussion by the Engineer. He advised that the Commission is now renting a maintenance building at this place, but the building is not big enough to accommodate highway department facilities, so it will be necessary for the highway department to arrange for its own building on its own property. He stated his approval of the site selected, which was discussed in connection with the adoption of the real-property resolution on the previous day; however, questioned the amount of the purchase price. The Assistant Attorney advised that $300.00 is a reasonable amount to pay for this property, and recommended the purchase of the property at such figure. The Commission approved the recommendation by unanimous vote, and ordered that the item be included in the real-property resolution.

The Attorney brought up for discussion the highway department's claim against McNutt Brothers, contractors, in the amount of $145.64, for damaging a highway department car. He advised that the accident occurred in 1940, but efforts to date to collect the amount of the claim have been unavail-

ing, it appearing that the state has four witnesses who allege that McNutt Brothers were to blame for the accident, and McNutt Brothers have four witnesses who allege that the state is to blame. He advised receipt of a letter today from the London Guaranty and Accident Company, Ltd., offering to settle the claim on a fifty-fifty basis - in other words, the company is willing to pay the state $72.82 as settlement in full. He recommended acceptance of this offer, in order to avoid the expense of litigation. The Commission approved the recommendation by unanimous vote.

The Attorney also brought up for discussion matters pertaining to the proposed lease of Floras Lake State Park, in Curry County, as a naval aircraft landing field. He advised that the federal authorities have approved the proposed agreement covering the leasing of the property to Curry County, except with respect to the period of the lease and two or three other items that are not of great concern. As to the period of the lease, he said, the federal authorities want a paragraph inserted in the agreement to provide for an extension of the lease beyond the twenty-five-year period specified therein. The Commission, by unanimous vote, disapproved of such extension, because the times are so unsettled and conditions are so susceptible of radical change and development that the Commission considers it unwise to attempt to bind its successors, the state, or any other agency of the state, beyond the twenty-five-year period. The Commission felt that federal agencies can safely rely on the belief that "if , at the end of twenty-five years the interests of the government or its agency warrant a continuation of the lease, then there will be no difficulty in securing such extension."

The Attorney also advised that the federal authorities want to be the sole judges as to the transfer of the lease from the county to a state agency if at some future time the legislature creates such an agency to handle airport matters. The Commission decided by unanimous vote not to approve such a provision.

After further discussion of this matter, motion was made by Commissioner Chessman, that no change whatever be made in the present form of the agreement except those minor changes which can be made without affecting the text of the agreement. The motion was seconded by Commissioner Schaupp, and was declared by Chairman Banfield to have received the unanimous vote of the Commission. The Attorney was thereupon instructed to advise the Supervisor of the Civil Aeronautics Administration of the action taken.

The Engineer requested authority to advertise for bids for the furnishing of maintenance rock that is needed for sections of the Three Rivers Highway and the Oregon Coast Highway, near Hebo, in Tillamook County. He advised that portions of these highways are in bad condition due to log-hauling, and there is immediate need for 5,000 cu. yds. of maintenance rock to strengthen a three-mile section of the Oregon Coast Highway from Clear Creek to the Little Nestucca Junction, and to reinforce a 4.3 mile section of the Three Rivers Highway, east of Hebo. He asked the Commission to authorize the taking of bids for the furnishing of such material, including an additional 13,500 cubic yards of oil rock for future maintenance during the next three years.

He estimated the total expense involved at $55,000.00. After discussion and it appearing to the Commission that there is urgent need for this material, the Commission voted unanimously in favor of the taking of bids for the furnishing of the same, upon motion of Commissioner Chessman, which was duly seconded by Commissioner Schaupp.

The State Parks Superintendent, Mr. S. H. Boardman, who was present, resumed his report on state park matters. He advised that the State Highway Commission now has assumed full control of Champoeg State Park as authorized by the Legislature, and that as authorized by the Commission at the previous meeting, he has installed one of his experienced caretakers at the place to take charge of development work. The Commission approved the report.

The Parks Superintendent discussed briefly with the Commission the acquisition of the proposed John Day Fossil Park, in Grant and Wheeler Counties. No action was taken by the Commission on this matter.

The Parks Superintendent submitted a financial report on the activities of his department, covering the period ending May 31, 1943, as follows:

		1943 Budget	Expenditures to May 31, 1943	Balance
Acquisition				
Curry County: Newburgh State Park	$2,892.96			
Linn County: Cascadia-Geisendorfer	250.00			
Tillamook County: Nehalem Sandspit-Peterson	12.50			
Legal Costs of Acquisition	210.01			
	$3,365.47	$12,210.00	$ 3,365.47	$ 8,844.53
Betterment		none	315.98	315.98
Operation and Maintenance		46,757.28	13,267.44	33,489.84
		$58,967.28	$16,948.89	$42,018.39

The Commission approved the report by unanimous vote.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission, and asked the Commission to confirm them, and the amounts allocated to each. After due consideration, the Commission by unanimous vote, upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman, authorized and instructed the Engineer to make such surveys on various sections of the highways of the state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

Type of Survey	Prefix No.	County	Section & Highway	Authorization
Location	10-1431	Douglas	Glendale Junction-Canyonville Sec., Pacific Highway	4th - $ 3,000.00 Total to date $27,500.00
Location	11-1410	Gillian	John Day-Blalock Section, Columbia River Highway	4th - $1,000.00 Total to date $2,527.50
Location	18-1466	Klamath	Beaver Marsh-Lobert Section, The Dalles- Calif. Highway	1st - $25,200.00
Reconn.	28-1413	Sherman	Madras-Columbia River Section, The Dalles-Calif. Sherman Highway	5th - $2,000.00 Total to date $8,250.00
Plans	206-1433	Coos	North Bend Air Station Access Rd., County and City Highway	1st - $500.00
Testing	110-1433	Douglas	Wright Ranch-Tiller Sec., Tiller-Trail Highway	3rd - $1,200.00 Total to date $6,200.00
Testing	17-1419	Josephine	Sexton Mountain Section Pacific Highway	2nd - $2,750.00 Total to date $4,000.00
Testing	17-1420	Josephine	Wolf Creek-Grave Creek Sec., Pacific Highway	1st - $1,500.00
Location	18-1455	Klamath	Pelican City-Henley Sec., Klamath Falls-Malin Hwy.	3rd - $2,000.00 Total to date $15,000.00
Bench Mark	24-1445	Marion	Illahee-Steiwer Hill Sec., Pacific Highway East	1st - $150.00
Storage	36-1430	Yamhill	Whiteson Section Pacific Highway West	1st - $50.00
R/W	25-1412	Morrow	Boardman-Umatilla Co. Line Section, Boardman-Stanfield Hwy.	1st - $400.00
R/W	30-1446	Umatilla	Morrow Co. Line-Stanfield Sec. Boardman-Stanfield Highway	1st - $350.00

The Engineer was instructed by the Commission hereafter in reporting on such matters to submit more details, including the necessity for the surveys, a description of each highway project, and other information, in order that the

members of the Commission may have a clear picture in mind with respect to each survey. Such information is to be forwarded to the Commissioners prior to the meeting when they are to be discussed.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

Berke Bros., Contract No. 2466, for grading the Miner Creek-Spencer Creek Section of the Oregon Coast Highway, in Lincoln County, requested an additional extension of time from July 31, 1942 to October 28, 1942, within which to complete this job. They alleged that the overrun in the time limit was due to necessary additional work in the completion of the project to the stage agreed upon by the Engineer. The Engineer advised that the contractor failed to complete the project within the specified time limit because of his connections with defense projects which were under way near Camp White. He advised, however, that the work on the highway project was performed in good season, and was completed in a satisfactory manner without inconvenience to the traveling public. He recommended, in view of the circumstances, that the extension of time request be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Porter W. Yett, Contract No. 2581, for grading and paving the Swan Island Access Road Project, in Multnomah County, requested an extension of time from October 15, 1942, to May 12, 1943, within which to complete this job. He alleged that the overrun in time limit was caused by the delay in the completion of a bridge project which was being built under a separate contract, numerous changes in the original plans, additional work to be performed under force account, and adverse weather conditions which interfered with construction operations. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Porter W. Yett, Contract No. 2593, for grading and paving the Sunderland Avenue Access Road, in Multnomah County, requested an extension of time from October 31, 1942, to May 18, 1943, within which to complete this job. He alleged that he failed to complete this project within the specified time limit because his operations were held up by another contractor in constructing a bridge project, numerous changes in the original plans, additional work that was required to be done by force account, and adverse weather conditions. The Engineer advised that the reasons given by the contractor for overrun of the specified time limit are correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contracts Nos. 2393, 2457, 2466, 2521, 2573, 2581, 2589, 2593, 2601, and 2613, for the construction of state highway projects, have been completed in accordance with the terms and provisions of the contracts and the modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2393, with Jacobsen-Jensen Company for grading and surfacing on the Barbur Blvd.-Boones Ferry Road Section of the West Portland-Hubbard Highway; in Multnomah County, completed November 26, 1941;

Contract No. 2457, with Roy L. Houck, for grading and paving the Clackamas Overcrossing Section of the Cascade Secondary Highway, in Clackamas County, completed November 14, 1942;

Contract No. 2466, with Berke Brothers, for grading the Miner-Creek Spencer Creek Section of the Oregon Coast Highway, in Lincoln County, completed October 28, 1942;

Contract No. 2521, with A. S. Wallace, for furnishing 18,100 cubic yards of crushed rock in stock piles for the Necanicum Junction-Sunset Camp Section of the Wolf Creek Highway, in Clatsop, Columbia, Tillamook, and Washington Counties, completed April 27, 1942;

Contract No. 2573, with D. C. and A. L. Williams, for furnishing 7,000 cubic yards of crushed materials in stock pile for the Baker-Homestead Section of the Old Oregon Trail, Baker-Homestead and Baker-Unity Highways, in Baker County, completed April 3, 1943;

Contract No. 2581, with Porter W. Yett, for grading and paving the Swan Island Access Road Project in Multnomah County, completed May 12, 1943;

Contract No. 2589, with Averill & Corbin, for construction of the Helmick Undercrossing, on the Pacific Highway West, in Polk County, completed May 14, 1943;

Contract No. 2593, with Porter W. Yett, for grading and paving the Sunderland Avenue Section of the Vancouver Shipyard Ferry Access Road, in Multnomah County, completed May 18, 1943;

Contract No. 2601, with A. H. Saxton & Son, for furnishing crushed rock in stock piles for the Port Orford Section of the Oregon Coast Highway, in Coos and Curry Counties, completed January 11, 1943;

Contract No. 2613, with E. C. Hall Co. & J. C. Compton, for grading and paving the Southwest Boardman Flight Strip, in Morrow County, completed May 29, 1943.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Federal Government with respect to Oregon Forest Highway Project 46-C1,D, Cascade Lakes Highway. (Third modification of Cooperative Agreement.)

Agreement with Jacobsen-Jensen Company, terminating state highway contract No. 2393, for the construction of the Barbur Blvd.-Boones Ferry Road Section of the West Portland-Hubbard Highway, in Multnomah County.

Agreement with the U. S. Forest Service covering use of the Marys Peak Forest Road by state contractors, in connection with transportation of rock from a state highway quarry to the Alsea State Highway.

Agreement with Henry Blankinship and wife, providing for reconstruction of a cattle pass under the Santiam Highway, within six months after the duration of the war.

Agreement with the Southern Pacific Company covering the construction of an extension to the company's spur railroad track near Springfield, in Lane County.

Petition to exclude a tract of state-owned land from the West Extension Irrigation District, in Morrow County.

Petition to exclude a tract of state-owned land from the Stanfield Irrigation District, Umatilla County.

Bargain and Sale Deed conveying unto Leo White and wife 13.37 acres of land situate adjacent to the Pacific Highway south of Salem, Marion County, file R 9482.

Bargain and Sale Deed conveying unto Coos County three parcels of land in North Bend. Right of way file # 8047.

Bargain and Sale Deed conveying unto Henry Duyck and wife 33.6 acres of land adjacent to Wolf Creek Highway, in Washington Co. Consideration $1,670. Right of Way file #6527.

Bargain and Sale Deed conveying unto Lincoln County, land in Block 48, Brassfield's Addition to Seal Rocks, Lincoln County. File #120.

Bargain and Sale Deed conveying unto Henry Duyck and wife 10.75 acres of land situate adjacent to the Wolf Creek Highway in Washington County. Consideration $3,828.00. Right of Way file #6527-A, and #6528.

The Commission had under discussion the setting of a date for its next regular meeting for the taking of bids, and decided to hold such meeting in Portland on Wednesday, July 7, 1943. The Secretary was instructed to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building. The Commission also decided to hold an afternoon meeting on Tuesday, July 6, 1943, in the Imperial Hotel, to dispose of routine matters. The Secretary was instructed to arrange for a room for this meeting.

The Commission also discussed the setting of a date for its trip into southwestern Oregon, to discuss with county courts matters pertaining to the programming of postwar funds. It was decided to make such trip during the week Monday, July 12, to Saturday, July 17, 1943.

There being no further business to come before the Commission at this time, the meeting was adjourned at 4:00 p.m.

State Highway Engineer

Secretary

Chairman

Commissioner

Commissioner

JUN 16 1943

Portland, Oregon, July 6, 1943

The State Highway Commission met in regular session at 1:30 p.m. in in room 615 (Imperial Room) of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission discussed the minutes of the meeting held on June 15 and 16, 1943, and approved the same by unanimous vote upon motion of Commissioner Chessman which was duly seconded by Commissioner Schaupp.

The Assistant Attorney requested authority to purchase certain parcels of real property that are needed in connection with various highway improvements. He submitted a list of such properties together with offers that he recommended in connection with each parcel. After careful consideration, the Commission approved the Assistant Attorney's request and thereupon by unanimous vote adopted the following resolution in regard thereto upon motion of Commissioner Schaupp which was duly seconded by Commissioner Chessman:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Tongue Point Section, Columbia River Highway

9144-A-Clatsop County				
Right of Way for slide area	15,713 sq. ft.	No Charge		Benson

Johnson Creek-Hubbard Creek Section, Oregon Coast Highway

8694-A-McKenzie, Donald R.				
Elliot and George Woodworth				
Crusher Plant Site and stockpile site	4.82 acres at $100.00		$ 482.00	McChesney

Camp Clatsop-West Lake Section, Oregon Coast Highway

9552-Baker, Edwin E.				
Right of Way	0.82 acre at $200.00 per acre	164.00		
	Moving or destruction of buildings	1,769.50	$ 1,933.50	Witt

Fishers Point-Manzanita Junction, Oregon Coast Highway

9023-Tillamook County				
Right of Way	378 sq. ft.		0.00	Benson

Front Street Project-City of Portland, Pacific Highway

10771-Nelson, Albert K.				
Right of Way	6,666 sq. ft. at $0.195	1,300.00		
	Building	1,700.00	$ 3,000.00	McCallister
10773-Sutton, Laura M.				
Right of Way	4,240 sq. ft. at 30¢	1,275.00		
	Building	3,725.00	$ 5,000.00	"
10144-Multnomah County				
Right of Way	9,612 sq. ft. at 15.66¢+		1,506.00	"
	35/76 in 11,200 sq. ft. at 20¢		1,031.58	"
	3,000 sq. ft. at 6.23¢		187.00	"
	4,682 sq. ft. at 4.6¢		218.00	"
	9,679 sq. ft. at 8½¢		825.00	"
	2,160 sq. ft. at 6¢		135.00	"
	49,709 sq. ft. at 2¢+		1,050.00	"

Borrow Pit	0.70 acre at $20.00		$ 14.00	"

Wolf Creek-Grave Creek Section, Pacific Highway

10432-A-State Land Board				
Right of Way	146.08 acres at $1.63		$ 238.92	Witt

The Assistant Attorney brought up for discussion the matter of acquiring certain land that will be needed in the future as right of way in connection with construction of the West Approach of the Steel Bridge on the Front Avenue Project in Portland. He advised that the property probably will not be needed until after the war is over when the construction of the Front Avenue Approach to the Steel Bridge is undertaken. However, in his estimation, it would be well to acquire the property at the present time so that it will be available when the Commission is ready to proceed with construction work. He gave as his thought that the land would cost the state considerably more if purchase were deferred. The Engineer confirmed the statements made by the Assistant Attorney. However, suggested in view of the fact that the City of Portland is cooperating in this project, that it would be well to discuss the matter with the city officials before final decision is reached. The Commission approved the Engineer's suggestion and thereupon referred the matter to Chairman Banfield to discuss with the city authorities. Detailed information with respect to the transaction is to be furnished Chairman Banfield by the Engineer.

The Assistant Attorney reported on the excess properties that had been acquired by the State Highway Commission in connection with right of way settlements, as previously ordered by the Commission. He advised that the total value of such excess properties is $170,573.33. Also that the State Highway Commission has disposed of some parcels valued at $56,000.00 which leaves an investment of $114,573.33. It was the thought of the Commission that such properties should be sold if they are not needed for state highway purposes, and that now is the propitious time to dispose of them. Accordingly, the Assistant Attorney was instructed to furnish the Commission with a report relative thereto for consideration by the Commission at its next meeting. He was also instructed to furnish each member of the Commission with a copy of the report that he submitted at this meeting.

The State Highway Engineer discussed briefly with the Commission matters concerning which delegations are to appear before the Commission on the following day, as follows:

Southeast Portland Chamber of Commerce re improvement of 82nd Avenue to a connection with McLoughlin Blvd., and re the extension of Foster Road to a connection with the Mt. Hood Highway. It was the opinion of the Commission that these two projects must take their places along with others in the formulation of future highway programs.

Mr. Walter Meacham, Executive Secretary, Old Oregon Trail Centennial Commission. The Engineer gave as his understanding that Mr. Meacham wishes to discuss with the Commission the matter of erecting additional "Old Oregon Trail" markings. He suggested that it would be advisable for the Commission to appoint an advisory committee to pass on such matters, and that before selecting the members of such board, if the Commission approves the appointment of same, the matter should be discussed with Mr. L. A. Mc Arthur, President of the Oregon Historical Socity, inasmuch as Mr. Mc Arthur is considered an authority on Oregon historical subjects. After discussion, motion was made by Commissioner Chessman that the Commission appoint such an advisory board, if that is considered the proper thing to do after consultation with Mr. Mc Arthur, the number of members to be decided later. The motion was seconded by Commissioner Schaupp and was declared by Chairman Banfield to have carried by unanimous vote. The Commission thereupon delegated Chairman Banfield to confer with Mr. Mc Arthur.

Mr. C. R. Fulgham, Dayton, re purchase of small parcel of land abutting on the Salem-Dayton Secondary Highway. The Assistant Attorney advised that the tract contains 1.68 acres and is valued at less than $250.00. However, according to instructions received from the former highway commission, he is precluded from considering any offer of less than $250.00. Due to the fact that this is more than Mr. Fulgham wishes to pay for the property, he considered it advisable to let Mr. Fulgham make his offer direct to the Commission. The Commission decided to listen to Mr. Fulgham's presentation and then to refer the matter to the Engineer and the Attorney for a joint report as to the advisability of accepting the offer that he makes.

Mr. M. A. Biggs, District Attorney of Malheur County. The Engineer advised that Mr. Biggs is appearing on behalf of the County relative to an exchange of a two-acre stock pile site which the County previously deeded to the State and later on sold under contract to other parties. The County Court, he said, wants the Highway Commission to deed the property back to the County to enable it to satisfy its contract sale and has stated a willingness to deed to the state another two-acre tract situate near by. The Commission took no action on this matter deferring the same until the following day when Mr. Biggs is present.

The Engineer reported on the costs to remove snow from the McKenzie Highway at McKenzie Summit and from the Mt. Hood Highway between Cooper's Spur and Wapinitia Junction so as to open up both of these highways for public travel. He estimated that it would cost about $300.00 to open up both highways

immediately and recommended approval of such expenditure. The Commission approved the recommendation by unanimous vote.

A letter was presented from Mr. Nic W. Monte, Regional Grazier for the U. S. Department of Interior, relative to the use of Federal Grazing Funds in connection with the construction of the Princeton-Rome Secondary Highway. Mr. Monte advises that the Grazing Service has set up a six-year post-war plan that calls for an expenditure of ten million dollars for range improvements; further, that his department feels that county road and other highway improvements are of as much importance to a community as would be the range improvements and should receive consideration in a unified program of post-war planning. He inquired whether or not the State Highway Commission would be willing to make a commitment of state funds for use in connection with the improvement of the Princeton-Rome Highway. The Commission decided by unanimous vote not to make any commitment at this time but to hold the matter in abeyance for future consideration.

Reconsideration was given by the Commission to a request from the Oregon Lumber Company for relief from furnishing flagmen on the John Day Highway at the point where this highway is crossed by the company's logging trucks. The Secretary recalled that the Commission at a previous meeting ordered a report as to the number of operators who are truck hauling logs directly across state highways as is the Oregon Lumber Company. Investigation, he says, reveals only two such operations - one being that of the Updegrave Trucking Company who are operating twelve logging trucks directly across the Klamath Falls-Lakeview Highway at mile post 24.50, and that of Mr. L. E. Parsons, who is operating two logging trucks directly across the Klamath Falls-Lakeview Highway at the same place. Permits issued to both of these operators, he said, contain the standard clause requiring flagmen. He pointed out that these two companies are operating a total of fourteen trucks under flagmen whereas the Oregon Lumber Company is operating sixteen trucks. The Commission considered it inadvisable to relieve the company of its obligation to furnish flagmen and accordingly denied the company's request.

The Engineer reported on the policy and practice that is now in force in the State of Washington with respect to the control of log hauling trucks, in comparison with that of the Oregon State Highway Commission. He advised that such comparison shows that the Oregon practice with reference to general log hauling is more valuable to the industry than is the Washington practice except for single log movements, in that it gives the loggers approximately the same total load and an additional one thousand pounds on the axle. As to the single log movements, he said, the Washington practice permits the movement of single logs weighing up to as much as 96,000 pounds and allows a weight of 46,000 pounds on tandem axles and 23,000 pounds on a single axle. The movement of such weights over highways such as exist in Oregon and Washington, he added, is bound to cause failure of the highways because the highways were not planned to carry such loads. He recommended retention by the Commission of its present policy with respect to general log hauling and that he be authorized to pass on single movements allowing the same if investigation reveals that highway facilities will not be damaged thereby. (See Engineer's letter dated July 3, 1943 addressed to members of the State Highway Commission for details of report.) After discussion, the Commission approved the Engineer's recommendation by unanimous vote.

JUL 6 1943

The Engineer reported that Highway Department Weighmasters are encountering difficulties in connection with the weighing of logging trucks on portable scales. It appears that truck drivers refuse to stop and allow their loads to be weighed on the loadometers unless the weighmasters have previously set up their signs on each side of the weighing operations, the operators alleging that they do not have to stop to be weighed unless the weighing operations are posted. Weighmasters, he said, frequently observe loads of logs while traveling with loadometers but it takes a little while to post the signs and to arrange the loadometers and when these are fixed, the load of logs has gone by and the operation has to be repeated. The Chief Weighmaster, he said, has requested unquestioned authority to stop a logging truck at any time when it appears that the load is overweight. It appeared to the Commission that this is a function of the State Police. The Engineer was thereupon instructed to discuss it with Mr. Charles P. Pray, Superintendent of State Police, and ascertain whether or not it would be possible for him to furnish a man to accompany the weighmasters who are operating the portable scales.

There was brought to the attention of the Commission a report of Chief Weighmaster, Loran L. Spaulding, relative to log hauling operations of Mr. Leo Howard whose permit was recently cancelled by the Commission for overload. According to Mr. Spaulding, two of the weighmasters observed three of Mr. Howard's trucks parked along side the Oregon Coast Highway at Hebo about 4:15 p.m., on June 23rd, which was the day before the trucks were supposed to operate after Mr. Howard's permit was reinstated. All three of these trucks, he said, were loaded with logs and had traveled over state highways for a distance of about ten miles. It appears that not only were these trucks being operated contrary to orders from the Highway Commission but they were also without proper PUC permits. Instructions were requested from the Commission as to what action should be taken in this matter. After discussion, the Commission instructed the Secretary to inform Mr. Howard that the Commission is cognizant of his infraction of the rules and regulations but in this particular instance will overlook it, although hereafter he will be expected to comply strictly with the laws and other requirements that govern his operations, otherwise he need expect no leniency whatever from the Commission in case of further violations.

The Commission discussed a report on overweight violations committed by Douthit and Shorey, log haulers, who are operating in the vicinity of Albany, and whose equipment has been weighed by highway department weighmasters at the Albany scales. According to the report, Douthit and Shorey are operating five trucks in this service and since January 15, 1943 have been observed with overloads sixteen times. The most recent violation occured on July 1, 1943, when their truck, bearing PUC Plate No. 4-22843, was observed with a load (gross) weighing 3,300 pounds in excess of the tolerances allowed by the Commission or 10,300 pounds in excess of the gross weight allowed by statute. The Commission decided not to cancel the permit of this operator for this particular offense; however, instructed the Secretary to notify Douthit and Shorey that unless they stop overloading their trucks, the Commission will consider them consistent violators of the requirements and will take action in connection therewith in accordance with the Commission's established policy.

The Commission confirmed the action taken at the previous meeting with respect to the sending of warning letters to log haulers who are observed with overloads, viz., letter of warning is to be sent to each operator who is observed with an overload. On receipt of report of the second overload, the offense is to be called to the attention of the Commission by telephone if the overload is flagrant or if the operator is a consistent violator. The Commission will then issue instructions whether or not to cancel the permit of the operator. In this connection, the Commission was advised that such warning letters were sent to all violators of record on June 17; however, due to delays in mail deliveries, it was thought best not to report flagrant cases to the Commission until July 1st in order to give the operators sufficient time to receive the notices. The Commission approved such procedure by unanimous vote.

The Commission discussed and ordered filed the Secretary's report on overweight violations committed by carriers who are operating under emergency transportation permits. According to this report, only four violations have been observed during the month June 4 to July 2, 1943, which is considerably less than the previous number reported during the same length of time.

A letter was presented from Mr. Maury Maverick, Director, Government Division, War Production Board, regarding the penalty that the Commission proposes to impose on log haulers who are observed with overweight loads. (See Secretary's letter dated June 8, 1943.) Mr. Maverick advises that the Commission's decision to cancel PUC permits of the violators will present a serious handicap to the war effort by restricting the amount of lumber that can be produced. He inquired if there is something that the War Production Board can do to help solve the overload problem so that such drastic action as the cancellation of permits regardless of number of trucks involved, will not be necessary. The Secretary was instructed to advise Mr. Maverick that the Commission does not have in mind the cancelling of a permit unless the operator is a consistent violator of the weight requirements or unless the overload is a flagrant one. Also that there are only a few violators in this category, the balance being conscientious operators who favor the Commission's policy with respect to the cancellation of permits.

The Engineer requested authority to install reflectorized railroad crossing signs at the grade crossing of the Salmon River Highway with the Willamina Grand Ronde Railroad Company tracks at Grand Ronde, Polk County. He explained that signs would be erected in the first instance at the expense of the state but future maintenance and renewal of the signs would be at the expense of the railroad company. The Commission approved the request by unanimous vote and thereupon signed a petition directed to the Public Utilities Commissioner requesting authority to erect the signs.

The Commission by unanimous vote approved the Engineer's letter of June 22, 1943, directed to Major Ernest H. Keene, F. D., United States War Department, Camp Abbot, Oregon, granting the War Department authority to use lands that are under the jurisdiction of the State Highway Commission in connection with the army maneuvers that are to be held in Central Oregon this year. Such use of the state's property is subject to the conditions that civilian traffic over highways is not interupted and that the army authorities will

assume the responsibility of protecting highway users against danger from artillery and rifle fire. Also that the War Department will reimburse the state for the expense of repairing the state's property that is damaged in connection with such maneuvers.

The Engineer requested authority to advertise for bids for the furnishing of approximately 30,000 cu. yds. of crushed rock which is needed for maintenance of the Oregon Coast Highway and the Wolf Creek Highway south of Cannon Beach where these highways are being severely damaged by log-hauling operations. He estimated that such material would cost about $90,000. The Commission approved the request by unanimous vote upon motion of Commissioner Chessman which was seconded by Commissioner Schaupp.

The Engineer asked the Commission to confirm the oral authority previously granted him to spend approximately $1,800.00 for construction of certain drainage facilities on the Pacific Highway East in the vicinity of Jantzen Beach, Multnomah County. He explained that ordinarily this work would have been done by state forces. However, due to the fact that the men were not available, he entered into a price arrangement with a contractor to do the work which cost the state about $300.00 more than if the work had been performed by a state crew. Commissioner Schaupp moved approval of the project. The motion was seconded by Commissioner Chessman and received the unanimous vote of the Commission.

A letter was presented from County Judge L. D. Felsheim, Coos County, in which the Commission was requested to assume the maintenance of County Market Road No. 5, known as the North Bank Road, particularly the portion thereof which extends from the Oregon Coast Highway (U.S.101) to the junction with the Seven Devils Chrome Access Road. Judge Felsheim advises that this road is being used largely by trucks hauling chrome and that the county has neither the manpower, equipment, nor the funds to adequately maintain the road under present traffic conditions. The Engineer advised that the section of the road referred to is 2.5 miles in length. He confirmed Judge Felsheim's statement to the effect that the road is being damaged by the trucks hauling chrome and recommended that the highway department assume the responsibility for maintaining this road if the Federal Government will pay the costs involved. Mr. T. M. Davis, Senior Highway Engineer, Public Roads Administration, who was present advised that an amount of $3,500.00 of Federal funds was at one time set up for such purpose and it was his thought that the government would assume this expense. After discussion, motion was made by Commissioner Chessman that the State Highway Department take over the maintenance of this road so long as the Federal Government will provide funds to pay the costs. The motion was seconded by Commissioner Schaupp and was declared by Chairman Banfield to have passed by the unanimous vote of the Commission. The Commission ordered the arrangement covered by written agreement between the county and the state.

The Commission had under discussion a request from Mr. Widmark for construction by the state of an irrigation ditch on private property situate about 1/2 mile north of the McKenzie Highway near the town of Sisters. The Engineer explained that the present irrigation ditch crosses the McKenzie

Highway in a concrete pipe at Spruce Street in the town of Sisters but there is a question whether or not it will again be used for irrigation purposes. In any event, Mr. Widmark is willing that this pipe culvert be closed, if the Highway Commission will construct the irrigation ditch on his property about 1/2 mile north of the highway which will cost about $100.00. If this culvert is closed, he added, Mr. Widmark will obtain his irrigation water through another ditch which crosses the highway at Cedar Street in Sisters. He recommended that the request be denied because in his estimation the highway department should not engage in construction work such as this off the highway right of way. Moreover, there may be objections from others to the closing of the ditch, and the Highway Department does not have men available to do the work. The Commission approved the recommendation by unanimous vote.

The Attorney presented a request from Mr. Harold B. Pasley for right of access to the Wolf Creek Highway through the Fred Zurcher property in Washington County. It appears that Mr. Pasley owns property that is situate back of the Zurcher property which fronts on the highway but he has no direct outlet therefrom except across the Zurcher land and he cannot use such an outlet unless the Highway Commission will grant him access to the highway at that point. This matter was discussed at considerable length but the Commission deferred a decision relative thereto pending receipt of additional information from the Attorney.

The Commission discussed a letter from the Ochoco Lumber Company requesting the rental of one of the Highway Department's power shovels for two or three days in connection with the quarrying of gravel for use in construction of driveways around its lumber sheds, at Prineville. The company advises that suitable gravel is obtainable on its millsite but it has no way of quarrying and they are anxious to improve the driveways so they can be used next winter. The Engineer advised that the company is willing to pay rental rate established by the OPA which is $165.00 per week or $41.00 per day. He recommended approval of the request. The Commission approved the recommendation by unanimous vote.

The Commission discussed a letter from Lt. J. G. Miller, A.G.D., Assistant Adjutant General, in regard to the use of Federal troops for guarding the Interstate Bridge. Lt. Miller advises that he has been directed by the Commanding General to inform the State Highway Commission that the United States War Department considers as its policy that it is the primary responsibility of local and state governments to protect installations such as bridges, etc., and that only in emergencies when the protection afforded by the responsible parties is considered inadequate will Federal troops be used. He further advises in view of this policy, that General DeWitt considered it inadvisable to make any change in his decision to withdraw the army guard from the Portland-Vancouver Interstate Bridge. The Commission ordered the communication filed.

The Attorney brought up for discussion the status of a proposed agreement with Mr. Frank H. Hilton with respect to the removal of his building from state highway property at Waldport. He advised that he submitted to Mr. Hilton a form of agreement covering this matter but Mr. Hilton refused to sign it because it contained provision for the removal of the building at the end of the

war, in any event, at the end of a two-year period. Mr. Hilton says he wants that clause changed to provide that the building may be left in its present location until the expiration of a period of six months after the war is over. The question arose what is meant by the duration. Commissioner Schaupp suggested phrasing substantially as follows which is the phrasing used in governmental papers:

> "Six months after the date of termination of the present emergency as declared by the President of the United States in proclamation No. 2487, on May 27, 1941."

The suggestion was approved by the unanimous vote of the Commission and the Attorney was instructed to revise the agreement accordingly.

The Engineer requested authority to purchase a small tract of land at the town of Crane, Harney County, as a maintenance headquarters site, and to spend approximately $1,000.00 of State Highway funds to construct thereon a temporary shelter to house Highway Department equipment. The Commission approved the request by unanimous vote upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman.

The Engineer also requested authority to purchase a small tract of land adjoining the maintenance headquarters site at Hebo, Tillamook County, on which to stock pile maintenance rock. Such request was approved by the Commission by unanimous vote subject to the condition that the tract may be obtained at reasonable cost.

The Assistant Attorney discussed with the Commission the advisability of purchasing additional lands from the State Land Board in connection with the relocation of the Pacific Highway between Wolf Creek and Grave Creek in Josephine County. He advised that the tract in question contains a total of 160 acres of which the Highway Department has already acquired 11.6 acres leaving a balance of 148.4 acres which can be purchased for the sum of $238.92. He recommended approval of this purchase giving as his thought that the area that is not needed for highway purposes can readily be sold later. After discussion of this matter, motion was made by Commissioner Chessman that the full 160 acre tract be purchased. The motion was seconded by Commissioner Schaupp and was declared by Chairman Banfield to have received the unanimous vote of the Commission.

The Assistant Attorney presented an offer from Mr. H. W. Freeze, Portland, to purchase fractional lots 1, 2, 3 and 4 of block 1, Kenton, Portland, for the sum of $2,000.00. He advised that this is the property for which the Commission received bids at its last meeting, the only bid being that of Mr. Freeze at $600.00 which the Commission rejected. Mr. Freeze's present offer, he says, is subject to a down payment of $500.00, the balance to be paid $25.00 per month during the first 12 months, and then $40.00 per month until the full purchase price has been paid. He recommended acceptance of this offer provided Mr. Freeze will pay the state 4½% interest on the deferred payments. Motion was made by Commissioner Schaupp that Mr. Freeze's offer be accepted provided he will pay 4½% on the deferred payments. Motion

was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission.

The Commission discussed an offer from W. H. Grabenhorst, Salem, to purchase a portion of the Christian Ramseyer property adjacent to the Pacific Highway south of Salem, which property was acquired by the Commission in connection with a right of way transaction. The Assistant Attorney advised that the tract contains 81.5 acres and that it has been appraised by a realtor in Salem at $2,852.50. The property, he said, has been listed with the Grabenhorst Company at $3,500.00 but there have been no inquiries concerning the purchase of same at such figure. Mr. Grabenhorst has offered to pay $3,000.00 for the property but would charge no commission for the sale which means that the state would save the sum of $225.00. He recommended acceptance of this offer in view of the fact that when considering the payment of the commission the amount that the Highway Commission will receive is only $275.00 less than the list price. The Engineer advised that the property is not needed for state highway purposes and that he is willing to abide by the Attorney's recommendation with respect to the sale price. After discussion, motion was made by Commissioner Chessman that Mr. Grabenhorst's offer be accepted. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

The Assistant Attorney brought up for discussion a complaint from Mr. C. F. Campbell, Eugene, with respect to certain buildings that the Highway Commission acquired from him in connection with acquisition of right of way for a proposed roadway between 8th Avenue and East Broadway in Eugene. He advised that the Commission sold these buildings to the Sullivan Wrecking Company on June 16, 1943 for $82.95 but Mr. Campbell now alleges that he did not intend that the Commission should have all the buildings. The Assistant Attorney suggested as a compromise proposition that the Commission pay to Mr. Campbell the amount received from the Sullivan Wrecking Company less the amount spent by the Commission for advertising, etc. It was his thought that Mr. Campbell would be satisfied with such a settlement. The Commission took the attitude that it acquired these buildings in good faith and could dispose of them as it saw fit. In view thereof, the Commission deferred its decision in the matter pending receipt of additional information from the Assistant Attorney.

The Commission approved and signed a petition directed to the Westland Irrigation District, Morrow County, requesting the exclusion from such irrigation district lands included in the right of way of the Old Oregon Trail which passes through the district. The action of the Commission was by unanimous vote upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman.

A resolution was presented from the Salem City Council requesting that Center Street in Salem from the East line of Commercial Street to the West line of Capitol Street be designated as a state highway route. The Engineer recommended approval of this request because this street forms a direct connection between the Pacific Highway and the Salem-Dallas Highway, and for the further reason that it has been signed as a state highway route for many years.

After discussion, the Commission approved the request and thereupon by unanimous vote adopted the following resolution in regard thereto on motion of Commissioner Chessman which was duly seconded by Commissioner Schaupp:

WHEREAS, by the provisions of Section 115-351, O. C. L. A., as amended by Chapter 48, Oregon Laws, 1941, the State Highway Commission with respect to state highways is authorized to designate main travelled or through highways or sections thereof by placing at the entrance thereto from intersecting highways signs or markers notifying drivers of vehicles to stop before entering or crossing such designated highways; and

WHEREAS, under the provisions of Section 100-122, O. C. L. A., the Commission is authorized and directed, whenever the route of any state highway passes through the corporate limits of any incorporated city or town of this State, to select and designate the street or streets of such incorporated city or town over which said state highway shall be routed, and said Commission is further authorized and directed to erect and maintain suitable road signs on and along said street or streets at such places and of such material and design as the Commission may select, and it is further provided by said law that the Commission may alter or change said routing when in its opinion the interests of the motoring public will be better served; and

WHEREAS, it is the judgment and opinion of the Commission that Center Street in the City of Salem from the east approach of the county bridge over the Willamette River connecting West Salem with Salem to the junction of said Center Street with Capitol Street should be designated as a street of the City of Salem over which to route state highway traffic, and it is further the judgement and opinion of the Commission that said street between said termini should be declared a main or through highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That Center Street in the City of Salem from the east end of the county bridge over the Willamette River between West Salem and Salem to the place where said street intersects or is intersected by Capitol Street be and said street between said termini hereby is designated as a street of the City of Salem over which there shall be routed state highway traffic.

2. That said street between said termini hereby is declared to be and hereby is designated as a main travelled or through highway.

3. The State Highway Engineer hereby is directed to erect and thereafter maintain along Center Street between said termini the necessary and appropriate directional signs conforming to the design and type of sign heretofore adopted and approved by the Highway Commission for like purpose.

4. That the State Highway Engineer be and he hereby is instructed to place or cause to be placed and thereafter maintained along said Center Street between said termini at all points where streets or roads intersect or enter said Center Street signs or markers notifying drivers of vehicles to stop before entering or crossing said street.

5. That the said Engineer is instructed further to place such signs or markers as nearly as practicable at the place or places where said cross or intersecting roads or streets meet a prolongation of the nearest property line of such through street, and such signs or markers so placed or installed shall indicate or designate to all drivers of motor vehicles entering said street from any of the said cross or intersecting roads or streets the place where the stop shall be made.

6. That said signs or markers shall conform in shape, design, size and other physical characteristics to the specifications and standards heretofore approved for such signs and markers.

7. That this resolution shall be entered in the minutes and records of the Commission as of the sixth day of July, 1943, and a duly certified copy thereof delivered to the Public Roads Administration and to the City of Salem.

8. That from and after the adoption of this resolution the maintenance of Center Street between said termini shall become, by reason of the designation of said section of said street as a street over which to route state highway traffic, and hereby is accepted by the Highway Commission as, an obligation of the State, and said street be maintained at the expense of the State between said termini.

The Engineer requested authority to increase the budget for the I.O.N. Highway Survey between Rome and the Idaho State line. He pointed out that the Commission previously authorized an expenditure of $3,000.00 for such purpose. However, it now appears that an additional $2,000.00 will be needed. The Commission approved such increase by unanimous vote.

Mr. Leslie Wadsworth, President of the State Association of Insurance Agents, was present and reported on the cost to insure the State Highway Department buildings. He advised that he had been successful in obtaining a rate of $2.56 per hundred for such insurance which includes extended coverage. At that rate, he said, the total premium will be $28,000.00 rather than $36,000.00 which he previously quoted. The Commission approved the report and confirmed the decision reached at the previous meeting to purchase such insurance. The matter of purchasing additional insurance covering building contents, automobiles and construction equipment was also discussed. The Engineer was authorized and instructed to investigate such matter and report back to the Commission.

The Engineer brought up for discussion matters pertaining to the contract awarded to Mr. C. J. Eldon for construction of the Wright Ranch-Milo Section of the Tiller-Trail Secondary Highway in Douglas County, contract No. 2557. He advised that Mr. Eldon has been making very slow progress on this work, alleging difficulties in securing oil, and there is a question whether or not the job will be finished this year. He was instructed by the Commission to ascertain from Mr. Eldon what plan he has for completing this project. In this connection, the Commission informed the Engineer that it is holding him responsible to handle matters of this kind without first receiving special orders from the Commission.

The Engineer requested authority to work the oil crews on a nine-hour shift basis. He advised that Crew No. 2, H. C. Melton, foreman, is now working in the Tillamook area where cost of living is higher than in other places and accommodations are scarce, due to logging operations and Navy construction work which is going on in this vicinity. It was his thought that by working the men on a nine-hour basis, which would necessitate paying them for ten hours' work, the crews could be held together. He also asked the Commission to authorize the placing of pavement-patching crews on a nine-hour day schedule. Relative to such crews he advised that if the work contemplated for this year is to be completed, it will be necessary to work the men longer hours. He gave as his thought that the extra pay resulting from the increased working hours probably will keep the men from quitting and will help in the securing of additional men for the short-handed crews. The matter was discussed at considerable length, and as a result thereof the Commission by unanimous vote approved the establishment of a nine-hour shift for all oil crews, and for the nine pavement-patching crews. This arrangement is to be of a temporary nature for this year's emergency period only.

A letter was presented from the North Tillamook County Chamber of Commerce, requesting the privilege of meeting with the State Highway Commission on its Coast Highway trip next week, to present several road matters. The Commission approved the request, and referred the matter to the Engineer to arrange the schedule accordingly.

A letter was presented from the Associated General Contractors of America, Inc., in which the Commission was advised that the enactment by the Congress of H. R. 2798 is seriously in danger, and urging friends of the proposed legislation to contact their congressmen relative thereto. The Engineer advised that this is important legislation from the State Highway Department's standpoint, and suggested that the Oregon congressmen should be urged to make a strong stand in favor of the passage of the bill. He was instructed to discuss the matter with Senator C. L. McNary, who is now on vacation in Salem, and to contact the other Oregon congressmen by letter.

The Commission approved, upon recommendation of the Engineer and the Attorney, the granting of an easement to the Union Pacific Railroad Company for the permanent use of a small tract of land owned by the state in Umatilla County, described as follows:

JUL 6 1943

0.23 acre, situate in the NE¼, Sec.8, T2N., R32E., W. M. (Right of Way File No. 1975.)

The Commission thereupon signed the easement.

The Assistant Attorney reported a request from Mr. Elgin B. Lichtenwalter, a farmer, who resides along the West Portland-Hubbard Highway near Aurora, for permission to fence off a portion of the highway right of way for grazing purposes until the state needs the property. He advised that the section which Mr. Lichtenwalter wishes to fence is at the southerly end of the graded section of the Highway, south of Boones Ferry Road Crossing, where no construction has been undertaken except that some material was taken for borrow purposes. He gave as his thought that it would be satisfactory to let Mr. Lichtenwalter use this property until such time as the state needs it, and he recommended that the standard form of permit which has been approved for persons who wish to use state-owned land for Victory gardens be issued to Mr. Lichtenwalter. Such permit, he pointed out, is revocable at any time and is on the year to year basis. After considerable discussion, the Commission by unanimous vote approved his recommendation.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission, and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission, by unanimous vote, authorized and instructed the Engineer to make such surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Plans	206-1433	Coos	North Bend Air Station Access Road	1st - $500.00
Relocation	18-1466	Klamath	Chemult and Chiloquin Sec., The Dalles-California Hwy.	1st - $25,200.00
Bench Marks	24-1445	Marion	Illahee-Steiwer Hill Sec., Pacific Highway East	1st - $150.00
Prospecting Materials	17-1420	Josephine	Wolf Creek-Grave Creek Sec., Pacific Highway	1st - $1,500.00
R/W Markers	25-1412	Morrow	Boardman-Umatilla Co. Line Sec., Boardman-Stanfield Hwy.	1st - $400.00
R/W Markers	30-1446	Umatilla	Morrow County Line-Stanfield Sec., Boardman-Stanfield Hwy.	1st - $350.00

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Oil Storage Tank Site	36-1430	Yamhill	Whiteson Section, Pacific Highway West	1st - $50.00
Prospecting for Quarries	12-1430	Grant	Seneca-Harney County Line Sec., John Day Highway	1st - $300.00
Prospecting for Quarries	13-1422	Harney	Grant County Line-Burns Sec., John Day-Burns Highway	1st - $500.00
Prospecting for Gravel & Talus Pits	113-1423	Harney	Princeton-Folly Farm Sec., Rome-Princeton Secondary Highway	1st - $500.00
Relocation	130-1447	Umatilla	Reith-Pendleton Sec., Stanfield-Pendleton Secondary Hwy.	1st - $100.00
Relocation	10-1431	Douglas	Glendale Junction-Canyonville Section, Pacific Highway	4th -$7,500.00 Total to date $32,000.00
Prospecting for Material	110-1433	Douglas	Wright Ranch-Tiller Section, Tiller-Trail Highway	3rd- $1,200.00 Total to date $6,200.00
Test Pits	17-1419	Josephine	Sexton Mt. Section, Pacific Highway	2nd- $2,750.00 Total to date $4,000.00
Reconnaissance	28-1413	Sherman & Wasco	Sherman and The Dalles-California Highways	5th- $2,000.00 Total to date $8,250.00
Location	18-1455	Klamath	The Dalles-California and Klamath Falls-Lakeview Highways	3rd- $2,000.00 Total to date $15,000.00

In this connection, the Commission discussed the advisability of authorizing the Engineer to order certain surveys without first securing the approval of the Commission. The Engineer recalled that he was authorized by the former Commission to order surveys that were not costly without first taking the matter up with the Commission, it being understood that he would secure confirmation by the Commission at the next meeting following. Such arrangement, he said, has worked very satisfactorily in that he has been able to expedite surveys that are of a minor nature and eliminates the necessity of bothering the members of the Commission with such details between meetings. The matter was discussed at some length with the result that the Commission voted unanimously to give the Engineer such authority to order surveys that are esti-

mated to cost not more than $2,000.00. He was instructed, however, to secure the Commission's approval at the first meeting following the issuance of the order. In reporting such surveys, the Commission ordered that any survey that previously had not been brought to the attention of the Commission shall be identified by the wording "not yet authorized."

The Engineer brought up for discussion the matter of right of way for the North Bend AirportAccess Road. It appears that such right of way is being acquired by the Federal Government which has inquired whether or not the Commission would loan the services of its Attorney, if necessary, in connection therewith, as it appears necessary to condemn certain right of way across property owned by a Japanese. The Commission by unanimous vote approved the loan of the Attorney's services for such purposes.

The Commission considered a request from contractor O. C. Yocom for an extension of time of sixteen days from November 30, 1942 to December 16, 1942, within which to complete his contract No.2597 for the construction of the South Mountain Mine Access Road in Malheur County. Mr. Yocom attributed his failure to complete the project within the specified time limit to adverse weather conditions and to difficulties in working his gravel pits. The Engineer advised that the award of this contract was held up for eighteen days after bids had been received so, in his estimation, Mr. Yocom is automatically entitled to an extension of time of such length. The state, he said, has not incurred any extra expense for engineering supervision in view of the fact that the engineering crew had another project in this vicinity under way at the same time. He recommended that the extension of time be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contracts No. 2597 and 2617, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

> WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:
>
> Contract No. 2597, with O. C. Yocom for 18 miles of roadbed topping on the South Mountain Chrome Mine Access Road in Malheur County. Completed December 16, 1942.
>
> Contract No. 2617, with M. C. Lininger & Son for furnishing crushed rock in stock piles for the Rock Creek-Joseph Section of the Wallowa Lake Highway in Wallowa County. Completed on June 23, 1943.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission adjourned at 5:00 p.m. to reconvene the following morning in the auditorium of the Public Service Building.

Portland, Oregon, July 7, 1943

The State Highway Commission reconvened in regular session at 9:00 a.m. in the Public Service Building Auditorium. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction work, for furnishing ferry service at Enegren Crossing of Coos River, sale of a building in Freewater, and sale of peaches in The Cove State Park were opened and read in conformity with previous published notices following which Chairman Banfield announced that awards would be made at 3:00 p. m. in the same room.

SALE OF PEACH CROP AT THE COVE PALISADES STATE PARK

NO BIDS RECEIVED

The Engineer requested authority to enter into a price agreement with O. C. Yocom, contractor on the Boswell Ranch-Follett Ranch Section of the Wallowa Lake Highway in Union County, for the furnishing of 3,000 cu. yds. of maintenance materials at a price of $2.50 per yard. The Commission approved the request by unanimous vote.

The Engineer presented a letter from Mr. Maury Maverick, Director, Government Division, War Production Board, inviting him to serve as a member of the construction machinery committee whose purpose is to advise and criticize the government division and the construction machinery division in their efforts in aiding local governments in the maintenance and repair of highways and obtaining surplus equipment. He advised that the first meeting of this group is to be held on July 22, 1943, but that he would not be able to attend this meeting even if the Commission authorized him to accept the invitation. The Commission by unanimous vote authorized the Engineer to accept this appointment.

A delegation representing the Southeast Portland Chamber of Commerce was present and urged the Commission to consider in its post-war program the following projects:

1. Extension of the improvement of 82nd Street, Portland, (Cascade Secondary Highway) from its present terminus to a connection with the Pacific Highway East near Oregon City.

2. Proposed extension of Foster Road, Portland, to a connection with the Mt. Hood Highway near a place called Kelso.

The delegation was headed by Mr. L. A. Mathison, Vice President and included Mr. Fred J. Barber, President, Mr. Charles H. Johns, Treasurer, and Mr. Axel Kildahl. They gave as their understanding that the improvement of 82nd Street was scheduled to be completed clear through to Oregon City but for some reason or other work was discontinued. Now they inquire as to the plans

of the Commission in regard thereto giving as their thought that they are entitled to this improvement as well as the proposed extension of Foster Road.

Chairman Banfield advised that this Commission is new and as yet has no definite plans for construction work; that the Commission is now canvassing the entire state to ascertain the ideas of the various communities as to which projects should be given priority status. The Commission, he said, will not formulate any definite construction program until such canvass has been completed and the Commission knows definitely what monies will be available to finance the work. Further, that it is the intention of the Commission to consider all of the projects that are presented and, after analyzing them thoroughly, to select those which it considers will do the most good for the greatest number of people bearing in mind monies available for construction.

Mr. Mathison read aloud from a report of the State Highway Engineer to the State Highway Commission, dated October 5, 1935, with respect to the proposed Foster Road Extension. (See report in general files for details.) He alleged that there are only two sections along this proposed route that would require new construction and advised that the Board of County Commissioners of Multnomah County are favorable to the project and have evidenced a willingness to grade the road from Portland to the Multnomah County line, if Clackamas County will grade the section from the county line to a connection with the Mt. Hood Highway. With regard to the 82nd Street Project, Mr. Mathison stated that north of the Multnomah -Clackamas County line the highway is in fine condition, but south of such point it is narrow and crooked and needs realignment badly. He said that the Southeast Portland Chamber of Commerce is not interested in any route controversy with respect thereto but simply wants a good highway connection with Oregon City. He urged the Commission to inspect both projects in company with representatives of the Southeast Portland Chamber of Commerce.

In conclusion, Chairman Banfield advised that the Commission will give careful consideration to both projects in the formulation of its construction program. However, it is not making any commitments or promises at this time. He further stated that the Commission will inspect both projects before passing final judgment but is not in a position at this time to state just when such inspection will be made.

Mr. Walter Meacham, Executive Secretary, Old Oregon Trail Centennial Commission was present and asked the Commission to authorize the erection of additional historical markers along the Old Oregon Trail. The Commission took the matter under advisement. Mr. Meacham also asked the Commission to assist the Oregon Trail Association in the placing of stakes along the original Oregon Trail Route so that the route actually used by the original settlers will be easily identified. He advised that the Oregon Trail Association is sponsoring such a project clear through to Missouri and will furnish the stakes but it has no means of transporting the stakes to the various points where they are to be installed. All that the Association is asking the Highway Commission to do, he said, is to deliver the stakes of which he thought there would be about 150 in the State of Oregon, east of The Dalles. After discussion, Chairman Banfield

stated that the Commission will cooperate to the best of its ability but cannot make a definite commitment until it has detailed information with respect to the locations. Mr. Meacham agreed to furnish the Engineer with complete information including a map showing the locations of the various places where the stakes are to be placed. Such information is then to be transmitted to the Highway Commission which will issue definite instructions.

The Engineer discussed briefly with the Commission a proposed agreement with the Northern Pacific Railway Company and the City of Portland, with respect to the construction of an overhead pedestrian crossing at Northwest Sherlock Avenue and Northwest Nicolai Street in Portland. He advised that an agreement was prepared covering this construction and that it was signed by the railway company. However, the City of Portland has refused to furnish the right of way and the project cannot go forward. In view of this information, the Commission decided not to sign the agreement but to hold the matter in abeyance for future consideration.

Consideration was given by the Commission to a request for the maintenance of a metal irrigation flume along The Dalles-California Highway near milepost 36.5. The Engineer advised that when the highway was constructed at this point it was necessary to change the location of an irrigation ditch, and that the topography was such that several hundred feet of flume had been constructed in lieu of an open ditch. This was some sixteen years ago, he said, and the flume is now in need of repair which Mr. J. E. Peck, the owner, alleges is the obligation of Wasco County. The County Court, he said, is unable to find any agreement with respect to the maintenance of this flume so the matter has been passed on to the State Highway Department. He estimated that it will cost about $50.00 annually to maintain the flume and gave as his thought that this is a county obligation rather than the states although the State Highway Department may be obligated to a certain extent if the flume has been damaged by state forces. The Attorney advised that the flume was constructed as a right of way consideration in view of which it is his opinion that the maintenance of the flume is a county obligation, notwithstanding the fact that part of the flume may be on the highway right of way. He recommended that the Commission refuse to accept the responsibility. The recommendation was approved by the Commission by unanimous vote upon motion of Commissioner Chessman which was seconded by Commissioner Schaupp.

Mr. S. H. Boardman, State Parks Superintendent, was present and reported on the following park matters:

1. Sale of peach crop in The Cove-Palisades State Park: Mr. Boardman pointed out that this sale was advertised for bids to be received at this meeting but no bids were received presumably on account of the fact that the O.P.A. had set a ceiling price for such commodity. He inquired as to the wishes of the Commission with respect to disposal of the peaches. After discussion, motion was made by Commissioner Schaupp that the matter be referred to the Parks Superintendent, the Engineer and the Attorney to work out a way to dispose of the peaches in a manner that will be to the best interests of the state. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission.

2. Report on inspection of the John Day Fossil area with Dr. John C. Merriam: The Parks Superintendent advised that as a result of this inspection, an agreement has been reached with Dr. Merriam as to the terrain that should be included in the proposed park. The Commission approved the report and thereupon invited the Parks Superintendent to accompany the Commission on its Central Oregon Trip at which time the Commission proposes to personally view the area.

3. Status of Champoeg State Park: The Parks Superintendent advised that he has assumed full jurisdiction over this park as authorized by the 1943 Legislature and the State Highway Commission. He was instructed to furnish each member of the Commission a detailed report of this park which is to include statements as to the existing conditions therein and as to plans that the Parks Superintendent has for the development of this area, the idea being that the Commission will use this information in the establishment of park policy.

4. Sheep grazing in Humbug Mountain Park: On recommendation of the Parks Superintendent, the Commission authorized renewal of its agreement with Mr. Robert Fromm which provides for the pasturing of sheep in this park from April 14, 1943 to April 13, 1944, at the rate of 50¢ per head per year.

5. Harney County Recreational Area: The Parks Superintendent reported receipt of a telegram from County Judge Nelson B. Higgs, Harney County, to the effect that if the State Highway Commission will withdraw its application for the leasing of certain lands adjacent to the John Day-Burns Highway about ten miles north of Burns, then Harney County will complete its application for acquisition of such land by exchange for other county lands and upon consummation of such transaction, the county will sell the tract to the state at the rate of $1.25 per acre, or a total of approximately $700.00 for the 560 acres involved. The land desired by the state is for recreational purposes and is described as follows:

> The E½ of NE¼ and the SE¼ of Section 21, The N½ of NE¼, SE¼ of the NE¼, and the N½ of SE¼ and the SE¼ of the SE¼ of Section 28, and the W½ of the NE¼ of Section 33 of T21S., R31E., W. M., Harney County.

The Commission considered this a good deal and by the unanimous vote of the Commission authorized the State Parks Superintendent to carry the transaction through to completion. The motion was made by Commissioner Chessman and was seconded by Commissioner Schaupp.

6. Proposed Wallowa Lake Park: The Parks Superintendent discussed briefly with the Commission matters pertaining to the proposed acquisition of land at the upper end of Wallowa Lake for state park pruposes. While the Commission took no definite action in this matter, the individual members expressed themselves as not being in favor of purchasing land in order to improve private holdings on the lake frontage. The Parks Superintendent was told to discuss the matter with the owners of the property on such basis.

During the discussion of park matters, the thought was expressed that it would be a nice thing if the Commission would take special recognition of the 80-acre park site gift from Mr. & Mrs. Ben Dorris of Eugene that was reported by the Parks Superintendent at the previous meeting. The suggestion was approved by the Commission which adopted the following resolution in regard thereto by unanimous vote:

WHEREAS, the citizenry of the State of Oregon, by legislative act, has recognized the value of and has declared it to be the policy of the State to preserve for general public use and enjoyment scenic and recreational sites and places along the public highways of the State, and, in furtherance of such purpose, has empowered the Highway Commission to acquire by purchase or by gift area possessing scenic and recreational qualities and values, and develop the same for public use, and

WHEREAS, Ben F. Dorris and Kay C. Dorris, desiring to cooperate with the Highway Commission, have, by deed of gift, conveyed to the State of Oregon, for public park and recreational purposes, a tract of land consisting of eighty (80) acres, located on the picturesque McKenzie River and on the equally picturesque McKenzie Highway, and have tendered such deed to the Commission for acceptance, and

WHEREAS, this Commission appreciates the generous and gracious contribution which Mr. and Mrs. Dorris have thus made to the development and welfare of this State;

NOW, THEREFORE, be it and it hereby is resolved by this Commission, all members being present, as follows:

(a) That the State Highway Commission does, on behalf of the people of the State of Oregon, gratefully accept and does with pride dedicate said land to the public forever for all public park and recreational purposes;

(b) That this Commission, for and on behalf of the citizenry of the State, does hereby express cordial and sincere appreciation of the helpful contribution, which the donors have so graciously made to the welfare and development of Oregon;

(c) That the deed of gift tendered by Mr. & Mrs. Dorris be accepted and placed of record in the deed records of Lane County, Oregon, and thereafter filed permanently in the records and files of the Commission at Salem, Oregon;

(d) That said park shall be known as the Ben F. and Kay C. Dorris State Park and shall by appropriate markers be so designated; and

(e) That this resolution be entered in the minutes and records of the Commission and an embossed copy thereof be presented to Mr. and Mrs. Dorris.

Mr. M. A. Biggs, District Attorney of Malheur County, came before the Commission in regard to a two-acre stock pile site that the county deeded to the state several years ago. Mr. Biggs advised that the county deeded this property to the state on June 6, 1934 but for some reason or other the deed was not recorded until May 14, 1936 and in the meantime, the subdivision of which this tract is a part was sold by the county under contract to other parties who are now demanding the two acres. He urged the Commission to deed this tract of land back to the county so the county can complete its transaction with the other parties, and advised that if the Commission will do that the county will give the state two acres situate nearby which should serve its purpose. The matter was discussed at considerable length but a definite decision was deferred until the afternoon session. (See ahead for final decision on this matter.)

The Engineer presented a tabulation of the following:

1. State primary highways which have been approved as part of the federal secondary highway system.

2. Primary highways tentatively approved as part of federal secondary highway system.

3. Primary highways not previously included in any federal secondary highway system program.

4. State secondary highways that have been approved as part of the federal secondary highway system.

5. State secondary highways that are tentatively approved as part of the federal secondary highway system.

6. State secondary highways not previously included in any federal secondary highway program.

He stated that he is fearful that any highway that is not on the federal primary or secondary highway system will not be eligible for federal funds that may be appropriated by the Congress for post-war construction and suggested that the Commission study these tabulations with the view in mind of placing these highways on such federal system if possible so as to avoid delays from that standpoint when the Commission is ready to formulate its construction program for future federal funds. The Commission took the matter under advisement. This matter was discussed briefly again during the afternoon session with W. H. Lynch of the Public Roads Administration.

The question whether or not to furnish plates to be used in printing of "County Officer Magazine," that is published by the Association of Oregon Counties, was brought up for discussion by the Engineer who advised that such plates were furnished last year at a cost of approximately $100.00. After discussion, the matter was referred back to the Engineer with instructions to contact the members of the advisory committee on travel and informative matters. The Commission authorized the expense if the members of the advisory committee are favorable.

The Commission adjourned at 12:00 noon and reconvened at 2:00 p.m. in the same room with all members, the State Highway Engineer, the Attorney and the Secretary present. During recess, the Commission took luncheon with the members of the recreational committee of the Portland Chamber of Commerce including Messrs. Art Kirkham, Loeb and Rohr. The acquisition of timbered wayside strips throughout the state was the topic for discussion. The Commission evidenced a sympathetic reaction to the arguments presented by the members of the committee and agreed to assist the committee in the furtherance of the acquisition of such timbered waysides insofar as is possible. (The Secretary did not attend this luncheon, but secured above information from Mr. S. H. Boardman, Parks Superintendent who was present.)

Reconsideration was given by the Commission to the matter of reconveying to Malheur County, the two-acre stock pile site mentioned by Mr. M. A.Biggs, District Attorney, at the morning session. Commissioner Chessman gave as his thought that the Commission should deed this property back to the county in order to keep the county's good will provided the county will deed to the state the other two-acre tract mentioned by Mr. Biggs, and he so moved. Commissioner Schaupp seconded the motion which was carried by the unanimous vote of the Commission

The Engineer reported a request from Mr. Harvey Wells, Portland, for action on the part of the State Highway Department to improve traffic conditions in the vicinity of Jantzen Beach, particularly insofar as pedestrians are concerned. It appears that pedestrians do not use the underpass that has been constructed for them because it is not immediately available at the point where they wish to enter the park, but prefer to walk across the highway which introduces a hazard that may some time result in a bad accident. The suggestion has been made, he says, that the matter could be taken care of by the establishment of a 30-mile per hour speed limit along this section coupled with proper police enforcement. However, he questions that such solution would prove effective particularly in view of the fact that the war time speed limit is now only 35 miles per hour in excess of such rate. After discussion of this matter, suggestion was made by Chairman Banfield that the Highway Department maintain signs at the point where pedestrians cross the highway directing them to use the underpass and that it be left up to Mr. Wells to provide other safety facilities and to obtain police protection. The suggestion was approved by Commissioners Schaupp and Chessman and was adopted by the Commission. The Engineer was instructed to erect signs accordingly.

The Commission discussed informally matters pertaining to the Highway Commission's damage suit against the California Oregon Power Company

and the Southern Pacific Railroad Company arising out of the failure of the Algoma Dike north of Klamath Falls, but took no action thereon.

Mr. W. H. Lynch, District Engineer, Public Roads Administration, was present and discussed with the Commission post-war maintenance of flight strips. He presented a tentative form of agreement covering the matter which he explained is on an annual basis and includes snow removal, the expense thereof to be paid by the state in the first instance with reimbursement from the government later. The Commission approved the arrangement and indicated that it would sign the agreements when they are presented in final form. In this connection, the question arose how to coordinate the maintenance operations with the landing of airplanes, so as to avoid accidents. Mr. Lynch suggested that the matter would be handled by telegram from his office.

The Commission also discussed with Mr. Lynch the matter of advertising for bids for the construction of the proposed revision of the Oregon Coast Highway near Astoria to accommodate the Astoria Airport. Mr. Lynch advised that according to newspaper accounts, this job has been given final approval and is now ready to proceed. In view thereof, the Commission authorized the Engineer to advertise this project for bids to be received at the next meeting. In this connection, a telegram was presented from Mr. Lynch stating that he is prepared to authorize the Highway Commission to advertise the Oregon DA-WC-30 project (McTimmonds Valley Project in Polk County) upon receipt of satisfactory evidence to the effect that right of way has been arranged for. In view of this notification, the Commission authorized the Engineer to advertise this project also for bids to be received by the Commission at its next meeting.

The Commission thereupon set Wednesday, July 28 as the date for its next regular meeting for the receiving of bids, and it was decided to hold this meeting in Portland as usual. The Secretary was instructed to make the usual arrangements to hold the meeting in the Auditorium of the Public Service Building. The Commission also decided to meet at the Imperial Hotel on Tuesday afternoon, July 27 for the disposal of routine matters. The Secretary was instructed to arrange for a room. The Commission also confirmed the date July 12 to July 17 inclusive, heretofore set for its inspection trip of the Oregon Coast Highway and the Pacific Highway.

Mr. C. R. Fulgham, Dayton, Oregon, came before the Commission at this time relative to his offer to purchase a small parcel of state-owned land which abutts on the Salem-Dayton Secondary Highway in Yamhill County, being a portion of the property that the Highway Commission acquired from A. M. Vernon in connection with a right of way settlement. Mr. Fulgham advised that he is purchasing other acreage in this vicinity and needs this small tract, which contains 1.68 acres fronting on the highway, in order to fill out his holdings. He offered to pay $150.00 for the property which, he said, is double the rate that he is paying for the other property. After discussion, the Commission agreed to sell the property to Mr. Fulgham for the amount offered provided the area is not needed for highway purposes. The matter was referred to the Engineer for investigation and with authority to approve the sale if the land is not needed by the highway department.

The Commission had under discussion the signing of an agreement with the Unites States of America relative to the lease of state property known as "Shore Acres" adjacent to the Cape Arago Secondary Highway in Coos County. After careful consideration of the lease agreement, the Commission approved and signed same and thereupon adopted the following resolution with respect thereto by unanimous vote, upon motion of Commissioner Chessman which was seconded by Commissioner Schaupp:

WHEREAS, Oregon State Highway Commission, Salem, Oregon, hereinafter called the Commission, is the owner of the following described real property, to wit:

All of the following described parcels of land situated in Sections 8 and 17, Township 26 South, Range 14 West of the Willamette Meridian in Coos County, Oregon, to wit:

PARCEL NO. 1. Beginning at the southwest corner of the northeast quarter of the southwest quarter of Section 17, Township 26 south, Range 14 West of the Willamette Meridian; thence North on the west line of said sub-division and on the west line of the southeast quarter of the northwest quarter of Section 17 to the southeasterly right-of-way line of the Cape Arago State Highway; thence northeasterly following the southeasterly right-of-way line of said highway a distance of 1650 feet, more or less, to a point that is 300 feet west, measured at right angles, from the east line of Lot 1 in said Section 17; thence north parallel with and 300 feet west of the east line of Lot 1 a distance of 880 feet, more or less, to the westerly boundary of said Lot 1; thence northerly on the west boundary of said Lot 1 and on the west boundary of Lot 5 in said Section 8 to the northwest corner of Lot 5; thence east on the North line of Lot 5 and the southwest quarter of the southeast quarter of Section 8 a distance of 1100 feet, more or less, to the westerly right-of-way line of the Cape Arago State Highway; thence southerly following the westerly right-of-way line of said highway to the intersection with the north and south center line of said Section 17; thence south on the north and south center line of Section 17 to the southeast corner of the Northeast quarter of the southwest quarter of said section; thence west on the south line of the said northeast quarter of the southwest quarter a distance of 1320 feet, more or less, to the place of beginning, containing 123.7 acres, more or less.

EXCEPTING THEREFROM that part of the Cape Arago State Highway included within the above described premises.

PARCEL NO. 2. Beginning at a point in the southwest quarter of the northeast quarter of Section 17, Township 26

South, Range 14 West of the Willamette Meridian, from which the southwest corner of said section bears south 47° 42' west 4878.0 feet; thence north 58° 34' east 42.5 feet; thence south 31° 26' east 160.0 feet; thence south 58° 34' west 85.0 feet; thence north 31° 26' west 160.0 feet; thence north 58° 34' east 42.5 feet to the point of beginning, containing 0.31 acre, more or less.

PARCEL NO. 3. A parcel of land situated in the west half of the northeast quarter of Section 17, Township 26 South, Range 14 West of the Willamette Meridian, said parcel being a strip of land 25 feet in width, 12.5 feet on each side of the following described center line:

Beginning at a point in the southwest quarter of the northeast quarter of said Section 17 from which the southwest corner of said section bears south 47° 42' west 4878.0 feet; thence north 31° 26' west 96.18 feet; thence north 9° 26' west 75.40 feet; thence north 23° 08' west 118.01 feet; thence north 23° 33' west 180.97 feet; thence north 20° 27' west 169.68 feet; thence north 35° 53' west 243.20 feet; thence north 63° 40' west 78.67 feet, thence north 61° 13' west 172.48 feet; thence north 50° 24' west 70.27 feet; thence north 37° 10' west 113.29 feet; thence north 18° 56' west 59.24 feet; thence north 17° 42' west 58 feet to a point opposite and 12.5 feet distant from which the easterly line of said strip of land intersects the westerly right-of-way line of Cape Arago State Highway.

The above described parcel of land contains .84 of an acre, more or less.

The total area of premises leased to the Government is 124.85 acres of land, more or less, on which is located a two-story building containing 9744 square feet of floor space,

and

WHEREAS, the United States of America, hereinafter called the Government, desires to lease the hereinabove described property and said Commission being willing, and

WHEREAS, power to enter into leases of this character has been given said Commission by Section 100-115, paragraph 5, 9 and 10 O. C. L. A. 1920, and that said Commission has the right to enter into such lease by and through its duly appointed Chairman and Commissioners.

NOW, THEREFORE, BE IT RESOLVED, that a lease be entered into with the Government, said lease to be for the period commencing March 16, 1943 and ending June 30, 1943 with option to renew from year to year, provided no renewal shall extend the period of occupancy beyond

six months after termination of present emergency, for the rental of one hundred ten and 83/100 Dollars ($110.83) per annum and that Mr. T. H. Banfield, Chairman, Mr. A. W. Schaupp, Commissioner, and Mr. M. R. Chessman, Commissioner, be and they are hereby authorized and empowered to execute said lease on behalf of said Commission

IN WITNESS WHEREOF, Oregon State Highway Commission has caused this Resolution to be executed by the proper officers.

Dated at Salem, Oregon this 7th day of July 1943.

T. H. BANFIELD (signed.)
Chairman

The Commission also had under discussion the adoption of a resolution with respect to the granting of a lease to the United States of America covering a 7.2 acre tract of land situate adjacent to the Pendleton Airfield in Sec.5, T2N., R32E, W. M., Umatilla County, Oregon. The following resolution in regard thereto was adopted by the Commission by unanimous vote upon motion of Commissioner Schaupp which was duly seconded by Commissioner Chessman:

WHEREAS, Oregon State Highway Commission, Salem, Oregon, hereinafter called the Commission, is the owner of the following described real property, to-wit:

A Tract of land situated in Section 5, Township 2 North, Range 32 East of the Willamette Meridian in Umatilla County, Oregon, more particularly described as follows:

Commencing at the northwest corner of Section 5, Township 2 North, Range 32 East of the Willamette Meridian; thence south 0° 20' east on the west line of Section 5 a distance of 2900.5 feet; thence east 1391.37 feet to a point on the present east boundary of Pendleton Field and the point of beginning; thence north on the east boundary of Pendleton Field 1000.0 feet; thence east 180 feet more or less to the westerly right of way line of the Pendleton Air Base Highway; thence southeasterly on the westerly right of way line of said highway 370 feet more or less to a point that is 350 feet easterly, measured at right angles, from said east boundary of Pendleton Field; thence south parallel with the east boundary of Pendleton Field 685 feet more or less to a point that is due east of the point of beginning; thence west 350 feet to the point of beginning, containing 7.2 acres more or less.

and

WHEREAS, the United States of America, hereinafter called the Government, desires to lease the hereinabove described property, and said Commission being willing, and

WHEREAS, power to enter into leases of this character has been given said Commission by Section 100-115, Paragraphs 5, 9, & 10 O. C. L. A. 1920, and that said Commission has the right to enter into such lease by and through its duly appointed Chairman and Commissioners.

NOW, THEREFORE, BE IT RESOLVED, that a lease be entered into with the Government, said lease to be for the period commencing January 5, 1943 and ending January 5, 1948 or six months after termination of present emergency, whichever period is longer, for the rental of One and no/100 Dollars ($1.00) per annum, and that Mr. T. H. Banfield, Chairman, Mr. A. W. Schaupp, Commissioner, and Mr. M. R. Chessman, Commissioner, be and they are hereby authorized and empowered to execute said lease on behalf of said Commission.

IN WITNESS WHEREOF, Oregon State Highway Commission has caused this Resolution to be executed by the proper officers.

Dated at Salem, Oregon, this 7th day of July 1943.

The Commission discussed a communication from the County Court of Jackson County in which the Commission was requested to change the traffic signs at the intersection of the Medford-Provolt Secondary Highway with the Copper County Road, at Ruch, so as to require traffic to stop upon entering the State Highway rather than upon entering the county road. The Engineer recommended elimination of all stop signs at this point. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution with respect thereto upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman:

WHEREAS, by resolution duly and regularly adopted on the twenty-seventh day of April, 1943, there were designated as main or through highways certain primary and secondary state highways; and

WHEREAS, said resolution included among other highways the Medford-Provolt Highway, otherwise designated as Secondary Highway

No. 272, and in connection with said secondary highway it was provided that "East bound traffic on the Medford-Provolt Highway shall stop before entering its intersection with the Copper County Road in Ruch"; and

WHEREAS, since the adoption of said resolution traffic conditions have changed with respect to said Medford-Provolt Highway, which traffic changes make unnecessary a requirement that traffic using said secondary highway stop before entering the said county road;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, as follows:

1. That the above quoted language be deleted from said resolution.

2. That the Engineer be and he hereby is instructed to cause to be removed any stop sign or signs which may have been erected on said secondary highway and which required traffic using said secondary highway to stop before entering the said county road.

3. That this resolution be entered in the minutes and records of the Commission as of the seventh day of July, 1943.

The Attorney presented for the Commission's approval a resolution relative to the changing of the traffic signs that are being maintained at the junction of Oregon Routes No. 211 (Woodburn-Sandy Secondary Highway) and 215(Cascade Secondary Highway) near the town of Molalla. He explained that this resolution is in conformity with action taken by the Commission at a previous meeting at which time he was instructed to prepare an appropriate resolution for the record. The Commission approved resolution by unanimous vote on motion of Commissioner Chessman which was duly seconded by Commissioner Schaupp:

WHEREAS, the Woodburn-Sandy Highway, which is known and designated as Secondary Highway No. 161, and the Cascade Highway, which is known and designated as Secondary Highway No. 160, intersect each other at a point approximately two miles west of Molalla; and

WHEREAS, it is the judgment and opinion of the Highway Commission that for the safety and convenience of members of the general public traveling said highways certain traffic controls and regulations should be established and maintained;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That all traffic moving north and south over Secondary Highway No. 160 shall come to a stop before entering the intersection of said highway with Secondary Highway No. 161.

2. That all traffic moving east and west over Secondary Highway No. 161 shall be deemed through traffic with respect to said intersection.

3. That any stop signs heretofore erected at the intersection of said two highways shall be removed.

4. That the State Highway Engineer be and he hereby is instructed to place, or cause to be placed, and thereafter maintain the necessary signs and markers to accomplish the traffic control and regulation contemplated by this resolution. Such signs as may be erected on said highways at said point shall conform to the types and standards heretofore approved by this Commission.

5. That this resolution shall be entered in the minutes and records of the Commission as of the 7th day of July, 1943, and shall be effective as of said date.

At 3:00 p. m. Chairman Banfield announced the following awards of contracts, etc., bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"North Bend Airport Access Road Project in North Bend, Coos County. The only bid received for this project was that submitted by Newport Construction Company, Portland, at $48,183.50. The Commission rejected this bid.

"Belknap Springs-Fourmile Butte Rock Production Project on the McKenzie Highway, in Deschutes and Lane Counties. The only bid received for this project was that submitted by J. S. Risley, Milwaukie, at $48,600.00. The Commission has awarded this contract to Mr. Risley at his bid price.

"Eighth Avenue-Broadway Section of Hilyard Street in Eugene, in Lane County. The Commission received two bids for this project. The low bidder was Nels T. Jorgensen, Eugene, at $8,387.00. The other bid was submitted by McNutt Brothers, Eugene, at $9,431.00. The Commission has awarded this contract to Mr. Jorgensen, the low bidder, at his bid price.

"Yeon Avenue-Nicolai Street Access Road Project in Portland, Multnomah County. The low bid submitted for this project was that of Edlefsen-Weygandt Company, Portland, at $3,477.20. The only other bid was that submitted by Porter W. Yett, Portland, at $4,504.75.

The Commission has awarded this contract to the low bidder, Edlefsen-Weygandt Company, at its bid price.

"Providing ferry service at Enegren Crossing of Coos River on the Coos River Secondary Highway in Coos County. Brunell Brothers, Marshfield, submitted the low bid for this project at $1,750.00 per month under alternate "A". They did not submit a bid under alternate "B". Andrew Stambuck, Marshfield, submitted the next low bid at $1,825.50 per month under alternate "A" and $1,906.01 under alternate "B". J. F. LaRouche, Portland, submitted the only other bid, being $2,056.00 per month on alternate "A" and $2,340.00 under alternate "B". The Commission has awarded this contract to Brunell Brothers, the low bidder at their bid price of $1,750.00 per month on alternate "A".

"Sale of residence building in Freewater, being building No. 10546, formerly owned by Mrs. Emma Barnes. The Commission received two bids for this building. The high one was that of O. A. Giles, Freewater, at $300.00, the other was that of H. S. Murray, Freewater, at $210.00. The sale of this building has been deferred by the Commission pending certain investigations. The Commission has authorized the Engineer to sell the building to Mr. Giles, the high bidder, if the investigation results favorably.

"Sale of peach crop at The Cove-Palisades State Park. The Commission received no bids for the purchase of the peaches and has authorized the Parks Superintendent, the Engineer and the Attorney to arrange for disposal of the peaches in a manner that will be to the best interests of the state."

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Union Pacific Railroad Company covering alterations to the Union Avenue Viaduct in Portland to accommodate additional railroad tracks.

Agreement with the General Petroleum Corporation of California covering maintenance of traffic access to its station at the intersection of Union and Denver Avenues, Portland.

Agreement with C. J. Mortensen, Forest Grove, covering the salvaging of fallen timber on the Wilson River Highway near Loyal M. Graham Bridge.

Agreement with Victor Affolter covering lease of a stock pile site, five miles north of Otis, on the Oregon Coast Highway in Tillamook County.

Agreement with Curry County with respect to the construction, operation and maintenance of an airport on the State Park at Floras Lake.

Permit granting to Swaggart & Cothren permission to use an old state-owned quarry site on the Salmon River Highway east of Rose Lodge.

Agreement with the United States of America covering the leasing by the Federal Government of "Shore Acres" property which the Highway Commission recently acquired from the Simpson Estate adjacent to the Cape Arago Highway, in Coos County. Resolution adopted by the Commission with respect to the leasing to the Federal Government of such property. Also, supplemental agreement modifying the original agreement with respect to the renewal of the lease.

Agreement with the City of Ontario covering improvements by the State of certain city streets that are not on the State Highway System.

Agreement with the United States of America covering the construction by the Bonneville authority of a permanent pole line along and across a state highway in Multnomah County.

Petition to exclude certain lands from the Westland Irrigation District in Umatilla County, comprising 23 parcels which are described in right of way file No. R8842.

Bargain and sale deed conveying to Harry Mercer 4,762 square feet of land situate at the end of the Denver-Union Avenue Section of the Pacific Highway in Portland. Right of way file No. 5671-A.

Bargain and sale deed conveying unto Mr. and Mrs. J. L. Stuart 3,778 square feet of land situate in lots 5, 6 of Block 5, Hackleman's Second Addition to Albany. Right of way file No. 5151.

Resolution with respect to the leasing to the Federal Government of 7.2 acres of land situate in Sec.5, T2N., R32E., W. M., in Umatilla County, adjacent to the Pendleton Airport.

Easement granting to the O. W. R and N. Company permanent right to use a small fragment of state-owned land in Umatilla County consisting of .23 acre situate in the N½ of Sec.8, T2N., R32E., W. M. Right of way file No. 1975.

Resolution establishing a 25 mile per hour speed limit on the McKenzie Highway at McKenzie River Bridge Crossing.

There being no further business to come before the Commission at this time, the meeting was adjourned at 3:15 p.m.

State Highway Engineer

Secretary

Chairman

Commissioner

Commissioner

JUL 7 1943

Astoria, Oregon, July 12, 1943

The State Highway Commission conferred with the Clatsop County Court and members of the Astoria Chamber of Commerce in the 13th Street Club at 1:00 p.m., immediately following luncheon. Present at such meeting were the following:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Representing the County Court of Clatsop County were County Judge Guy Boyington and County Commissioners James Elliott and John Slotte. Representing the Chamber of Commerce were Charles Reynolds, President, Don Mitchell, Vice President, Walter Underwood, Secretary, Orval Eaton, Mayor of Astoria, Robert W. Lucas, Harry Clatterbos, Jack C. Wright, Fred Hellberg, and Brewer Billie, City Manager. President Reynolds presided.

Following introductions by Commissioner Chessman, Chairman Banfield explained the object of the Commission's visit, advising that the Commission is canvassing the entire state to ascertain from the county courts of the various counties and from local citizens the projects that they would like given priority consideration in the formulation of the Highway Commission's postwar construction program, and to inspect state parks and highway construction projects enroute. The Commission does not as yet know, he said, just what funds will be available to finance construction when the war is over but it anticipates receiving a considerable amount of federal funds for this purpose and wants to be ready to proceed with construction immediately after notification has been received that these funds are available to the state. He pointed out that the Commission is not in a position at the present time to make any commitments or promises with respect to construction because it does not know how much money it is going to have to spend, but the Commission is particularly desirous of ascertaining which projects are most desired by local citizenry throughout the state. He suggested that it would be advisable to file with the Commission three or four projects arranged in their order of preference, and advised that these will be referred to the Engineer for analysis and report following which the Commission will then determine whether or not such projects or any of them should go forward. He called upon the Engineer to explain the status of prospective federal funds that may be expended for highway construction.

The Engineer explained that the Congress has under contemplation a bill that will provide to the State of Oregon during each of the three years immediately following the war the sum of approximately $15,000,000.00 which will have to be matched with state funds to the extent of approximately $4,000,000.00. Further, that 50% of such federal funds must be spent on federal aid primary highways and the balance on secondary highways and on projects through and adjacent to cities and towns of 10,000 population or more. He predicted

JUL 12 1943

that Congress will enact this Legislation shortly after reconvening this fall inasmuch as highway construction will be an important factor in the return to peace time economy, and that the government will retain the present method of distributing such funds to the several states. He also predicted that the Commission will receive from the various districts of the state a program of projects several times in excess of the number that the Commission will be able to handle with the monies available and advised in that case that the Commission will probably select those projects that will give the greatest good to the greatest number of people.

At the request of Commissioner Chessman, the Engineer also advised the status of the Astoria Airport Project involving reconstruction of a portion of the Oregon Coast Highway. He stated that the Commission will receive bids on this project at its meeting on July 28; and that the plans call for relocation of the highway on crooked alignment as a temporary expedient until some future date when the Commission is financially able to reconstruct the entire section of this highway on permanent alignment. He also mentioned that this is a large project which cannot be completed until next year so traffic will be somewhat discommoded in the meantime, particularly during the winter months, although everything possible will be done to expedite travel and to cause the least amount of inconvenience.

Judge Boyington mentioned the following projects on behalf of the county court advising, however, that the court has not discussed them yet with local citizenry so the order of priority is subject to change:

1. Construction of the Cannon Beach Section of the Oregon Coast Highway.

2. Gradual betterment of the Columbia River Highway between Portland and Astoria.

3. Construction of a connecting link between Astoria and the Wolf Creek Highway. In this connection he suggested that a better route could be found than the present Nehalem Secondary Highway.

4. Enlargement of the secondary highway system in Clatsop County.

5. Designate and improve the Fort Stevens Road as a part of the state highway system.

6. Installation of a state operated ferry service across the Columbia River at Astoria.

Mr. Clatterbos endorsed Judge Boyington's program. He particularly mentioned the ferry operation giving as his opinion that the state should take over such function because present indications are that it will be a long time before a bridge can be constructed across the Columbia River at this point. Commissioner Chessman recalled that the former Highway Commission was favorable to taking over this ferry operation but did not do so because the Washington

Highway Department was unable to cooperate. He referred to legislation enacted by the 1943 Legislature with respect to the operation of ferries across the Columbia River, particularly at The Dalles, and gave as his thought that such legislation might be helpful.

The Engineer inquired as to whether or not the City of Astoria has any projects in mind, and suggested as a possible project the completion of the improvement that already has been started at this place. Commissioner Chessman pointed out that there is a bottleneck at the present time at the approach to the ferry. Judge Boyington advised that Clatsop County will furnish the right of way to eliminate this condition where it is needed across county-owned lands. Mayor Eaton advised that the principle projects that the city has in mind are the completion of the project that has been started and the elimination of the bottleneck at the ferry.

The meeting was adjourned at 1:30 p.m. following appropriate closing remarks by Mr. Reynolds and Chairman Banfield.

The Commission then motored to the town of Wheeler where a conference was held at the City Hall at 4:00 p.m. with representatives of the North Tillamook County Chamber of Commerce. All members of the Commission were present at such meeting as were also the State Highway Engineer, the Attorney and the Secretary. There were sixteen local people as follows: County Judge Harland M. Woods, County Commissioners E. H. Lindsey and E. G. Anderson, Erling Brauti, President, North Tillamook County Chamber of Commerce, Tom Cathers, Secretary, Henry Oberg, Mayor of Nehalem, Clyde Lewis, Mayor of Wheeler, Mrs. Sam Reed, Mr. Paris Rainey, Ben Lane, Manzanita Chamber of Commerce and Mr. Carlsen, Wheeler Chamber of Commerce.

Mr. Brauti presided. He asked the Commission for the construction of a connecting road between Wheeler and the Wolf Creek Highway near Elsie, along the route of the North Fork of the Nehalem River. He advised that the proposed road extends from the Wolf Creek Highway near Elsie to a connection with the present Necanicum Highway at Marquam and Callows Logging Camp north of Wheeler. The entire road, he said, is only about twelve miles long, that its construction will eliminate dangerous travel conditions along the present route and will shorten the distance between common points about six miles. He advised that logging interests have already constructed a roadway for most of the distance and that there remains only about 1/2 mile of roadway to be built at the east end in order to connect with the Wolf Creek Highway.

Mr. Rainey spoke for this improvement in the interests of the farming industry. Mr. Oberg also endorsed this project as essential. He emphasized the improvement as a short cut over present routing and as a wonderful scenic route of travel. Mr. Lane endorsed this project giving as his thought that it is feasible and easily constructed. He urged its approval by the Commission from the standpoint of beach travel and an aid to the farmers of this district.

Mr. Cathers also urged this project for reasons stated by the other speakers. He said that he does not know any other project that is more feasible or just.

Mr. Lewis stated that the project under discussion is a desirable one but in his estimation, it is more important that the alignment along the present Necanicum Highway be revised to eliminate excessive curvature.

Mr. Carlsen spoke on behalf of the improvement mentioned by Mr. Lewis, stating that in his estimation the elimination of the curves on the present route north of Wheeler is more important than the construction of the new route to Elsie.

County Commissioner Lindsey urged the Commission to consider the construction of the connecting link between the Wilson River Highway and the Wolf Creek Highway, in Washington County. Commissioner Schaupp inquired of Mr. Lindsey as to his choice of projects stating should the Commission construct the proposed North Fork Road in preference to the modernization of the Necanicum Highway north of Wheeler. Mr. Lindsey replied that he considers the North Fork Project the more important of the two.

Chairman Banfield concluded the conference by stating the purpose of the Commission's visit, his remarks being similar to those made at the meeting in Astoria.

The meeting was adjourned at 4:30 p.m. following which the Commission motored to Tillamook, inspecting proposed highway projects enroute with the members of the Tillamook County Court. During such inspection the County Court expressed a desire for the following improvements in the order of priority preference:

1. Reconstruction of the Oregon Coast Highway from Tillamook south about six miles.

2. Reconstruct the bridge over the Trask River on the Netarts Secondary Highway, just west of Tillamook.

3. Reconstruct the Wilson River Highway on permanent alignment between Tillamook and the crossing of the Wilson River.

Following such inspection and dinner at the Tillamook Hotel, the Commission conferred with local citizenry at 7:15 p.m. in the Hotel dining room.

The Highway Department was represented by all three members of the Commission, the Engineer, the Attorney and the Secretary. The Tillamook County Court was represented by County Judge Harland M. Woods and Commissioners E. H. Lindsey and E. G. Anderson. The following were present as representatives of the Tillamook Chamber of Commerce: Warren McMinnimee, President and District Attorney, R. V. Miller, Secretary, Charles A. Ross, H. T. Botts, George Riechers, Fred Guyton, J. H. Rosenberg, J. B. Honey, Carl Haberlach, A. T. Dolan, Mr. and Mrs. Fred Melinger, George Winslow, John Aschim, N. J. Ackley, D. E. Steinbach, Mayor of Tillamook, Arthur Lundberg, Fritz A. Beltz, Homer McLean, I. E. Keldson, Carl Stranahan, Ivan Norris, J. deCook, A. E. Claussen and A. G. Beals. Messrs. Clarence Coe, President, and Arch Sanders,

Secretary-Manager, Marshfield, were also present representing the Oregon Coast Highway Association. Judge Woods presided.

Following introductions, Chairman Banfield explained the purpose of the Commission's visit, giving substantially the same information that was given at the meeting in Astoria. At his request, the Engineer gave a brief outline of the proposed Congressional Legislation which provides for an authorization of federal funds to finance postwar highway construction. Judge Woods than opened the meeting for general discussion.

Mr. McMinnimee asked the Commission to name the timbered wayside strip along the Wilson River Highway, H. H. Rosenberg State Park, in honor of the late H. H. Rosenberg, former county judge, who was largely responsible for the acquisition of this area for park purposes. It was his thought that the park should be appropriately marked for public information. Mr. McMinnimee also asked for the repainting of the yellow center-line stripe along highways in the coastal district, as an aid to travel at nighttime and during fogs. Mr. Coe also urged the repainting of the yellow stripe along the Oregon Coast Highway. The Engineer advised that the stripe-painting crew is now working on the Oregon Coast Highway in the southern part of the state and is scheduled to complete the striping of this entire highway before fall.

Mr. Beltz suggested in view of the fact that the State Highway Department is experiencing difficulty in securing labor with which to perform maintenance operations that it might be possible to obtain the services of war prisoners. The suggestion was taken under advisement by the Commission.

Mr. Beltz also brought up for discussion the penalty that the Commission proposes to impose on log haulers for overloading. He gave as his thought that log haulers should be allowed to transport loads of unlimited weight because the logs must be gotten to market for use in connection with the country's war effort. He gave as his opinion that it would be better to let the roads go to pieces rather than to handicap the Federal Government in its task of winning the war which would be the result if the logs could not be gotten to the mills fast enough. In reply thereto, Chairman Banfield advised that the legal weight limit in Oregon is 54,000 pounds but with tolerances allowed by the law and by the Highway Commission, log haulers may load up to 61,000 pounds if the overall wheel base of the hauling equipment is 40 feet or more. The trouble, he said, is that about 3% of the operators load their equipment over the 61,000 pounds limit, and as a result the highways are going to pieces. In order to rectify the situation, he added, the Commission has found it necessary to severely penalize the flagrant violator by cancellation of his permit. It is not the desire or the intention of the Commission to handicap the logging industry as a whole, he explained, but its object is simply to penalize the operator who transports flagrant overloads in an endeavor to save the road facilities for general public use.

After further discussion of a general nature, the meeting was adjourned at 7:45 p.m., following which the Commission motored to Ocean Lake for an overnight stop at the Dorchester House.

T H Banfield
Chairman

State Highway Engineer

A W Schlaefli
Commissioner

Secretary

Commissioner

Toledo, Oregon, July 13, 1943

The State Highway Commission conferred with the Lincoln County Court and interested local citizens at 10:30 a.m. in the Lincoln County Court House following inspection of state parks and highway projects enroute from Ocean Lake. All three members of the Commission were present at this meeting as were also the Engineer, the Attorney and the Secretary. Representing the County Court were County Judge F. E. Gilkey and County Commissioners E. J.Calkins and J. C. Barkley. Others present were H. H. Mumford, Joe Wilson, Dow V. Walker, Dr. H. R. Kaufman, L. G. English, Lamar Newkirk, O. H. Schwerdtmann, Taft, C. A. Woodman and Bob Davey, Newport. Judge Gilkey presided.

Chairman Banfield explained the object of the Commission's visit giving substantially the same information that he gave to the group in Astoria. He particularly advised that while the Commission is not in a position at the present time to make any commitments or promises with respect to future construction work, it would like to have an expression from the County Court and local citizens with respect to the projects that they would like included in the Commission's postwar construction program so that they can be given consideration when such program is arranged.

Judge Gilkey advised that their preference project is the completion of the oiling of the Alsea Highway. The unoiled section, he said, is about twenty miles long and the people of Waldport and Yachats are particularly desirour of such improvement. Commissioner Barkley endorsed this request. As a second preference project, Judge Gilkey asked for the construction of the unimproved section of the Siletz Secondary Highway between Siletz and Kernville. He advised that this road is very important particularly from the standpoint of log hauling. Mr. Walker, representing the C. D. Johnson Lumber Company of Toledo, urgently requested such improvement, particularly the section over Euchre Mountain. He alleged that the existing road is not wide enough for two-way traffic and presents a serious hazard considering the quantity of logs that are hauled over the road daily.

Judge Gilkey's third request was for the repainting of the center line stripe on the highways in the coastal district. His remarks were endorsed

JUL 13 1943

by Mr. English. Chairman Banfield advised that the stripe-painting crew is working on the Oregon Coast Highway in southern Oregon and that the schedule for the crew calls for the completion of striping throughout the full length of this highway before fall. He pointed out, however, that there is a shortage of men to carry on the work so there may be some delays. As a fourth project Judge Gilkey requested the modernization of the Corvallis-Newport Highway, particularly over Pioneer Mountain and between Toledo and Newport. Local citizens speaking in behalf of such improvement were Dr. Kaufman, and Messrs. Newkirk and Wilson. In this connection, Judge Gilkey asked that pedestrian lanes be painted on the highway in the town of Toledo. Such matter was endorsed by Dr. Kaufman who suggested the oiling of the rock shoulders along the highway for pedestrian use and the painting of dividing stripes between the shoulders and the highway pavement.

As a fifth project, Judge Gilkey asked the Highway Commission to take over as a state secondary highway the county road which extends from the town of Siletz to the town of Nashville, and as a sixth project he requested the modernization of the Oregon Coast Highway north of Newport, at least the improvement of the worst sections. In this connection, Mr. Woodman urged on behalf of the people of Newport only a limited amount of straightening work on the Oregon Coast Highway. It was his thought that too much straightening work is not practical because it would encourage tourists to hurry through the state.

Mr. Walker urged the Commission to consider placing on the state highway system a new road between Toledo and Newport following the old railroad grade. Also speaking in behalf of such project were Judge Gilkey and Mr. Davey. The straightening of the McMinnville-Tillamook Highway between Willamina and Grand Ronde in Tillamook County, was also requested by Judge Gilkey in behalf of residents of Northern Lincoln County who use this road extensively.

The Engineer gave a brief outline of prospective funds following which Chairman Banfield advised that the Commission is appreciative of the projects presented all of which will be studied, but the Commission can give no assurance that they will all be approved for the program because they might not fit into the Commission's plans for the monies available. He asked the County Court to arrange its projects in the order of their importance. The following projects were thereupon presented by Judge Gilkey as those which should be given first, second and third consideration, respectively:

1. Improvement of the Oregon Coast Highway.

2. Modernization of the Corvallis-Newport Highway.(U.S.20)

3. Improvement of the Alsea Highway.

The meeting was adjourned at 11:30 a.m., following which the Commission motored to Marshfield, inspecting state parks and highway projects enroute.

JUL 13 1943

At 8:00 p.m. the Commission conferred with the Coos County Court and interested citizens in the Chandler Hotel, all members of the Commission being present and participating. Also present were the State Highway Engineer, the Attorney and the Secretary. This meeting was held under the auspices of the Oregon Coast Highway Association. Included in the local group were Messrs. Clarence Coe and Arch Sanders, President and Secretary, respectively of the Association. Others present were County Judge Louis D. Felscheim, County Commissioners Lars P. Peterson and P. W. Culver, J. Albert Matson, Mayor of Marshfield, Senator William Walsh, Representative Stella A. Cutlip, Walter S. Chene, Sheldon Sackett, Representative R. J. Moore of Bandon, Lafe Compton, Jack Lamb and A. H. Young of Coquille, and W. Briggs of North Bend. Mr. Sanders presided.

Following introductions, Chairman Banfield explained the object of the Commission's visit his remarks being substantially the same as those made by him at previous conferences. At his request the Engineer outlined briefly the prospects for federal funds with which the Commission hopes to finance postwar construction.

Mr. John Kelly, Executive Director, Committee on Postwar Readjustment and Development, who was present as a member of the Commission's party, outlined briefly the purposes of the Committee of which he is the executive officer.

Judge Felscheim advised that the County Court has not yet prepared a program of projects for submission to the Commission but wants to consult with other county departments before doing so; however, he said that the County Court is particularly anxious for the Commission to continue the improvement of the Oregon Coast Highway in Coos County and to complete the work already started. In this category, he mentioned the improvements between Marshfield and North Bend and between Marshfield and Coquille. He also asked the Commission to designate additional secondary highways in this county.

Judge Felscheim also advised that the County Court is worried about the county roads which are breaking up badly due to heavy log hauling traffic. He indicated that the County would have to ask for help from some outside source, either the state or the government, in order to recondition these roads which work, he said, the County cannot finance on its own account. He informed the Commission that Coos County is building up a reserve of funds for future road construction purposes and that it expects after the war is over to be able to contribute some county funds, if necessary, to match federal or state monies that may be available at that time. He reiterated that the County has no definite program outlined as yet but will file a list of projects with the Commission as soon as possible.

Mayor Matson inquired as to the status of traffic light installation between Marshfield and North Bend. He gave as his understanding that the former Commission authorized installation of such lights which as yet have not been installed. The matter was referred to the Engineer for investigation. Mrs. Cutlip and Mr. Compton spoke briefly.

Mr. Moore asked the Commission to approve the same weight tolerances in connection with the transportation of green lumber that is now allowed

log haulers in the transportation of logs. He emphasized that his request covers only the movement of green lumber and not kiln dried lumber. The matter was referred to the Engineer for report.

The following projects were suggested for consideration in the formulation of the postwar program of construction.

Improvement of the Oregon Coast Highway(U.S.101). This project was considered of first importance, especially the completion of the improvements that have been started between Marshfield and North Bend and between Marshfield and Coquille. It was stated that such improvements will satisfy the arterial highway requirements in Coos County.

The Commission also was asked to consider the improvement of the Coos River Secondary Highway and its extension past Golden and Silver Falls and past Loon Lake to a connection with the Umpqua Highway near Scottsburg.

The improvement of the Old Coos Bay Wagon Road was also suggested as a meritorious improvement as were the Old Seven Devils Road between Marshfield and Bandon and an extension of the Powers Secondary Highway to the Rogue River at Agness. Mrs. Cutlip endorsed the Powers-Agness improvement on behalf of the people of Curry County.

Mr. Coe suggested the advisability of issuing State Highway Bonds in a sufficient amount to finance needed improvements to all state highways throughout the state in the postwar program.

The meeting was adjourned at 9:50 p.m., following a presentation of colored motion pictures of Oregon Coast Highway Scenery by Mr. Sanders.

T H Banfield
Chairman

R. H. Baldock
State Highway Engineer

C. W. Eckley
Commissioner

H. Heacock
Secretary

[illegible]
Commissioner

Gold Beach, Oregon, July 14, 1943

Following inspection of highway projects and state parks enroute from Marshfield to Gold Beach on this day, the Highway Commission conferred with the Curry County Court and interested local citizens at 11:45 a.m. in the Curry County Court House. Present at such meeting representing the State Highway Department were all members of the Commission, the State Highway Engineer, and the Secretary. Representing the County Court were County Judge A. H. Boice and County Commissioners Claude M. Clayton and A. W. Cope. Others present were Collier H. Buffington, Attorney, George Dickensen, Secretary of the Gold Beach Chamber of Commerce, Clarence Young, Banker, and William Bullard, Druggist.

JUL 1 1943

Chairman Banfield explained the purpose of the Commission's visit and the status of funds that the Commission hopes to receive from the federal government to finance postwar construction work.

Judge Boice advised that the Curry County Court has no particular projects in mind at this time but would like the Commission to consider a general highway improvement program in Curry County, including the widening and straightening of crooked sections of present highways. He particularly mentioned such improvement of the Oregon Coast Highway north of Euchre Creek where, he said, log hauling operations are extensive and there is not enough room on the highway for trucks and busses to pass safely. He advised that this is their most important project. He also asked for improvement of the highway through the town of Gold Beach.

Mr. Buffington suggested three improvements; viz., (1) reconstruction of the Port Orford-Euchre Creek Section of the Oregon Coast Highway, (2) construction of a connecting road up the Rogue River from Gold Beach to the Pacific Highway. He recommended such project from the recreational and commercial standpoints. (3) Widen the Oregon Coast Highway through the town of Gold Beach. He alleged that this project was approved by the former Highway Commission, and declared that it should be constructed although, he said, there are other more important places along the highway outside of Gold Beach which are in need of similar improvement.

Mr. Buffington also complimented the Commission on its stand with respect to log hauling. He gave as his thought that the tolerances allowed by the Highway Commission are satisfactory and that people in this district are in sympathy with the Commission's policy in that regard.

Mr. Dickenson endorsed Mr. Buffington's remarks as did also Mr. Young and Mr. Bullard.

Commissioner Cope asked the Commission to complete the improvement of the Cape Blanco Secondary Highway, advising that such road is in bad condition and badly in need of attention.

Commissioner Clayton said that he is perfectly willing to leave it up to the judgment of the State Highway Commission as to what work should be undertaken in Curry County.

Chairman Banfield concluded the conference by stating that while the Commission is canvassing the state in order to obtain certain information with respect to highway projects for consideration in the formulation of the postwar program, it is not in a position to make any definite promises or commitments in regard thereto, at this time, because the Commission does not know just how much money it will have to finance the work. He pointed out, however, that the Commission will not be able to do all the work that is requested so probably many of the projects that are suggested will have to be deferred for a future program.

The meeting was adjourned at 12:10 p.m., following which the Commission motored to Grants Pass via the Oregon Coast and Redwood Highways.

Grants Pass, Oregon, July 14, 1943

The State Highway Commission conferred with members of the Josephine County Court and interested local citizens at 9:00 p.m. in the Redwood Hotel, all members of the Commission, the Engineer and the Secretary being present.

Representing the Josephine County Court were County Judge W. A. Johnson and Commissioners Pete Fredrickson and Lucius Robinson. Others present were S. S. Orr, President of Grants Pass Chamber of Commerce, C. H. Demaray, Chairman of the Highway Committee, Charles Cooley, Al Drulette, J. R. Harvey, all of Grants Pass, and S. J. Miller and A. Athey of Cave Junction.

Chairman Banfield explained the purpose of the Commission's visit as at previous gatherings on this trip. He requested that there be submitted to the Commission a list of projects arranged in the order of their importance, for consideration by the Commission in the formulation of its postwar program.

The Engineer outlined briefly the prospects of receiving federal funds with which to finance the work.

Judge Johnson headed the local group. He called on Mr. Demaray to present the County's program of projects. Mr. Demaray submitted the following:

1. Elimination of the bottleneck conditions on the Pacific Highway north of Grants Pass, particularly at Stage Road Pass, Canyonville and "three or four other places." He said that such improvement is Josephine County's preference project and gave as his understanding that it is also the first priority project of Jackson and Douglas Counties.

2. As a second priority project, he mentioned the reconstruction of Hayes-Hill Section of the Redwood Highway by the elimination of curves, etc.

Commissioner Fredrickson spoke for the following secondary highways:

1. Improvement of the road from Applegate to Robinson Bridge.

2. Improvement of the road from Grants Pass to Dixie Ranch.

3. Improvement of the road known as the Merlin Loop.

Mr. Demaray then mentioned the improvement of the Takilma-Happy Camp Forest Development Road. He asked the Commission to consider the designation of this road as a forest highway and the improvement of the same as such.

JUL 14 1943

With respect to this particular road, Mr. Harvey advised that the U. S. Forest Service wants the road improved in order to facilitate the marketing of timber, chrome and copper, which abounds in the district served by this road. The Forest Service, he said, has money to finance the construction work but the road cannot be placed on the forest highway system to make it eligible for such funds without a joint action by the Oregon State Highway Commission, the California Highway Commission, Public Roads Administration and the United States Forest Service. The Commission took the matter under advisement.

Commissioner Fredrickson confirmed the remarks of the previous speakers with respect to modernization of the Pacific Highway between Grants Pass and Roseburg as the county's preferance project.

Chairman Banfield at this juncture assured the delegation that the Commission will give sincere consideration to the projects mentioned and will act honestly in the distribution of the funds at its disposal so that they will be spent in a way that will provide the greatest amount of good for the greatest number of people, regardless of the districts in which the money is expended.

Commissioner Robinson inquired as to the availability of funds for secondary road construction and for construction of market roads. He asked for the improvement of roads on the north side and on the south side of the Rogue River north of Grants Pass and for the construction of a connecting road between the two. These roads, he said, are only about three miles apart but people living on one side of the river cannot reach a point on the opposite side of the river without travelling 18 to 20 miles, and it is this condition that he would like to have corrected. He mentioned the Applegate Bridge which, he declared, is so narrow that trucks cannot pass on the structure. He suggested the replacement of this bridge by a new structure and use of the old bridge on a less important market road.

Mr. Athey spoke for the improvement of the Takilma-Happy Camp Road.

After further discussion, the meeting was adjourned at 10:00 p.m. with closing remarks by Chairman Banfield.

T H Banfield
Chairman

State Highway Engineer

A W Schansky
Commissioner

H R Crawford
Secretary

L V Sherman
Commissioner

Enroute Grants Pass to Medford, July 15, 1943

At 8:00 a.m. the Highway Commission motored from Grants Pass to Medford for an inspection of highway projects, all members of the Commission, the Engineer, and the Secretary being present. The following routine matters were disposed of by the Commission enroute:

JUL 15 1943

The Engineer reported the need to resurface a portion of the Oregon Coast Highway near Cannon Beach where the highway has been severely damaged by extensive log hauling operations. He requested authority to advertise for bids at the Commission's next regular meeting for surfacing materials, including the stock piling of considerable quantity of such materials for future maintenance purposes. He estimated the cost of the project at approximately $90,000.00.

After discussion, motion was made by Commissioner Chessman that the Engineer's request be approved. Commissioner Schaupp seconded the motion which was carried by the unanimous vote of the Commission.

The question of acquiring the land that lies between the old Spruce Production Railroad and the right of way of the Oregon Coast Highway near Yachats, and the advisability of acquiring strips of land on the ocean side of the Oregon State Highway between Newport and Waldport and between Waldport and Yachats had the attention of the Commission. (The lands referred to in both instances were inspected by the Commission personally enroute from Ocean Lake to Marshfield on Tuesday of this week.)

After discussion, motion was made by Commissioner Schaupp that the Commission acquire the area between the railroad and the highway at the point mentioned. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission. The Commission ordered the matter referred to the Attorney to secure options.

Motion was made by Commissioner Chessman that the Attorney be instructed to obtain options for the purchase of small tracts lying between the Oregon Coast Highway and the Pacific Ocean along the section between Waldport and Yachats, so that the Commission will have some idea as to what it will have to pay for these areas. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

The question of maintenance of a county road that is being used by a state highway contractor in the transportation of gravel from a state-owned gravel pit at Buena Vista, Polk County, to the state highway construction work on the Pacific Highway West, near Suver, was brought up for discussion by the Engineer. He advised that the route of haul is over county roads for a distance of approximately seven miles of which two miles is on the Independence-Granger Road which is being maintained by the state. Further, that the hauling has caused considerable damage to the road surfacing, a portion of which is oiled construction. The Polk County Court, he said, has threatened to close the roads for such hauling unless some arrangement is made to repair and maintain them. It was the Engineer's thought inasmuch as the damage is being caused by a contractor who is doing work for the state, that the State Highway Department should assume the responsibility for the repairs and for maintenance so long as the contractor is operating over these roads. He pointed out the possibilities of securing reimbursement from the federal government for the cost of the work, which he estimated would amount to approximately $2,500.00, inasmuch as the material that is being hauled over them is to be used in connection with highway work which resulted from the Army construction at Camp Adair. He

requested authority from the Commission to tell the Polk County Court and the Benton County Court, where similar conditions obtain, that the State Highway Department will assume the obligation for such repair work and maintenance work and will endeavor to be reimbursed by the federal government. The request was approved by the Commission by unanimous vote.

The Commission discussed a request from the Waldport Chamber of Commerce for the opening of an approach road extending from the Oregon Coast Highway to the Ocean Beach at the State Park in Waldport, which project was inspected by the Commission in person enroute to Marshfield earlier in the week. The Commission by unanimous vote confirmed the action taken at a previous meeting when the request was denied.

The Engineer brought up for discussion the matter of placing the entire personnel of the State Highway Department on a 48-hour week basis. He advised that at the present time, field forces are working on such schedule as are also certain employees in the administrative office, particularly those in the maintenance department who are obliged to work Saturday afternoons inasmuch as their work dovetails with the field maintenance forces. The present arrangement with respect to the administrative office, he said, is not entirely satisfactory because some employees work Saturday afternoons and some do not. It was his thought that the placing of all employees on the same work schedule would work for harmony and efficiency. The plan, he said, would be to increase the salary paid to each employee approximately 9%, to cover the extra four hours work, and to limit the arrangement, which would become effective on August 1, 1943, for the duration of the war and six months thereafter or until such time as the Commission considered it advisable to restore the present working hours. Commissioner Schaupp stated that he will offer no objection to such plan if it is considered necessary in the minds of the other two commissioners. Chairman Banfield favored increasing the working hours and salaries and wages in conformity therewith. Commissioner Chessman advised that he is in agreement with Chairman Banfield. Motion was thereupon made by Commissioner Chessman that starting on August 1, 1943, or as soon thereafter as is possible, that all State Highway Department employees be placed on a 48-hour work week basis and that the salaries and wages of each employee who is not now working on such a schedule be increased in proportion thereto. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

The Commission discussed briefly the request made by Mr. R. J. Moore at the meeting in Marshfield, for tolerance allowances on the transportation of green lumber corresponding to those now allowed log haulers. The Engineer was instructed to analyze this proposition and report to the Commission later.

The question of maintaining guards on state highway bridges was brought up for discussion. The Engineer advised that insofar as the Interstate Bridge between Portland and Vancouver, Washington, is concerned, guards have been hired but it was necessary to pay them at the rate of $175.00 per month. These men, he said, are being deputized as State Police Officers and their duties will be to police the structure as well as guard it against sabotage; further, that the guards will work under the direct supervision of the

Oregon and Washington State Police Departments. As to the maintenance of guards on other highway bridges, the Engineer advised that the expense of providing such protection will amount to about $20,000.00 annually. In this connection he reported receipt of oral information from Mr. Charles P. Pray, Superintendent of Oregon State Police Department, that, in his estimation, such guards are not now necessary. The matter was discussed at some length but a decision was deferred by the Commission pending receipt of additional information. The Engineer was instructed to obtain an official recommendation from Mr. Pray with respect thereto.

The Engineer reported receipt of information to the effect that people in Medford are not entirely satisfied with the present arrangement for one-way traffic along the route of the Pacific Highway through this town. He recommended no change in the present arrangement at this time because in his estimation the separation of north bound and south bound traffic is the only manner in which traffic congestion on the highway through the city's business district can be avoided. The Commission decided not to make any change in the present arrangement of traffic control.

The Commission discussed briefly and ordered filed a letter from the Associated General Contractors, Inc., dated July 8, 1943, advising that the Congress has finally passed the postwar highway program bill, HR 2798, and that it now awaits the President's approval.

The Commission also discussed briefly and ordered filed a letter from the Automobile Club of New York, Inc., in which the suggestion is made that immediate investigation be conducted and careful measures taken with respect to the gasoline "muddle", to the end that the available supply of gasoline throughout the nation may be equally apportioned and consummed.

The Engineer requested authority to open up and maintain in the name of the Highway Commission a ration bank account with the U. S. National Bank of Portland or one of its branches, as authorized and defined in general ration order made by the O.P.A. He recommended approval of such request in order to facilitate the purchase of gasoline for highway equipment, advising that it will eliminate the confusion that obtains in the use of gasoline coupons. The Commission approved the request by unanimous vote and thereupon ordered the preparation of an appropriate resolution covering the matter for adoption at the next meeting.

The meeting was declared adjourned at 9:00 a.m., following which the Commission inspected the Pacific Highway over the Siskiyou Mountains and then returned to Medford where at 12:00 O'clock noon, a conference was held with the Jackson County Court and members of the City Council in the offices of County Judge J. B. Coleman. Representing the State Highway Department were all members of the Highway Commission, the Engineer and the Secretary. Representing the County Court were County Judge J. B. Coleman and County Commissioners William Perry and A. E. Powell. Representing the City of Medford were Mr. C. A. Meeker, Mayor, and Mr. Frank P. Farrell, City Attorney.

Chairman Banfield explained the object of the Commission's visit as at previous meetings during this trip. He particularly requested a list of local projects for consideration by the Commission in the formulation of its postwar construction program.

Judge Coleman, who presided, turned the meeting over to Mayor Meeker who advised that the city has nothing particularly in mind except that the City Council wants the Highway Commission to know that it desires to work with the Highway Commission in every way possible, including the solving of the one-way traffic problem on the Pacific Highway through the City of Medford, with respect to which, he said, there is some local dissatisfaction. He suggested another survey of the present traffic control arrangement which he thought would satisfy the opposition. The Engineer advised that to widen Riverside Avenue, the street over which north-bound Pacific Highway travel is now routed, will cost a prohibitive sum, in view of which, in his estimation, the present arrangement for divided traffic must be maintained, otherwise, the highway will have to be constructed on a new alignment so as to by-pass the city. There followed a brief general discussion until 12:10 p.m. when a recess was taken for luncheon.

The conference was resumed at 1:00 p.m. in the Medford Hotel. Other persons present at that time were Mr. G. R. Carter, County Clerk and Mr. Tom Rosenbury, County Master Mechanic. Judge Coleman acted as spokesman for the local group. He presented the following projects for the Commission's consideration:

1. Modernization of the Pacific Highway.

2. Construction of the uncompleted section of the Little Butte Secondary Highway from its present terminus to a connection with the Klamath Lake Westside Secondary Highway in Klamath County.

3. Additional improvement of the Crater Lake Highway, particularly between Shady Cove and Antelope Creek. With respect to such project, he suggested the construction of concrete pavement giving as his thought that an oiled highway surface cannot properly be maintained.

4. Further improvement of the Tiller-Trail Secondary Highway.

With respect to the proposed extension of the Little Butte Secondary Highway, Judge Coleman pointed out that the availability of this highway for general traffic will reduce considerably the distance between Medford and Klamath Falls over the present Green Springs Route. He suggested the construction of this proposed extension to a low standard in order to open the highway for general public use at an early date.

Commissioners Perry and Powell both endorsed Judge Coleman's remarks and emphasized as the county's preference project, the further modernization of the Pacific Highway.

Commissioner Schaupp verified Judge Coleman's statement with respect to the Little Butte Secondary Highway and the Engineer verified Judge Coleman's remarks with respect to the Crater Lake Highway, advising that concrete pavement would have to be constructed on the Shady Cove-Antelope Creek Section some time because conditions are such that an oiled surface will not stand up under the traffic that this highway carries.

At this juncture, the Engineer reported a telephonic request from the United States Army authorities for permission to transport a part of a wrecked airplane over state highways from Medford to Pendleton. He advised that the overall width of the load is 21 feet which is far in excess of clearances available. He recommended in view thereof denial of the request notwithstanding that the army has offered to furnish police escort. The Commission approved the recommendation.

The meeting was adjourned at 1:30 p.m., following which the Commission motored to Roseburg inspecting highway projects enroute.

Roseburg, Oregon, July 15, 1943

The State Highway Commission conferred with the Douglas County Court and interested local citizens at 8:00 p.m. in the dining room of the Umpqua Hotel. All members of the Highway Commission were present as were the Engineer and the Secretary. There were twenty local people in attendance including the following: County Judge D. N. Busenbark, County Commissioners H. B. Roadman and J. Ross Hutchinson, F. C. Frear, County Engineer, Huron W. Clough, former state highway commissioner, William Harris, Mayor of Roseburg, W. I. Mess, President of the Roseburg Chamber of Commerce, Guy Cordon, Attorney, A. C. Marsters, J. A. Harding, Earl Wiley, Fred Gentman, Harry Booth, W. C. Wells, Richard Cohen, Mr. ___ Ferris, Harry Penninger, Secretary of Chamber of Commerce, Mr. ___ Elliott, Mr. ___Parrisburg, and Percy Croft. Mr. Mess presided.

Following introductions, Chairman Banfield explained the object of the Commission's visit. He mentioned briefly the federal funds that the Commission hopes to receive from the government to finance postwar construction and assured those present that the Highway Commission will spend all of the monies under its control fairly so as to provide the greatest amount of good for the greatest number of people throughout the entire state. He requested the presentation of a list of projects arranged in priority status, for consideration by the Commission in the formulation of its postwar program. Commissioners Schaupp and Chessman endorsed Chairman Banfield's remarks.

The Engineer explained in detail the prospective federal funds.

At the request of Mr. Mess, Judge Busenbark presented the following program of projects for Douglas County:

1. Reconstruct the Pacific Highway, (U.S. 99), from Roseburg south to the Douglas-Jackson County line. He advised that this is the county's preference project.

2. Widen and straighten the Elkton-Sutherlin Secondary Highway.

3. Widen and straighten the three-quarter mile section of the Territorial Highway from Anlauf north, and oil the five-mile section of this highway from Anlauf to the Lane County line.

4. Widen and straighten the Tiller-Trail Secondary Highway from Milo southeast to the Jackson-Douglas County line including betterment work and oiling of a fifteen-mile section thereof.

5. Complete and oil the North Umpqua County Road from Roseburg to Dixonville, five miles, and grade and oil the twelve-mile section of this road from Marks Ranch to Rock Creek. He asked the Commission to designate this road as a secondary state highway.

County Commissioners Roadman and Huchinson endorsed Judge Busenbark's remarks. Mr. Roadman invited the Commission to inspect the North Umpqua Road in company with the County Court on the following morning, which invitation was accepted by the Commission.

Mayor Harris stated that the city has a number of projects in mind but is not ready to report them to the Commission. He endorsed Judge Busenbark's request for improvement of the Tiller-Trail Secondary Highway.

Mr. Cordon suggested that the Highway Commission should first improve those roads which are of primary importance from the state wide standpoint and then improve the highways of secondary importance. He urged as a first project the modernization of the Pacific Highway (U.S.99), both north and south of Roseburg. He also spoke for the improvement of the Tiller-Trail Secondary Highway and of the North Umpqua Road. Mr. Clough endorsed Mr. Cordon's remarks relative to the improvement of highways that are of secondary importance. He mentioned the improvement of the Pacific Highway as the county's priority project and also expressed his interest in the improvement of the North Umpqua Road.

Mr. Marsters endorsed the improvement of the Pacific Highway stating that secondary roads in Douglas County are not of much use unless the Pacific Highway is standardized.

The meeting was adjourned at 9:10 p.m.

T. H. Banfield
Chairman

State Highway Engineer

A. W. Gilstrap
Commissioner

Secretary

W. B. Stevenson
Commissioner

JUL 15 1943

Eugene, Oregon, July 16, 1943

The State Highway Commission met with the County Court of Lane County and members of the Eugene Chamber of Commerce at 1:00 p.m. in the Eugene Hotel following inspection of highway projects enroute from Roseburg.

Representing the State Highway Department were Chairman T. H. Banfield, Commissioners A. W. Schaupp and M. R. Chessman, R. H. Baldock, State Highway Engineer, J. M. Devers, Attorney, S. H. Boardman, State Parks Superintendent and H. B. Glaisyer, Secretary.

The County Court was represented by County Judge Clinton Hurd, Commissioners Allen P. Wheeler and W. J. Holland and County Engineer, P. M. Morse. The Eugene Chamber of Commerce was represented by W. B. Gard, Vice President, Ed Turnbull, Chairman of the Highway Committee, William Tugman, Stanley Stephenson, Donald Erb, President, University of Oregon, Howard Merriam, Fred Brenne, Secretary of the Chamber of Commerce, Elisha Large, Mayor of Eugene, William Clubb, City Engineer, Earl McNutt, Contractor, Victor Morris, Fred Stickles, Mr. ___ Barnell of Springfield and Mr. H. E. Maxey of Springfield. Mr. Gard presided.

Following introductions by Mr. Turnbull, Chairman Banfield explained the purpose of the Commission's visit, stating that the Commission is making a canvass of the entire state to secure ideas from the people of the various communities relative to projects that they most desire for construction in the Highway Commission's postwar program. He requested a list of such projects from Eugene and Lane County, following which appropriate remarks were made by Commissioners Schaupp and Chessman. The Engineer outlined the prospects of receiving federal aid to assist in the financing of the postwar program.

Mr. Turnbull mentioned three projects that they have in mind, as follows:

1. Completion of the modernization of the Pacific Highway across the entire state.

2. Reconstruction of the Willamette Highway east of Goshen.

3. Cooperation between State Highway Commission, Lane County and the City of Eugene in the development of a comprehensive plan for postwar development along North High Street at Eugene so as to avoid waste of funds. He particularly asked for engineering assistance from the State Highway Commission. At his request, Mr. Tugman gave a lengthy description of the plans for the last mentioned subject.

Commissioner Holland asked the Commission to consider the construction of the so-called "Route F" Highway which extends westerly from Eugene to the Pacific Ocean. Mayor Large endorsed the North High Street project mentioned by Mr. Turnbull.

JUL 16 1943

Mr. Turnbull advised that the projects that he mentioned are for immediate performance but others such as the construction of "Route F" Highway and the modernization of the Siuslaw Highway should come later. This concluded the discussion of highway projects.

Immediately following discussion, ceremonies were conducted with respect to the 80-acre park along the McKenzie River which has been deeded to the state as a gift by Mr. & Mrs. Ben Dorris of Eugene. Mr. and Mrs. Dorris were both present at this meeting and presented the deed to the Commission through the State Parks Superintendent. The Commission accepted the deed with thanks and thereupon presented to Mr. and Mrs. Dorris through the State Parks Superintendent, an embossed copy of the resolution relative thereto that was adopted by the Commission at its previous meeting.

The meeting was adjourned at 1:45 p.m. with appropriate remarks from Mr. Gard, following which the Commission motored to Albany, where a meeting was held with the Linn County Court at 3:30 p.m. in the County Court House. All members of the Highway Commission, the Engineer, the Attorney and the Secretary were present at such meeting. Representing the County Court were County Judge E. G. Arnold, County Commissioners H. A. Renninger and Claude G. Smith, and County Engineer Walter W. Larsen. Ralph R. Cronise, publisher of the Albany-Democrat Herald was also present.

Chairman Banfield explained the object of the Commission's visit, and asked the court to submit to the Commission a list of projects arranged in the order of their importance, for consideration by the Commission in the formulation of its postwar construction program. He advised that the Commission is making no promises or commitments at this time but is canvassing the state in order to obtain advance information as to the desires of the people of the different communities.

County Commissioner Renninger stated that the County Court has no particular program in mind. He gave as his thought that the State Highway Engineer knows the needs of Linn County and will be able to supply such information. He advised, however, that the county is short of funds and will appreciate any help that it can receive.

The Engineer outlined briefly the status of prospective federal funds that the Commission hopes to be able to use in financing postwar work.

County Engineer Larsen suggested consideration by the Commission of several county roads connecting towns in Linn County, particularly the following:

1. Road extending from Lebanon to Corvallis via Tangent, 17 miles in length.

2. Scrabble Hill road between Lebanon and Salem.

3. Road extending from Lebanon to Brownsville, 12 miles in length.

4. Alternate route for the Santiam Highway between Lebanon and Albany, paralleling the railroad. In regard to the fourth project, he advised that availability of this route will reduce the distance between Lebanon and Albany about 1.6 miles.

Commissioner Chessman inquired as to the project the county court considers of most importance.

Mr. Renninger advised that the reconstruction of the Santiam Highway between Sweet Home and Cascadia, in his estimation, is the most important project so far as primary highways are concerned.

Engineer Larsen placed in this category the improvement of the secondary state highway between Lyons and Mill City. Mr. Renninger also mentioned the modernization of the Pacific Highway between Albany and Salem. He reiterated that the County Court has not as yet given the matter serious thought but will advise the Commission later as to the projects that it prefers.

The meeting was concluded at 4:00 p.m. whereupon the Commission motored to Corvallis where at 8:00 p.m. the Commission conferred with the Benton County Court and interested local citizens in the Benton Hotel. Representing the State Highway Department at such meeting were Chairman Banfield, Commissioner Chessman, the State Highway Engineer, and the Secretary. Commissioner Schaupp was excused. Representing the Benton County Court were County Judge George I. McBee and County Commissioner W. H. Malone. Others present were Dr. G. W. Peavy, Oregon State College, S. M. P. Dolan, Bob Glenn, Joe Booth, Harold Woodcock, Mayor of Corvallis, and Robert Johnson. Mr. Malone presided. He turned the meeting over to Chairman Banfield who explained the purpose of the Commission's visit. Remarks were also made by Commissioner Chessman.

The State Highway Engineer explained briefly the federal legislation that proposes an authorization of federal monies to assist the states in financing postwar highway construction work.

Commissioner Malone stated that the County Court has no definite program as yet to submit to the Commission but will prepare one later. He suggested, however, the widening of the Pacific Highway West both north and south of Corvallis, particularly the elimination of two right angle turns south of Rickreall. Also completion of the Alsea Highway and modernization of the same was suggested. Mr. Dolan also urged the improvement of the Alsea Highway. He recited the history of the road and alleged that a former Highway Commission at one time promised to complete same but as yet the work has not been done.

Chairman Banfield replied that the present Highway Commission knows nothing about the former Highway Commission's obligation with respect to this road; that the present Commission must be responsible for its own actions and for the spending of money under its jurisdiction to the best interests of all. He declared that the Commission must meet today's problems today and stated if this Commission were obligated to fulfill the obligations of former Commissions then it would appear unnecessary to have a Commission at all. He reiterated

that the Commission's visit at this time is to secure an expression from the local people with respect to highway work that they would like to have done after the war is over. He asked the local group to submit to the Commission a list of such projects arranged in their order of importance. The Commission, he said, is not in a position to make any commitments or promises today but in its deliberations will give sincere consideration to the projects that are submitted.

Mr. Johnson endorsed the improvements of the Alsea Highway and the Pacific Highway West. Mr. Glenn spoke for the rerouting of the highway in Corvallis along the river frontage so as to relieve the congestion in the business district. The State Highway Engineer pointed out the difficulties of such rerouting, mentioning the railroad tracks on the street next to the river which would have to be eliminated.

Commissioner Chessman inquired as to the secondary highway improvements or projects. The following were suggested by Mr. Malone as in need of attention:

1. Kings Valley Secondary Highway.
2. Alsea-Deadwood Secondary Highway.
3. Territorial Secondary Highway.
4. Secondary highway between Blodgett and Nashville.
5. Kings Valley Highway towards Salem.

He spoke against the construction of a new bridge across the Willamette River at Independence, stating that there now exists a good road on each side of the river at this point with a good ferry connection across the river.

Judge McBee suggested the improvement of a direct highway route from Corvallis to Lebanon via Tangent, by-passing Albany. He pointed out that U. S. Highway No. 20 has been extended from Albany to Newport and that such direct connection would be an advantage to the users of this route.

After further discussion, the conference was concluded at 9:00 p.m.

T. H. Banfield
Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

JUL 16 1943

Salem, Oregon, July 17, 1943

Following inspection of highways and the site of the proposed bridge across the Willamette River at Independence enroute from Corvallis to Salem, the Commission conferred with the members of the Marion and Polk County Courts at 10:15 a.m. in the Circuit Court Room of Marion County Court House. Representing the State Highway Department at such meeting were Chairman T. H. Banfield, Commissioner M. R. Chesaman, R. H. Baldock, Engineer, H. B. Glaisyer, Secretary. Representing the Marion County Court were County Judge Grant Murphy, Commissioners J. E. Smith and Roy Rice and County Engineer, N. C. Hubbs. Representing the Polk County Court were County Judge Herman Van Well, County Commissioners H. H. Brandt and Fred Gibson, and County Engineer Edward J. Hines. Others present were E. L. Gray, Earnest A. Miller, and Mike Walker representing the Salem-Independence-Kings Valley Highway Association. Representing the Street Committee of the Salem City Council were Messrs. Lloyd Rigdon and Harold Davis, City Engineer. Representing the Highway Committee of the Salem Chamber of Commerce were W. L. Phillips and Oscar D. Olson.

Judge Murphy of Marion County presided. At his request, Chairman Banfield explained the object of the Commission's visit and particularly advising that the Commission is now making a canvass of the entire state to ascertain the desires of the local communities with respect to projects which they wish given consideration by the Highway Commission in the formulation of its postwar program. He further advised that when the canvass of the state has been completed, the projects submitted by the various communities will be carefully studied by the Engineer who will report his findings to the Commission which will then make its decision relative thereto. Commissioner Chessman endorsed the remarks of Chairman Banfield.

Judge Murphy thereupon presented as the project in which Polk County and Marion County are particularly interested, the construction of the River Road south from Salem to Independence, including a bridge across the Willamette River at Independence. He urged the Commission to give favorable consideration to this project from the standpoint of both counties and advised that both counties are willing to cooperate by furnishing "match-money" when the time comes for this project to be put on the construction program. Both counties, he said, are willing to enter into an agreement with the State Highway Commission covering the matter of financing the work, provided the project is not too costly; however, the counties will expect the state to assume full jurisdiction as a state obligation, when the work is complete.

County Judge Van Well of Polk County endorsed the remarks of Judge Murphy. He said that so far as he knows there is no better place for the State Highway Commission to spend its money than in the construction of this project and that Polk County will contribute some of the funds to pay the costs.

Chairman Banfield inquired if this is the number one project for both counties to which Judge Murphy replied in the affirmative so far as "match-money" is concerned. He also said that both counties have additional projects in mind which they are not in a position to present to the Commission at this meeting but will do so later.

JUL 17 1943

Judge Van Well also stated that Polk County Court will furnish the Commission with a priority list of projects later on. He suggested, however, that the list would include the following: Construction of a short-cut route between Rickreall and Buell on the Dallas-Coast Secondary Highway and the improvement of U. S. 99W from Rickreall to McCoy. Judge Van Well then brought up for discussion, the repair and maintenance of the Buena Vista County Road which is being badly damaged by trucks belonging to the state's contractor who is engaged in construction work on the Pacific Highway West in the vicinity of Suver. He said that this contractor is hauling gravel over county roads from the Buena Vista District to the Suver project, and gave as his thought, in view thereof, that it is the state's obligation to repair and maintain the road while it is being subjected to the contractor's hauling. The Engineer advised that the Commission has already taken action on such matter and has agreed to maintain the road for the period mentioned.

Judge Van Well expressed appreciation for the help given by the State Highway Commission with respect to the maintenance of the Independence-Granger County Road. He advised that the road is rather rough at the present time and is in need of some attention.

Mr. Gray suggested additional improvements to the Independence-Granger Road by realignment to eliminate some of the bad turns.

At this juncture, the State Highway Engineer explained the prospects of receiving federal funds with which to assist the state in the financing of postwar highway construction work.

Judge Murphy suggested the following Marion County projects for such program. He advised that they have not been arranged in order of their importance except insofar as he personally is concerned so they must be considered tentative only and subject to verification later by the County Court.

1. Designation as a state highway of the section of the North Santiam Highway that extends from Niagara to Detroit. He requested construction of this section as a state road as soon as possible regardless of the prospects for a dam across the North Santiam River at this point.

2. Extension of the improvement of the Salem-Silverton Secondary Highway. He recalled that the improvement was started several years ago but was not finished because of the entrance of the United States into the World War.

3. Extension of the reconstruction work on the Pacific Highway East, (U.S.99E) south from Salem, at least as far as Albany although, he said, it should be reconstructed clear through to the California State Line.

4. Construction of the South River Road from Salem to Independence including a bridge over the Willamette River at Independence.

5. Completion of the Wilsonville Cut-off(West Portland-Hubbard Highway) between the Marion County Line and Portland. He advised that for the most part this work is outside of Marion County but is of importance to this county.

6. Construction of the proposed highway between Rickreall and Salt Creek, in Polk County. This road, he says, ties in with the North Santiam Highway as a route to the coast and is important from that standpoint.

7. Extension of the improvement of the North River Road north of Salem.

Mr. Walker spoke in behalf of the Salem-Independence-Kings Valley Highway Association, urging the improvement of the South River Road from Salem to Independence and the construction of a bridge over the Willamette River at Independence. He pointed out that the 1943 Legislature enacted a law which provides a way for counties to accumulate funds with which to help finance projects of this kind. He suggested that the Highway Commission enter into an agreement with the Marion and Polk County Courts with respect to this improvement so that the counties will have something definite to work on and can proceed to accumulate funds as provided in this law to help finance the project. Mr. Miller also urged action by the Highway Commission along that line. Mr. Phillips requested assurance from the Commission that the state will cooperate on this project.

Chairman Banfield replied that the Highway Commission cannot make a commitment of any kind at this time but must finish its canvass of the state first. He pointed out that it would not be fair to other parts of the state if the Commission took action now on this project because it is an entirely new one, and while the Commission is in sympathy with it, it must confine its immediate consideration to present highway problems.

Commissioner Chessman verified Chairman Banfield's statement. He further stated that the Highway Commission does not know definitely now as to what funds will be available when the war is over. He pointed out that if the government provides federal funds for postwar work, undoubtedly the Public Roads Administration will have considerable to say about how the money is expended. For these reasons, he said, the Commission cannot make any advance commitments.

Mr. Walker then asked the Commission for another conference when the Commission has completed the state-wide canvass. He was informed by Chairman Banfield that the Commission would be glad to discuss the matter again with the group.

The meeting was concluded at 11:20 a.m.

State Highway Engineer

Secretary

Chairman

Commissioner

JUL 17 1943

Portland, Oregon, July 27, 1943

The State Highway Commission met in regular session at 1:30 p.m. in room 615 (Imperial Room) of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner A. W. Schaupp was excused from this meeting; however, arrived at 10:15 a.m., the following day.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with offers that he recommended be made in connection with each. After careful consideration of each item, the Commission approved the request, and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Warrenton Junction-Lewis & Clark Bridge Section, Oregon Coast Highway
10883-Stevens, Arthur N.

Right of Way	12,750 sq. ft. in exchange for 15,870 sq. ft. to be conveyed by the State		
	Clearing	$ 125.00	
	Moving Building	$2,596.80	$2,721.80 Benson

JUL 27 1943

Warrenton Junction-Lewis & Clark Bridge Section, Oregon Coast Highway(Cont.)

Right of Way	18.68 acres at $25.00	$ 466.25		
	Fencing, gates, anchor posts, severance damage, compromise, Federal Land Bank fees	$1,164.75	$1,631.00	Benson

With respect to Item No. 10925 in the above resolution, being purchase of a stock-pile site from Levi L. McDonald, the Commission's approval was given subject to the condition that no other suitable site can be found. The Commission considered that $500.00 per acre is too much to pay for this land. The matter was referred to Commissioner Schaupp and the Engineer for final decision.

Mr. T. M. Davis, Senior Highway Engineer, Public Roads Administration, on the following day approved, on behalf of the federal government, the offers that are to be made for the properties in which the government is particularly interested.

The Assistant Attorney also asked the Commission to authorize the acquisition of other properties by condemnation. He submitted a list of such

properties, together with offers that he recommended for each parcel, as follows:

File No.	Name	Purpose Required	Recommended Offer
10889	Henry Naegeli, et al	Right of Way	$2,500.00
10340	Captain Charles H. Johnson	Right of Way	550.00
10345	Daisy I. Whiton	Right of Way	225.00
4051	Mary Sijota	Right of Way	550.00
7487	Mrs. D. E. Sunderland	Right of Way	300.00

After careful consideration, the Commission approved the request, and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and also access roads or other roads in which the Federal Government is interested, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Henry Naegeli, et al., which property is located in the southeast quarter (SE¼) of Section 26

and in the southwest quarter (SW¼) of Section 25, Township 8 North, Range 10 West, W. M.; in Section 25, Township 8 North, Range 10 West, W. M.; and in the Trueman Powers D. L. C. in Section 25, Township 8 North, Range 10 West, W. M., all in Clatsop County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 1, 2, and 3, and is further identified in the records of the Highway Commission as file R10889, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway;*

Real property owned by Captain Charles H. Johnson, which property is located in the northwest quarter (NW¼) of the southwest quarter (SW¼) of Section 32, Township 5 North, Range 10 West, W. M., Clatsop County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4 and is further identified in the records of the Highway Commission as file R 10340, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway;*

Real property owned by Daisy I. Whiton, which property is located in Lots 5 and 6, Block 5, Sylvan Park, situated in Section 6, Township 4 North, Range 10 West, W. M., Clatsop County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5 and is further identified in the records of the Highway Commission as file R10345, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway;*

Real property owned by Mary Sijota, which property is located in the southwest quarter (SW¼) of the southwest quarter (SW¼) of Section 10 and Lot 4 (SE¼ of SE¼) of Section 9, Township 8 South, Range 11 West, W. M., Lincoln County, Oregon, and in the southwest quarter (SW¼) of the southwest quarter (SW¼) of Section 10, Township 8 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 6 and 7, and is further identified in the records of the Highway Commission as file R 4051, and which property is being acquired for right of way and channel change purposes in connection with the Oregon Coast Highway;*

Real property owned by Mrs. D. E. Sunderland, which property is located in Lots 18, 19, and 20, Block 29, Crescent, situated in Section 30, Township 24 South, Range 9 East, W. M., Klamath County, Oregon, and is more

particularly described on the attached sheets and designated as Parcel No. 8 and is further identified in the records of the Highway Commission as file R 7487, and which property is being acquired for right of way purposes in connection with The Dalles-California Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

---

*(The detailed description of the respective parcels or real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 37, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Attorney reported on his investigation of the complaint of contractor C. J. Eldon, with respect to the claims made by two railroad companies for reimbursement of the cost of maintaining flagmen and watchmen in connection with Mr. Eldon's contract for the construction of the Davies Overcrossing Structure, on the Wolf Creek Highway, in Washington County, contract No. 2402. He gave as his understanding that the claims were filed with the State Highway Commission and that they were paid by the state, and that the Commission is now attempting to deduct the amounts thereof from moneys earned by Mr. Eldon under his contract; further, that Mr. Eldon denies any contractual obligation to pay the claims and he is asking the Commission to allow him the amount thereof in the state's final settlement with him for this work. Mr. Eldon's protest, he said, is on the ground that the railroads have charged him not only for actual hours that the watchmen were employed on the job, but have also charged him for hours consumed while traveling back and forth between Portland and the job, including transportation costs. The total of the railroad claims, he said, is $2,436.75, of which amount $810.36 is for time consumed while traveling back and forth between the job and Portland, plus transportation costs. The difference between these two amounts, $1,626.39, he said, represents compensation for the time actually put in on the job by the watchmen. He advised that he was able to find nothing in any of the contracts which in any way discloses that the railroad could or intended to charge transportation costs in connection with the furnishing of flagman or watchman services, or that the railroads could or intended to transport their men each day between the job and Portland, and that the time consumed in traveling back and forth would be computed on the basis of time and one-half, although there is evidence to the effect that the state had knowledge of such matters during the progress of the work, but did not bring it to the attention of the contractor. He submitted a lengthy written report on his investigations, and gave as his opinion that the contractor in any event is liable only for the sum of $1,626.39, which represents the actual time employed by the railroad company's watchmen, without payment for overtime or travel expense. He recommended settlement with Mr. Eldon on such basis. The Engineer concurred in the recommendation. The Commission approved the recommendation by unanimous vote.

Mr. Ralph Moody, Attorney, Salem, and Mr. Gus Carlson, Rate Specialist, Portland, came before the Commission at this time with regard to the repair of a road that extends from the Old Oregon Trail at East 3rd Street in the town of Umatilla, to a small island in the Columbia River, on which have been constructed certain oil-storage facilities. Mr. Carlson advised that the construction of this roadway was completed by Umatilla County in December, 1942, but was partially destroyed during high water, in June of this year. The county, he said, lacks the necessary funds to make repairs, which are estimated to cost about $8,000.00, so has it in mind to ask the federal government for access road moneys to finance the work. He inquired whether or not the Highway Commission would support the county's request. Chairman Banfield advised that while the Highway Commission can not make suggestions or recommendations in connection with projects of this kind, it will offer no objections to the county's application for such funds. In the event that the county is successful in obtaining funds from the government, he said, the Highway Commission will be pleased to assume the responsibility of contracting the work, if that is the wish of the county. This concluded the conference.

The Secretary presented a list of violations that have been committed by carriers that are operating over state highways under emergency transportation permits. He was instructed to notify such violators that they must limit their loads to the weights prescribed in their permits; otherwise the permits will be cancelled. In this connection the Engineer reported on the request of Mr. R. J. Moore of the Moore Mill and Lumber Company, Bandon, for the privilege of transporting green lumber over state highways under the same weight tolerances that the Commission allows log-haulers. He said that in his estimation there is no justification for a weight tolerance on lumber, and recommended that the request be denied. The Commission approved the recommendation by unanimous vote, and instructed the Engineer to so inform Mr. Moore, explaining fully just why the Commission has found it necessary to deny his request.

The Commission had under discussion the question of penalizing a number of log-haulers who have been observed transporting flagrant overloads. There were presented to the Commission nineteen cases of this kind, with information as to the number of violations that each has committed, and the size of the overloads. After considerable discussion, the Commission decided unanimously to cancel the permits of the following operators, subject to concurrence by Commissioner Schaupp:

Standley Brothers, Camas Valley	Jack Baldridge, Reedsport
J. D. Bryson, Roseburg	Ben Baldridge, Reedsport
Hugh H. Honnen, Eugene	Donald Baldridge, Reedsport
Harold Nichols, Reedsport	Edward L. Mattin, Coquille
William Edward Gannon, Jr. Albany	Howard Henry Jenkins, Myrtle Point
Manley A. Watson, Reedsport	Alfred A. Baldridge, Reedsport

(This action was approved by Commissioner Schaupp on the following day, at which time the Secretary was instructed to make formal request to the Public Utilities Commissioner for cancellation of the special carrier permits of the above operators. See ahead for additional paragraph on this matter.)

In this connection, the Engineer advised receipt of a request from the E. K. Wood Lumber Company, Reedsport, for permission to transport over the Umpqua Highway, in the vicinity of Scottsburg, loads of logs having a gross weight of about 80,000 pounds. This company, he said, has stated a willingness to furnish the state a bond to cover its fair share of extra maintenance work that may be necessary to keep the road in good condition and to repair damage that might occur as a result of the overloads. He recommended denial of the request. The Commission approved the recommendation.

The Commission had under discussion a report from the Chief Weighmaster, relative to the operations of A. W. Paulson, log-hauler, Molalla. It appears that Mr. Paulson is operating two trucks in log-hauling service, and that he does everything possible to keep these trucks from being weighed at the state's scales, which is rather irritating to other operators who are endeavoring to cooperate with the State Highway Commission. As an example of such practice, the Chief Weighmaster advised that on July 20 both of Mr. Paulson's trucks were observed heavily loaded at a point about a mile from the state weighing station at Molalla. The drivers, he said, decided not to cross

the state's scales, one of them parking his load in a farm yard nearby, and the other returning to Molalla and parking his truck at a filling station. He suggested that the Commission should take action of some kind against operators who refuse to have their equipment weighed. The Secretary was instructed to write Mr. Paulson and to other operators in this category, advising them that the Highway Commission insists that they submit to the weighing of their loads on the state's scales, and if they do not comply with instructions from the weighmasters in that regard, then the Commission will cancel their special-carrier permits. In the discussion of this matter, it was pointed out that the weighmasters do not have police authority, so are not in position to force an operator to submit to the weighing of his equipment. Chairman Banfield suggested that it would be advisable to have at least one of the weighmasters of each crew deputized by the Superintendent of State Police, so as to correct such a situation. Commissioner Chessman concurred. Final action on this matter, however, was deferred until the next day when Commissioner Schaupp would be present. (This was approved on the following day by unanimous vote of the Commission, and the resolution with respect thereto was adopted at that time. See ahead for resolution.)

A report from the Chief Weighmaster with respect to log hauling operations on the Santiam Highway, between Cascadia and Sweet Home, also had the attention of the Commission. According to the weighmaster's report, operators over this section are not complying with the provisions of their overlength permits, which require the operations between Mile Post 32.9 and 35.68 to be under the protection of flagmen. The Secretary was instructed to inform all of the operators who are truck-hauling logs over this section that they must furnish flagmen in accordance with provisions of their permits, otherwise, the Commission will cancel their permits.

The Commission also discussed a report from the Chief Weighmaster with respect to log-haulers who are operating with insufficient binder chains around their loads. It was pointed out in the discussion that all log-hauling permits contain a provision for three binder-chains, but it appears that the operators do not comply therewith, it having been observed that many of them use only one binder chain and some of them use no binder chain at all. The Secretary recalled that the Commission at a previous meeting ordered that violators of this provision be warned that unless they tied their loads with the required number of binder chains their permits would probably be cancelled. These warning letters, he said, have gone out to the violators of record, some of whom have indicated orally that they are unable to purchase chains for this purpose. He was instructed by the Commission to make further inquiry from such operators why they do not comply with the provisions of their permits in this regard.

A letter was presented from Mr. Chas. P. Pray, Superintendent of the Department of State Police, regarding the maintenance of guards on certain state highway bridges. It was Mr. Pray's thought that guard service could be discontinued on the following bridges with a minimum risk of interruption of traffic, inasmuch as these structures are not in or near populous communities, and danger of attack by the enemy appears remote:

Bridges over the Willamette River at Salem, Albany and Harrisburg.
Bridges over Youngs Bay and Lewis and Clark River, at Astoria.
Bridge over the Deschutes River at Maupin.

He also gave as his thought that the guard at Arch Cape Tunnel, on the Oregon Coast Highway, may be dismissed, because the tunnel is a type of facility that is difficult to damage or destroy, and besides there is an alternate route in the event the tunnel is blocked. In reaching these conclusions Mr. Pray stated that "* * * only the threat of saboteurs intent on paralysing traffic was considered. They have been influenced by the fact that no invasion for saboteurs to abet now impends or appears probable; that enemy aliens are sequestered or watched; that the reds, by chance or mischance, are on our side." (See letter dated July 21, 1943, for further details.)

In the discussion of this matter the question was raised whether or not highway bridges are insured against sabotage. The Commission deferred a decision on this matter, pending receipt of such information, and until Commissioner Schaupp is present. (See record of following day for final action on this matter.)

The Engineer reported briefly on the program that has been scheduled for the traffic-line painting crews for 1943. He submitted a map showing the striping that has already been accomplished, and that which is scheduled for this year's performance, together with the proposed schedule of operations. The Commission approved the report and the schedule as outlined.

The Commission discussed a complaint from the County Court of Polk County regarding damage that is being done to Polk County roads by the gravel-hauling operations of contractors E. C. Hall and J. C. Compton, in supplying subbase material for the new highway (U.S. 99W) south of Monmouth. The Engineer presented a map showing the location of the gravel deposit and the route over which the contractors are hauling the materials. He pointed out that the hauling is over about two miles of oiled road and about two miles of graveled road, a portion of which distance is along the Independence-Granger oiled road, that is being maintained by the state. For the most part, he said, the damage is being done to the oiled road. He estimated the cost to repair such damage at about $1,500.00 and recommended approval of the project, in view of the fact that the damage is being done by the state's contractors. The Commission approved the recommendation by unanimous vote.

The Engineer brought up for discussion a request from the U. S. War Department for a deed conveying unto the federal government title to those portions of secondary highways Nos. 190 and 191 which are contained within the limits of Camp Adair. He advised that these roads have been closed by the Army to general public use, and are being used exclusively in connection with army activities, so will not be of much value to the state until the present war emergency has expired. It was his thought that it would be satisfactory to give the Army a temporary lease or easement for the exclusive use of the roads for as long as they are needed for army purposes, provided the government will approve the granting of an easement to the state for a slight encroachment of the McTimmonds Valley Road at the west edge of the cantonment

area, and will approve the award of the contract for the McTimmonds Road construction, bids for which are to be taken on the following day, so that federal access moneys may be obtained to finance that portion of the work. The Attorney read aloud a letter from Mr. Don E. Meldrum, Division Real Estate Director, U. S. Army Engineers, on the subject, and also read his reply thereto. After considerable discussion, the Commission approved the Attorney's letter by unanimous vote, subject to the condition that he insert therein that the Commission will not approve the granting of an easement to the government for the use of the secondary highways in the cantonment area until the matters mentioned by the Engineer have been disposed of to the satisfaction of the Commission, and until the contract for the construction of the McTimmonds Valley Road Project has been awarded. This action was approved by Commissioner Schaupp on the following day.

The Commission discussed, approved, and signed a petition directed to the Stanfield Irrigation District, requesting the exclusion from the Boardman-Stanfield Section of such district, of all lands contained within the right of way of state highways which lie within the district's boundaries.

The Commission discussed a proposed modification of its agreement with the Union Pacific Railroad Company relative to the remodeling of the Union Avenue Viaduct to accommodate additional railroad tracks. The Attorney advised that the modification simply consists of the addition of a new paragraph which makes the agreement effective as of the date upon which the work contemplated therein was actually done. He also said that he sees no serious objection to conforming to the railroad company's request, and recommended approval thereof. The Commission approved the recommendation, and thereupon signed the agreement as modified.

The Attorney presented a form of "Release of Damages" which he has prepared for execution by Mr. H. G. Stewart, in the disposition of his claim against the State for damages to his property by erosion, adjacent to the John Day Highway, at Mile Post 138.48. He explained that the claim is for building a new irrigation ditch, which cost $48.00. The Commission by unanimous vote approved the form of release, and authorized payment of the claim, if Mr. Stewart will execute the release form.

The Commission had under consideration a letter from W. H. Lynch, District Engineer, Public Roads Administration, relative to approval of the Oregon Forest Highway Program letter, covering estimated expenditures for the fiscal year ending June 30, 1944, out of the forest highway funds available to the State of Oregon, totaling $16,500.00. The Commission approved such program, and on the following day signed a letter jointly with Mr. Lynch and Mr. James Frankland, Acting Regional Forester, directed to the Chief of the Forest Service and the Commissioner of the Public Roads Administration, Washington, D. C., relative thereto. Such letter follows:

July 17, 1943

Chief, Forest Service,
Commissioner, Public Roads Administration
Washington, D. C.

Gentlemen:

In accordance with the regulation for carrying out the provisions of Section 23 of the Federal Highway Act, it is recommended that the following estimated expenditures for the Fiscal Year ending June 30, 1944, be authorized out of available Forest Highway funds for the State of Oregon.

Location Surveys	$ 4,000
Administration	12,500
Total	$16,500

These expenditures are for necessary administration of uncompleted major construction projects and surveys and plans on approved routes.

Very truly yours,

A letter was presented from Mr. H. S. Fairbank, Division of Information, Public Roads Administration, Washington, D. C., in regard to the eligibility of highways for federal funds, under pending postwar legislation, particularly with reference to the designation of highways under the term "Secondary and Feeder Roads," as defined by HR 2426. According to Mr. Fairbank's letter, any road that is not on the federal aid system will qualify for such designation. The Engineer gave as his thought, in view of this letter, that it would not be necessary to request an extension of the federal aid secondary highway system at this time. The Commission concurred and thereupon instructed the Engineer to withhold applying for such extension for the time being.

The Commission discussed briefly and ordered filed a letter from Mr. Lewis A. McArthur, Secretary of the Oregon Geographic Board, dated July 12, 1943, with regard to the "Franklin-Smithfield" community name controversy, in Lane County. Commissioner Chessman advised that upon receipt of this communication he wrote Mr. R.V. Howard, who is particularly concerned with the matter, that the State Highway Commission does not have jurisdiction thereover, and suggested to Mr. Howard that he take the matter up with the Lane County Court.

The Secretary presented a resolution from the Board of Directors of the Jackson County Chamber of Commerce, requesting the abandonment of one-way traffic upon Central Avenue and upon Riverside Avenue, in the City of Medford. He also presented a resolution from the Medford City Council, recommending that the Highway Commission give due and serious consideration to the request of the Jackson County Chamber of Commerce, and that it make such surveys,

JUL 17 1943

studies, or other investigations, as it may deem proper relating to traffic conditions upon Central Avenue and upon Riverside Avenue, in Medford. These resolutions were discussed briefly by the Commission and were referred to the Engineer for report at the next meeting.

The Secretary also presented a resolution from the Portland Chamber of Commerce on the subject of preservation of timber along Oregon highways, and a letter from Mr. David B. Simpson, President of the Chamber of Commerce, with regard thereto. The Commission referred this matter to the State Parks Superintendent, Mr. S. H. Boardman, with instructions to suggest to the members of the recreational committee of the Portland Chamber of Commerce that it accompany him on a trip over Oregon highways, to gain first-hand information with respect to just what the State Highway Commission is now doing to preserve highway scenery.

The Engineer reported the need to construct a revetment along a short section of the Willamette River, near Oakridge, where a wash-out has occurred, in order to protect the state's investment in the Willamette Highway, which is in danger. He estimated that such revetment would cost about $4[illegible],000.00 and requested authority for the expenditure, and to take bids for the project at the next meeting of the Commission. The Commission approved the request by unanimous vote, and also authorized the Attorney to obtain options for right of way, as may be necessary, in connection therewith.

A resolution was presented from the Board of Supervisors of Del Norte County, California, in which the Oregon State Highway Commission was requested to join with the California State Highway Commission, the Public Roads Administration, and the Regional Foresters of the United States Forest Service in Oregon and California, in securing the redesignation of the Happy Camp-Takilma Forest Development Road as a Forest Highway. It was stated in the resolution that this road needs improvement badly because it serves a district which abounds in strategic materials that are needed by the nation in connection with its war effort; also, that under the road's present designation it is not possible to secure such improvement, hence the desire for the reclassification. The Engineer advised that this road is about forty-three miles in length, most of which is in the state of California, and that it would cost about half-a-million dollars to construct it; further, that in his estimation now is not the proper time to add new roads to the Oregon Forest Highway System, in view of the fact that there is a considerable mileage of uncompleted roads on such system in Oregon, which should have first attention. The Commission concurred and thereupon instructed the Secretary to so inform the Board of Supervisors.

The Assistant Attorney requested instructions with respect to the exchange of properties with the U. S. Forest Service, at the Waldport Ranger Station, south of Waldport. He recalled that the Commission on July 16, 1943, authorized such exchange, and while there was no specific discussion of the question, he assumed that the Commission wanted the exchange made by the usual form of a deed. It now appears, he said, that the land which the state was to get from the Forest Service cannot be conveyed except by act of Congress, so suggestion has been made by Mr. F. W. Furst, Forest Supervisor, that the government property be made available to the Highway Commission by "Special Use

Permit" or "Easement". He requested instructions. The Commission approved such method of conveyance, if that is the proper way to handle it, and if the Attorney feels that the interests of the state are properly protected thereby. It was left up to the Legal Department to decide.

The Commission had under discussion a form of "easement deed," granting to the United States of America a permanent easement and right of way across certain state property adjacent to the Oregon Coast Highway, in Lincoln County. The question arose whether or not the easement should be granted on a permanent basis. The matter was referred to the Engineer for study with respect thereto and report at the next meeting of the Commission.

The Assistant Attorney reported on his investigation of the request of Harold V. Pasley for an approach entrance to the Wolf Creek Highway, across the Ernest and Fred Zurcher property. He explained that a settlement has not yet been made with Ernest and Fred Zurcher for right of way, but that when it is made it will include restriction of access. Mr. Pasley's property, he said, does not abut upon the highway, and there will be no necessity for any right-of-way settlement with him. He stated that Mr. Pasley is considering the purchase of some of the Zurcher property located north of the highway, and the result of his conversation with Mr. Pasley was that, before the purchase is completed, he would get in touch with the State Highway Department, and at that time the question of a point of access would be given further consideration. The Commission ordered that the matter rest in abeyance pending further developments.

The Secretary requested instructions relative to the retention of the bid deposit submitted by Mr. Walter L. Strain, in connection with his offer to purchase the old Knapp Hotel Building, at Port Orford, for which the Commission took bids at its meeting on May 12, 1943. He recalled that the Commission referred the bids to the Attorney at that time to make certain inquiries whether or not the women's organizations who are interested in the preservation of the building from a historical standpoint, would be willing to assume the expense of moving the building from the state's property, if the building were given to them. The Attorney advised that such inquiries have been made, but to date he has received no satisfactory reply. The Commission decided, in view thereof, that it should no longer retain Mr. Strain's bid deposit. The Secretary was thereupon authorized to return it to Mr. Strain.

The Engineer requested authority to purchase two tractor loaders, at an estimated total cost of $5,000.00. He advised that the loader that was purchased by the Commission some time ago has worked out very successfully, in that it takes the place of several wheelbarrow men. He recommended approval of the present purchase, because the loaders are a big labor-saving device and can be used not only on paving work, but in connection with other maintenance work. The Commission approved the purchase by unanimous vote.

The Engineer brought up for discussion a suggestion offered by Mr. George H. Flagg, Public Utilities Commissioner, relative to the imposition of fines by Justices of the Peace, on log-haulers who are arrested for overload-

ing their equipment. He advised that it was Mr. Flagg's idea that the Justices of the Peace would be inclined to impose heavier fines if they were fully acquainted with the law with respect to weights, particularly that which grants to log-haulers a tolerance over and above the 54,000 pound limit. The matter was discussed at some length, during which the Commission questioned the advisability of so informing the Justices of the Peace. It was the thought of the Commission that the desired results would be obtained if a general letter along that line were directed to the District Attorneys of each county, and each such attorney were fully informed as to just what the Highway Commission is trying to do to stop overloading. After discussion of the matter from that standpoint, the Commission approved such method of handling the matter, and referred it to the Attorney to prepare an appropriate form of letter.

Commissioner Chessman brought up for discussion the disposal of houses in Astoria that the Commission is acquiring in connection with right of way settlements. The Assistant Attorney advised that the matter has not as yet been given much thought, due to the fact that the houses have not yet been paid for, but if past practice is followed, the houses probably will be sold to the highest bidder therefor. Mr. Chessman remarked that housing facilities in Astoria are very limited at the present time, due to wartime activities in that place, and no doubt the houses under discussion will be in considerable demand. It was his thought in view thereof that they should not be wrecked, but should be moved onto other property where they could be used to good advantage. The Assistant Attorney was instructed by the Commission to make the preservation of the buildings a condition of the sale, when they are disposed of.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission, and asked the Commission to confirm them and the amounts allocated for each. After due consideration, the Commission, by unanimous vote, authorized and instructed the Engineer to make such surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Quarries	7-1423	Crook & Wheeler	Marks Creek-Taylor Creek Sec., Ochoco Highway	1st - $600.00
Drainage Ditch	9-1450	Deschutes	Lapine-Crescent Section, The Dalles-Calif. Highway	1st - $150.00
Prospect.	12-1431	Grant	Dads Creek-Dixie Summit Sec., John Day Highway	1st - $500.00
Drainage Ditch	19-1430	Lake	Chewaucan Narrows-Valley Falls Section, Fremont Highway	1st - $200.00
Location	20-1455	Lane	6th and High Streets, Eugene	1st - $2,000.00

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Plans	21-1460	Lincoln	Siletz Bay-Newport Section, Oregon Coast Highway	2nd - $1,000.00 Total to date $2,500.00
Plans	127-1423	Polk	Wells-Suver Road Section, Independence-Granger County Rd.	2nd - $250.00 Total to date $10,050.00

The Engineer presented a report on the survey for the relocation of the Pacific Highway East, between Steiwer Hill and Albany, which survey was authorized by the Commission on January 10, 1943. He presented a map showing several alternate routes, particularly pointing out the proposed revision north of Jefferson. He recommended adoption of the line which passes to the west of the town of Jefferson. The Commission deferred action on this matter until Commissioner Schaupp is present. This matter was reconsidered on the following day, but a decision was again deferred until the next meeting. The Engineer was instructed to report to the Commission at that time on the estimated cost to construct the alternate routes, and the Attorney was instructed to report on the cost of right of way.

The Commission had under discussion the following requests for extensions of time within which to complete highway construction projects:

Jacobsen-Jensen Company, contract No. 2570, for grading and paving Section "B" of the South Unit of the Antelope Creek-Medford Section of the Crater Lake and Pacific Highways in Jackson County, requested an extension of time from August 31, 1942 to June 15, 1943, within which to complete the job. They attributed their failure to complete the project within the specified time limit to unavailability of materials, due to wartime conditions. The Engineer advised that highway traffic was not unduly hindered or inconvenienced by reason of the delay, because all of the curbs and pavement were completed by September 19, 1942. The delay, for the most part, he said, was occasioned by such work as oiling sidewalks and approach-road connections, cleaning up the job and performance of other miscellaneous items. He pointed out that the contractor has been in competition with the builders of Camp White, which has made it difficult for him to obtain not only equipment and supplies but also labor. He recommended in view of the circumstances that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote of the members present.

The Gilpin Construction Company, contract No. 2621, for replacing pier fenders on the Lewis and Clark River Bridge on the Oregon Coast Highway in Clatsop County, requested an extension of time of twenty-one days, from May 31 to June 21, 1943, within which

to complete this job. They attributed their failure to complete the contract within the specified time limit to adverse working conditions caused by ocean tides. The Engineer advised that all work in connection with this job was completed prior to the specified completion date, except for the installation of the lower waling of the fenders, which waling could only be installed at extreme low tide, and it was not until June 21 that conditions were right to make the installation. He recommended, in view thereof, that the extension of time requested be granted without penalty. Commissioner Chessman moved approval of the recommendation. The motion was seconded by Chairman Banfield, and carried.

The Engineer reported that the contracts Nos. 2570 and 2621, for the construction of state highway projects, have been completed in accordance with the requirements of the contracts or modifications thereof, and that such jobs are now ready for acceptance. The following resolution accepting such projects was offered and adopted by the unanimous vote of the Commissioners present:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2570, with Jacobsen-Jensen Company, for grading and paving Section "B", South Unit, Antelope Creek-Medford Section of the Crater Lake and Pacific Highways, in Jackson County, completed June 15, 1943.

Contract No. 2621, with The Gilpin Construction Company, for replacing pier fenders on the Lewis and Clark River Bridge, on the Oregon Coast Highway, in Clatsop County, completed June 21, 1943.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission confirmed Monday, August 23, 1943, as the date for its next regular meeting for the receiving of bids, and instructed the Secretary to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building, Portland. The Commission also confirmed the date, August 24 to 28, inclusive, for its Central Oregon inspection trip, and instructed the Secretary to arrange for accommodations enroute. It was decided not to include Yamhill County in this trip.

The meeting was adjourned at 4:15 p.m. until the following morning.

Portland, Oregon, July 28, 1943

The State Highway Commission reconvened in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Schaupp arrived at 10:15 a. m.

Bids as follows for highway construction work were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the award of contracts would be made at 1:30 p. m. in the same room.

OREGON COAST HIGHWAY
ASTORIA AIRPORT SECTION
GRADING AND BITUMINOUS MACADAM SURFACING

C. H. Wheeler	$393,903.50
Peter Kiewit Sons' Company	$491,205.00
McNutt Brothers	$492,400.00
Erickson Paving Company	$596,096.20
E. C. Hall Company and J. C. Compton	$605,454.00

NORTH BEND AIRPORT ACCESS ROAD PROJECT IN NORTH BEND
GRADING AND PAVING

Newport Construction Company	$69,093.50

BRIDGEPORT-MONMOUTH COUNTY ROAD AND DALLAS-KINGS VALLEY SECONDARY HIGHWAY
MONMOUTH-PEDEE SECTION
GRADING, SURFACING AND OILING

	Using Asphalt	Using Tar
Peter Kiewit Sons' Company	$387,570.00	---
McNutt Brothers	$438,159.00	$438,419.00
Malcom & Tieslau	$467,994.00	---
E. C. Hall & J. C. Compton	$575,109.00	---

BRIDGEPORT-MONMOUTH COUNTY ROAD AND DALLAS-KINGS VALLEY SECONDARY HIGHWAY
MONMOUTH-PEDEE BRIDGE PROJECT
ONE LOG SPAN, TWO PILE TRESTLES AND THREE CONCRETE CULVERTS

J. F. Johnston	$14,270.00
C. W. Reeve	$15,088.00
Lindstrom Brothers	$17,030.00
Norris & Philpott	$17,978.00

(Continued on next page)

JUL 28 1943

(Monmouth-Pedee Bridge Project--Continued)

Tower Sales & Erecting Company	$18,165.00
Tom Lillebo	$18,498.00
O. N. Pierce	$20,570.00
Harry L. Hamilton	$20,760.00

OREGON COAST AND THREE RIVERS HIGHWAYS
HEBO ROCK PRODUCTION PROJECT

A. H. Saxton	$67,760.00
Rogers Construction Company	$68,650.00
C. H. Wheeler	$68,970.00
McNutt Brothers	$72,275.00
A. T. Dolan	$78,575.00

Reconsideration was given by the Commission to the cancellation of the P. U. C. permits of the twelve operators whose violations were discussed on the previous day. The Attorney advised that, as instructed by the Commission, the Public Utilities Commissioner has again been contacted relative to whether or not all of these operators have P. U. C. permits, and it has been ascertained, as reported previously by the Secretary, that two of them do not have permits in their own names. He recommended confirmation by the Commission of the action taken with respect to the operators who have permits from the Public Utilities Commissioner, and that the others be prosecuted. The Engineer concurred in such recommendation and read aloud a suggested press release with respect thereto. The Commission indicated approval of the recommendation and of the press release, but deferred final decision until Commissioner Schaupp is present.

In the discussion of this matter, it was brought out that the law requires the Public Utilities Commissioner to obtain from the State Highway Commission a recommendation before a special carrier permit is issued to a log hauler. The Secretary explained that under authority of the former Highway Commission a blanket recommendation was filed with the Public Utilities Commissioner, which eliminated the necessity to secure a separate recommendation for each applicant; however, certain highways were exempt and if the proposed hauling was to be over one of such exempted highways, then the permit was not issued until the application was cleared by the highway department. It was the thought of the Commission that it would have better control over log-haulers if the Public Utilities Commissioner were required to obtain a recommendation covering each applicant. Accordingly, the Secretary was instructed to cancel the blanket recommendation and to inform the Public Utilities Commissioner that the Highway Commission prefers from now on to make a special recommendation in every instance. The action was confirmed by Commissioner Schaupp later in the session.

The Attorney reported on his further study of the law enacted by the 1943 Legislature, with respect to permits that are issued by the State Highway Commission. He advised that this law grants to the Highway Commission

authority to issue permits for any kind of movement, subject to approval by the Governor of the state.

Commissioner Schaupp arrived at this time, and participated in the discussions that followed.

Chairman Banfield explained for Commissioner Schaupp's benefit, the action taken by Commissioner Chessman and himself on log-hauling matters. Commissioner Schaupp expressed himself as being in favor of going the limit in the penalizing of log-haulers, in order to preserve highway facilities. As a result of further discussion of this matter, motion was made by Commissioner Schaupp that the Commission cancel for a period of ten days the permits of the twelve operators whose flagrant overloads have been under discussion at this meeting. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission.

Chairman Banfield also explained the attitude of Commissioner Chessman and himself with respect to deputizing the Chief Weighmaster, and one weighman of each of the weighmaster's crews, as state police officers, so that these men will be in a position to require log-haulers to remove a portion of their loads in the event weighing reveals the loads to be in excess of the allowable limit. Commissioner Schaupp approved the action taken by the other Commissioners in this regard, and thereupon moved the adoption of the following resolution with respect thereto, which motion was seconded by Commissioner Chessman and received the unanimous vote of the Commission:

> WHEREAS, notwithstanding all efforts of the Commission to cooperate in the transportation of logs over state highways consistent with public welfare and the preservation of highways which are the property of all of the people of the State, certain operators persist in carrying loads for in excess of authorized or permitted limits, thereby resulting in unnecessary and costly damage to the public highways; and
>
> WHEREAS, the measures heretofore adopted by the Commission by which, under certain circumstances and after repeated flagrant violations, permits have been revoked on recommendation of the Commission have failed to accomplish needed results; and
>
> WHEREAS, it is provided by law that any peace officer may, after determining by weighing the vehicle and load that the weight of any vehicle and load is unlawful, require the driver to unload immediately such portion of the load as may be necessary to decrease the gross weight of such vehicle to the maximum specified by law; and
>
> WHEREAS, it is the judgment of the Commission that more efficient law enforcement can be accomplished if certain highway employees are vested with powers of a peace officer;
>
> NOW, THEREFORE, the Commission does hereby respectfully request Charles P. Pray, Superintendent of State Police, to appoint

as members of the State Police assigned to the special duty of law enforcement with respect to log and lumber hauling the following-named highway employes:

Loran L. Spaulding	Clarence L. Frey	Albert G. Luther
Louie Olson	Kelley J. Stanard	N. Nelson Grubbe
Thomas W. Cameron	Cleo M. Dyer	Elbert Harris
Robert W. Wyatt	Stanford C. Sparks	Claude S. Miller

That said employes shall be carried on the pay roll of the State Highway Department both with respect to salaries and necessary traveling expenses.

The Engineer was thereupon instructed to discuss the matter with Mr. Charles P. Pray, Superintendent of State Police, and to secure the deputization of the Chief Weighmaster and one weighman on each crew, if that meets with Mr. Pray's approval. He was also instructed to discuss the matter with Mr. F. H.Brundage, Western Log and Lumber Administrator, of the War Production Board.

Commissioner Schaupp also approved the action taken by Chairman Banfield and Commissioner Chessman with regard to the directing of a letter to the District Attorneys throughout the state, with respect to log-hauling matters.

The Engineer suggested, and the Commission approved by unanimous vote, the following press release covering the Commission's action with respect to log-hauling matters:

"The Highway Commission took drastic action today to curb overweight abuses by log haulers. Chairman Banfield stated that the Highway Commission was charged with the responsibility of keeping Oregon highways in a satisfactory condition; that shortage of labor and overweight loads made a difficult combination. "Two months ago", the Chairman stated, "the Highway Commission announced that flagrant violations of weight restrictions must cease." For a time there was substantial observance of the law, but during the past five weeks flagrant violations have occurred involving weight exceeding the law by from 8 to 25 tons. The roads and bridges will not stand up under such heavy loads, and the continuance of this practice will destroy them, which will not only stop the hauling of logs but will likewise curtail the hauling of farm products and military supplies over such roads.

"Moreover, the motorists of the state who build these roads and who cannot use them now because of mileage rationing, will not have roads to drive over when gasoline is again available unless these abuses are stopped.

"The Commission is sure that the lumber industry as a whole does not approve this practice. A relatively few individuals by their action are actually handicapping the timber industry.

"The Commission will, therefore, cancel the permits of those found guilty of gross and flagrant overloads. Some of the violators were found to be operating without P.U.C. plates, and the Commission will take steps to prosecute such individuals on two counts."

Reconsideration was given by the Commission to the matter of insuring state highway bridges against sabotage, which matter was deferred from the previous day. The Engineer advised that he has made inquiry, and now finds that insurance recently purchased by the Commission covering these bridges, does not include payments for damages that occur from such cause. To obtain such coverage, he said, by extended insurance, would cost about $1,800.00 for full coverage on a three-year basis, or about $800.00 for fifty-per-cent coverage on the same basis, as compared with the cost of about $35,000.00 annually for the employment of guards. It was the thought of the Commission that the extra insurance would prove more satisfactory, because, in the event any of the bridges were damaged by sabotage, the state could recover at least partial damages from the insurance company. The Engineer and the Attorney were thereupon instructed to investigate the matter further, and to purchase the extended insurance if, in their estimation, that is the proper thing to do. It was understood that such insurance would provide the fifty-per-cent coverage of each bridge, only, inasmuch as it was felt that if a bridge were damaged, it would not be necessary to replace the entire structure. The Engineer was instructed to dismiss the stationary guards that are now being maintained on the following bridges, if satisfactory insurance is purchased.

Willamette River Bridge, Albany
Willamette River Bridge, Harrisburg
Willamette River Bridge, Salem
Deschutes River Bridge, Maupin
Lewis and Clark River Bridge, near Astoria
Youngs Bay Bridge at Astoria
Arch Cape Tunnel, south of Cannon Beach

The Assistant Attorney brought up for discussion the offer of Mr. H. W. Freeze, Portland, to purchase certain state-owned land at the intersection of North Interstate Avenue and Argyle Street, in Portland. He advised that the Commission at the previous meeting accepted Mr. Freeze's offer to pay $2,000.00 for this property on certain terms, provided he would pay interest on the deferred payments. Mr. Freeze, he said, now wishes to change the basis of settlement to provide for a down payment of $1,000.00 and monthly payments of about $25.00, with 4½% interest on the balance which means that he will pay out at the same time as under the previous method of settlement. On this basis, he added, Mr. Freeze wants a deed to the property at once, but he is willing to give the state a mortgage, as security. He recommended acceptance of the revised offer, and that Mr. Freeze be allowed to take possession of the property as soon as he has made the initial payment. The Commission approved the recommendation by unanimous vote.

The Attorney presented a form of resolution covering the alteration of the traffic signs at the intersection of the Woodburn-Sandy Secondary Highway No. 161, with the Wilhoit County Road, about one mile east of Molalla, in

Clackamas County, which change was authorized by the Commission at the previous meeting. After discussion, the Commission by unanimous vote approved and adopted the resolution as follows:

WHEREAS, the Woodburn-Sandy Highway is a secondary state highway and is known and designated as State Secondary Highway No. 161 and said highway intersects the Wilhoit county Road in Clackamas County at a point approximately one mile east of Molalla; and

WHEREAS, traffic moving over said county road at the place where said county road intersects said secondary highway is greater in volume and character than the traffic over said secondary highway at said point of intersection; and

WHEREAS, the convenience and safety of the traveling public necessitate the erection and maintenance of certain traffic control signs at the point where said secondary highway and the said county road intersect; and

WHEREAS, it is recognized that traffic entering said secondary highway at said point of intersection over or from said county road is predominantly log-hauling vehicles;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That westbound traffic on said Secondary Highway No. 161 shall come to a complete stop before entering the intersection formed by said Secondary Highway No. 161 and the west leg of said county road.

2. That the stop sign heretofore erected on said county road requiring west bound traffic thereon to stop before entering said secondary highway shall be removed.

3. That eastbound traffic on said Secondary Highway No. 161 be required to stop before entering the intersection with said county road, provided, however, that eastbound traffic on said secondary highway destined to the south along said county road shall not be required to stop, the intent of this last regulation being to permit at this point a right turn without the necessity for stopping.

4. That northbound traffic on said county road destined towards Colton, Estacada, and points east be required to stop before entering the intersection with said Secondary Highway No. 161.

5. In addition to the above stop signs, it is recognized that westbound traffic from said secondary highway and destined to the south along said county road should, to some extent, be regulated

by appropriate traffic control signs, but that since any such control signs would be entirely off the highway right of way and erected for the purpose of controlling purely county traffic, it must be erected and maintained pursuant to an act or order of the County Court of Clackamas County. Therefore, the Highway Commission hereby consents to the erection by theCounty Court of Clackamas County of the necessary and appropriate stop signs requiring traffic originating on said secondary highway to the east of said intersection and destined southwardly along said county road to come to a complete stop before entering said county road, it being further understood and provided that such stop sign or signs be placed at points approved by the State Highway Engineer.

6. That this resolution be entered in the minutes and records of the Commission as of the 28th day of July, 1943, and shall be effective as of said date.

Commissioner Chessman brought up for discussion the matter of constructing a sidewalk along the Oregon Coast Highway, between the Lewis and Clark Bridge and Miles Crossing, which project heretofore has been approved by the Commission, subject to satisfactory settlement of right-of-way transactions. He pointed out that the right-of-way matter has been disposed of, and suggested, in view thereof, that the Engineer be authorized to advertise the project for bids to be received at the next meeting. A motion was made by him to that effect. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

The Engineer brought up for discussion the bid received from contractor C. H. Wheeler, at the morning session, for the construction of the Astoria Airport Section of the Oregon Coast Highway. He advised that this bid was qualified upon the use of a quarry situated within the city limits of Astoria, known as the Hildebrand Quarry, the operation of which has been estopped by city ordinance. However, the contractor has stated a willingness to withdraw the qualification, if the State Highway Commission will make an honest effort to get the city to rescind its ordinance for the duration of this job. He pointed out that Mr. Wheeler's bid is nearly $100,000 lower than the next-low bid, and that the Public Roads Administration is not inclined to approve the award of the contract to any but the low bidder. Commissioner Chesaman disqualified himself in passing on this matter, explaining that he has fought the use of this quarry for several years, because of the dust nuisance and the noise that it creates, the quarry being situated near one of the city schools and some of Astoria's finest homes. Chairman Banfield and Commissioner Schaupp both appeared inclined to do what the contractor has asked, and tentatively approved the engineer's talking the matter over with the members of the city council and the city attorney of Astoria.

Mr. Wheeler, who was present, was then called into conference. He was accompanied by Mr. Jack Winninger, President of the contracting firm of Warren Northwest, Inc., and Mr. Allan Hunter, who represents the company that is

to write Mr. Wheeler's contract bond. Mr. Winninger was spokesman. He explained that he is subcontracting part of the work from Mr. Wheeler, and gave the reasons that prompted submission of a qualifying letter with their bid. He quoted Mr. Owens, former Astoria City councilman, as saying that he (Mr. Owens) thought that the city would permit the use of this quarry if its operation was in connection with the war effort. The Engineer advised that Mr. Wheeler's bid is satisfactory in all respects, except for the qualifying clause, which would have to be withdrawn before the Commission can award the contract. Mr. Winninger stated that they would be perfectly willing to withdraw the qualification, if the Highway Commission or the Public Roads Administration, or the United States Navy authorities will assist them in securing the consent of the City of Astoria to the use of the quarry. The Engineer inquired whether or not the contractor would be satisfied if he personally appeared before the Astoria City Council relative thereto. Mr. Winninger replied in the affirmative. He added that they expect to remove only about 24,000 cu. yds. of rock from this quarry, which is considerably under the amount needed for the job, and that their operations in the quarry would last only about thirty-five days of ten hours each. Mr. W. H. Lynch, District Engineer, of the Public Roads Administration, who was present, stated that he would endorse any presentation that is made to the Astoria City Council, by Mr. R. H. Baldock, as State Highway Engineer, but he cannot approve award of the contract to the second-low bidder, because such bid is about $100,000.00 higher than that of Mr. Wheeler. Commissioner Chessman explained, for the benefit of Mr. Wheeler and Mr. Winninger, the reason that he is not in position to bring any personal influence to bear in connection with the matter.

After further discussion, the Commission authorized the Engineer to discuss the matter personally with the Astoria City Council, and approved the award of the contract to Mr. Wheeler on the basis of his bid, if Mr. Wheeler will withdraw his qualification by letter. Messrs. Wheeler and Winninger both stated their approval of such arrangement, whereupon the Commission instructed the Engineer to contact the city authorities at once. The Commission thereupon referred the bids received for this project to the Engineer with authority to award the contract to the low bidder, when the above conditions have been satisfied.

Commissioner Schaupp brought up for discussion a request from Mr. R. B. Hadley of Klamath Falls for permission to move a house 24' x 34' in dimension, over the Midland Secondary Highway, from Mile Post 2.0 to Mile Post 4.80. The Commission by unanimous vote approved the issuance of the permit provided Mr. Hadley will furnish the required amount of public liability and property damage insurance, and the customary $1,000.00 bond; and provided further, that the movement is accompanied by sufficient flagmen to properly and effectively protect other traffic.

The Commission recessed for lunch at 11:40 a. m., and resumed discussions at 1:00 p. m., in the same room, with all Commissioners, the State Highway Engineer, the Attorney and the Secretary present.

The Engineer discussed with the Commission the bids that were received at the morning session, for construction work. As a result thereof the Commission decided to reject the bid received for the North Bend Airport Access Road Project, and by unanimous vote authorized the Engineer either to negotiate with a contracting firm to do the work, or to do the work by force account or with state forces, if such an arrangement meets with the approval of the Public Roads Administration. The Commission also decided unanimously to refer to the Engineer the bids received for the remaining projects, with authority to award the contract to the low bidder in each instance when certain conditions have been satisfied.

At 1:30 p.m. Chairman Banfield announced the following awards of contracts, as a result of previous discussions.

"Astoria Airport Section of the Oregon Coast Highway, in Clatsop County. 3.9 miles grading and bituminous macadam surfacing. C. H. Wheeler, Portland, submitted the low bid for this project, in the amount of $393,903.50. Peter Kiewit Sons' Company, Omaha, Nebraska, submitted the second low bid, in the amount of $491,205.00. There were three higher bidders. The Commission has referred this bid to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"North Bend Airport Access Road Project, in North Bend, Coos County. 0.40 miles of grading and paving. Newport Construction Company, Portland, submitted the only bid for this project, in the amount of $69,093.50. The Commission has rejected this bid and has authorized the work to be done by force account, if such an arrangement meets with the approval of the Public Roads Administration.

"Monmouth-Pedee Section of the Bridgeport-Monmouth County Road and the Dallas-Kings Valley Secondary Highway, Polk County. 12.51 miles of grading and surfacing; and 5.98 miles of oiling. Peter Kiewit Sons' Company, Omaha, Nebraska, submitted the low bid for this project, in the amount of $387,570.00, based on the use of asphalt. They did not submit a bid based on the use of tar. McNutt Bros., Eugene, submitted the second-low bid, in the amount of $438,159.00, based on the use of tar, and $438,419.00, based on the use of asphalt. There were two higher bidders. The Commission has referred the bids to the Engineer with power to award the contract to the low bidder, when certain conditions have been fulfilled.

"Monmouth-Pedee Bridge Project on the Bridgeport-Monmouth County Road and the Dallas-Kings Valley Secondary Highway, Polk County. One log span, two pile trestles and three concrete culverts. J. F. Johnston, Newberg, submitted the low bid for this project, in the amount of $14,270.00. C. W.Reeve, Salem, submitted the second-low bid, in the amount of $15,088.00. There were six other bidders. The Commission has referred the bids to the Engineer with power to award the contract to the low bidder, J. F. Johnston, when certain conditions have been fulfilled.

"Hebo Rock Production Project on the Oregon Coast and Three Rivers Highways, in Tillamook County. A. H. Saxton, Corvallis, submitted the low bid for this job, in the amount of $67,760.00. Rogers Construction Co., Dayton, Washington, submitted the second-low bid in the amount of $68,650.00. There were three other bidders. The Commission has referred the bids to the Engineer, with power to award the contract to the low bidder, when certain conditions have been fulfilled."

The Commission by unanimous vote considered and adopted the following "nunc protunc" resolution with respect to the establishment of a ration bank account to facilitate purchase of gasoline by the use of gasoline deposit certificates as authorized at its meeting of July 15, 1943.

WHEREAS, the Office of Price Administration has provided under and by virtue of a general ration order, subsequently supplemented, amended, explained and otherwise modified from time to time, that bulk consumers of gasoline may have their gasoline rations issued in the form of gasoline deposit certificates(Form OPA R-568) or consumer coupons approved for bulk transfer; and

WHEREAS, notwithstanding the fact that compliance with said ration order is optional in so far as the State of Oregon is concerned, the Highway Commission has elected to operate under said order and procedure and procure its necessary supply of gasoline by use of gasoline deposit certificates; and

WHEREAS, by the rules and regulations set up by the Office of Price Administration it is required of a bulk consumer of gasoline that such consumer open a ration bank account and thereafter conform with all of the routine and mechanics fixed and provided therefor by the Office of Price Administration;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That the Oregon State Highway Commission does hereby elect to procure, receive and accept its gasoline rations pursuant to the gasoline deposit certificate plan (Form OPA R-568) provided and inaugurated by the Office of Price Administration under its Consumer Bulletin No. 1.

2. That for such purpose R. H. Baldock, as State Highway Engineer, hereby is authorized to open and establish a ration bank account in The United States National Bank of Portland, Oregon, and/or in one or more of the branches of said bank, which said bank and/or any branch of said bank hereby is authorized to represent the Oregon State Highway Commission in all transactions involving deposits made in said ration bank account or accounts and in all disbursements therefrom.

3. That the said R. H. Baldock, as State Highway Engineer, and the following named employes of the Highway Department, to wit:

M. H. Hawke and Carl F. Smith, are hereby authorized to sign or endorse for the Oregon State Highway Commission such drafts, checks or other orders drawn against the said ration bank account and may make additional deposits in said account from time to time as conditions may warrant.

4. That the said R. H. Baldock, as State Highway Engineer, and the said M. H. Hawke and Carl F. Smith, as employes of the State Highway Commission, hereby are authorized to sign ration checks as defined in the said Gasoline Consumer Bulletin No. 1, and are authorized to endorse ration checks or other ration evidences owned or held by the Oregon State Highway Commission for deposit in said account.

5. That The United States National Bank of Portland, Oregon, be and it hereby is authorized to receive and honor all ration checks signed in accordance with the foregoing authorization and within the purview and purpose of said Gasoline Consumer Bulletin No. 1.

6. That the said R. H. Baldock, as State Highway Engineer, hereby is authorized to conform to and comply with such rules, regulations and routine as may be fixed and established from time to time by the Office of Price Administration with respect to the said ration bank account and such additions as may be made thereto from time to time.

7. That the provisions of this resolution and the policy and procedure hereby adopted and put in effect by the Oregon State Highway Commission shall apply to and control any ration bank account which may, prior to the date of this resolution, have been established by the State Highway Engineer, and the provisions of this resolution and the policy adopted hereby shall remain in full force and effect until amended, revoked or rescinded in writing by this Commission, a certified copy of which said amendment, rescission or revocation shall be served upon the said bank and shall thereafter become effective.

8. That if from time to time it appears necessary that other or additional persons and employes than M. H. Hawke and Carl F. Smith should be authorized to sign checks or other papers in connection with the said ration bank account, then the said R. H. Baldock, as State Highway Engineer, hereby is authorized to name and designate such other or additional persons and shall thereafter and thereupon notify in writing the said Bank, giving the names of such other or additional persons or employees so authorized.

9. That the Secretary to the Oregon State Highway Commission hereby is authorized to prepare for delivery to the said The United States National Bank a certified copy of this resolution, which certified copy when delivered to the said Bank shall be the Bank's authority to recognize and deal with the said R. H. Baldock, as State Highway Engineer, in the opening of said ration bank account, the maintenance of the same and the making of deposits therein and the withdrawals therefrom from time to time as the business of the Commission may warrant.

10. That this resolution be entered in the minutes and records of the Commission as of July 15, 1943, and deemed in effect as of that date.

For the benefit of Commissioner Schaupp, Chairman Banfield explained that previously in the session the Commission discussed a resolution from the Portland Chamber of Commerce, in which the Commission was urged to acquire scenic strips along the highways of this state. He advised that the request is in conformity with the Commission's established policy, in view of which the Parks Superintendent has been authorized to contact the Recreational Committee of the Portland Chamber of Commerce and arrange a trip with members thereof, in order to acquaint them with what has already been done by the Commission along that line. Commissioner Schaupp expressed his approval of such action.

The State Parks Superintendent was present and reported on the following park matters:

1. Application of the U. S. Coast Guard to construct a telephone pole line across Cape Lookout State Park, in Tillamook County:- The Parks Superintendent recommended approval of this request, subject to the condition that care is taken not to destroy valuable timber and shrubbery. The Commission approved the recommendation.

2. Request of Paul Rubeck, Marshfield, to purchase timber in Umpqua State Park:- The Parks Superintendent advised that this property is located adjacent to the Oregon Coast Highway about six miles south of Winchester Bay and that Mr. Rubeck wants to buy about 500 M-FBM of spruce timber standing thereon. He recommended against the sale of this timber. The Commission approved the recommendation.

3. Offer of W. O. Laurence, Sixes, Oregon, to purchase a portion of Port Orford Cedar State Park:- The Parks Superintendent advises that Mr. Laurance wants to buy 34 acres of this park which is located adjacent to the Oregon Coast Highway, about seven miles north of Port Orford. This park, he said, was deeded to the state as a gift, by Moore Bros., Bandon, who stipulated in the deed that the property was always to be held for wayside purposes. He recommended that Mr. Laurance's offer be denied. The Commission approved the recommendation.

4. Proposed purchase of Sparrow property, in Douglas County:- The Parks Superintendent requested authority for the right of way department to secure options for the purchase of a portion of the Sparrow land, situate adjacent to the Oregon Coast Highway, between Elbow Lake and Gardiner. The Commission approved the request by unanimous vote, and it was so ordered.

5. Proposed exchange of wayside lands, in Douglas County:- The Parks Superintendent advised that the Crown-Willamette Company, which owns timber situate adjacent to the Oregon Coast Highway

between Tahkenitch Lake and the Douglas-Lane County line, is now negotiating with the U. S. Forest Service for an exchange of properties, with the view in mind of preserving timbered wayside strips. He exhibited a map showing the location of the property. The Commission evidenced its approval of such exchange, and instructed the Parks Superintendent to point out the tract to the members of the Recreational Committee of the Portland Chamber of Commerce, when he takes this committee on the proposed trip for inspection of state parks.

6. Proposed exchange of O & C lands, in Douglas County:- The Parks Superintendent advised that Douglas County has worked out the proposed exchange of lands with the O & C Department, which makes it possible for the state now to acquire from the county the state parks at the summit of Camas Mountain on the Coos Bay-Roseburg Highway, and at Elkton Tunnel, on the Umpqua Highway, which two parks for the past several years have been under lease from the federal government. The two tracts, he said, contain 5,485,000 feet of timber, and the county has offered to sell both tracts to the state for the sum of $5,485.00, which is at the rate of $1.00 per M-FBM. He gave as his thought that this is a good deal; however, advised that there is a possibility that the Congress will enact legislation whereby some 1,500 acres of O & C lands, that the state now has under lease from the government, will be deeded to the state without cost. Such information, he said, was obtained from Mr. Guy Cordon of Roseburg, with whom he wishes to confer before completing the purchase of the two above-mentioned tracts from Douglas County. The Commission by unanimous vote approved the carrying on of negotiations for the acquisition of the Douglas County land, with a view in mind of obtaining it without cost, is possible.

7. Sale of down timber in Joaquin Miller State Park:- The Parks Superintendent advised that there is considerable fallen timber in this park, which is located adjacent to the Oregon Coast Highway, about two miles south of Florence, in Lane County. For the most part, he said, the timber consists of hemlock, which has fallen during severe storms. The property must be cleaned up, he said; otherwise the state will lose it. He requested authority to negotiate the sale of the timber. The Commission approved the request.

8. Proposed purchase of timbered wayside strips along the Pendleton-John Day Highway south of Ukiah:-The State Parks Superintendent advised that the tract contains a nice stand of timber, which the owner offers to sell to the state with the land at the rate of $12.00 per acre. The property, he said, lies along Camas Creek, about three miles south of the town of Ukiah. The Commission deferred action on this matter, pending inspection of the property on its trip through Central Oregon, about August 25.

9. Sale of hay on Shore Acres property, at Cape Arago State Park:- The Parks Superintendent reported an offer from L. H. Cornell, North Bend, to purchase the hay on 34 acres in this park, at the rate of

$2.00 per acre, or a total of $68.00. About half of this acreage, he said, has been matted to the ground by army tanks maneuvering over the area. He recommended acceptance of Mr. Cornell's offer. The Commission approved the recommendation.

10. Parks financial statement:- The following financial report was presented by the State Parks Superintendent and was approved by the Commission by unanimous vote:

	1943 Budget	Expenditures to June 30, '43	Balance
Acquisition	$12,210.00		$8,787.03
Curry County: Newburgh State Park		$2,892.96	
Linn County: Cascadia-Geisendorfer		300.00	
Tillamook County: Nehalem Sandspit-Peterson		12.50	
Legal Costs of Acquisition		217.51	
Betterment	none	340.78	340.78
Operation and Maintenance	46,757.28	$16,432.03	34,325.25
Plus sale of cinders (Gov't. requires this to be spent on Cove Park)	4,000.00		
	$62,967.28	$20,195.78	$42,771.50

11. General report on state parks:-In conformity with previous instructions from the Commission, the State Parks Superintendent presented to each Commissioner a detailed general report on all state parks, including a summary of acreage, costs, and other pertinent information.(For details see copy of report in general files.)

Mr. Lewis A. McArthur, President of the Oregon Historical Society, came before the Commission at this time in regard to the appointment of a committee to pass on the establishment of historical markers along state highways, in Oregon. His appearance was at the request of the Commission. Chairman Banfield advised Mr. McArthur that the Commission has in mind the erection of historical markers along state highways throughout the state, but before embarking on a program of this kind wants to know the facts with respect to the various historical sites. To obtain such information, he said, the Commission considers it advisable to appoint a committee to advise the Commission relative thereto. He inquired whether or not Mr. McArthur is willing to accept the Chairmanship of such committee, the size of which would be left up to Mr. McArthur to decide. Commissioner Chessman stated that it is the desire of the Commission to have the advice and counsel of people who are authorities on Oregon history. Mr. McArthur replied that there is a question whether or not

he could serve on the committee, but in any event he would be very glad to assist the Commission in the selection of the committee members.

Following discussion of this matter, Mr. McArthur reported a dangerous parking condition which exists along S. W. Sixth Avenue in Portland. He said that he does not know whether such matter comes under the jurisdiction of the Highway Commission but he is simply reporting it so the Commission can order corrective measures taken if the condition is subject to its control. The matter was referred to the Engineer and the Attorney to investigate and discuss with the Portland city officials.

Mr. James Elliott, logging contractor, Astoria, was present and asked the Commission to move the state's scales which are now located on the Salmon River Highway at Grand Ronde. He stated that the scales are now improperly located, and, as a result, all of his trucks are required to go about half a mile out of their way in order to be weighed, which is costing him about thirty or forty dollars per day extra expense, not mentioning the extra wear and tear on his trucks and tires and extra consumption of gasoline. He also said that other operators are effected similarly. The Engineer advised that this matter has been before the Commission on several occasions, but the Commission has taken no definite action relative thereto. He estimated that it would cost about $2,500.00 to move the scales, and recommended that that be done. The Commission approved the recommendation by unanimous vote.

The Commission considered and signed the following agreements, etc:

Agreement with Frank L. Ferguson, being contract of sale covering property on revised location of Crater Lake Highway.

Agreement with City of Junction City covering improvement of city streets not on the state highway system.

Contract with Brunell Bros., for furnishing ferry service at Enegren Crossing of Coos River, in Coos County.

Contract with Edlefsen-Weygandt Company for grading and paving Yeon Avenue-Nicolai Street Access Road, Portland.

Agreement with G. T. Wadsworth covering removal of two walnut trees on the Pacific Highway at Woodburn.

Agreement with the City of Eugene covering maintenance of Hilyard Street between 8th Avenue and Broadway.

Agreement with Robert Fromm covering pasturing of sheep in Humbug Mountain State Park, for year ending April 13, 1944.

Bargain and sale deed conveying unto W. H. Grabenhorst & Co. 81.5 acres of land, adjacent to the Pacific Highway, south of Salem.

JUL 23 1943

Bargain and sale deed conveying unto Wiley & Smith 7,000 sq. ft. of land in Kerns Addition, Portland.

Acceptance of permit from Freda R. Giese, covering retaining wall construction along the south line of the Giese property, in Lane County.

Petition for exclusion of land from Stanfield Irrigation District.

Modification of agreement with Union Pacific Company relative to remodelling Union Avenue Viaduct, Portland.

Joint letter with Public Roads Administration and U. S. Forest Service, programming Oregon Forest Highway funds for fiscal year ending June 30, 1944.

There being no further business to come before the Commission at this time, the meeting was adjourned at 2:30 p. m.

T H Banfield
Chairman

R W Schaupp
Commissioners

State Highway Engineer

H B Glaisyer
Secretary

Portland, Oregon, August 23, 1943

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Schaupp arrived at 10:30 a. m.

Bids as follows for highway construction work and for the sale of a residence building at Milton were opened and read according to previously published notices, following which Chairman Banfield announced that the awards of contracts would be made at 2:30 p. m. in the same room:

INDEPENDENCE-GRANGER COUNTY ROAD
SUVER ROAD-WELLS ROAD SECTION
OILING

E. C. Hall & J. C. Compton	$2,578.80
Parker-Schram Company	$4,446.75
Babler Bros.	$4,966.00

OREGON COAST HIGHWAY
MILES CROSSING-LEWIS AND CLARK RIVER SECTION
OILED ROCK FOOTPATH

C. H. Grimstad & T. Vanderveldt	$5,740.00
C. H. Wheeler	$7,360.00

OREGON COAST, WOLF CREEK AND NECANICUM HIGHWAYS
CANNON BEACH JUNCTION SECTION
SURFACING AND ROCK PRODUCTION

Rogers Construction Co.	$84,750.00
C. H. Wheeler	$87,430.00
A. H. Saxton & Sons	$88,815.00
E. C. Hall Co.	$93,095.00
Fisher Bros.	$95,624.00
T. W. Thomas	$101,600.00
Jed Wilson	$103,410.00

WILLAMETTE HIGHWAY
OAKRIDGE REVETMENT SECTION
ROCK AND GRAVEL REVETMENT

Hord & Stuart	$40,735.00
McNutt Bros.	$44,710.00
Leonard & Slate	$45,000.00

I.O.N. HIGHWAY
MALLOY RANCH-HOOKER CREEK SECTION
GRADING, SURFACING AND OILING; CONCRETE BRIDGE; ROCK PRODUCTION

Morrison-Knudsen Co.	$348,823.50
Leonard & Slate	$430,695.50
J. A. Terteling & Sons	$463,576.50
McNutt Bros.	$494,189.00
Triangle Construction Company	$512,953.50

SALE OF RESIDENCE BUILDING IN MILTON

Building No. 10530 (Former Owner Irene Troyer)

O. A. Giles	$100.00

AUG 23 1943

The Engineer discussed briefly with the Commission matters pertaining to which delegations are to appear at this meeting.

The Engineer reported on investigations that had been made with respect to the one-way traffic scheme which is now in force along the Pacific Highway through the city of Medford. He recalled that the Commission has been asked by city officials to change this scheme so as to provide two-way traffic on Riverside Avenue which is now designated for northbound traffic only. The criticism, he said, is based primarily on the objections of a few property owners who resent the taking away of southbound traffic from Riverside Avenue and by business men who have offices on Central Avenue over which southbound traffic is routed who complain of the noise that is created by heavy trucks that operate on this street. He advised that the present scheme of routing traffic originally had the approval of the city officials and to make any change now would require a complete re-design at the intersection of the Crater Lake Highway and Pacific Highway and would involve a large expenditure of funds; further, that to permit two-way traffic along Riverside Avenue would cause serious traffic congestion which undoubtedly would be accentuated when times return to normal. He recommended retention of the present scheme; however, suggested that the noise condition along Central Avenue could be eliminated by routing southbound truck traffic over Front Avenue. Such plan, he said, would necessitate an expenditure of approximately $60,000.00 to construct connections with Central Avenue at both ends of Front Avenue. He presented a map to show visually the plan as outlined. He also suggested, if the Commission approved such arrangement, that the city be required to furnish extra right of way that might be needed which he estimated would cost about $19,000.00. The matter was discussed at considerable length but no definite action was taken thereon although the Commission indicated that it did not favor any change in the present manner of routing traffic through the city of Medford.

The Engineer reported the results of his formal request of Mr. Charles P. Pray, Superintendent of Department of State Police, for the appointment as special police officers, of several highway department weighmasters. Mr. Pray, he said, advises that compliance with the request would contravene a policy of his department which is of long standing and which has been followed strictly throughout the years, and also advises that there is a question whether or not the act which created the State Police Department contemplated the appointment of officers other than those who are regularly selected and qualify as members of his department. Mr. Pray, he added, suggests that it would be possible to have the weighmasters appointed special agents by Governor Snell under authority of section 90-105 O. C. L. A. which would probably serve the purpose of the State Highway Commission. After discussion, the Commission instructed the Attorney to look into the law covering such appointments and advise the Commission of its authority relative thereto. Chairman Banfield was authorized by the Commission to discuss the matter with Governor Earl Snell if necessary after the Attorney has made his report.

A report was rendered by the Engineer on the cost to purchase commercial insurance covering State Highway equipment and contents of buildings, for fire and extended coverage perils. He advised that Peck & Wadsworth, Salem,

acting in behalf of the State Association of Insurance Agents, have quoted a premium of $62,034.00 for a three-year policy based on a valuation of $3,419,374.00. He pointed out that during the past ten years the highway department's fire loss has averaged less than $3,500.00 per year. By not carrying commercial insurance on equipment during this period, he said, the highway department has saved approximately $150,000.00 based on an annual premium charge of $15,000.00. He recommended in view of this experience that the additional insurance coverage not be purchased. The Commission approved the recommendation by unanimous vote.

Reconsideration was given by the Commission to the matter of purchasing extended insurance covering state highway bridges. The Engineer advised that pursuant to instructions given him by the Commission at its meeting on July 27, he has made further investigation in this matter and now finds that such insurance can be purchased on a three-year basis for $1,519.00, and that it would be just about as cheap to carry full coverage as partial coverage. He recommended the purchase of such insurance on the full coverage basis and also recommended that the Arch Cape Tunnel on the Oregon Coast Highway be insured against fire in the amount of $100,000.00, which represents about 50% of its total cost, which would raise the total premium to $2,419.00 for the three-year period or about $800.00 per year. After discussion, the Commission voted unanimously to purchase full coverage insurance for three years on the bridges and also on the tunnel as recommended by the Engineer. The Engineer was thereupon instructed to dismiss the guards that are now being maintained at these locations as soon as the insurance is in effect.

The Engineer requested authority to purchase three pieces of equipment known as "hystevators", for use by patrolmen in the cleaning of highway ditches and by pavement and oiling crews in the loading of patching materials. He estimated the total cost involved at $1,800.00. The Commission approved the purchase of such equipment by unanimous vote.

The Engineer reported award of the following contracts, bids for which were received by the Commission at its meeting of July 28, 1943, the conditions of the awards having been satisfied:

"Construction of the North Bend Airport Access Road, in Coos County, contract awarded to Newport Construction Company on August 14, 1943, as the result of negotiation.

"Grading, surfacing and oiling the Monmouth-Pedee Section of the Monmouth County Road and the Dallas-Kings Valley Secondary Highway, in Polk County. Contract awarded on August 20, 1943, to Peter Kiewit Sons' Company, the low bidder.

"Construction of bridges and culverts on the Monmouth-Pedee Bridge Project on the Bridgeport-Monmouth County Road and the Dallas-Kings Valley Secondary Highway, in Polk County. Contract awarded on August 20, 1943, to J. F. Johnston, the low bidder.

AUG 23 1943

"Construction of the Astoria Airport Section of the Oregon Coast Highway, in Clatsop County. Contract awarded on August 21, 1943, to C. H. Wheeler, the low bidder."

The Commission by unanimous vote confirmed the award of these contracts.

The Commission discussed briefly and ordered filed a press report to the effect that Mr. Arthur C. Benson of Breyn Mar, Washington, contemplates the construction and operation of a trackless-trolley system on highways between the California state line and the Columbia River. The Commission decided to defer action on this matter until the scheme is farther advanced.

A communication was presented from the Gresham Fire and First Aid Service, Gresham, Oregon, requesting a contribution from the State Highway Commission to assist in supporting the Gresham Volunteer Fire Department. It appears that the Gresham Fire and First Aid Service is being maintained entirely by volunteer "members" and contributions from residents and property owners in the area served. It also appears that calls are answered to the homes of all persons in the area but if the resident or property owner has not contributed to the service a charge of $25.00 is made. The Attorney advised that there is a ruling to the effect that the state cannot be a member of a mutual organization which may call upon the state for funds; however, he gave as his opinion that it is not beyond the authority of the Commission to enter into an agreement with the Gresham Fire Service for fire protection if it so desires, by which agreement the state would contribute a specified sum of money and in consideration, the Gresham Fire Department would hold its equipment and fire fighters available for the protection of the state's property located in this place. The matter was discussed by the Commission at considerable length during which the Commission expressed the feeling that the making of a contribution in this instance would establish an undesirable precedent in view of which the Commission voted unanimously to deny the request.

The Commission discussed and approved the application of the U. S. War Department to install certain drainage facilities along U. S. Highway 99 W in front of the Corvallis Airbase, south of Corvallis, on the condition that drainage pipe of ample size is installed to take care of excess waters and that the work is done in conformity with highway department standards of construction. The Commission thereupon signed a form of permit covering the matter.

Mr. Charles H. Reynolds, La Grande, President, Oregon Trail Association, headed a delegation which appeared before the Commission in regard to the further improvement of the Columbia River Highway between Portland and The Dalles. Others in the delegation representing the Portland committee for such improvement were Russell L. Colwell, Vice President, First National Bank of Portland, Ronald G. Callvert, representing Palmer Hoyt, publisher of the Oregonian, Marshall Dana, representing Sam Jackson, associate publisher of the Oregon Journal. Mr. Colwell presented the principle arguments in behalf of the group. He recalled that the Portland committee was appointed about two years ago by the Mayor of Portland and that it is supposed to represent the Portland

business interests that want the Columbia River Highway improved. The committee, he said, wishes to bring to the Commission suggestions for the completion of the highway within a reasonable length of time which it appears cannot be accomplished within the next 30 or 40 years under the present plan of allocation of funds. He suggested three ways to finance the work:

1. Sale of state highway bonds. The committee, he said is not in favor of such method of financing.

2. Establishment of this highway as a toll road which is undesirable and does not have the approval of the committee members.

3. The establishment of a highway district comprising some 12 or 15 counties which are situate adjacent to the Columbia River Highway and the Old Oregon Trail throughout its entire length in Oregon. The plan, he said, would involve the sale of bonds by the district. It was his thought that this is an acceptable and fair way to finance the project so that construction can go forward immediately after the war is over and be completed within a reasonable length of time.

Mr. Colwell's remarks were endorsed by Messrs. Dana and Callvert, both of whom urged the improvement from the commercial and pleasure standpoints. Mr. Reynolds also added his endorsement in behalf of the Oregon Trail Association and also stated that the object of the committee is to present the proposed methods of financing to the Commission for its consideration in the event the project cannot be financed with funds derived from regular sources.

There followed a general discussion on the matter during which Mr. Colwell advised that the counties along the route have not yet been contacted with respect to the formulation of the highway district because the committee wanted to discuss the matter with the Highway Commission first. Mr. Dana declared that the improvement would be a big asset to the state, to the northwest and to the entire nation; that it is a needed improvement being of primary importance and should be finished as soon as possible. In reply to an inquiry from Chairman Banfield as to whether or not the people of Portland prefer this project to completion of the Wolf Creek Highway or the Front Avenue Project in Portland, Mr. Dana stated that the Columbia Gorge Project should not be placed in competition with the others.

Chairman Banfield advised that the Highway Commission does not have the authority to issue bonds except refunding bonds and then only in the amount of two million dollars annually; further, that the Commission is now canvassing the state with the idea in mind of ascertaining just what projects the various communities desire in the postwar construction program so that a program can be formulated and plans prepared which will enable immediate construction as soon as the war is over. The Commission is not in a position, at this time, he said, to make any definite statements in regard to any projects and will not be in such position until the state canvass has been completed and until it is known just what federal funds are to be available to finance the work. Mr. Dana requested assurance from the Commission that everything possible would be done to expedite this project to which Chairman Banfield replied that the Commission would give the matter careful consideration

AUG 26 1943

in the forming of its postwar program, but can make no promises at the present time. He pointed out that as a result of the Commission's canvass of the state, many more projects will be presented to the Commission than can be financed so the Commission will be obligated to establish a procedure as to the construction of one road in preference to another.

Commissioner Schaupp arrived at this time and entered into the discussion that followed. Chairman Banfield concluded the conference by stating that the Commission intends to analyze to the best of its ability all of the projects that are submitted for its consideration and will adopt a program on the basis of what it considers to be to the best interests of the entire state.

Following departure of this group, Mr. Reynolds presented the following programs of projects in behalf of the Union County Court and the Oregon Trail Association:

PROJECTS REQUESTED IN BEHALF OF UNION COUNTY

1. North Powder Road:- Complete the grading and surfacing of 1500 feet and the construction of a 54-foot bridge across North Powder River.

2. Reconstruct Hunter Lane to modern secondary highway standards, 7 miles in length, and extend same to a connection with the Imbler-Summerville-Toll Gate Road.

3. Reconstruct to modern secondary highway standards the 8-mile section of the Union-Cove Secondary Highway, No. 342.

4. Reconstruct a 9.9-mile section of the North Phillips Creek Road to modern secondary highway standards and designate such road as a state secondary highway.

5. Reconstruct to present-day secondary highway standards the 13.4-mile section of the county road between Alicel and Cove and place this road on the state secondary highway system.

6. Reconstruct to present-day secondary highway standards the 2.9-mile section of McAllister Lane which extends southerly from Island City to a connection with the Old Oregon Trail, and designate this road as a state secondary highway.

7. Extend Starkey Secondary Highway, No. 341, 16 miles to a connection with the Pendleton-John Day Highway at Ukiah, and construct same to modern standards.

8. Modernize the Old Oregon Trail to present-day standards between the towns of Union and North Powder, 15 miles.

9. Modernize to present-day standards the 6.8-mile section of the La Grande-Joseph Highway between Elgin and Pine Grove.

10. Modernize to present-day standards the 8-mile section of the Old Oregon Trail between La Grande and Hilgard.

Mr. Reynolds presented a blueprint map showing the several projects requested. He also presented a letter from the Union County Chamber of Commerce and a letter bearing the signatures of the Union County Court, City Officials and principal business men of Union County, both of which letters endorsed the program as outlined. Chairman Banfield pointed out that this is a big program and that the State Highway Commission will probably not have funds available to finance all of it, but will be pleased to consider them in the formulation of its postwar program.

PROJECTS SUGGESTED BY THE OLD OREGON TRAIL ASSOCIATION

1. Reconstruct the section between Ontario and the Baker County line to eliminate inferior alignment.

2. Widen the Durkee Undercrossing and flatten the approaches thereto.

3. Widen the Oxman (Unity) Overcrossing and eliminate the sharp approaches thereto.

4. Reconstruct the section between North Powder and Union.

5. Realign the section between La Grande and Hilgard so as to eliminate two overcrossings and numerous curves.

6. Consider adoption of a new route to eliminate hazardous alignment on Emmigrant Hill.

7. Widen West Court Street in Pendleton.

8. Reconstruct the 26-mile section between Boardman and Arlington.

9. Reconstruct the section between Quinton and the John Day River.

10. Eliminate the bottleneck condition caused by narrow streets through the City of The Dalles.

11. Reconstruct the section between The Dalles and Troutdale. With respect to project No. 11, Mr. Reynolds pointed out that this is the project that was requested by the Portland committee at this meeting and gave as his opinion that it is the most important project now before the Highway Commission. He advocated the establishment of this section as a toll road to finance construction if there appears to be no other way to secure the necessary funds.

AUG 23 1943

In reply to an inquiry from Chairman Banfield as to whether or not the present method of distributing funds to the various sections of the state is equitable, Mr. Reynolds stated that such method, in his opinion, is satisfactory. After discussion of the various projects presented, Chairman Banfield advised that the Commission will carefully consider each one in formulation of its postwar construction program but cannot make any promises or definite commitments with respect to any of them at the present time.

Mr. L. T. Merwin, President, Northwest Electric Company, Portland, was present in behalf of a Portland committee which is interested in securing the services of Mr. Robert Moses, New York City, to formulate plans for the development of Portland and vicinity as a postwar project, in order to provide work for the thousands of people who will be thrown out of employment upon cessation of the wartime activities. He asked the Commission to join with the group and participate in the costs involved which, he said, would amount to $100,000.00 for two months work by Mr. Moses and his corps of specialists. Other organizations participating, he said, are the City of Portland, Multnomah County, Port of Portland, Portland Dock Commission and the Portland School District, and the object of the group is to formulate a public works program of self liquidating projects so as to avoid a recurrence of the conditions that obtained after the last war. Mr. Merwin stated that the committee is meeting today to make its final decision with respect to securing Mr. Moses' services and would like to have the members of the Commission attend such meeting if possible; otherwise, to notify the committee so that it will know what to expect from the state. After discussion, Chairman Banfield stated that the Commission is not in a position to state at this time definitely whether or not it can contribute state funds for this purpose because the Commission does not know if it has the power to join in this expense. He advised Mr. Merwin that the Commission will discuss the matter with its Engineer and its Attorney and will let him know by 4:00 p.m. on this day. Following Mr. Merwin's departure the matter was reconsidered by the Commission. The Commission, after discussion, voted unanimously not to join in this undertaking because of the danger of establishing an undesirable precedent. It appeared to the Commission that if it contributed toward the expenses in this instance, it could not very well refuse to cooperate with other cities and towns which may present similar requests. It was decided to tell Mr. Merwin that the Commission considers it inadvisable for the state to join in this project as suggested but that it will authorize the Engineer to work with Mr. Moses' organization as is now being done at Eugene. The Engineer was thereupon authorized to cooperate with Mr. Moses' group to such extent. Mr. Merwin reappeared before the Commission at 4:00 p. m. at which time he was informed by Chairman Banfield that the Commission had discussed his proposal but feels that it cannot join with the others because it considers that it does not have the authority to spend state funds for such purposes; furthermore, it is the opinion of the members of the Commission that contributing state funds in this instance would establish a very undesirable precedent which would react unfavorably to the Commission in disposing of similar requests in the future. However, the Commission has authorized the Engineer to work with the group and to furnish records, et cetera.

Mr. Merwin then inquired whether or not the Commission would be willing to join with the group later on in the event a plan is derived, as a result of Mr. Moses' efforts, that shows a distinct benefit to the state highway program. Chairman Banfield remarked that that is another angle which would have to be studied. Commissioner Chessman also remarked that that would be a consideration; however, the Commission is treading on dangerous ground and while the idea of the undertaking is fine insofar as the Metropolitan District of Portland is concerned, there is a question whether or not it would benefit the up-state districts. He pointed out that the City of Astoria has paid for its own plans without state aid and that the City of Eugene is doing likewise. The question, he says, involves the problem of drawing a line where the Commission should cooperate and where it should not cooperate.

Mr. Merwin inquired whether of not the Commission would consider participating in the plan if federal funds become available for such purpose. Commissioner Schaupp replied that in his estimation the Commission should make no commitment whatsoever at this time. It was his thought that the cooperation that the Commission is now giving the City of Eugene is the maximum that it can offer to any city. In reply to an inquiry from Mr. Merwin, as to whether or not the Commission will entertain another appeal, Chairman Banfield stated that the Commission is not unfriendly to the entire scheme and will be pleased to listen to further appeal later on if presented at one of the regular meetings. This concluded the conference.

Messrs. Z. K. Smith, President, and J. R. Smith, Secretary-Treasurer, of the contracting firm, Logan and Taylor, Inc., came before the Commission in regard to the prequalifying of Logan and Taylor, to enable them to bid on state highway contract work. The Engineer explained that the former Highway Commission disqualified Mr. Logan from personally bidding on state highway work because of unsatisfactory past performances in connection with highway construction contracts. He pointed out that Mr. Logan since then has become associated with Mr. Taylor and others, which changes the situation, and in view thereof he recommended acceptance of the prequalification of the new firm on the condition that if they are successful bidders on any highway project but do not carry on their work to the satisfaction of the State Highway Commission that they be not permitted to bid on additional work. After discussion, motion was made by Commissioner Schaupp that this contracting firm be allowed to bid on state highway work to the extent of their prequalification, subject to the condition mentioned by the Engineer. The motion was seconded by Commissioner Chessman and was declared by Chairman Banfield to have received the unanimous vote of the Commission.

The Attorney brought up for discussion the proposed meeting with the highway officials of the states of Washington and California for discussion of matters of mutual concern. He advised that September 24 or 25 has been suggested as the time for such meeting and that the Washington officials have suggested that the meeting be held either in Eugene or Klamath Falls. Chairman Banfield stated that he could not attend the meeting on such date as he would be out of the state. Commissioner Schaupp stated his preference for the meeting to be held in Portland. Commissioner Chessman indicated that either Portland or Eugene would be satisfactory from his standpoint. It was decided that Commissioners Schaupp and Chessman would attend this meeting, but it was left up to the

Attorney to arrange the meeting place. (Final arrangements were made to hold the meeting on Friday, September 24, 1943, at Klamath Falls.)

The Commission recessed for luncheon from 11:50 a. m. to 2:30 p. m.

The Commission reconvened at 2:30 p. m. in the same room with all Commissioners, the State Highway Engineer, the Attorney and the Secretary present. The Commission discussed the bids received at the morning session after which Chairman Banfield made the following announcement of awards of contracts such awards having been previously approved by the Commission by unanimous vote:

"Suver Road-Wells Road Section of the Independence-Granger County Road, in Benton and Polk Counties. E. C. Hall Co. & J. C. Compton, Eugene and McMinnville, submitted the low bid for this project in the amount of $2,578.80. The second-low bid was that of Parker-Schram Company, Portland, at $4,446.75. There was one other bid submitted on this project. The Commission has awarded this contract to the low bidder, E. C. Hall Co. & J. C. Compton, at their bid of $2,578.80.

"Miles Crossing-Lewis and Clark River Section of the Oregon Coast Highway, in Clatsop County. The low bid was submitted by C. H. Grimstad and T. Vanderveldt, Astoria, at $5,740.00. The only other bid was that of C. H. Wheeler, Portland, at $7,360.00. The Commission has awarded this contract to the low bidder, C. H. Grimstad and T. Vanderveldt, at their low bid of $5,740.00.

"Cannon Beach Junction Section of the Oregon Coast, Wolf Creek and Necanicum Highways, in Clatsop & Tillamook Counties. The low bid was submitted by Rogers Construction Company, Dayton, Washington, at $84,750.00. The second-low bid was that submitted by C. H. Wheeler, Portland, at $87,430.00. There were five other bids submitted on this project. The Commission has awarded this contract to the low bidder, Rogers Construction Company, at its low bid of $84,750.00.

"Oakridge Revetment Section of the Willamette Highway, in Lane County. Three bids were received for this project, the low one being that of Hord & Stuart, Portland, in the amount of $40,735.00, and the second-low bid being that of McNutt Bros., Eugene, in the amount of $44,710.00. The Commission has referred all bids received on this project to the Engineer with power to award the contract to Hord & Stuart, the low bidders, when certain conditions have been satisfied.

"Malloy Ranch-Hooker Creek Section of the I.O.N. Highway, in Malheur County. Five bids were received on this project, the low bid being that of Morrison-Knudsen Company, Boise, Idaho, in the amount of $348,823.50, and the second-low bid being that of Leonard & Slate, Portland, in the amount of $430,695.50. The Commission has referred all bids received on this project to the

AUG 23 1943

Engineer with power to award the contract to Morrison-Knudsen Co., the low bidder, when certain conditions have been satisfied."

Sale of Residence Building in Milton:

"The only bid received for the purchase of this building was submitted by O. A. Giles, Freewater, at $100.00. The Commission has rejected this bid."

A letter was presented from contractor A. H. Saxton & Sons relative to the Hebo Rock Production Project on the Oregon Coast and Three Rivers Highways, in Tillamook County, for which project this contractor submitted the low bid at the meeting of the Highway Commission held on July 28, 1943. Chairman Banfield read the letter aloud as follows:

Lowell, Oregon
August 23, 1943

Oregon State Highway Commission
Salem, Oregon

In Re: Hebo Rock Production Project
on Oregon Coast and Three Rivers
Highways, Tillamook County

Gentlemen:

After making extensive explorations and tests of the different sources of rock available in the vicinity of the above project, we hereby agree to assume the responsibility of sufficient rock being available for the completion of the above project.

In return for assuming this responsibility, the Oregon State Highway Commission will compensate us at our unit bid price for any additional truck haul from the source of the material to the crusher that may be involved in securing sufficient material for the completion of the above project.

We will be willing to accept the award of the contract for the completion of the above captioned project upon your acceptance of this letter. Signed and accepted in duplicate this 23rd day of August, 1943.

Yours very truly

A. H. SAXTON & SONS

By A. H. SAXTON (Signed)

Mr. A. H. Saxton was present and entered into the discussion of this matter. The Engineer recommended acceptance of the condition mentioned in the letter and the award of contract subject thereto. Motion was thereupon made by Commissioner Schaupp that the contract be awarded to A. H. Saxton & Sons subject

to the provisions of the letter. Motion was seconded by Commissioner Chessman and received the unanimous vote of the Commission.

Messrs. R. R. Bullivant and M. R. McArthur, representing the Phillips Petroleum Company, came before the Commission in regard to the application of Daight & Stewart Truck Company for permission to transport certain oil drilling equipment over state highways enroute from California to Marshfield. Mr. McArthur stated that his company has contracted to drill an oil well about seven miles south of Marshfield and that the equipment will have to be shipped in from California, some of which will involve loads weighing in excess of the Oregon legal weight limits. It will also be about five feet longer than the length permitted in Oregon. The Engineer recommended approval of the request if the company can meet the requirements specified in the Commission's wartime emergency permits. The Commission approved the recommendation by unanimous vote. (Mr. McArthur advised the Engineer later in the day that arrangements had been made to transport all of this equipment from California to Marshfield by rail which would eliminate the necessity for a permit except over the Oregon Coast Highway from Marshfield south seven miles to the site of the drilling. Such information was transmitted to the Commission which again approved the granting of the permit subject to the usual requirements.)

The Commission by unanimous vote approved the minutes of meetings held on July 6 and 7, July 12 to 17, inclusive, and July 27 and 28, 1943.

The Assistant Attorney reported orally on the right of way budget and expenditures made for real property purchases this year. The Commission approved the report.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He presented a list of such properties together with offers that he recommended be made in connection with each parcel. After careful consideration of each item, the Commission approved the request and thereupon by unanimous vote adopted the following resolution with regard thereto:

> WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and
>
> WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and
>
> WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

WARRENTON JUNCTION-LEWIS & CLARK BRIDGE SECTION, OREGON COAST HIGHWAY

10882-Davis, Arthur E. Right of Way	2,812 sq. ft. in exchange for Lot 12, Block 92, Warrenton Park, the cost $35.00			Benson
10880-C-Clatsop County Right of Way	5,000 sq. ft. at .007¢		$35.00	"

AUG 23 1943

MALLOY RANCH-HOOKER CREEK SECTION, I. O. N. HIGHWAY (Continued)

10375-A-Harris, Charles V.				
Hauling road	0.14 acre	0.00		
	Fencing	30.00	$30.00	Cozad

CRANE SECTION, BURNS-CRANE HIGHWAY

10929-Harney County			
Maintenance Site	23 lots at $4.35	$100.00	DeSouza

The Assistant Attorney requested authority to institute condemnation proceedings to acquire certain other properties, settlement for which he has been unable to reach by negotiation. He presented a list of such properties together with offers that he recommended be authorized in condemnation as follows:

File No.	Name	Purpose Required	Recommended Offer
10914	Grover C. Knight, Estate	Gravel Pit and Hauling Road	$300.00
10994	Chas. H. Hills Estate	Revetment	$415.00
11000	John S. Dunn	Revetment	$ 10.00
11003	Claude R. Jones	Revetment	$ 10.00
9762	Bert Schultz	Right of Way	$725.00
11004	Homer M. Cross	Quarry	$1000.00
9473	Security Savings & Trust Co.	Mineral Rights	$500.00

After careful consideration of each item, the Commission authorized condemnation and approved the offers recommended in each instance. The following resolution with respect thereto was adopted by the Commission by unanimous vote upon motion of Commissioner Schaupp which was duly seconded by Commissioner Chessman:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolman accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition of or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety

of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by the Estate of Grover C. Knight, Deceased, which property is located in the northeast quarter ($NE\frac{1}{4}$) of Section 13, Township 28 South, Range 46 East, and in the south half ($S\frac{1}{2}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 12, Township 28 South, Range 46 East, W. M., Malheur County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 1 and 2, and is further identified in the records of the Highway Commission as file R 10914, Parcel 1 of which property is being acquired for the purpose of securing therefrom roadbuilding materials and Parcel 2 is being acquired for hauling road purposes in connection with the I. O. N. Highway;*

Real property owned by the Estate of Chas. J. Hills, Deceased, et al., which property is located in the south half ($S\frac{1}{2}$) of Section 16, Township 21 South, Range 3 East, W. M., Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 3 and 4, and is further identified in the records of the Highway Commission as file R 10994, and which property is being acquired for highway drainage purposes in connection with the Willamette Highway;*

Real property owned by Claude R. Jones, et ux., which property is located in the northwest quarter (NW¼) of the southwest quarter (SW¼) of Section 16, Township 21 South, Range 3 East. W. M. Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5 and is further identified in the records of the Highway Commission as file R 11003, an easement on which property is being acquired for highway drainage purposes in connection with the Willamette Highway;*

Real property owned by Bert Schultz, et al., which property is located in the northwest quarter (NW¼) of the southeast quarter (SE¼) of Section 3, Township 39 South, Range 9 East, W. M., Klamath County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 6 and is further identified in the records of the Highway Commission as file R 9762, and which property is being acquired for right of way purposes in connection with the Klamath Falls-Lakeview Highway;*

Real property owned by Homer M. Cross, et ux., which property is located in the northeast quarter (NE¼) of the northwest quarter (NW¼) of Section 34, Township 4 South, Range 10 West, W. M., Tillamook County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 7 and is further identified in the records of the Highway Commission as file R 11004, and which property is being acquired for manufacture of roadbuilding materials and hauling road purposes in connection with the Oregon Coast Highway;*

Real property owned by The First National Bank of Portland (Oregon), a corporation, successor in interest to Security Savings & Trust Company, which property is located in the northeast quarter (NE¼) of the southwest quarter (SW¼) and the south half (S½) of the southeast quarter (SE¼) and the northwest quarter (NW¼) of the southeast quarter (SE¼) of Section 33, and in the south half (S½) of the southwest quarter (SW¼) and the south half (S½) of the southeast quarter (SE¼) of Section 34, and in the south half (S½) of the south half (S½) of Section 35, all in Township 6 South, Range 31 East, W. M., Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 8, 9, and 10 and is further identified in the records of the Highway Commission as file R9473, and which property is being acquired for the purpose of developing and maintaining a park, recreational ground and/or resort, and for the purpose of preserving the timber growing thereon, and is located near the Pendleton-John Day Highway.*

AUG 23 1943

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

---

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 38, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Attorney brought up for discussion a request from the federal government to lease for the duration of the war and six months thereafter, a portion of Ecola State Park, Clatsop County, consisting of some 25 acres of land. He advised that the army is establishing certain defense facilities on adjoining government owned land and needs the state property in connection therewith;

further, that the army would like to have a permanent easement for roadway through the state park in order to have access to its holdings, and has agreed to give the state the right to use the roadway after the war is over. He recommended approval of the arrangement. The State Parks Superintendent, S. H. Boardman, was present and concurred in the recommendation subject to the condition that the state is given the right to use the roadway and to salvage the down timber which consists mainly of spruce. After discussion, the Commission by unanimous vote authorized the leasing of the property to the federal government on the basis of the Parks Superintendent's recommendation. The following resolution with regard thereto was adopted by the Commission by unanimous vote upon motion of Commissioner Chessman which was seconded by Commissioner Schaupp:

In the matter of a lease between)
Oregon State Highway Commission,)
as Lessor, and the United States)
of America, as Lessee.)

WHEREAS, Oregon State Highway Commission, Salem, Oregon, hereinafter called the Commission, is the owner of the following described real property, to wit:

The South half of Lot 2 of Section 1, Township 5 North, Range 11 West Willamette Meridian, County of Clatsop, State of Oregon, comprising 25 acres, more or less and

WHEREAS, the United States of America, hereinafter called the Government, desires to lease the hereinabove described property and said Commission being willing, and

WHEREAS, power to enter into leases of this character has been given said Commission by Section 100-115, paragraph 5, 9, and 10, O. C. L. A. 1920, and that said Commission has the right to enter into such lease by and through its duly appointed Chairman and Commissioners.

NOW, THEREFORE, BE IT RESOLVED, that a lease be entered into with the Government, said lease to be for the period commencing August 23, 1943 and ending June 30, 1944, with option to renew from year to year, provided no renewal shall extend the period of occupancy beyond six months after termination of present emergency, for the rental of One Dollar ($1.00) per annum and that T. H. Banfield, Chairman; A. W. Schaupp, Commissioner; and M. R.Chessman, Commissioner, be and they are hereby authorized and empowered to execute said lease on behalf of said Commission

IN WITNESS WHEREOF, Oregon State Highway Commission has caused this Resolution to be executed by the proper officers.

Dated at Salem, Oregon, this 23rd day of August, 1943.

T. H. BANFIELD, Chairman (Signed)
A. W. SCHAUPP, Commissioner "
M. R. CHESSMAN, " "

Attest:
H. B. GLAISYER, Secretary(Signed)

AUG 23 1943

The Commission discussed and denied a request from John F. Kilkenny, Attorney, Pendleton, for hunting rights on a duck lake owned by the state adjacent to the Boardman-Stanfield Highway, in Umatilla County, it being considered by the Commission inadvisable to lease public property for private purposes such as this.

The Assistant Attorney reported on the offer of C. R. Fulgham to pay $150.00 for a small tract of state-owned land adjacent to the Salem-Dayton Secondary Highway, in Yamhill County, as ordered by the Commission at the previous meeting. He stated that the property is of no value from the state highway standpoint and that Mr. Fulgham's offer is fair and reasonable. He recommended acceptance of the same. The Commission voted unanimously to sell the property to Mr. Fulgham for the amount of his offer.

A letter was presented from Mr. Ralph E. Moody, Attorney for contractor, Homer G. Johnson, with respect to Mr. Johnson's claim for extra compensation arising out of his contract No. 2390 for the construction of the Siletz-Toledo Section of the Siletz Secondary Highway, in Lincoln County. Mr. Moody requests that Mr. Johnson be allowed until the 20th day of September, 1943 in which to present additional data and evidence in behalf of his claim. The Attorney recommended the granting of this request. The Commission approved the recommendation.

The Engineer reported on the proposed relocation of the Pacific Highway East between Illahee School, south of Salem, and Albany. He presented a map showing three alternate routes, one of which passes through the town of Jefferson, a second by-passes Jefferson on the east a short distance, and the third being situate about two miles west of the town of Jefferson. He favored the latter location because of the saving in distance that would accrue and because the cost to construct the same is not greatly in excess of cost of constructing either of the other two routes. He estimated the right away along such route would cost about $39,000.00. This matter was discussed at considerable length and as a result, motion was made by Commissioner Schaupp that the route recommended by the Engineer be adopted subject to the condition that no commitment is being made as to construction. The motion was duly seconded by Commissioner Chessman and was declared by Chairman Banfield to have carried by the unanimous vote of the Commission. The following resolution in regard thereto was thereupon adopted by the Commission by unanimous vote:

> WHEREAS, for the purpose of accomplishing a better alignment, the elimination of unsafe and excessive curvature, and otherwise improving the Pacific Highway East, the Commission directed the Engineer to make a survey of the section of the Pacific Highway East between a point approximately one mile south of Illahee School, in Sec. 11, T. 9 S., R. 3 W., W. M., Marion County, and a point approximately one mile easterly from the east city limits of Albany, in Sec. 4, T. 11 S., R. 3 W., W. M., Linn County; and
>
> WHEREAS, said survey has been completed and a map thereof made and the field notes and other engineering data have been filed in the office of the State Highway Commission in Salem, Oregon; and

WHEREAS, after due consideration of said map and records it is the judgment of the Commission that said map, survey, field notes and other engineering data should be approved and adopted by the Commission and the location and route between said termini be made the location and route of the Pacific Highway East between said points;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That the survey, field notes, map and other engineering data with respect to the Pacific Highway East between the above-designated termini be and the same in their entirety are hereby approved and adopted as the survey, field notes, map and engineering data supporting and disclosing the route of the highway between the said termini, and the Engineer hereby is directed to file all of said data and information and to preserve the same in the records and files of the State Highway Commission at Salem, Oregon.

2. That the route of the Pacific Highway East in Marion and Linn Counties between the above-designated termini hereby is changed and modified and said highway between said termini hereby is located as follows, to wit:

> Beginning at a point on the present Pacific Highway East, in Marion County, said point being approximately one mile south of the Illahee School where the present highway crosses the section line between sections 2 and 11, T. 9 S., R. 3 W., W. M., thence running in a southerly direction through sections 11, 10, 15, 22, 27, and 33, T. 9 S., R. 3 W, W. M., to the Marion-Linn County line; thence continuing in a southerly direction through sections 4, 9, 16, 21, 28 and 33, T. 10S., R. 3 W., W. M., in Linn County, to a connection with the present located Pacific Highway East in the northwest quarter of section 4, T. 11 S., R. 3 W., W. M., approximately one mile east of the east city limits of Albany.

3. That said map for identification bears thereon the signature of R. H. Baldock, State Highway Engineer, and is dated the 23rd day of August, 1943, the original of which said map has been placed in the files and records of the Highway Commission at Salem, Oregon, and a copy of which is attached hereto*

4. That the State Highway Engineer hereby is instructed and directed to physically locate and mark with proper monuments or markers on the ground the said route and highway between said termini, and the Engineer is further instructed to prepare the said section of said highway for proper and adequate improvement as a part of the section of the Pacific Highway East, in Marion and Linn Counties, between said termini.

*Map filed in "New Highway Routes" - No. 50.

AUG 23 1943

5. That this resolution be entered in the records and minutes of the State Highway Commission and that a duly certified copy thereof be mailed to the County Court of Marion County and to the County Court of Linn County and to the United States Public Roads Administraion of Portland, Oregon.

In connection with this matter, the Engineer advised that this is a meritorious project for postwar construction. He requested authority to proceed with the location survey and the preparation of plans and specifications so as to avoid delays from that standpoint when construction is ordered. He also requested authority for the Attorney to negotiate options for the right of way. The Commission approved both requests by unanimous vote.

The Secretary presented a letter from Mr. Don H. Peoples, Executive Secretary, Bend Chamber of Commerce, inquiring when the Highway Commission expects to make its official visit to Bend to discuss postwar highway problems. Mr. Peoples advises that the Bend Chamber of Commerce does not consider that the Commission's visit to Bend in April to be an official visit because the Highway Committee of the Chamber of Commerce was not present when postwar projects were discussed with the county court; hence, would like an opportunity to present projects which it considers important. The Engineer suggested that it would be advisable to give the highway committee an opportunity to present the projects that it has in mind and suggested that the committee be invited to attend the next regular meeting of the Commission or that the committee be asked to submit their projects in writing together with a map disclosing the locations of the various projects, whichever the committee prefers. The suggestion was approved by the Commission whereupon the Engineer was instructed to telephone the information to Mr. Peoples.

Messrs. Arthur Kirkham and O. C. Roehr, members of the Recreational Committee of the Portland Chamber of Commerce, came before the Commission at this time and expressed their appreciation for the opportunity of inspecting Oregon parks and timbered waysides along the Oregon Coast Highway recently, in company with the State Parks Superintendent. They complimented the Commission on the progress that has been made in the acquisition of parks and wayside strips, and suggested that the plan should be continued with vigor as funds are available. They suggested the securing of options at the present time for the purchase of tracts which in the opinion of the Parks Superintendent should be acquired in the peoples interests. They particularly referred to property adjacent to the Oregon Coast Highway near Cannon Beach and to a small strip at Elbow Lake. Mr. Kirkham advised that a complete report in writing will be furnished the Commission at a later date.

The Commission had under discussion overweight violations committed by the following log haulers:

George F. Bullock, Myrtle Point
South Fork Logging Company, Springfield
Ernest L. Louvring, Springfield
Wayne Hale, Noti
Charles R. Siverly, Pilot Rock

AUG 20 1943

The Secretary presented a list of violations committed by each of these operators which violations consist of gross overloads ranging from 7,100 pounds to 9,900 pounds over and above permitted tolerances. The violations of each operator were given careful consideration by the Commission and as a result thereof the Secretary was instructed to give final warning to each of these violators that their P.U.C. permits will be cancelled if they do not discontinue overloading their equipment in this service.

In this connection, the Secretary presented a letter from the E. K. Wood Lumber Company to Chairman Banfield requesting the reinstatement of the company's permit for log hauling which was cancelled because of overload violations. Chairman Banfield stated that he authorized the reinstatement of this permit prior to the expiration of the ten-day period because of statements made by the company in the letter and also orally, that the company hereafter would control its loads so as to avoid loading in excess of the prescribed weight limits. Commissioner Schaupp and Commissioner Chessman approved the action taken by Chairman Banfield in this matter.

The Commission discussed the matter of attending the annual meeting of the American Association of State Highway Officials which is to be held in Chicago, Illinois, on December 1, 2, and 3, 1943. It was decided that the Oregon State Highway Department should be represented by all three members of the Commission, the State Highway Engineer and the Attorney.

The Engineer brought up for discussion a letter from County Judge Bert Johnson, Morrow County, suggesting a method to control traffic along the Heppner Highway near the Lexington Schoolhouse in Lexington to accommodate trucks engaged in wheat hauling. Judge Johnson advised that wheat trucks approach the state highway on a downhill grade for about a mile and under present conditions are required to stop before entering the Heppner Highway which is working a hardship on the haulers due to the fact that stopping is hard on brake equipment and ranchers are experiencing considerable difficulty in securing replacements. He suggested a reversal of the traffic signs as a temporary proposition so that the wheat trucks will not have to stop at this intersection during the harvest season. The Engineer recommended that the suggestion be denied because of the undue traffic hazard that would be created if the wheat trucks were allowed to proceed across the highway without stopping. The Commission approved the recommendation by unanimous vote.

The Commission also discussed and denied a petition from residents of Brockway, Roseburg and vicinity requesting the reopening of the old Coos Bay Wagon Road between Roseburg and Camas Valley where this road has been blocked at its eastern end by a private property owner. The Commission considered this matter entirely out of its jurisdiction due to the fact that the road is not on the state highway system. The Secretary was instructed to so inform the petitioners and to suggest that they present their problem to the Douglas County Court.

The Commission discussed briefly and ordered filed letters from the City of Monmouth, the Milwaukie Business Men's Club, and the La Grande Chamber

of Commerce relative to the resolution adopted by the Portland Chamber of Commerce pertaining to the preservation of scenic roadside strips along Oregon highways.

A letter was presented from Aurora Post 110, American Legion, requesting permission to erect and maintain a monument on state-owned property in the town of Aurora which monument they propose to dedicate to the men and women in the armed forces of the United States. The Engineer advised that the location desired is a small triangular tract situate at the intersection of the Pacific Highway with Main Street, in Aurora. He pointed out that a former Highway Commission, in December, 1940, approved a similar request from the Oregon Music Teachers Association who proposed to erect a monument in honor of Mr. Henry Theophilus Finck, a great music critic, who died in 1926, but the monument was not erected on account of wartime conditions, although recent inquiries reveal that a considerable sum was raised by the association to pay the expense involved. The Commission considered that the Music Teachers Association has prior right to the location and accordingly denied the request of the American Legion.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission, and asked the Commission to confirm them and the amounts allocated for each. After due consideration, the Commission, by unanimous vote, authorized and instructed the Engineer to make such surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Plans	230-1448	Umatilla	Access Road from Columbia River Highway to Umatilla Oil Storage Dump	1st - $200.00
Location	10-1435	Douglas	Myrtle Creek-Canyonville Section, Pacific Highway.	2nd-$3,500.00 Total to date $13,500.00
Prospect.	23-1433	Malheur	Eldorado Pass and Ironside on John Day Highway	1st - $300.00
Prospect.	1-1433	Baker	Unity and Eldorado Pass on John Day Highway	1st - $300.00
Prospect.	113-1423	Harney	Princeton-Folly Farm Section, Rome-Princeton Highway	2nd - $500.00 Total to date $1,000.00
Prospect.	17-1420	Josephine	Wolf Creek-Grave Creek Section, Pacific Highway	2nd $1,500.00 Total to date $3,000.00

AUG 23 1943

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Location	20-1434	Lane	City of Eugene, Sections of Pacific Highway	4th- $5,205.00 Total to date $50,325.00

The Commission had under discussion the following requests for extensions of time within which to complete highway construction projects:

Leonard & Slate, Contract No. 2483, for grading, surfacing and oiling the Boswell Ranch-Follett Ranch Section of the Wallowa Lake Highway, in Wallowa County, requested an extension of time from May 31, 1942 to June 30, 1943, within which to complete this contract. They attributed their failure to complete the work within the specified time limit to inclement weather and to lack of labor to operate two shifts. The Engineer advised that this contract was awarded on June 12, 1941 and that it provided for completion by May 31, 1942. Actual work on the project was started, he said, on June 16, 1941, and was continued until early in December of that year when the contractor was not able to follow the original plan for surfacing. Nothing further was done, he said, until August 27, 1942, when a supplemental agreement was entered into providing for changes in the work to be performed including the elimination of the oiling that was required under the original contract. Under this arrangement surfacing work was subcontracted to O. C. Yocom who started crushing rock on November 10, 1942, but he was obliged to close down the work for the winter months a short time thereafter. Mr. Yocom, he said, resumed the surfacing work in April, 1943, and completed the project on June 30 of this year. He attributed the failure of the contractor to complete the contract within the specified time limit to lack of equipment, wartime conditions, obligations to construct government airport projects, and to difficulties in securing equipment, parts and labor. He recommended that the extension of time requested be granted without penalty notwithstanding that the state's expense for engineering supervision was increased due to the length of time involved in completing the job. The Commission approved the recommendation by unanimous vote upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman.

Triangle Construction Company, Contract No. 2534, for grading, surfacing and oiling the Brogan-Jamieson Section of the John Day Highway, in Malheur County, requested an extension of time from June 30, 1942, to July 31, 1943, within which to complete this job. They attributed their failure to complete the project within the specified time limit to lack of asphalt for the surfacing, the available supply of such material having been commandeered for use in connection with important defense projects. The Engineer advised that the contract was awarded on October 24, 1941, and that work was actually started

by the contractor on November 6, 1941; further, that all work, with the exception of the oiling, was completed during 1942. He confirmed the contractor's statement as to difficulties in securing asphalt for the oiling part of the contract and advised that circumstances beyond the control of the contractor prevented completion of the work within the specified time limit. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Tru-Mix Concrete Company, Contract No. 2571, for construction of bridges and culverts on the south unit of the Antelope Creek-Medford Section of the Crater Lake and Pacific Highways, in Jackson County, requested an extension of time from August 15, 1942, to June 15, 1943, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions and to an increase in the quantity of work to be performed. The Engineer advised that this contractor had great difficulty in securing treated lumber for these structures and in securing sufficient labor to carry on the work due to competition with contractors who were constructing buildings in the army cantonment at Camp White. He recommended in view of the circumstances that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Clifford A. Dunn, Contract No. 2602, for grading, surfacing and construction of bituminous macadam on the Alkali Lake Flight Strip Project adjacent to the Lakeview-Burns Highway, in Lake County, requested an extension of time of 30 days from June 15 to July 15, 1943, within which to complete this job. He attributed his failure to complete the project within the specified time limit to extreme difficulties involved in the work and to adverse weather conditions which prevented the application of the oil surfacing. The Engineer advised that the reasons given by the contractor for over-running the specified time limit are substantially correct. He recommended in view thereof that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

H. C. Walling, dba Salem Supply Company, Contract No. 2605 for grading, surfacing, and furnishing maintenance materials for the Crabtree Creek-Jordan Section of the Albany-Lyons Secondary Highway, in Linn County, requested an extension of time of six months from December 31, 1942, to June 29, 1943, within which to complete this job. He attributed his failure to complete this project within the specified time limit to adverse weather conditions. The Engineer advised that the contractor was greatly delayed in his operations due to the necessity to complete another grading project which he had under way, and

he was also delayed in the surfacing work during the spring period by the insistance of certain logging operators that they be supplied with the output from his gravel plant for their private roads. The loggers request for such material, he explained, had previously been approved by the State Highway Department with the knowledge that the state highway contract would be delayed accordingly. He recommended in view of these circumstances that the extension of time now requested be granted without penalty. The Commission approved the recommendation by unanimous vote upon motion of Commissioner Schaupp which was duly seconded by Commissioner Chessman.

The Engineer reported that the contracts Nos. 2534, 2571, 2602 2605, 2625 and 2629, for the construction of state highway projects, have been completed in accordance with the requirements of the contracts or modifications thereof, and that such jobs are now ready for acceptance. The following resolution accepting such projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2534, with the Triangle Construction Co., for grading, surfacing and oiling on the Brogan-Jamieson Section of the John Day Highway, in Malheur County. Completed July 31, 1943.

Contract No. 2571, with the Tru-Mix Concrete Co., for construction of bridges and culverts on the south unit of the Antelope Creek-Medford Section of the Crater Lake and Pacific Highways, in Jackson County. Completed June 15, 1943.

Contract No. 2602, with Clifford A. Dunn for grading, surfacing and bituminous macadam construction on the Alkali Lake Flight Strip, in Lake County. Completed July 3, 1943.

Contract No. 2605, with H, C. Walling, dba Salem Supply Company, for grading, surfacing and furnishing maintenance materials on the Crabtree Creek-Jordan Section of the Albany-Lyons Secondary Highway, in Linn County. Completed June 29, 1943.

Contract No. 2625, with E. C. Hall Co., for furnishing crushed materials in stock-piles on the Moro-Wasco County Line Section of the Sherman Highway, in Sherman County. Completed July 3, 1943.

Contract No. 2629, with Geo. C. Clark, for painting the Yaquina Bay Bridge, at Newport, on the Oregon Coast Highway, in Lincoln County. Completed July 30, 1943.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission discussed a date for its next regular meeting but deferred setting a definite date for the same until later.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the City of Madras covering the improvement of certain city streets that are not on the state highway system.

Agreement with the City of Salem, covering the improvement of certain city streets not on the state highway system.

Agreement with the City of Portland covering the maintenance of Nicolai Street at its intersection with Northwest Yeon Avenue and with Northwest 23rd Avenue.

Agreement with the U. S. Gov't. with respect to the government's leasing of a portion of Ecola State Park, in Clatsop County, also resolution with respect thereto.

Easement deed conveying unto the United States of America the right to use certain state property near Waldport, in Lincoln County.

Quitclaim deed conveying unto Cogswell F. Campbell and wife certain property in the City of Eugene. (Right of Way File 9309)

Bargain and sale deed conveying unto A. V. Linn and son two parcels of land in Wasco County. (Right of Way File Q-103 and Q-261.)

Permit granting to the United States War Department authority to install a pipe line along the Pacific Highway West at the Corvallis Airport.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:15 p. m.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

AUG 23 1943

Hood River, Oregon, August 24, 1943

The State Highway Commission conferred with the County Court of Hood River County and interested citizens at 10:15 a. m., in the Circuit Court Room on the second floor of the First National Bank Building, with respect to the postwar highway program. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Representing the County Court were: County Judge C. D. Nickelsen, County Commissioners R. W. Arens and George F. Stranahan, and County Engineer C. M. Hurlburt. Others present were: Edward Steele, Secretary, Hood River Chamber of Commerce; E. Riddell Lage, State Representative; Hugh G. Ball, Editor, Hood River News; and a Mrs. ___ Lewis.

Chairman Banfield presided. He explained the object of the Commission's trip, which he said was to secure suggestions from the County Courts and interested citizens of the various communities of the state, with respect to highway projects which should be given consideration in the formulation of the Highway Commission's postwar construction program. He requested the submission of a letter containing a list of projects in Hood River County which the local people feel should be given consideration in such program. He asked that the projects be listed in their order of priority, and that there also be submitted a map showing the location of the projects. He pointed out that the Highway Commission is not in a position at the present time to make any definite commitments or promises with respect to any particular project, and will not be in such position until the Commission completes the canvass of the entire state. He further pointed out that it is planned to finance the work for the most part with federal funds; however, the amount that Oregon will receive has not yet been determined because congressional legislation is still pending.

Judge Nickelsen requested the following projects:

1. Reconstruction of the Columbia River Highway between The Dalles and the Multnomah County line, particularly through Hood River County. He stated that this is the county's number-one project.

2. Complete the improvement of the Hood River Secondary Highway No. 281, between Dee and Parkdale.

3. Complete the improvement of the Odell Secondary Highway No. 282, between Odell and Tucker Bridge.

4. Improve the Fike's Underpass Section of the Mt. Hood Highway, near Van Horn.

AUG 24 1943

5. Improve the Lost Lake County Road from Dee south.

In reply to an inquiry from Chairman Banfield as to whether the improvement of the Columbia River Highway should be done all at one time or "piece-meal", Judge Nickelsen stated that the several units should be constructed simultaneously. Chairman Banfield then advised that if all the work were done at one time, the Highway Commission would probably have to resort to the sale of bonds to finance it, in view of the fact that the revenues from the state gasoline tax and the moneys that the Commission hopes to receive from the federal government will not be sufficient to pay the costs.

Judge Nickelsen advised that they are particularly anxious for the Hood River County Section to be modernized. He mentioned making this section a toll road, if necessary, to provide the funds. He referred to the Pennsylvania Turnpike, which, he said, is being operated as a toll road and has been a success since its construction. He favored the sale of bonds if necessary to assure early construction of the entire section.

The State Highway Engineer pointed out the difficulties of making this section a toll road, stating that federal approval would have to be obtained, in view of the fact that so much federal money has already been spent for construction of the present road.

Mr. Steele voiced objections to making the section a toll road. It was his thought that people would cross the river and use the Washington highways if required to pay a toll to use this road. He stated that the Chamber of Commerce considers the modernization of the Columbia River Highway as the county's most important project and favors the sale of bonds, if necessary, to finance the work in order to expedite completion. As the project of next importance, he asked the Commission to take over the Columbia River bridges and ferries and operate them free of charge. As a third project, Mr. Steele asked the Commission to designate the Lost Lake County Road a state secondary highway, and to improve the same as such. As a fourth project, Mr. Steele asked for state aid in establishing an airport along the Columbia River for future use in connection with air-freight movements, et cetera. He suggested the filling in of the Columbia River sloughs just north of Hood River for such purpose.

Chairman Banfield advised that the state is not in position to assist in the making of airports. He inquired as to the feeling of the local group relative to the giving of priority to the Columbia River Highway improvement, explaining that the Commission has received information to the effect that all of the counties along this highway consider such improvement as a most important project to be included in this program. Mr. Steele advised that he has attended numerous meetings of groups in the counties that are situated along this highway, and it appears to him to be the unanimous feeling, as expressed at such meetings, that the Columbia River Highway is the number-one project, and that the entire improvement should be done at one time rather than by "piece-meal" construction. He added that it certainly is the number-one project for Hood River County, and gave as his thought that the people of Wasco County and of Multnomah County will also favor it and will forego

AUG 24 1943

secondary highway projects in order to secure such improvement. Judge Nickelsen confirmed Mr. Steele's remarks in this regard, in view of the commercial importance of the road.

Chairman Banfield then suggested that it would be a help to the Commission if the counties would all join in requesting such improvement as their number-one project. This request, he said, should be in the form of a letter signed by the sponsors of the project; that is, the County Courts, Chambers of Commerce, and the Oregon Trail Association. Commissioner Chessman mentioned the three propositions presented by the Portland committee on the previous day, with respect to financing the Columbia River Highway improvement; viz., by the sale of additional highway bonds, by the establishment of a toll road section, and by the formulation of a highway district comprising some fifteen counties adjacent to the Columbia River Highway and the Old Oregon Trail. He inquired which method is favored by the people of Hood River County. This inquiry appeared to go unanswered.

Representative Lage spoke in behalf of the Columbia River Highway improvement as the county's number-one project. He also suggested the establishing of airplane landing strips for small passenger planes, and the financing of the same with funds derived from the state gasoline tax.

Mr. Ball also spoke in behalf of the Columbia River Highway improvement. He favored construction of the entire section between The Dalles and Portland at one time, rather than by "piece-meal" construction.

After further discussion, Chairman Banfield concluded the conference by stating that the Commission will be pleased to give fair consideration to the projects presented and will be prepared to do its share in providing employment during the change-over fror a wartime to a peacetime economy. The meeting was adjourned at 11:10 a. m. following which the Commission motored to John Day, Oregon, where at 8:30 p. m. the Commission conferred with members of the County Court and interested citizens, in the County Courthouse, with respect to postwar highway work. Present at such meeting were all members of the Highway Commission, the State Highway Engineer, and the Secretary. Representing the Grant County Court were: County Judge J. H. Allen, and County Commissioners Dick Schouten and Byars Deardorff. There were also present some twenty-four local citizens from various parts of the county, including Carl H. Brown, Mayor of Prairie City, Orin L. Patterson, former County Judge; Wayne Stewart, Dayville; State Representative E. B. Kimberling, Prairie City; Mrs. Chloe Page, Monument; Mrs. Mary Davison, Ritter Hot Springs; William L. Merritt, former County Engineer; Herman Oliver, former State Highway Commissioner; Mr. ___ Martin, Long Creek; I. B. Hazeltine, Sheriff of Grant County; Chester A. Bennett, Assistant Supervisor, Malheur National Forest, John Day; and Dr. G. G. VanDerVlugt, Prairie City. Judge Allen presided and introduced the speakers.

Chairman Banfield explained the object of the Commission's visit; viz., to secure information from the local communities relative to projects which they feel should be given consideration by the Commission in the formulation of its postwar reconstruction program. He advised that there is now pending in Congress a bill which, if passed, will give Oregon about $15,000,000 each year for the first three years following the war, to assist the state in financing highway work. The state, he said, will be required to provide about $4,000,000 annually as match money, making a total of approximately $19,000,000 available for construction during each of the three years. He pointed out that as a result of the Commission's canvass of the state, it is likely that the number of projects suggested by the various communities will far exceed the number that the Commission will be able to finance, for which reason the Commission is asking the various communities to submit a list of projects, arranged in the order of their importance, for study. The selection of projects, he said, will be made by the Commission on the basis of providing the greatest amount of good for the greatest number of people. The Commission is not in position at the present time, he added, to make any definite commitments or promises because of financial uncertainties and the desire to complete the canvass of the state before taking final action.

Judge Allen called upon Mr. Carl H. Brown, Mayor of Prairie City, to speak for the local communities. Mayor Brown pointed out that while Grant County is rich in products such as stock, lumber and ore, it has no railroads over which to send this produce to market, in view of which condition the people must depend upon the highways for transportation. He complimented the Commission on the maintenance of the gravelled highways in this county, but stated that their need is for additional surfacing and oiling. He particularly mentioned the surfacing and oiling of the Dixie Summit-Prairie City Section of the John Day Highway, which, he said, is already graded, and the completion of the oiling west of the town of Unity. He also asked for the oiling of the section between Unity and Ironsides, and the five-mile section between Jamieson and Brogan, which, he said, is now graded to state standards. These three projects, he said, will complete the oiling of this highway east of John Day. Mayor Brown also asked for the completion of the oiling of U. S. Highway No. 395 (John Day-Burns Highway) to the Harney County line and beyond to the city of Burns. He also asked for the completion of a short section of the Pendleton-John Day Highway through Fox Valley, north of John Day, and for the reconstruction of the John Day Highway, west of John Day, to the Ochoco Highway junction. He pointed out that the market for the people of John Day is Portland, so this improvement is important. For the same reason, he asked the Commission to complete the construction of the Ochoco Highway, between Mitchell and Prineville, as well as the Warm Springs Secondary Highway, between Prineville and Madras, and the balance of the Warm Springs Primary Highway, between Warm Springs Agency and its connection with the Wapinitia Highway at Bear Springs. The suggested improvements, he said, will provide a direct, fast highway from the John Day Valley to Portland, which will relieve the traffic congestion that now obtains on the Columbia River Highway, and will be a benefit to all the people residing in southeastern Oregon.

The State Highway Engineer advised that the Brogan-Jamieson Section of the John Day Highway is now complete.

AUG 21 1943

Mr. Patterson stated his approval of the program as outlined by Mayor Brown, stating that in his estimation such program satisfies the present needs of Grant County. He emphasized the need for completing the oiling of U. S. Highway No. 395 from John Day to Burns, and for the reconstruction and oiling of the Pendleton-John Day Highway, between Fox Valley and Mountain Rest. He also suggested the construction of the proposed cut-off, between John Day and Beech Creek, on the Pendleton-John Day Highway, which, he said, would shorten the distance from John Day to Pendleton by some nine or ten miles. He advised that Grant County is expecting nothing from the State Highway Commission except maintenance work until the war is over. Mr. Stewart spoke in behalf of a commercial highway route to Portland, following a water grade down the John Day River to the Columbia River Highway.

Representative Kimberling spoke for the improvement of the Long Creek-Kimberly Secondary Highway, and also suggested the construction of a highway along the John Day River on the opposite side of the river from the John Day Highway.

Dr. VanDerVlugt declared that the present roads in Grant County are not adequate to serve the county's interests to the best extent. He mentioned as the county's number-one project the further improvement of the John Day Highway between the town of John Day and Ochoco Junction, together with the reconstruction of the Ochoco Highway between Mitchell and Prineville, the completion of the Warm Springs Secondary Highway between Prineville and Madras, and of the Warm Springs Primary Highway between Madras and Wapinitia Junction.

Mrs. Page urged the improvement of the Kimberly-Long Creek Secondary Highway. She also suggested the possibility of a short-cut highway westerly from Fossil to a connection with The Dalles-California Highway at Maupin.

Mrs. Davidson spoke for the improvement of the county road which extends from the Pendleton-John Day Highway to Ritter Hot Springs.

Mr. Merritt suggested improvement of the road down the middle fork of the John Day River, from Galena, to serve the mining interests of that district, and the extension of such road up this river to a connection with the John Day Highway at Austin. He also suggested the possibility of a shorter route from the John Day Valley to Portland, by way of Mitchell and Antelope. He was informed by the State Highway Engineer that careful study of the highway situation in the John Day Valley reveals that the route that would best serve the people is the route which follows the John Day Highway to the Ochoco Junction; thence along the Ochoco Highway to Prineville; thence via the Warm Springs Secondary Highway to Madras, and the Warm Springs Primary Highway through the Indian Agency, to a connection with the Wapinitia Highway near Bear Springs.

Mr. Oliver endorsed the projects suggested by the other speakers, which he summarized as follows:

1. Early completion of the John Day Highway, both east and west of John Day.

AUG 24 1943

2. Completion of the proposed reconstruction of the Ochoco Highway, between Mitchell and Prineville.

3. Completion of the Secondary Highway, between Prineville and Madras.

4. The completion of the Warm Springs Highway between Madras and Wapinitia Junction.

He advised that under present highway conditions stock from the John Day Valley is now being transported to Portland over the John Day and Columbia River Highways, but the route of travel will be by the Mitchell, Prineville, Madras, and Wapinitia Highways as soon as that connection is made available, which will relieve the traffic congestion along the Columbia River Highway and the Central Oregon Highway. Such project, he said, is of first importance in his estimation. Mr. Oliver also spoke for the improvement of the Pendleton-John Day Highway, and of the John Day-Burns Highway. Regarding secondary highway projects, he spoke for the improvement of the Long Creek-Kimberly Road, in behalf of the people of the upper John Day Valley. He declared this a very important project. He also asked for the designation and improvement as a state secondary highway of the old stage road, between Prairie City and Baker, which, he said, would provide a saving of some eighty miles in distance between these two places.

Mr. Martin endorsed the Long Creek-Kimberly Secondary Highway improvement.

Other speakers were: I. B. Hazeltine, Canyon City, Sheriff of Grant County, and Mr. Chester A. Bennett, John Day, Assistant Supervisor of the Malheur National Forest.

Chairman Banfield concluded the discussion by repeating his opening remarks with respect to projects that the Highway Commission is interested in, and with regard to the funds that the Commission hopes will be available to finance the postwar work. He requested from the County Court a map showing the location of the various projects that have been mentioned at this meeting, and a letter containing a description of the various projects. He assured the group that the Commission will give due consideration to the suggestions offered, and will select for the program those projects which can be financed and which, in the minds of the Commission, will best suit the needs of the state as a whole. He pointed out that the Commission has only a limited amount of funds to carry on maintenance operations and to pay off outstanding bonds as they become due, so there is a possibility that the Commission will need additional funds to carry on new construction work, if the program is advanced beyond the limits of the Commission to pay with current revenues. He thanked the group for its presentation, and gave assurance that the Commission will give Grant County fair consideration in the allocation of the moneys at its disposal.

AUG 24 1943

The meeting was adjourned at 9:35 p. m.

Chairman

Commissioner

Commissioner

State Highway Engineer

Secretary

Heppner, Oregon, August 25, 1943

Following a motor trip over the Pendleton-John Day and Heppner Highways, inspecting state parks and highway projects enroute, the Commission conferred with the Morrow County Court and interested citizens in the Heppner City Hall, at 1:15 p. m. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Representing the Morrow County Court were County Judge Bert Johnson, and County Commissioner L. D. Neill. Representing the Heppner Chamber of Commerce were Clarence Rosewall, President; P. W. Mahoney, District Attorney and Chairman of the Roads Committee; and J. O. Turner, Mayor of Heppner. Others present were Bennie Howe, Minister; K. A. House, Manager, Pacific Power and Light Company; E. R. Houston, City Recorder; John Fuiten, Sheriff of Morrow County, pro tem; Dr. E. D.Tibbeles, Councilman; Frank Turner, Realtor; J. J. Nys, City Attorney; O. Wendell Herbetson, Minister; O. G. Crawford, Heppner Gazette-Times; Josephine Mahoney, representing the Pendleton East Oregonian. Mr. Rosewall presided.

Judge Johnson presented the following projects for consideration by the Commission in the formulation of its postwar highway construction program:

1. Straighten, widen and surface the Ruggs (Rhea Creek)-Hardman Section of the Heppner-Spray Secondary Highway, particularly between Stevens Ranch and Hardman; and surface this highway through the mountains south from Hardman.

2. Complete the construction of the Wasco-Heppner Secondary Highway between Heppner and Condon, about six miles in length, including grading and surfacing.

3. Resurface the Lexington-Echo Secondary Highway several miles out from the town of Lexington. He advised that this is not a postwar project because the road is badly in need of immediate improvement.

AUG 25 1943

Judge Johnson also asked for the improvement of the following county roads:

1. Willow Creek Road, from Heppner to the top of the hill above the coal mine, twenty-four miles in length. He suggested an allocation of Forest Highway funds to finance a portion of the work.

2. Improvement of a twelve-mile section of the Rhea Creek County Road, between Jordan and Ruggs.

3. Improvement of the Hale Ridge Road, between Hardman and Davidson Ranch, about twenty miles in length.

4. Improvement of the Johnson Creek Logging Company's road, near Lena.

He advised that Morrow County is making provision for a sinking fund to finance road work after the war is over, and there is now some $20,000 in such fund, which will be augmented by $10,000 provision for which has been made in the county's budget.

Judge Johnson filed with the Commission a letter from the County Court recommending the state highway projects mentioned by him at this meeting, together with a map disclosing the location of such projects.

Chairman Banfield advised that the Highway Commission is not precluded from carrying on maintenance operations, except from the standpoint of labor, equipment and supplies, and so far as that feature is concerned the Commission will do the best that it possibly can, particularly referring to the Lexington-Echo Secondary Highway mentioned by Judge Johnson. He asked the County Court to submit a statement from the Chamber of Commerce and local citizens with respect to the county's program. He pointed out that as a result of the Commission's canvass of the state, there probably will be recommended to the Commission more projects than the Commission can possibly finance with funds available, so it probably will be necessary to refuse some of them. He inquired as to the county's attitude with respect to the issuance of bonds to finance projects for which funds would not otherwise be available, and advised that some of the counties are advocating such procedure in order to finance the construction of the entire program at one time.

Judge Johnson replied that he, personally, is not in favor of the issuance of any additional highway bonds. Morrow County, he said, now has a considerable amount of such bonds outstanding, which will not mature until about 1958. Mr. Mahoney, speaking in behalf of the Road Committee of the Chamber of Commerce, endorsed the program suggested by Judge Johnson, so far as it pertains to state roads. He urged better maintenance of the Heppner-Spray Secondary Highway, declaring that the road will go to pieces unless it has a little better attention.

Mayor Turner asked for the improvement of the Willow Creek bridges in Heppner, which he declared are so constructed that they act as a dam or

AUG 25 1943

bottleneck for the waters of this creek. The Commission referred the matter to the Engineer for study. Mayor Turner also endorsed the program presented by Judge Johnson, particularly urging the improvement of the Lexington-Echo Secondary Highway.

At the request of Chairman Banfield, Mr. W. H. Lynch, District Engineer, Public Roads Administration, who was present, explained the status of Forest Highway funds. He advised that there are no such funds available at the present time, and that there is no way of ascertaining whether or not there will be such funds available after the war is over which precludes the making of plans for Forest Highway improvements. He mentioned the maintenance of the Heppner-Spray Secondary Highway, and advised that according to the agreement that was signed when this road was constructed, the obligation to maintain rests with either the state or the county. He pointed out that the road was not built for heavy log-hauling such as the road is now subjected to. In this connection, the State Highway Engineer gave as his thought that it is not a question of maintenance, but is one of reconstruction, because it will necessitate an increase in the capital investment. He stated that he would investigate the matter, and would report to the Commission as soon as possible.

Chairman Banfield concluded the discussion by stating that the Commission will carefully consider the projects suggested at this meeting, after they have been analyzed by the Engineer, and will make as fair an allocation to Morrow County as is possible under prevailing conditions.

The meeting was adjourned at 1:45 p. m., following which the Commission motored to Condon, where the Commission conferred with the Gilliam County Court at 3:30 p. m., in the County Courthouse.

Present at such meeting were all three members of the State Highway Commission, the State Highway Engineer and the Secretary. Representing the Gilliam County Court were County Judge Jas. D. Burns, and County Commissioners R. E. Irby and J. Wright. Others present were Stewart Hardie, County Clerk; D. M. Mackey, District Attorney, and E. R. Fatland.

Chairman Banfield explained that the object of the Commission's visit is to secure an expression from the County Court and interested citizens, with respect to the postwar highway construction program which the Commission hopes to be able to undertake and to finance with funds provided by the federal government for such purpose.

Judge Burns suggested the following projects:

1. Construction of the uncompleted sections of the Wasco-Heppner Secondary State Highway. He advised that this is the only major road project that the county has to suggest, it being the most important from the county's standpoint because it will save some twenty-six miles of distance between Condon and The Dalles, over the present route, via Arlington.

2. Improvement of the John Day Highway, between Condon and Arlington.

Judge Burns also mentioned a prospective new road which would extend from Condon to Kent on the Sherman Highway; thence west to a connection with the Wapinitia Highway near Maupin. Mr. Fatland endorsed the projects mentioned by Judge Burns, as did also Commissioner Wright and Mr. Hardie. Mr. Hardie also suggested the oiling of some of the county roads in Gilliam County.

Chairman Banfield brought up for discussion matters pertaining to the water-grade highway down the Columbia River. He advised that some of the counties have requested that the entire section between The Dalles and Portland be constructed at one time, which means that the Commission probably would have to obtain funds from some new sources. He inquired as to the attitude of Gilliam County with respect thereto.

Judge Burns stated that the people of Gilliam County are interested in the water-grade highway to Portland, but they are more concerned with securing a good winter road to The Dalles. In reply to a request from Chairman Banfield, Judge Burns said that the County Court would prepare a map showing the projects that they would like to have included in the Commission's postwar program, and would forward it to the Commission with a letter describing the projects, after the next meeting of the County Court.

The meeting was adjourned at 4:00 p. m., following which the Commission motored to Fossil where at 7:45 p. m. the Commission met with the County Court of Wheeler County in the courthouse, all members of the Commission, the State Highway Engineer and the Secretary being present. Representing the county court were County Judge S. J. Howard and County Commissioners Charles R. Jackson and J. I. Thomas. Several citizens were present including Mr. Charles Burgess, local stockman.

Chairman Banfield explained that the object of the Commission's visit is to secure expressions from the County Court and interested citizens with respect to the Commission's postwar program. He also explained the proposed method of financing the work with federal and state funds. He asked the County Court to furnish the Commission with a list of projects that it desires given consideration in the formulation of such program, arranged in the order of their importance, and to supplement the same with a map disclosing the location of the various projects.

Judge Howard recommended the following postwar program for Wheeler County, and advised that it would be confirmed by letter and map later:

1. Improve the Ochoco Highway between Mitchell and the Crook County line, and that part of the John Day Highway from Wolf Hollow to Service Creek. He requested that both of these projects be undertaken jointly as the county's first choice of primary road improvements.

AUG 25 1943

2. Improve the John Day Highway from Service Creek to the Grant County line. He suggested this project as the county's second choice for primary highway improvements.

3. Improve the Shaniko-Fossil Secondary Highway between Fossil and the Wasco County line. He suggested such project as the county's first choice for secondary highway improvements.

4. Improve the Service Creek-Mitchell Secondary Highway as the county's second choice for secondary highway improvements.

5. Oil the Wheeler County portion of the Heppner-Spray Secondary Highway. This project, he said, is the county's third choice for secondary highway improvements.

6. Oil the Kinzua County Road. He suggested such improvement as the county's first choice for feeder-road construction.

Commissioners Jackson and Thomas endorsed the projects mentioned by Judge Howard.

Mr. Burgess stated that he represents Clarno Grange which is urging the improvement of the Shaniko-Fossil Secondary Highway, as a short-cut route to Portland, via the Wapinitia Highway. He advised that this highway has been constructed for about eight or nine miles west of Fossil, and for a similar distance east of Antelope, but is impassable during the winter season between such improved sections. He gave as his opinion that this is the number-one project for Wheeler County.

Chairman Banfield pointed out that funds available to the Commission are limited, so the Commission probably will not be able to construct all of the projects that are requested; further, that while the Commission cannot make any promises or commitments with respect to any project at the present time, it will give all of them fair consideration, and will allocate available moneys equitably to the various parts of the state. He inquired as to the attitude of the County Court with respect to the sale of bonds to expedite highway construction.

Judge Howard stated that he does not favor a bond issue for this purpose, although it might be satisfactory if it were necessary to expedite construction. Commissioner Jackson stated his preference for an extended program of construction, although, if more federal money could be obtained, he would do whatever is necessary in order to get it. He further stated that he does not think that the people of Wheeler County will approve a bond issue unless it is absolutely necessary. Judge Howard concurred in these remarks.

In answer to an inquiry from Chairman Banfield, Judge Howard and Commissioner Jackson both stated that they would prefer that the Commission take five years to complete its postwar program, rather than to go into debt to perform such construction within three years. Mr. Burgess also stated that

he does not favor going into extra debt for this purpose, but prefers the taking of two or three years longer to do the work contemplated, if that would avoid the sale of bonds.

After further discussion, the meeting was adjourned at 8:15 p. m., with closing remarks by Chairman Banfield.

T. H. Banfield
Chairman

State Highway Engineer

A. W. Schaupp
Commissioner

Secretary

M. R. Chessman
Commissioner

Moro, Oregon, August 26, 1943

The State Highway Commission met with the County Court of Sherman County at 10:30 a. m., in the County Courthouse for discussion of postwar projects, following an inspection of the Cottonwood Grade Section of the Wasco-Heppner Secondary Highway enroute from Fossil. Present at such meeting were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Representing the County Court were County Judge Jerry M. Wilson, and County Commissioner Vernon I. Miller. Other persons present were Hon. Giles L. French, Moro; T. L. Johnson, Mayor of the town of Wasco; and James B. Adams, representing the Eastern Oregon Land Company.

Chairman Banfield explained the object of the Commission's visit advising that the Commission is canvassing the state to secure suggestions from the people of the various districts with respect to projects which they feel should be considered by the Highway Commission in the formulation of its postwar construction program. He also advised concerning funds with which the Commission hopes to be able to finance such program. He asked the local group to submit to the Commission in writing a list of Sherman County projects arranged in the order of their importance, which they would like to have considered in this program and a map showing the location of the several projects. Judge Wilson agreed to furnish such letter and map after consultation with the other members of the County Court. He mentioned the following projects as of importance to Sherman County:

1. Improvement of the Sherman Highway (US 97) in the southern part of the county. In this connection, he stated that the alignment

AUG 26 1943

of the highway is satisfactory but the standard of construction is low and should be rectified.

2. Extend and improve the Fulton Canyon Secondary Highway from its present terminus about 1½ miles south of the Columbia River Highway, at Miller, to Wasco. He urged this as the project of most importance to Sherman County because of the large amount of produce that is transported over this road. He advised that there are possibilities that Sherman County will lose its railroad so it is very important that this road be improved in order that the people of the county may have an adequate road over which to haul produce to The Dalles.

3. Improvement of the overhead railroad crossing on the Sherman Highway south of Moro. He declared that this crossing is two low for practical purposes.

4. Improvement of the county road which extends east from the town of Moro to a connection with the Wasco-Heppner Secondary Highway. In this connection the Engineer advised that this road is now being used by state highway traffic as a temporary proposition; that the Commission has plans to improve the alignment of the Wasco-Heppner Highway by constructing a diagonal road leading into the town of Wasco which, when completed, will save some 26 miles distance to a connection with the Columbia River Highway at Miller.

5. Modernization of the Columbia River Highway to eliminate excessive curvature. Judge Wilson stated that people do not like the existing curves on this highway and in order to avoid them are using the highway on the Washington side of the Columbia River.

Chairman Banfield mentioned that some of the people that the Commission has consulted have suggested the sale of bonds to obtain funds to finance all reconstruction of the Columbia River Highway between The Dalles and Portland at one time, rather than by "piece-meal". He inquired as to the attitude of the people of Sherman County with respect thereto. Judge Wilson replied that he has not given the matter much study so is not in a position to answer definitely although the present road is inadequate to handle the traffic that it carries and should be improved as soon as possible.

In reply to further inquiry of Chairman Banfield as to whether or not the people of Sherman County want the Columbia River Highway improvement, Judge Wilson stated that the interior roads of the county do not mean much unless the Columbia River Highway is improved.

Mr. French spoke for the improvement of the roads that are of local importance. He particularly suggested the improvement of the Sherman Highway south of Grass Valley and also south of Biggs. He endorsed Judge Wilson's request for the improvement of the overhead railroad crossing south of Moro and also urged consideration of the improvement of county cross roads, including the Shorars Bridge Secondary Highway. The Columbia River Highway

AUG 26 1943

improvement, he said, is very important although in his estimation the Commission should not overlook the improvement of the other roads in Sherman County. Mr. French also asked for the renaming of The Dalles-California Highway. He declared that the present name is a misnomer and suggested that the Sherman Highway should be given more prominence because in his estimation it will eventually be the main thoroughfare across the state through Central Oregon. In this connection, the Engineer explained the use of route numbers rather than names to identify highways. He pointed out that The Dalles-California Highway is now known as U. S. No. 97 from the California line to a junction with the Sherman Highway, from which point U.S.97 is now routed over the Sherman Highway. Judge Wilson suggested if the Sherman Highway is to be the main north and south thoroughfare that provision should be made for a bridge across the Columbia River at Biggs so that traffic will not have to go to The Dalles in order to cross the river. The Engineer advised that a survey of the bridge situation is now being made by the Highway Departments of Oregon and Washington, acting jointly, and when the data are assembled a report will be rendered to the Commission and to the governor.

County Commissioner Miller endorsed all of the projects and statements made by Judge Wilson.

Mr. Adams urged the preservation of the natural scenery along state highways and the planting of trees through the desert part of the state. Chairman Banfield advised that this is in line with the Commission's established policy. At his request, the State Parks Superintendent, Mr. S. H. Boardman, who was present, reported briefly on this situation.

Commissioner Schaupp brought up the question whether or not the City of The Dalles is to be head of navigation on the Columbia River. Judge Wilson gave as his opinion that The Dalles will not be the head of navigation but on the other hand produce will be loaded at many points above The Dalles.

Commissioner Chessman inquired as to the attitude of the local group relative to the proposal made by the Portland committee on August 23, with respect to financing the improvement of the Columbia River Highway between The Dalles and Portland. Mr. French stated his disapproval of the sale of bonds for this purpose. Judge Wilson stated his preference for the "pay-as-you-go" plan. After discussion of a general nature, the meeting was adjourned at 11:15 a. m., following which the Commission motored to Madras, where at 2:30 p.m., the Commission conferred with the County Court of Jefferson County in the county courthouse, all members of the Commission, the State Highway Engineer, and the Secretary being present.

Representing the County Court were County Judge T. A. Power, and County Commissioners F. E. Stangland and Perry A. South. Also present was Dr. V. S. Howard, President of the Madras Chamber of Commerce.

Chairman Banfield explained the object of the Commission's visit. He asked the court to submit to the Commission a letter listing the projects which the court would like to have considered by the Commission in the formulation of its postwar highway construction program, the projects to be arranged

in their order of importance. He also asked for the submission of a map disclosing the location of the various projects.

Judge Power agreed to furnish such information. He suggested the following projects:

1. Completion of the Warm Springs Primary Highway from Warm Springs Agency to a connection with the Wapinitia Highway at Bear Springs. He said that this is the most logical project from Jefferson County's standpoint.

2. Complete the reconstruction of The Dalles-California Highway (US97) south from Madras, to the crossing of Crooked River.

3. Complete the construction of the Warm Springs Secondary Highway between Madras and Prineville.

4. Construct a direct highway route east from Madras to a connection with the Ochoco Highway, near Mitchell. Judge Power suggested such route as a future commercial road to shorten the distance from the John Day Valley to Portland. He added that for the time being the completion of the Warm Springs Secondary Highway between Madras and Prineville is of much more importance.

5. Improvement of the road facilities at The Cove State Park. Judge Power stated that the County Court feels that inasmuch as the park is state property, the maintenance of the roads leading to the same should be a responsibility of the state. Mr. South explained that this is a maintenance and betterment problem, rather than new construction. The Engineer advised that the Commission has not yet considered construction of approach roads to this park, and, in his estimation, before the Commission could do so, it would be necessary to designate the road a state secondary highway, which is inadvisable under present conditions.

Commissioner Stangland approved the projects recommended by Judge Power. Commissioner South did likewise, as did also Dr. Howard.

Commissioner Stangland inquired as to the possibilities of securing the immediate completion of the Warm Springs Primary Highway. He was informed by Chairman Banfield that the Commission is now limited to maintenance work so such project must wait until the war is over. He added that while the Commission considers the project meritorious, it is making no promises or commitments concerning it, or with respect to any project, at this time.

Judge Power presented a letter dated August 21, 1943, which the County Court has received from the Bend Chamber of Commerce with respect to highway matters. The letter was read by the individual members of the Commission, but was not discussed; neither was the letter left with the Commission.

AUG 26 1943

The meeting was adjourned at 3:00 p. m., following which the Commission motored to Prineville, inspecting The Cove State Park enroute.

At 8:45 p. m. the Commission conferred with the County Court of Crook County, and a group of local citizens, in the County Courthouse, all members of the Commission, the State Highway Engineer, and the Secretary being present.

Representing the County Court were County Judge Asa W. Battles and County Commissioner Claude C. Dunham. Others present were A. R. Bowman, former County Judge; W. B. Morse, former State Representative and former Mayor of Prineville; Henry Hewlett, U. S. Forest Supervisor; C. W. Woodruff, Manager, Prineville Railroad; Chas. C. Parsell, U. S. Grazier; Rev. Ted Goodwin, and Remey Cox, of the Central Oregonian.

Chairman Banfield explained the purpose of the Commission's visit, stating that the Commission is canvassing the state to secure expressions from the people of the various communities as to the projects which they consider should be included in the Highway Commission's postwar program. He also advised concerning the propsects of receiving federal funds with which to finance the work. The Commission, he said, is making no promises whatsoever with respect to any project, and will not be in position to make commitments until the canvass of the state has been completed, and the Commission knows definitely how much money will be available. He asked the County Court to suggest a program in writing, listing projects in the order of their importance, and to submit with the same a map disclosing the location of the various projects.

Judge Battles presented a letter, signed by the Crook County Court, in which were recommended three major projects as follows:

1. Completion of the Ochoco Highway between Prineville and Mitchell. Judge Battles stated that this is an important project inasmuch as it will eliminate the bottleneck condition that now exists between these points. His remarks were endorsed by Mr. Woodruff, who stated that Prineville is the railhead for the Mitchell district.

In the discussion of this project, W. H. Lynch, District Engineer, Public Roads Administration who was present, stated that this section is in the National Forest area and that it was planned to finance the project largely with Forest Highway funds. However, it involved an expenditure of more money than was available, so construction had to be postponed. He added that there have been no Forest Highway funds appropriated since 1941, and there is no knowing what the future will bring forth with respect to federal Forest Highway appropriations.

2. Development of the "Combs Flat" Road, and an extension thereof to Paulina and Suplee; thence either easterly to a junction with the John Day-Burns Highway, or southerly from the Suplee district to a junction with the Central Oregon Highway. This project was discussed at considerable length. Speaking in behalf of the same, in

addition to Judge Battles, were Messrs. Bowman, Morse, Hewlett, Woodruff and Parsell. The arguments presented in favor of the road were based on providing an outlet for timber and farm produce. Of particular importance were the remarks of Forest Supervisor Hewlett, who stated that the road will serve a timber district where 70 million feet of timber is to be cut annually on a sustained-yield basis. On such basis, he said, logging operations in the district will continue "forever", which emphasizes the need for a good highway over which to transport the logs to the railhead at Prineville. In concluding the discussion of this matter, Chairman Banfield advised that the object of the Commission now is to adjust road problems between counties, and to arrange for allocation to the various districts of the state, in the most equitable manner, the moneys that become available to the Commission for highway improvements.

3. Completion of the Warm Springs Secondary Highway between Prineville and Madras. Judge Battles urged this improvement, and the completion of the Warm Springs Primary Highway between Madras and Bear Springs as very important projects.

Commissioner Dunham endorsed the program as outlined by Judge Battles.

The meeting was adjourned at 10:00 p. m., following appropriate closing remarks by Chairman Banfield.

T H Banfield
Chairman

Commissioner

State Highway Engineer

Secretary

Commissioner

Lakeview, Oregon, August 27, 1943

Following inspection of highways and state parks enroute from Prineville to Lakeview, the Commission conferred with the members of the Lake County Court and interested local citizens, at 1:30 p. m. in the County Courthouse. Present at such meeting were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Representing the County Court were County Judge J. R. Heckman and Commissioners P. W. Hotchkiss and E. J. Egli, and County Clerk C. W. Pendleton.

There were fourteen other citizens present, including J. C. Clark, representing the Underwood Lumber Company; H. M. Nolte, Realtor; Jack Dalen, representing the Oregon Molding Company; Buck Snyder, Stockman, Paisley; Dave E. DeArmond, Mayor of Lakeview; and Harry Utley, representing the Flavel-Utley Company.

Chairman Banfield explained the purpose of the Commission's visit; viz., to obtain suggestions from the people in the various communities that would be helpful to the Commission in arranging its postwar highway construction program. He also advised concerning the possibility of securing federal funds to assist in financing the work. He asked the County Court to submit in writing a list of projects that are most desired by the people of Lake County, arranged in the order of their preference rating, together with a map disclosing the location of each project.

Judge Heckman agreed to furnish such information later. He made an oral request for the following projects:

1. Reconstruct a six-mile section of the Fremont Highway, through the Crooked Creek Canyon.

2. Construct a proposed highway westerly from the town of Silverlake on the Fremont Highway, to a connection with The Dalles-California Highway, near its junction with the Willamette Highway. He advised that such cut-off would reduce the distance between these points about sixty-two miles under the present route via Lapine.

3. Complete the oiling of the ten-mile section of the Klamath Falls-Lakeview Highway, near Quartz Mountain.

4. Improve the Lakeview Airport Road.

5. Construct improvements to the Warner Valley Secondary State Highway.

6. Improve the county road which extends from the Klamath Falls-Lakeview Highway, about seven miles west of Lakeview, southerly along the west side of Goose Lake to the California state line.

7. Improve an additional county road which extends southerly from the Klamath Falls-Lakeview Highway to a connection with the Goose Lake Road; thence to the California state line.

Mayor DeArmond endorsed the program as outlined by Judge Heckman, particularly urging the improvement of the Lakeview Airport Road.

Chairman Banfield explained that the State Highway Commission cannot initiate projects of this kind, but it would have to come to the Commission through Army or Navy sources.

AUG 27 1943

Judge Heckman also asked the Commission to improve the drainage of a state borrow pit adjacent to the Klamath Falls-Lakeview Highway, near the County Fairgrounds. He said that under present conditions the water backs up onto the fairgrounds, and onto adjacent residence property, and causes considerable damage. The matter was referred by the Commission to the Engineer for investigation.

Mr. Clark urged improvement of the Warner Valley Secondary State Highway, which, he said, is being severly damaged by reason of log-hauling operations. He presented a letter giving factual data with respect to the logging activities in this vicinity, fees paid to the state by log haulers, et cetera, which was read aloud by the Secretary. The letter was thereupon given to the County Court with the understanding that it would be mailed to the Commission, along with the Court's letter requesting projects for postwar consideration.

Mr. Snyder requested authority to operate oversized equipment in connection with the transportation of stock over state highways, between California and Oregon points. He was informed that the Commission is now issuing permits of this nature, and will be pleased to accommodate him in this regard if he will make formal application for a permit, giving necessary facts.

Mr. Snyder also asked the Commission to help the county in maintaining travel over certain county roads during the winter season. He particularly asked for snow removal on a four-mile section of the county road which extends south from the town of Paisley. He gave as his understanding that the county will pay the expense involved if the Commission will do the work. The Commission took the matter under advisement.

Mr. Utley urged the improvement of the Warner Secondary Highway from Adel to the Hart Mountain Antelope Refuge.

Mr. Pendleton inquired as to possibilities of securing county road improvements, and was informed by the Engineer that such roads do not qualify for the moneys with which the Commission expects to finance postwar construction.

The question of improvement of the state highway in California which connects with the Fremont Highway at New Pine Creek, south of Lakeview, was brought up for discussion. It appears that the Oregon section is in very good condition, but no attempt has been made in recent years by the California Highway Commission to improve the road in that state. Commissioner Schaupp requested data on this road as a basis for discussion with the California highway authorities. The court agreed to furnish such information.

Following this conference the Engineer reported to the Commission that all of the conditions have been satisfied with respect to the award of the contract for the construction of the Malloy Ranch-Hooker Creek Section of the I.O.N. Highway, in Malheur County, and that he has this date awarded the contract to Morrison-Knudsen Company, Boise, Idaho, which submitted the low bid for the project in the amount of $348,823.50, on August 23, 1943, as

previously authorized by the Commission. The Commission, by unanimous vote, confirmed the Engineer's action in this matter.

There being no further business to come before the Commission at this time, the meeting was adjourned at 2:10 p. m., following which the Commission motored to Klamath Falls, inspecting state highways and state parks enroute.

Klamath Falls, Oregon, August 27, 1943

At 8:30 p. m. the Commission conferred with the Klamath County Court, members of the Klamath County Chamber of Commerce, representatives of the Klamath Falls City Council, and the City Planning Commission, in the dining room of the Pelican Cafe, with respect to postwar projects, all members of the Commission, the State Highway Engineer, the Attorney, and the Secretary being present.

Representing the County Court were County Judge U. E. Reeder, Commissioners John Reber and Fred Pope, and County Engineer Walley Hector. Representing the Chamber of Commerce were J. V. Owens, President; Malcom Epley, Vice President; E. H. Balsiger, Director in Charge of Roads and Highways; Fred Heilbonner, Director; A. M. Collier, Director; Lee Jacobs, Director; Mitchell Tillotson, Director; Bert Schultz, Director; Representative Henry Semon, Director; T. B. Watters, Chairman, Roads & Highway Committee; Senator Marshall Cornett, Chairman, Aviation Committee; C. A. Dunn, Chairman, Rehabilitation Committee; Earl C. Reynolds, Executive Secretary. Representing the City Planning Commission were E. M. Igl, Chairman, Rev. L. K. Johnson, Vern Moore, Frank Howard, A. D. Collier, and Sheldon Brumbaugh. Representing the City Council were A. H.Bussman and Walter Weisendanger, and E. A. Thomas, City Engineer. Also present were George Lewis, Attorney, Office of Price Administration.

County Judge Reeder presided. At his request Commiasioner A. W. Schaupp introduced the members of the Highway Commission and its party, and Mr. Reynolds introduced the members of the Klamath Falls group.

Mr. Waters presented the following suggested program of projects, orally and in writing, in behalf of the County Court and the Klamath County Chamber of Commerce, for consideration by the Commission in preparing its postwar program, and accompanied the same by maps disclosing the locations of the several projects:

STATE PRIMARY HIGHWAYS

1. The Dalles-California Highway, US 97.

   a. Complete survey for construction from a point near Klamath Agency to a point near Sand Creek on US 97 and proceed with construction, bringing to standard specifications as to grade and surfacing.

   b. Grade from the foot of Algoma Hill on US 97 to a point north of Barclay Springs, to be followed by surfacing and paving; also bringing

up to standard specifications by widening and resurfacing that portion of US 97 between Barclay Springs and Modoc Point.

c. Relocate and construct to standard specifications that portion in the Federal Aid System of the Highway from Terminal City to Hatfield, California, via US 97, Oregon 66 and Oregon 39.

d. Complete survey for realignment from the junction of US 97 and Oregon 66 to the beginning of the realignment at a point north of Klamath Falls known as Terminal City, to be followed by reconstruction to standard specifications as to grade and surfacing.

e. To bring up to standard specifications by widening and resurfacing, that portion of US 97 north from a point north of Sand Creek.

2. Willamette Highway, Oregon 58.

a. Goshen-Oakridge bottleneck. Complete to standard specifications as to alignment, grade and surfacing that portion of the highway from Oakridge to Goshen.

b. Oakridge east to Salt Creek Falls. Bring to standard specifications as to surface and oiling.

c. Odell Lake to the Junction of US 97. Bring to standard specifications as to surface and oiling from the junction of Oregon 58 and US 97 west toward Odell Lake.

3. Lakeview Highway, Oregon 66.

a. Final completion of Lakeview Highway.

STATE SECONDARY HIGHWAYS

1. Relocate and construct to standard specifications that portion of the highway in the Primary State System, but not a part of the Primary Federal Aid System, from Terminal City to Hatfield, California, via US 97, Oregon 66, and Oregon 39.

2. West Side Highway, Secondary No. 421, (Route 236). Bring to standard specifications as to grade and surfacing road from Klamath Falls to Fort Klamath, and connecting with Secondary market road from Medford via Route 236 and Lake of the Woods.

3. Midland Market Road, Secondary No. 420. Reconstruct and bring up to standard specifications by grading and surfacing from the end of the present oiled surface south west to US 97.

4. Mack's Store-Midland, Secondary No. 423. Bring up to standard specifications as to grade and surfacing from Mack's Store on Oregon 39 to US 97.

AUG 27 1943

5. Malin-Poe Valley. Bring up to standard specifications as to grade and surfacing the unfinished portions of this highway.

6. Olene through Poe Valley, connection with Malin-Poe Valley-Bonanza road.

Mr. Thomas presented a proposed state highway program covering projects within and adjacent to the City of Klamath Falls, as recommended by the City Planning Commission and approved by the Klamath Falls City Council, together with a map disclosing the location of the several projects which are as follows:

1. Immediate location and establishment of highway routes through the city and its suburbs. He pointed out that the location shown on the map for this improvement is not authentic or definite, but the Planning Commission and the City Council feel that the improvements should be near the locations shown on the map.

2. Immediate completion of surveys and plans for the reconstruction of South Sixth Street, from Main Street to its junction with the Klamath Falls-Lakeview Highway. In this connection, he stated that plans should include the following:

a. Widening for four-lanes of traffic.

b. Construction of a new overpass of the Southern Pacific railroad tracts.

c. Removal of power and telephone poles.

d. Installation of adequate street illumination.

e. Separation strip from Washburn Way to the U.S. R.S. canal.

3. Surveys and plans for standardizing Secondary State Highway, No. 421, within the city limits. He explained that such project includes realignment of the highway route.

4. Acquisition of all odd corners of property that are cut off by highway right-of-way acquisition, -- same to be used for state park purposes. He particularly referred to the parcels of land which will be left remaining between the highway and the U.S.R.S. main canal through the easterly side of Klamath Falls. He added that the plan should include the landscaping of all highway rights of way in and near the city, so as to beautify the city entrances.

Mr. Thomas also submitted in behalf of the City Planning Commission the following proposed program of road construction within the city limits of Klamath Falls, which, he said, are needed to provide connections from the

AUG 27 1943

business center to the new proposed highways. He suggested that these projects could be financed with postwar federal funds and submitted a map showing the location of the several projects:

1. Widen and generally improve Eleventh Street from Commercial Street to Upham, and Upham Street from Eleventh Street to California Avenue.

2. Create a through truck route starting at Alameda and Esplanade; thence along Esplanade to Main Street and across private property to Eleventh and Klamath Streets; thence along Klamath Street to the Link River.

3. Widen and generally improve Third Street from Klamath Avenue to California Avenue.

4. Widen and generally improve Main Street from Alameda to Michigan Avenue.

Chairman Banfield, at this juncture, explained the object of the Commission's trip, and particularly advised relative to the funds which the Commission hopes will be available for highway improvements during the postwar period. In this connection he stated that while the Commission has no money to spend on new highway construction at the present time, it hopes to have approximately $60,000,000 during the first three years after the war is over, most of which will be funds provided by the federal government. It is the intention of the Commission, he said, to study all of the projects that are presented by the various communities as a result of the Commission's canvass of the entire state, and to select for the postwar program such projects as will provide the greatest amount of good for the greatest number of people, considering the state as a whole. The Commission is not in position at the present time, he added, to make any definite promises or commitments with respect to any particular project and will not be in such position until the canvass of the state is completed, the suggested projects analysed, and until the amount of funds that will be at the Commission's disposal is definitely known. He mentioned that during the progress of the Commission's canvass a suggestion has been made that the Commission issue additional bonds, in order to expedite construction, and the suggestion has also been made that certain roads should be made toll roads in order to obtain funds for highway improvements. He asked the group for its reaction relative to such proposals. The Commission, he said, wants to obtain a clear picture of the needs of all communities as an aid in the selection of the projects that are to be undertaken during the period that the country is changing over from a wartime to a peacetime economy. He requested a letter listing desired projects in the order of their importance, and a map disclosing the location of each.

The meeting was adjourned at 10:00 p. m., following appropriate remarks by Chairman Banfield, Commissioner Chessman, Commissioner Schaupp, Dr. E. B. McDaniels, President of the Oregon State Motor Association, Senator Marshall E. Cornett, W. H. Lynch, District Engineer, Public Roads Administration, R. H. Baldock, State Highway Engineer, and Earl C. Reynolds, Executive Secretary of the Klamath County Chamber of Commerce.

AUG 27 1943

Following adjournment, the Commission approved and signed an agreement with the Bennett Trust Company, providing for a modification of a previous agreement with respect to the making of payments for the acquisition of the Simpson property, in Coos County, known as "Shore Acres". According to the original arrangement, settlement was to be made by the state by deferred payments. Under the new arrangement settlement is to be made immediately, with the understanding that the total amount of the purchase price is to be reduced by the amount of $1,000.00.

This concluded the Commission's visit to the Central Oregon counties.

LOCATED AT SALEM, OREGON

TABLE OF CONTENTS

Page	Date 1943	Subject
	Sept.24	Tri-State Highway Association. Minutes of meeting held in Klamath Falls included in this volume for reference purposes only.
11742	Oct. 11	Clackamas County. Conference in Oregon City with County Court. Projects recommended by County Court for postwar construction. County Court requests Market Roads Nos. 20 & 28 be designated State Second. Hwys. No action.
11743		Columbia County. Conference in St. Helens with County Court and interested citizens. County Court recommends projects for postwar construction.
11744		List of projects presented.
11745		Lower Columbia River Hwy. improvement discussed. New highway Forest Grove to Rainier suggested.
11746		Washington County. Conference in Hillsboro with County Court and interested citizens re postwar construction. List of projects submitted by County Court.
11747		List of projects presented by Forest Grove City Council and Chamber of Commerce. Tualatin Valley Hwy, Portland to Forest Grove. Improvement endorsed by Hillsboro C.of C. Also Wolf Cr.Hwy.
11748		Yamhill County. Conference in McMinnville with County Court and interested citizens re postwar construction program.
11749		List of projects recommended by County Court. Projects recommended by cities of Amity, Newberg and Dayton.
11750		Discussion of contemplated improvements.
11751	Oct. 12	Bids received on following projects and sale of building: Baker-Weiser Junction Rock Production Project; Wren-Philomath Section Surfacing and Rock Production; Redmond-Marks Creek Section Rock Production Project; Lapine Section Rock Production Project;
11752		Ashland-State Line Section Rock Production Project; Madras-Redmond Air Base Target Range Grading, Surfacing and Oiling; Cold Springs Section Rock Production Project; Umatilla Oil Depot Grading, Surfacing and Oiling; Wapinitia Rock Production Project.
11753		Sale of residence building in Milton.
		Minutes approved as follows, for August 23 and August 24 to 27 inclusive.
		Log hauling. Request of Ostrander Logging Co. to operate logging trucks across two state second. hwys. discussed. Action deferred.
		Morrow County. Willow Creek Bridges. Report on condition. Decision deferred.
		Morrow County. Report on condition of Heppner-Spray Secondary Highway. Action deferred.

Page	Date 1943	Subject
11753	Oct. 12	Snow Removal. Santiam Pass to be kept open during winter season if possible.
11754		Linn County. Santiam Maintenance Station. Conditional permission granted to use facilities as restaurant during emergency.
		Clackamas County. Pedestrian overpass at S.P. crossing of Pacific Hwy.East at Milwaukee. Engineer authorized to advertise for bids.
		Lincoln County. Siletz Secondary Hwy. Engineer authorized to advertise for bids for improvement.
11755		Engineer instructed to obtain federal moneys if possible.
		Crook County. Repair of 3 bridges on Crooked River Hwy. and 1 on Crooked River-Paulina Sec. Hwy. Engineer authorized to advertise for bids.
		Equipment. Oral authority to purchase 2 Holland truck-loaders at $200.00 each confirmed.
		Equipment. Oral authority to purchase following equipment confirmed: 60 1½-ton trucks, 6 4-ton trucks, 10 pickup trucks, 4 station wagons and 1 passenger automobile. Purchase of 30 Dodge trucks at increased price approved.
		Awards. Engineer's award of contract for construction of Oakridge Revetment Project confirmed.
11756		Prequalification of Contractor. A.A.Hardesty, formerly disqualified, to be reinstated as trial propqsition.
		Multnomah County. Board of County Commissioners present for discussion of matters pertaining to postwar program.
11757		Recommendations deferred pending report of Mr. Robert Moses on postwar development in Portland. Commission approved for consideration a list of projects in Mr. L.M. Lepper's letter of 3-15-43.
11758		Polk County. Pacific Highway West between Monmouth and Suver. Log hauling prohibited.
		Overload violations. Attorney's opinion re authority to penalize carriers discussed. State police to be held responsible for control. Violations committed by Ostrander Logging Co. discussed. Action deferred pending investigation. State Police Supt's request for full cooperation in control of overloads approved. Engineer and Attorney to discuss plan of procedure with Supt. Pray.
11759		Report on overweight violations committed during September discussed.
		Report on violations committed by Roaring River Logging Co. discussed. No action taken.
		Morrow and Gilliam Counties. Wasco-Heppner Second. Hwy No.300. A.K. York requests improvement of Cottonwood Grade Sec. To be considered in postwar program.
		Clatsop County. County Judge Guy Boyington requests construction of highway between Elsie and Miles Crossing as substitute for first choice in postwar program change approved.

Page	Date 1943	Subject
11759	Oct.12	Multnomah County. Portland. Maritime Commission requests use of property near Steel Bridge for storage of lend-lease material. Approved if City concurs.
11760		Umatilla County. Pendleton. Request for surveys of proposed railroad underpass and overpass projects denied. Commissioner Chessman to advise City Council.
		Postwar Program. Partial list of survey projects to be submitted to Public Roads Administration for approval.
11763		Crook County. Crooked River Secondary Highway. Request of Henry Severance for permission to install cattle guard near Paulina approved conditionally.
		Lake County. Fremont Highway near Paisley. Request of Wm. Hotchkiss for permission to construct culvert. Action deferred pending investigation.
		Jackson County. Camp White Cantonment. Construction of 2 waiting rooms on highway right of way approved.
		Lane County. Florence. Construction of waiting room on Coast Highway approved.
		Claim. C. J. Eldon asks reimbursement for unanticipated expenses incurred in connection with Contract No.2557. Denied.
11764		Claim. Eugene Sand & Gravel Co. asks reimbursement of Federal Transportation Tax in connection with Contract No. 2604. Denied.
		Claim. Mr. John Copley claim for repairs to car damaged as a result of defect in bridge on Pacific Hwy. East, near Albany. Denied.
		Umatilla County. Old Oregon Trail through Hermiston. Resolution adopted designating new route and abandoning former route; also extending Hermiston Secondary Hwy.
11766		Multnomah and Hood River Counties. Columbia River Hwy. Abandonment of portions. Resolution adopted.
11769		Roadside strips. Letters encouraging acquisition of roadside strips considered and ordered filed.
		Benton County. Camp Adair. Stipulation in case of U. S. War Dept. vs. State of Oregon re stockpile site approved and signed.
11770		Right of way. Klamath County. J. G. Patterson, Klamath Falls, demands rock wall along property as partial consideration. Action deferred.
		Condemnation. Oregon Coast Hwy., Lincoln County. Resolution adopted relative to dispute with Harry W. Hopkins and wife at Depoe Bay.
11773		Commission recessed at 12:00 noon, to reconvene at 2:00 p.m.
		Claim. Homer G. Johnson, Contract No. 2390. Ralph Moody, Attorney, requests postponement of hearing. Approved.
11774		Abandonment. Resolutions from counties, etc., as follows, approved:

Page	Date 1943	Subject
11774	Oct. 12	Abandonments. (Cont.)
		Portion of old Cascade Hwy. near Clackamas overcrossing.
		Section of old Crater Lake Hwy. north of Medford.
		Old route of Crater Lake Hwy. within city limits of Medford.
		Washington County. Tigard. Offer of A. Schubring to pay $250 for small parcel of land accepted.
		Coos County. North Bend. Request of Coos Bay Logging Co. to purchase old ferry landing denied.
		Right of Way. Acquisition along Oregon Coast Hwy. between Cannon Beach Jct. and Cannon Beach deferred.
		Park Matters: Action taken on trip Aug. 24 to 27, 1943, incl. as follows, confirmed:
11775		John Day Fossil State Park. Parks Supt. to determine areas needed.
		John Day Hwy. wayside areas. Parks Supt. authorized to select areas.
		Lake County cutover waysides. Parks Supt. to select waysides between Drews Valley and Lake-Klamath Co. line.
		Proposed Crown Point Addition. Parks Supt. to negotiate for 2 tracts connecting Crown Pt. and Crown Pt. loops.
		Proposed Short Sand Beach Addition. Parks Supt. to prepare descriptions for purchase of cutover areas.
11776		Crash of Bomber on Cape Lookout. No damage claim to be filed.
		Bly Mountain proposed cutover acquisition. Action deferred. Commissioner Schaupp to ascertain possibility of purchase.
		Proposed wayside acquisition in Antelope Canyon. Taking of options authorized on four forties.
		Park Matters. Parks Supt. reports on following:
		Hood River Co. Offer of Seneca Fouts, Portland, to sell 160 acres adjacent to Columbia River Hwy. refused.
11777		Douglas County. Arrangement with Douglas Co. for acquisition of tract on Camas Mt. and tract at end of Elkton Tunnel approved.
		Coos County. Offer of Henry Sengstacken Co., Marshfield, to sell 140 acres land adjoining Cape Arago State Park. Deferred pending investigation of Park Supt. and Engineer.
		The Cove Palisades State Park. $669.26 net profit from sale of peaches.
11778		Financial Report. Report for period Jan.1 to Sept.30, 1943, approved.
		Curry County. Floras Lake State Park. Revised County resolution re lease as Navy aircraft landing field approved.
11779		Resolution adopted.
		Real property. Mrs. F. E. Garle. Issuance of duplicate
11780		warrant to cover loss of original, discussed. Referred to Attorney for solution.

Page	Date 1943	Subject
11780	Oct.12	Buildings. Josephine County. Offer of Mr. Sam Alderson to purchase, accepted.
		Right of Way. Miner Creek-Spencer Creek Section US101, Lincoln County. Property needed from F.R. Salway to be condemned, if necessary.
		Permits. Oregon Lumber Co. requests permit for over-width loads on John Day Hwy. Denied.
		Labor and Wages. Oregon State Bldg. and Const. Trades Council requests conference. Engineer to confer & report.
		Malheur County. City street improvements, Ontario. Elmo E. Smith, Mayor, inquires re securing State & Federal aid. Engineer to inform Mr. Smith re availability of federal money.
11781		Advisory Committee, Northwestern States Development Assn. Engineer authorized to attend meeting.
		Congressional hearings. Engineer authorized to attend hearings re postwar construction in Washington, D.C.
		Speed zones. Request for speed limit signs at hwy. entrances in Astoria. Referred to Attorney.
		Bids. Commission acts on bids received at this meeting.
		Awards. Chairman announces award of contracts and sale of building.
11783		Lincoln County. Oregon Coast Hwy., Gleneden Beach. Right of Way settlement with J.A. Sansbury discussed. Engineer to investigate proposed width reduction. Attorney to negotiate new option.
		Claim. Compromise settlement with Arch Cape Land Co. denied.
11784		Clatsop County. Scalehouse at Warrenton Jct. Use by Guerin Bros. approved if furnish bond.
		Polk County. Fern Creek-Monmouth Access Road. Construction of new bridge over Fern Creek authorized.
		Marion County. Woodburn. Request of A. L. Harader to remove 3 oak trees discussed. Inspection to be made.
11785		Hood River and Multnomah Counties. Columbia River Hwy. Proposed exchange of properties with U.P. RR.Co. approved.
11791		Real Property. Resolution authorizing acquisition.
11792		Condemnation. Recommended offers. Resolutions adopted.
		Paul B. and D. P. Peterson. Quarry site. Rome-Princeton Hwy.
		Joseph and Mary Ann Fracasso. Right of Way. Pacific Hwy. West.
		Etta Alexander and Pearl Hummel. Right of Way. The Dalles-California Hwy.
		Dorcas I. Bazinette, et vir. Right of Way. The Dalles-California Hwy.
		J. A. Periman. Right of Way. The Dalles-California Hwy.
		Mark Devlin Estate. Right of Way. Columbia River Hwy.
		B. A. Young. Pacific Hwy.

11796	Oct. 12	Extensions of time granted as follows:
		C. J. Eldon, Wright Ranch-Milo Section;
		Clifford A. Dunn, Rome Flight Strip;
11797		Jed Wilson, Banzer Bridge-Washington Co. line;
		Oscar E. Joelson, Buchanan Rock Production Project;
		Tru-Mix Concrete Co., Tolo-Camp White Access Rd.;
11798		A. H. Saxton & Son, Trent-Salt Creek Falls Section;
		Porter W. Yett, Vanport Junction Section;
		J. F. Johnston, Baker Creek Bridge Section.
		Contracts completed and accepted as follows:
11799		Wright Ranch-Milo Section, C. J. Eldon;
		Rome Flight Strip, Clifford A. Dunn;
		Banzer Bridge-Washington Co. Line Sec., Jed Wilson;
		Buchanan Rock Production Project, Oscar E. Joelson;
		Tolo-Camp White Access Road Project, Tru-Mix Concrete Co.;
		Vanport Junction Section, Porter W. Yett;
		Baker Creek Bridge Section, Johnston Bros.;
		Yeon Ave.-Nicolai St. Access Rd. Project, Edlefsen-Weygandt Co.;
		Suver Road-Wells Road Sec., E. C. Hall Co. & J.C. Compton.
11800		Agreements, et cetera, signed as follows:
		Standard Oil Co., surrendering lease of property adjacent to Oregon Coast Hwy. in Gardiner.;
		Umatilla County, re maintenance of Umatilla Oil Depot Access Road;
		Curry County, re use of Floras Lake State Pk. as U.S. Naval Aircraft landing field;
		Guerin Bros., permit to use state scale site at Warrenton Jct.;
		United States of America, re tract of state-owned land within boundaries of Camp Adair;
		Union Pacific Co., conveying portions of right of way of old Columbia River Hwy.;
		U. S. Government, re use of state-owned land in Lincoln Co.;
		U. S. Forestry Service, re use of hwy. property at Waldport Ranger Station;
		Supplemental recreational application re lease of govt. land.
		Meeting date. Next regular meeting to be held Nov. 8, 1943.
11801	Nov. 8	Bids received on following projects and buildings:
		Baker-Weiser Junction Rock Production;
		Crooked River Bridges; repair of four bridges;
		Hunter Creek-Lone Ranch Creek Rock Production;
		Juntura-Hope Rock Production;
		Service station building in Gardiner.
11802		Minutes approved for October 11 and 12, 1943.

Page	Date 1943	Subject
11802	Nov. 8	Delegations. Engineer explains matters concerning which delegations are to appear.
		Morrow County. Heppner. Willow Creek flood control discussed. Engineer instructed to inspect during next flood period.
		Lake County. Snow removal on Clover Flat County Road. Work to be done if requested by County and if equipment is available.
		Wasco County. County officials confer re claim of
11803		J.O.Chastain, et al., for damages to irrigation flume. State to pay 1/3 of cost of repairs.
		Wasco County. Judge Kirk files list of projects for postwar construction in Wasco County.
		Log hauling. Report on overweight violations. State Police to be advised of weighmaster's schedule of operations so police officers can be present.

		Warm Spgs. Irrigation Dist., construction of drainage ditch;
		Wallace B. Mack, disposition of claim;
		Modification of project agreement with PRA covering Rhea Creek-Jumpoff Joe Creek Section;
		Easement deed conveying to U.S. of America certain property in Ecola State Park;
		Flora A. Smith, correction deed conveying certain Portland property.

TRI-STATE HIGHWAY ASSOCIATION

Minutes of Meeting
held in
Klamath Falls, Oregon, September 24, 1943

Pursuant to the suggestion of Mr. Tom W. Holman, Chairman of the Highway Advisory Commission of the State of Washington, representatives of the State Highway Departments of the States of Washington, California and Oregon and of the U. S. Public Roads Administration met in the Willard Hotel, Klamath Falls, Oregon, at 10:00 a.m. on September 24, 1943, for a discussion of highway matters of mutual concern from a coastwide standpoint.

The following were present at such meeting:

STATE OF WASHINGTON

Tom W. Holman, Chairman, Washington Highway Advisory Commission
Charles A. Pedersen, Member, Washington Highway Advisory Commission
Edward A. Anderson, Member, Washington Highway Advisory Commission
Fred L. Wolf, Member, Washington Highway Advisory Commission
Clinton S. Reynolds, Member, Washington Highway Advisory Commission
Burwell Bantz, Director of Highways
O. R. Dinsmore, Construction Engineer

STATE OF CALIFORNIA

C. H. Purcell, Director of Public Works and Chairman, California Highway Commission
George T. McCoy, State Highway Engineer
Fred T. Grumm, Assistant State Highway Engineer
C. C. Carleton, Attorney
G. N. Cook, Assistant Secretary

STATE OF OREGON

A. W. Schaupp, State Highway Commissioner
M. R. Chessman, State Highway Commissioner
R. H. Baldock, State Highway Engineer
C. B. McCullough, Assistant State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Commission Secretary
H. G. Smith, Construction Engineer
Oscar Cutler, Assistant Staff Engineer
Tom Edwards, District Maintenance Superintendent

U. S. PUBLIC ROADS ADMINISTRATION

Dr. L. I. Hewes, Chief, Western Region, San Francisco
W. H. Lynch, District Engineer, Portland
H. D. Farmer, Senior Highway Engineer, Portland

Mr. Holman presided.

Mr. Schaupp extended a welcome to the group in behalf of the people of Klamath Falls and the Oregon Highway Commission, following which Mr. Holman explained the purpose of the conference which, he said, is to devise, if possible, methods of joint action on matters affecting the coast region, including the following:

1. Discussion of S.971 (H-R 2426) now pending in Congress, which authorizes Federal appropriations for post-war construction, et cetera:

   a. Present status of bill.

   b. Ways and means to obtain enactment.

2. Position of Highway Departments in post-war planning:

   a. Relations with State Planning Councils.

   b. Relation with National Planning.

   c. Direct work on post-war highways.

3. Relations with Federal Government:

   a. Public Roads Administration.

   b. Approvals and priorities from War Production Board.

   c. The Military, including what might be done jointly in order to prepare for use of highways in an intensive war with Japan.

4. Interstate and International Highways:

   a. Alaska Highway.

   b. Three Flags Highway.

   c. Columbia River Bridges

   d. General joint policies for Coast Area.

5. Matters that are to be discussed at the annual meeting of the American Association of State Highway Officials in Chicago, December 1, 2 & 3, 1943.

6. Organization:

a. Setting up of methods for exchange of information.

b. Inclusion of other states and District of Columbia.

The meeting was then declared open for general discussion.

Mr. Reynolds, Washington, advised that the Washington Highway Advisory Commission has been in existence for only two years and during that time it has experienced a lack of contact with the other two Pacific Coast States (California and Oregon). It was his thought that the forming of the three coast states into an organization for the interchange of ideas with respect to regional highway matters would be a decided advantage to each of the states and would help considerably in the securing of national benefits. He referred to the organization of the "American Trucking Association, Inc." as an example of what good might be accomplished by such an organization.

After discussion Mr. Holman inquired whether or not there is objection to forming the three states into an organization of this nature. None were offered, whereupon he declared the suggestion carried by unanimous vote.

Motion was thereupon made that the group be known as the "Tri-State Highway Association". The motion was seconded and carried.

Mr. Holman was then elected chairman of the association by unanimous vote upon motion of Mr. Schaupp which was seconded by Mr. Purcell.

Mr. Glaisyer was elected secretary of the association by unanimous vote upon motion of Mr. Reynolds which was seconded by Mr. Anderson and Mr. Baldock.

The group then considered S. 971 (H. R. 2426). The discussion was led by Mr. Baldock, who explained briefly the provisions of the bill and the action taken thereon by the Executive Committee of the American Association of State Highway Officials at its meeting in Chicago on April 2 and 3, 1943, when the apportionment of the federal funds to the states, as provided in the bill, was approved; viz., 50 per cent on the basis of population, 25 per cent on the basis of area, and 25 per cent on the basis of mileage of post roads. The action of the Executive Committee, he said, was endorsed by most of the states at a subsequent meeting in Chicago on June 25, 1943, and previously by the Western Association of State Highway Officials at a meeting held in San Francisco on June 3 and 4, 1943.

Mr. Baldock pointed out that six of the eastern states are opposed to the form of apportionment as set forth in the bill. These states, he said, are led by Commissioner Cox of the State of Connecticut, who alleges that the

method of apportionment will not accomplish the desired purpose of providing work for men released from the armed forces and from the wartime industries in the areas where the greatest congestion in population exists, and who protests the apportionment of such large amounts to the western states where the population is small. Mr. Baldock pointed out that less than one third of the funds made available for post-war highway construction will be expended for direct labor in the areas where the projects are carried on, and that at least one third of the funds will be expended for the manufacture of construction machinery and supplies which come from the east and middle west. These funds will give employment in the mines, the mills and the factories, in the centers of population, in addition to the direct expenditures on the roads themselves. Moreover, there is an amendment now proposed by the American Road Builders Association to provide a supplemental apportionment of one-quarter billion dollars annually for each of the three post-war years, which money would be apportioned on the basis of the population of each state, in cities having a population of 10,000 or more, as of the 1940 federal census. The effect of this bill, he said, would be substantially to change the proposed formula with relation to the factors of population, area, and post-road mileage, from 50-25-25, to 60-20-20, respectively. He added that the executive committee of the American Association of State Highway Officials has not taken action on the proposed amendment as yet, but information has been received that the eastern states would not be satisfied even with the passage of this amendment.

In the discussion that followed, Mr. Grumm suggested that Section 4 of the bill, which provides certain sums for improvements within urban areas, should be amended, because the bill as now written gives the cities too large a percentage of the total fund. Mr. Reynolds expressed himself similarly.

Mr. Purcell gave as his thought that this section, at least, should be clarified, because it involves the question of developing city streets beyond that necessary.

Dr. Hewes gave as his thought that the Public Roads Administration will be liberal in its interpretation of the section.

Mr. Baldock referred to a report from Thomas H. MacDonald, Commissioner of Public Roads, entitled "Toll Roads and Free Roads," in which Mr. MacDonald points out that the main bottlenecks on the highway networks today are through the cities. Mr. Baldock gave as his thought that the highway authorities of the several states should give serious thought to the problem in the cities, and provide reasonable funds to facilitate traffic movements into and through municipal areas, the expenditures to be made by the highway departments of the several states under the supervision of the Public Roads Administration.

In the further discussion of this matter Mr. Reynolds suggested that the group should agree on some concerted action, in order to obtain maximum benefits. He suggested agreement on the following:

1. Position to be taken by the group with respect to S. 971 (H.R. 2426).

2. Efforts to be extended with respect to securing the passage of the bill in desired form.

After discussion, a motion was made by Mr. Baldock that "this group endorse the position taken by the Western Association of State Highway Officials at its meeting in San Francisco, on June 3 and 4, 1943, approving the action taken by the Executive Committee of the American Association of State Highway Officials at its meeting in Chicago, on April 2 and 3, 1943, in adoption of what is known as the 'Chicago formula' with respect to this bill."

The motion was seconded by Mr. Reynolds, and carried by unanimous vote.

Messrs. Baldock, Purcell and Hewes were appointed a committee by Chairman Holman to prepare an appropriate resolution, embracing the sentiment expressed by the motion, for adoption later.

Recess was taken from 12:00 noon to 1:30 p. m.

Upon reconvening, the Committee appointed at the morning session offered the following resolution with respect to S.971 (H.R.2426), as instructed:

WHEREAS, the American Association of State Highway Officials has supported in Congress an authorization of $1,000,000,000 per year for highways for three post-war years, to be apportioned to the states on the basis of one-half state population, one-quarter area and one-quarter mileage of post roads; and

WHEREAS, the Western Association of State Highway Officials has endorsed and approved this action of the American Association of State Highway Officials;

NOW, THEREFORE, BE IT RESOLVED that the highway officials of the three Pacific Coast States, in meeting at Klamath Falls, Oregon, on September 24, 1943, hereby express their endorsement of the action of the Western Association of State Highway Officials and of the parent body, the American Association of State Highway Officials; and

BE IT FURTHER RESOLVED that the highway officials of the Pacific Coast states also express their confidence in the action of the executive committee of the American Association of State Highway Officials in its further support of the bill now before the Congress.

After a reading of the resolution, adoption of the same was moved by Mr. Baldock. The motion was seconded by Mr. Bantz and, upon call for the question, carried by the unanimous vote of the group.

Ways and means to secure passage of the bill by the Congress were then considered. Entering into the discussion were Messrs. Baldock, Purcell, Hewes, Schaupp, Reynolds and Grumm. It was decided that each state should contact its Congressmen personally, if possible, with respect thereto, and that County Courts, Chambers of Commerce, civic and other organizations should be requested to urge the Congressmen by wire at the time hearings are being held on the bill, to support the bill as written, reference to the bill to be by number rather than by description.

The question whether or not an interim committee should be appointed to keep in touch with developments was also discussed. It was decided that more good would be accomplished if each highway department would keep the others advised of its findings. Such arrangement was declared adopted by Chairman Holman.

Under discussion next were matters pertaining to post-war planning and state relations with the Federal Government.

Mr. Purcell outlined the California setup which functions as the "Employment and Reconstruction Commission." The purpose of the Commission, he said, is to provide work for returning soldiers and to relieve unemployment generally after the war is over. To that end, he explained, the Commission is encouraging war industries to continue their activities in the state at that time, and is also formulating plans for many types of work including highways, reclamation, water works and many other projects. The program, he added, will be for immediate undertaking, rather than for "long time" performance.

For the further information of the group, Mr. Purcell explained details of the California post-war setup, which functions under a director who is appointed by the governor, and who carries out the policies formulated by the Commission. Insofar as highways are concerned, Mr. Purcell said that funds have been appropriated by the legislature to pay for rights of way and for the preparation of plans, et cetera, so as to avoid delays on such accounts when construction must be gotten under way; also, that additional sums have been provided by the legislature to finance investigations to ascertain what can be done to aid cities and towns in the return to peacetime economy. He stressed "need" rather than "unemployment" as a guide in the functioning of this Commission.

Mr. Baldock explained the Oregon setup for post-war planning, stating that a commission has been appointed by the governor to compile data on a state-wide basis for use in formulating a work program that will be available for immediate undertaking when the war is over. The state highway department, he said, is represented on this commission which functions through a managing director.

Mr. Reynolds outlined briefly the operating plan of the State Planning Council of Washington. He advised that the highway department is not represented on this council, and that the assembling of information is done largely through community committees.

Dr. Hewes called attention to the Congressional Act passed on July 13, 1943, (Public Law #146, 78th Congress) which provides for the use of federal funds in the financing of post-war highway planning.

Mr. McCoy brought into the discussion the matter of engineering personnel on access roads. He advised that due to a shortage of engineers, the California Highway Department is experiencing considerable difficulty in carrying on projects of this kind, and that they are using men on access road contracts who should be employed on other work, such as post-war engineering. He suggested, in view thereof, that the engineering crews whose services will soon be dispensed with on the Alaska Highway work be made available to California in this emergency. It was indicated that the men are being recruited by the Army Engineers, for employment on army projects where the scale of pay is considerably higher than that of the states.

Dr. Hewes expressed sympathy with the situation, and agreed to see what can be done about it. He volunteered to recommend higher pay for engineers employed on post-war planning, which he thought would be an inducement to the men, and probably would expedite the preparation of plans.

Mr. Purcell suggested that the Public Roads Administration might contact the highway departments of the mid-western states, with respect to the loan of engineering talent, which would make possible the assignment of the present organization to work on going projects.

Mr. Devers suggested raising the pay of engineers in an amount corresponding to the increase in the price of materials, et cetera, that are used on highway work. Dr. Hewes advised that such procedure was employed on the Alaska Highway survey, and satisfactory results were obtained.

After further discussion, in which it developed that salary increases are difficult to realize in Washington and Oregon, and that the matter of raising wages is not the only question involved, the discussion was concluded by a suggestion from Dr. Hewes that the states bring into the picture of post-war planning the item of engineering emergency. He also said that he would contact other states in regard to the loan of engineering talent, if requested to do so in writing. Mr. Purcell agreed to submit such request.

Chairman Holman next brought up for discussion the question, "What are the West Coast states going to do about the highway situation when the war activities are extended from Europe to Japan?" The matter was discussed briefly, but action was deferred, it being the opinion of all that present highways are adequate to handle the situation until shipping is increased and existing dock facilities are improved.

Under the heading "Interstate and International Highways" Mr. Schaupp brought up for discussion the completion of the Enterprise-Lewiston Highway which connects Wallowa County, Oregon, with Asotin County, Washington, and the proposed revision of the Oregon-Washington Highway, between Milton, Oregon, and Walla Walla, Washington. He inquired as to the plans of the Washington Highway Department for these projects. He was informed by Messrs. Reynolds and Bantz that both projects are included in the Washington post-war highway program.

Mr. Schaupp also inquired as to the plans of the California Highway Department with respect to the highway which extends from Malin, Oregon, to Canby, California, and to the highway connection south of Lakeview, Oregon. Concerning the first-mentioned project, he gave as his understanding that by former agreement between the two states the section in California was to be improved when the Oregon section was completed. Oregon, he said, has fulfilled its part of the agreement, but the road is still unimproved in California.

Mr. Grumm stated that the State of California has no knowledge of such agreement, and called attention to the fact that the California section is a county road, over which the state does not have jurisdiction; however, the highway between Canby, California, and Merrill, Oregon, he said, is a state highway and has been improved. As to the highway south of Lakeview, he said that very expensive construction is involved, but the plan is to include a portion of the work in the post-war program.

Dr. Hewes gave an enlightening talk on the Alaskan Highway, which was appreciated by all.

The Columbia River bridge problem was mentioned but not discussed, inasmuch as this is a matter that concerns only Washington and Oregon, and can be disposed of at some other time.

A discussion of the "Three Flags Highway" and the "International Pacific Highway" occasioned remarks by Messrs. Purcell, Pedersen and Schaupp. A question arose as to the routing of this highway. A map prepared for the Three Flags Highway Association indicates that the route follows U. S. 395; whereas, according to other information, the route follows U. S. 395 to Reno; thence extends to the Mexico line at Nogales via U. S. 95, Boulder Dam, Phoenix and Tucson. In this connection Mr. Purcell reported receipt of information from Mr. E. E. East, Chief Engineer of the Automobile Club of Southern California, to the effect that the highway which extends from Nogales to Guadalajara, in Mexico, has been placed on the Mexican highway system by the Mexican Government, and will be constructed as a national road. It was his thought that the information should be appropriately acknowledged by this group, and accordingly offered the following motion relative thereto: "That the Tri-State Highway Association express to the Mexican Government its approval and commendation of the action taken in placing the Nogales-Guadalajara Highway on the Mexican highway system, and its pleasure in being informed of the progress that is being made with respect to the improvement of this road." The motion was seconded by Mr. Schaupp and after discussion carried by unanimous vote.

Matters pertaining to the annual meeting of the American Association of State Highway Officials, which is scheduled to be held in Chicago on December 1, 2 and 3, 1943, were discussed. A canvass of the group indicated that all three states would be well represented at such meeting. The thought was expressed by Chairman Holman that it would be helpful if some arrangement were effected for the interchange of ideas among the three state highway departments with respect to matters that are to be considered at such meeting, and with respect to other matters of mutual concern.

Mr. Purcell declared it important that each highway department keep in close contact with the others on important matters, and suggested that such contact be made through the State Highway Engineers. Motion was thereupon made by Mr. Reynolds that each state highway department keep the other two fully informed on such matters through the State Highway Engineers. The motion was seconded by Mr. Devers. In the discussion that followed the motion was amended, at the suggestion of Mr. Schaupp, to provide that each State Highway Engineer shall keep the other two Highway Engineers fully advised with respect to pending Congressional legislation. The motion, as amended, carried by unanimous vote.

There followed a brief discussion of a general nature, during which the question arose when and where to hold the next meeting of the association. It was left with Chairman Holman to call the meeting, which it was decided should not be held until after the Chicago meeting of the American Association of State Highway Officials, in December, 1943.

The meeting was adjourned at 4:45 p. m., with appropriate closing remarks by Chairman Holman.

Oregon City, Oregon, October 11, 1943

The State Highway Commission met with the County Court of Clackamas County at 9:00 a. m. in the County Courthouse for discussion of matters pertaining to the Commission's proposed post-war highway construction program. Present were:

A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Chairman Banfield was excused. Representing the County Court were: County Judge E. L. Pope and County Commissioners George Randall and C. W. Kruse.

Commissioner Chessman explained the object of the Commission's visit and asked the County Court to submit in writing a list of the projects, arranged in the order of their importance, that the Court would like the Commission to consider in the formulation of its post-war program, together with a map indicating the location of the several projects. He advised that the Commission is not in a position to make any definite commitment or promises with respect to any project but will give each fair consideration in the formulation of the program.

The Engineer advised concerning the possibility of securing federal funds to assist in financing the work.

Judge Pope mentioned as the County's No. 1 Project on Primary Highways the construction of a new bridge over the Pudding River at Aurora. As a No. 2 Primary Project he suggested the completion of the West Portland-Hubbard Highway (Wilsonville Cut-off). He also asked for the improvement of the Mt. Hood Highway between Sandy and Firwood, particularly the widening of shoulders and the elimination of one exceptionally bad curve. As the No. 1 Project on Secondary Highways Judge Pope suggested improvement of the county road which extends from Eagle Creek through Barton to Carver. As a No. 2 Project he suggested the improvement of County Road #28 which extends from Spring Water to Carver via Logan. As a No. 3 Project he suggested the improvement of Secondary Highway #161 between Eagle Creek and Sandy.

Judge Pope mentioned the extensive logging operations which are being carried on in the upper reaches of the Clackamas River. He stated that there are approximately eight billion board feet of timber to be marketed from this source all of which will be transported over County Roads Nos. 28 and 20, the latter road passing through Four Corners and Redland. He asked the Commission to place these two roads on the State Secondary Highway System. He stated that from Clackamas County's standpoint the improvement of the roads over which log hauling is being carried on is of more importance than the proposed extension of Foster Road, Portland, which is being sponsored by Multnomah County interests, although Clackamas County is not opposing such extension.

OCT 11 19

There followed a general discussion during which Commissioner Schaupp inquired as to the County Court's attitude with respect to the further improvement of the 82nd Street Highway between Portland and Oregon City. The Court expressed no opinion with respect to such project.

The meeting was adjourned at 10:00 a. m. with a statement from Judge Pope that Clackamas County Court will submit its suggested program in writing in the not distant future.

The Commission then motored to St. Helens for a conference with the Columbia County Court.

State Highway Engineer

Secretary

Commissioner

Commissioner

St. Helens, Oregon, October 11, 1943

The State Highway Commission conferred with the County Court of Columbia County at 11:30 a. m. in the County Courthouse with respect to the Commission's proposed post-war highway construction program. Present at such meeting were:

A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Chairman Banfield was excused. Representing the County Court were: County Judge Ray Tarbell and County Commissioners William Pringle, Sr. and J. N. Miller. Others present were: George A. Nelson, County Agricultural Agent; C. N. Rogers, Mortician; Honorable J. D. Perry, State Representative, all of St. Helens; Fred Herman, former State Representative; A. R. McCall, Publisher of Rainier Review; William Reid, Postmaster; Fred McKinley; and E. A. Brits, all of Rainier; M. R. Herrington and George L. Caldwell, President of the Lower Columbia River Highway Association, of Clatskanie; Floyd Lynch, Ralph Langdon and J. G. Watts, all of Scappoose; A. F. Baker, Superintendent of Clark Wilson Lumber Co., Wilark; and Samuel L. Miller, Forester, Salem.

Commissioner Chessman explained the purpose of the Commission's visit following which the Engineer advised relative to the possibilities of securing federal funds to assist the state in financing the post-war program.

County Judge Tarbell recommended in behalf of the County Court the following projects for the Highway Commission's consideration:

OCT 11 19 ..

1. The Federal and Primary Highway System.

As the Columbia River Highway is the only Federal and Primary Highway in Columbia County, we wish to recommend the continuance of construction from the end of the present improved highway in St. Helens toward Rainier and Astoria. We believe the traveling public will be better served if the highway is improved beginning at St. Helens and continuing toward Astoria so that the improvement is continuous rather than improving short sections between St. Helens and the Clatsop County line.

2. Federal Aid Secondary Highways.

The present Federal Aid Secondary system consists of the Nehalem Valley Secondary Highway, the Mist-Clatskanie Highway and the Trehorne-Sunset Camp Road or Upper Nehalem Valley Road. We wish to recommend that the section of the Nehalem Valley Highway west of Mist be completed and that consideration be given the completion of the Trehorne-Sunset Camp section of the Upper Nehalem Road, both in Columbia and Washington Counties.

The Court also desires to submit to you for your consideration the road extending from Scappoose to Pittsburg. This is at present a County road, and has been constructed by W. P. A. and County funds, the grading has been practically completed, the road should be surfaced and oiled, we request that this road be placed on the State Secondary Highway system and the Federal and Secondary system and completed. This road, in the opinion of the Court, will provide an outlet for the Nehalem Valley and to Northwest Portland much more direct than any other route.

The Court also wishes to recommend for your consideration for construction with Federal and Secondary Highway funds the road extending from the Nehalem Valley Highway via Oak Ranch Creek to Apiary and the Columbia River Highway near Rainier.

In order of preference our recommendations for Federal Aid Secondary Highway Funds are as follows:

1. The Pittsburg-Scappoose Road.
2. Complete the section west of Mist in the Nehalem Valley Highway.
3. Complete the Upper Nehalem Valley Road from a point at the end of the present oiled section three miles southwest of Trehorne to Sunset Camp on the Wolf Creek Highway in Washington County.
4. The road from the Nehalem Valley Secondary Highway via Oak Ranch Creek and Apiary to the Columbia River near Rainier.

JUL 1941

There followed a general discussion during which Mr. Herman voiced his approval of the County Court's program with respect to the Lower Columbia River Highway. He gave as his thought that the most important improvement is the elimination of curves between Prescott and Goble. The general improvement of this highway he said should start at Rainier and extend westerly. Mr. Herman also endorsed the County Court's program for Secondary Highway improvements. He stressed the importance of a new highway extending from Forest Grove to Rainier where it would connect with the Washington Highway via the Rainier-Longview Bridge.

Mr. Baker suggested the construction of an entirely new highway down the Columbia River between St. Helens and Astoria rather than the reconstruction of the existing highway, although the old highway, he said, should be left for local use. Mr. Caldwell made a similar suggestion and pointed out particularly that there is an available route which bypasses the town of Clatskanie.

Recess was taken at 12:15 p. m. for luncheon at the Houlton Coffee Shop following which discussion was resumed at that place.

Continuing his remarks concerning the proposed Columbia River Highway improvement Mr. Caldwell gave as his thought that such improvement should start at Goble rather than at Rainier. Mr. Perry endorsed Mr. Baker's remarks with respect to the Columbia River Highway improvements and also the remarks of Mr. Herman with respect to the proposed highway between Forest Grove and Rainier.

The meeting was adjourned at 1:00 p.m. with appropriate closing remarks by Commissioner Chessman who stated that the State Highway Commission is not in a position at the present time to make any promises or commitments with respect to any project but must wait until Congress has taken action on the pending post-war bill which provides the federal funds. He predicted that the Commission would have its program formulated by the first of the year and advised that the money will be distributed throughout the state equitably and in fairness to all concerned.

The Commission then motored to Hillsboro for a conference with the Washington County Court.

State Highway Engineer

Secretary

Commissioner

Commissioner

OCT 1 19

Hillsboro, Oregon, October 11, 1943

The State Highway Commission met at 2:30 p. m. in the Washington County Courthouse for discussion of post-war highway projects with the Washington County Court and interested citizens. Present were:

A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Chairman Banfield was excused. Representing the County Court were: County Judge H. D. Kerkman and County Commissioners James Lewis and J. W. Hughes. Others present were: J. W. Barney, City Manager; Thomas H. Bailey, representing the Chamber of Commerce; and Ed Moore, all of Hillsboro; Honorable L. B. Drake, Mayor of Forest Grove; Charles O. Roe, Secretary, Chamber of Commerce; W. H. Weber, City Manager; F. D. Gardner, Councilman; and Joseph R. McCready, City Attorney, all of Forest Grove; H. R. Johnson, Beaverton; and L. L. Crawford, Buxton.

Commissioner Chessman explained the object of the Commission's visit and advised concerning the prospects of the state receiving federal funds to assist in the financing of a post-war highway work program. He asked the County Court for its recommendations with respect to the projects that it feels should be considered by the Commission in the formulation of a construction program when the war is over. The following program was recommended by Judge Kerkman in behalf of the County Court, the same being accompanied by a map showing the location of the various projects:

PRIMARY:

1. #47 - Wolf Creek.
2. #29 - Tualatin Valley Highway - continue 4-lane highway between West Slope and Forest Grove.
3. #37 - Wilson River Highway - Gales Creek to Glenwood.
4. #51 - West Portland - Hubbard.

SECONDARY:

1. #142 - Farmington Road - Beaverton to Campbell Bridge.
2. #140 - Hillsboro - Silverton, Campbell Bridge to County line.
3. #140 - Hillsboro - Silverton Highway, Hillsboro - Campbell Bridge.

Program recommended by Washington County Court (continued):

FEDERAL AID:

1. #22 - Hillsboro - Orenco - Cornelius Pass.

2. # 9 - Forest Grove to Balm Grove.

3. #12 - Hillsboro - North Plains.

Commissioner Chessman then declared the meeting open for general discussion after advising that the Commission is not in a position to make any promises or commitments with respect to any project until it is known just how much federal moneys Oregon is to receive under the pending legislation and until an opportunity has been given the Commission to analyze the various projects that are submitted for its consideration.

Mayor Drake, Forest Grove, presented the following program in behalf of the Forest Grove City Council and the Chamber of Commerce:

1. Widen the Tualatin Valley Highway for four lanes of traffic between West Slope and Forest Grove.

2. Provide for the lessening of the traffic congestion on the streets of Forest Grove by designating certain streets as state highway routes and widening same.

3. Improve Pacific Highway West from Junction City to Corvallis and McMinnville, also improve the Tualatin Valley Highway from McMinnville to Forest Grove and extend this highway to a connection with the Lower Columbia River Highway at Rainier as a super highway for through traffic connecting army cantonments.

Mayor Drake stressed the importance of the widening of the Tualatin Valley Highway between West Slope and Forest Grove. His remarks were endorsed by Mr. Barney and by Mr. Gardner, Mr. Barney stating that the widening of this highway is justified regardless of the existence of the Wolf Creek Highway. Mr. Gardner's endorsement was based on the routing of heavy truck traffic over this highway rather than over the Wolf Creek Highway. He also endorsed the projects presented by the County Court particularly calling attention to the need for improvement of the traffic situation in Forest Grove and for the straightening of the Tualatin Valley Highway between Forest Grove and Gaston.

Mr. Bailey advised that the Hillsboro Chamber of Commerce is supporting the request for the widening of the Tualatin Valley Highway between Portland and Forest Grove; however, urged the completion of the Wolf Creek Highway as the project of most importance. He predicted a large increase of population in the Tualatin Valley after the war is over advising that even now there is a big demand for small acreage tracts, so both projects are of primary importance. Mr. Roe endorsed Mr. Bailey's remarks.

The meeting was adjourned at 3:00 p. m. with closing remarks by Commissioner Chessman who advised that all projects presented at this meeting will be carefully considered by the State Highway Commission in the formulation of its highway program.

The Commission then motored to McMinnville for a conference with Yamhill County Court.

State Highway Engineer

Commissioner

Secretary

Commissioner

McMinnville, Oregon, October 11, 1943

The State Highway Commission conferred with the Yamhill County Court and interested citizens at 4:15 p. m. in the Yamhill County Courthouse regarding the Commission's proposed post-war highway construction program. Present were:

A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Chairman Banfield was excused. Representing the County Court were: County Judge H. M. Hoskins and Commissioner Charles R. Newman. Others present were: H. W. Herring, County Engineer; Dr. Charles H. Lowe, Mayor; and H. W. Torbet, of Amity; Mayor C. H. Francis and Harry Sherman of Dayton; Dan Harmon, representing the Chamber of Commerce and R. H. C. Bennett of Newberg; and J. C. Compton, Edgar Meresse, Linn Gubser, and George Zimmerman, all of McMinnville.

Commissioner Chessman explained the object of the Commission's visit and advised relative to the bill now pending in Congress that provides federal funds with which to assist the states in the financing of post-war highway work. He asked the County Court to submit a list of highway projects, arranged in the order of their importance, for consideration by the Commission in the formulation of its post-war program. He advised that the funds the Commission expects will be available to finance the post-war program will not be sufficient to permit the undertaking of all of the work suggested by the various communities throughout the state but that the Commission will select those that it considers of most importance giving fair consideration to all.

Judge Hoskins requested consideration of the following projects:

1. West Side Pacific Highway

   (a) Dayton Junction to Lafayette.

   (b) Lafayette to Tualatin Valley Highway.

   (c) McMinnville south to Polk County line.

2. Salmon River Highway

   (a) McMinnville Junction south of McMinnville to DeLashmutt Corner.

   (b) Sheridan East to Balston Road.

3. Tualatin Valley Highway, Washington County line to West Side Pacific Highway

4. Three mile Lane Secondary Highway Bridge over Yamhill River at McMinnville and realignment at Yamhill River Bridge.

5. Hillsboro-Woodburn Secondary Highway from Washington County line to Newberg.

6. Bellevue-Hopewell Secondary Highway from Bellevue Corner on Salmon River Highway to Amity on West Side Pacific Highway.

7. Dayton-Amity Secondary Highway from east end of present improvement northeasterly to three mile Lane Secondary Highway.

Commissioner Chessman read the program aloud for the benefit of all present and then declared the meeting open for general discussion.

Mr. Torbet noted that whereas the County Court's program includes the improvement of the Bellevue-Amity Section of the Bellevue-Hopewell Secondary Highway it does not include the Amity-Hopewell Section. He suggested that the program should be enlarged to include such section.

Mr. Harmon urged the following improvements:

1. Improvement of the Hillsboro-Woodburn Secondary Highway #140 between Newberg and the Washington County line, known as the Chehalem Mountain Section. He said that the Washington County portion of this route is in good condition but the Yamhill County portion needs straightening, widening, resurfacing and oiling.

2. Continue reconstruction of the Pacific Highway West between McMinnville and Newberg. In this connection he asked for the remodeling

of the railroad underpass at Lafayette (St. Joseph) and the rebuilding of the section between Dundee and Newberg.

3. Improvement of the county road which extends from Dundee to Yamhill. (He was informed by Judge Hoskins that this project is in the County Court's program for County post-war improvement.)

Mayor Francis stressed the importance of the improvement of the Amity-Dayton Secondary Highway. It was his thought that this project should be given primary attention by the Commission in its proposed program because of its importance as a short-cut route to Portland for people residing along the Pacific Highway West south of McMinnville, and because the U. S. Farm Security Administration is maintaining a large camp for immigrant workers along this road.

Mr. Torbet, speaking as Chairman of the Road Committee of the Amity Chamber of Commerce asked for the widening of the Pacific Highway West in the northern part of Amity and for the construction of a sidewalk at this location for the benefit of people who now have to walk on the highway. He declared this is a worthy project to reduce accidents. His remarks were endorsed by Dr. Lowe.

After further discussion of a general nature the meeting was adjourned at 5:00 p. m. with appropriate closing remarks by Commissioner Chessman who advised that the State Highway Commission will give fair consideration to all projects that have been presented but cannot at this time make any promises or commitments regarding any of them.

State Highway Engineer

Secretary

Commissioner

Commissioner

OCT 13 1943

Portland, Oregon, October 12, 1943

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction work and for the sale of a residence building at Milton were opened and read according to previously published notices, following which Chairman Banfield announced that the Commission would consider the award of contracts at 3:00 p. m. in the same room:

THE OLD OREGON TRAIL
BAKER-WEISER JUNCTION

SALE OF RESIDENCE BUILDING IN MILTON

Building No. 10530 (Former Owner Irene Trover)

J. J. Howard $60.00

The Commission by unanimous vote approved the minutes of the meetings held on August 23 and on August 24 to 27, inclusive, subject to a minor change in one of the items. (Correction made in Office Copy of minutes of August 23 and in copies sent to Commissioners.)

The Engineer discussed briefly with the Commission a request from the Ostrander Logging Company for permission to operate its logging trucks across two state secondary highways in the vicinity of Molalla. He advised that the company is building its own private logging road between Molalla and the Willamette River near Canby including an overhead crossing of the Pacific Highway and the Southern Pacific Railroad tracks at Canby, and it now wants the privilege of operating its trucks across the two state secondary highways at grade. He gave as his thought that such grade crossings should not be allowed because the operations would not only severely damage the highway surface but would also create a hazard to highway users. He suggested that the company should be required to build overhead structures to separate the grades as is being done at Canby and pointed out that by a realignment of the logging road only one such structure would be required. He quoted the Commission's Attorney to the effect that the company does not have lawful authority to cross the state highways as it proposes.

The Commission took no definite action in the matter deferring the same until representatives of the Ostrander Logging Company are present during the afternoon session. (The representatives of the Ostrander Logging Company did not appear at this meeting.)

The Engineer reported on the condition of the Willow Creek Bridges in Heppner, the improvement of which was requested by Mayor Turner on the occasion of the Commission's visit to Heppner on August 25, 1943. A decision was deferred by the Commission until the next meeting. The Engineer was instructed in the meantime to send the individual Commissioners a written report on the subject.

The Engineer also reported on the condition of the Heppner-Spray Secondary Highway in Morrow County concerning which the Heppner delegation complained at the meeting in Heppner on August 25, 1943. He advised that it would cost a large sum of money to improve the road properly. He suggested that the situation could be alleviated by placing a limited amount of surfacing materials on the bad sections which he estimated could be done for about $20,000.00 Action on this matter was also deferred by the Commission until the next meeting. The Engineer was instructed to make a written report on the subject to the individual Commissioners in the meantime.

The Engineer discussed with the Commission the advisability of attempting to keep the Santiam Pass open during the coming winter in view of

the shortage of labor and the fact that the volume of traffic that will use the road undoubtedly will be less than in normal years because of added restrictions inthe use of gasoline. He pointed out that considerable trouble was experienced last winter with snow slides which necessitated the closing of the road entirely on four different occasions ranging from three days to three weeks. He also advised that the cost of keeping the highway open during the winter of 1941-1942 was $25,732.00 and during the winter of 1942-1943 the amount spent for such purpose was $32,632.00. He requested instructions.

Chairman Banfield gave as his thought that the highway should be kept open throughout the winter if possible. Commissioners Schaupp and Chessman concurred making the decision unanimous.

The Engineer then brought up for discussion the question of boarding the men who are headquartered at Santiam Maintenance Station. He advised that there is a small building on the premises that is fitted up for mess hall purposes but the present policy of the Commission prohibits its use for private gain. He suggested, if the Commission approves, that it might be possible to arrange with the wife of one of the men who are stationed at this place to furnish meals for the extra men and for people who may become stranded there because of the snow conditions, if allowed the use of the state's facilities; otherwise, it will be almost impossible to keep the men on the job.

It was the thought of the Commission that some provision must be made to provide meals for the maintenance crew at this location, in view of which the Commission approved unanimously the Engineer's suggestion as an emergency proposition for the duration.

The Engineer requested authority to advertise for bids for the construction of a pedestrian overpass at the Southern Pacific crossing of the Pacific Highway East at Milwaukie which is estimated to cost about $1,500.00. He advised that it was originally intended to do this work with state forces but the bridge crews are short handed and barely able to take care of routine maintenance work so it was thought best to contract it as there are a number of small contractors who might be interested. The Commission approved the request by unanimous vote upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman.

The Engineer reported the necessity to improve the Siletz Secondary Highway north of Siletz if this highway is to be kept open for travel during the coming winter months. He advised that this road carries a large volume of log hauling traffic and that the improvements contemplated consist of widening at Euchre Mountain, riprapping to repair river wash, rock surfacing a one-half mile section and the stock piling of oil rock for future use. He estimated the cost of the project at $52,525.00 and recommended that the work be done and that he be authorized to advertise the project for bids to be received at the next meeting.

The Commission approved the recommendation by unanimous vote; however, it instructed the Engineer to obtain federal moneys if possible to pay the costs involved.

The Engineer also reported the need to strengthen three wooden truss bridges on the Crooked River Highway and one wooden truss bridge on the Crooked River-Paulina Secondary Highway in Crook County. He advised that these bridges were constructed in 1921-1922 and are now in danger of failure. The only safe way of maintaining them, he said, is to completely retimber the truss spans which he estimated would cost about $22,000.00. He urged favorable consideration by the Commission on this matter. After discussion and in view of the apparent emergency, motion was made by Commissioner Schaupp that the project be approved and that the Engineer be authorized to advertise it for bids to be received at the next meeting. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission.

The Commission by unanimous vote confirmed the oral authority previously given the Engineer to purchase two Holland truck-loaders at $200.00 each.

The Commission by unanimous vote also confirmed the oral authority previously given the Engineer to purchase the following equipment:

60 - 1½-ton trucks. Estimated cost $90,000.00
6 - 4-ton trucks. " " $45,000.00
10 - pick-up trucks. " " $ 7,000.00
4 - station wagons. " " $ 3,600.00
1 - large passenger automobile for Division Engineer Chandler. Estimated cost $1,400.00

Total estimated cost $147,000.00

In the discussion of this matter the Engineer advised that following the Commission's oral approval of this purchase the State Board of Control received quotations from two dealers, one of whom offered to deliver nine Chevrolet trucks with dump bodies which meet the specifications in all particulars and the other offered to deliver thirty Dodge trucks that are not exactly in conformity with the specifications and will cost the state $24,512.10 more than a like number of Chevrolet trucks. He advised that it is extremely difficult, because of war time conditions, to purchase equipment of this kind, and in view thereof, recommended the purchase of the thirty trucks notwithstanding the increased price, inasmuch as they are badly needed to replace other trucks that have been driven over 100,000 miles each and the fact that it is becoming increasingly difficult to keep them in repair. The Commission approved the recommendation by unanimous vote.

The Engineer reported that the conditions controlling the awarding of the contract for the construction of the Oakridge Revetment Project for which the Commission took bids on August 23, 1943, have all been satisfied and that in conformity with authority previously granted him by the Commission,

he awarded this contract on September 14, 1943, to Hord and Stuart who submitted the lowest bid therefor. The Commission by unanimous vote approved the award of this contract as reported.

The Commission had under discussion the question whether or not to accept the prequalification statement of Contractor A. A. Hardesty so as to allow him to bid on future highway work. The Engineer advised that Mr. Hardesty was disqualified by the former Highway Commission on November 17, 1937, because he had demonstrated that he was not adequately financed and because he was continually creating trouble for the State Highway Department either by failure to pay claims incurred in connection with his work or by failing to complete the job within the specified time limit. Plans and specifications, he said, have been refused Mr. Hardesty since that time but he now asks for reinstatement. The Engineer recommended that Mr. Hardesty's prequalification be reinstated as a trial proposition subject to the condition that it again be revoked if he does not carry on his work satisfactorily.

Chairman Banfield gave as his thought that the Commission should permit Mr. Hardesty to bid on state work up to the extent of his capacity subject to the condition recommended by the Engineer. Commissioners Schaupp and Chessman concurred and it was so ordered.

The Board of County Commissioners of Multnomah County represented by Frank L. Shull, Chairman; Tom H. West; Charles C. Bradley, Commissioners; and County Roadmaster George W. Buck was present at the request of the State Highway Commission for discussion of matters pertaining to the Highway Commission's proposed post-war highway construction program. Chairman Banfield explained the reason for the conference stating that the Commission has just completed a canvass of the entire state during which the County Courts were asked to submit to the Commission a list of projects which they consider of primary importance and which they feel should be given consideration by the Commission in the formulation of its post-war highway program. Similar information, he said, is requested of Multnomah County as a guide in programming the federal and state moneys. He asked the Board to submit such a program in writing, listing the projects in the order of their importance. He explained, however, that the funds the Commission anticipates will be available, probably will not be sufficient to finance all of the projects that have been suggested, and that the Commission will not decide the program until the matter has been given very careful study.

Commissioner Shull stated that his Board is of the feeling that the Highway Commission knows best which projects are of primary importance to Multnomah County, for which reason they are reluctant to recommend that any particular project should receive the benefit of the fund in preference to others; particularly in view of the fact that some of the projects under consideration are of as much interest or even more interest to other counties than they are to Multnomah County. He added, however, that if the Commission will state just how much money it is going to spend in Multnomah County, then the Board of County Commissioners will suggest where to spend it. His remarks were endorsed by Mr. Buck.

There followed a general discussion during which the State Highway Engineer suggested that it might be advisable if the Multnomah County recommendation were deferred until Mr. Robert Moses, who is now conducting a survey for post-war development in Portland has made his report. The suggestion was approved by Mr. Shull who predicted that Mr. Moses' report would be filed in about thirty days. The arrangement was also approved by the Highway Commission. Chairman Banfield concluded the conference by stating that the information wanted by the Highway Commission is the recommendation of the Board of County Commissioners with respect to primary and secondary highway improvements.

Mr. L. M. Lepper, Director of the East Side Commercial Club, Portland, was also present and asked the Commission to consider for the post-war program the projects listed in his letter of March 15, 1943, to the Commission. The Commission approved his request. (NOTE: The projects listed in Mr. Lepper's letter are as follows:

1. Complete Portland Front Street, now partially completed, to a connection with Interstate Avenue.

2. Wolf Creek Highway, from North Plains to Sylvan, to give greater use to the large investment already made.

3. Wilson River Highway, Balm Grove to North Plains, to connect with the Wolf Creek Highway and shorten the distance to beaches from Portland Metropolitan Area with now over 600,000 population.

4. Wilsonville Cut-off completed to shorten distance from Portland to Salem, et cetera, connecting in West Portland as planned.

5. Warm Springs Cut-off completed to shorten the truck haul to Bend and Eastern Oregon points by some thirty miles as planned and started.

6. S. E. 82nd Avenue to a three-lane highway from Multnomah County Line over new Southern Pacific Railroad viaduct to McLaughlin-Clackamas River Bridge.

7. New Water-Grade Columbia River Highway from Bonneville to Troutdale, and Cascade Locks to The Dalles, when possible.

8. S. E. 39th Avenue, Portland Viaduct over Johnson Creek & Gulch through Ardenwald, and south in Clackamas County to a best connection with the New Portland-Oregon City McLaughlin Super-Highway.

9. Columbia River Levee Highway now opened from Union Avenue to about one mile east of Portland Super-Air Port, to be completed from there to Blue Lake Park Road connection. Started by PWA and Multnomah County.

10. Denver Avenue-Union Avenue Grade separation.

The Engineer reported that the new section of the Pacific Highway West between Monmouth and Suver in Polk County has been completed and is now open to general public use. He advised that the surface on this section consists of bituminous macadam constructed on new grade which might be severely damaged if subjected to heavy log hauling traffic, particularly during the winter months. In order to avoid such a situation he said that he has ordered the new section posted to prohibit its use by log haulers which should not inconvenience them because they still have the use of the old road between these two points. He asked the Commission to approve such posting. The Commission confirmed the Engineer's action in this matter by unanimous vote upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman.

The Commission discussed an opinion from the Attorney with respect to the Highway Commission's authority to penalize commercial carriers who have been arrested for overloading their equipment. According to this opinion the Highway Commission has no legal recourse against such violators and is without authority to penalize them unless they are operating under the Commission's war time emergency permits, in which case the permits could be cancelled. In view of this opinion the Commission instructed the Secretary to bring to the attention of Mr. Charles P. Pray, Superintendent of the Department of State Police, two recent violations committed by the Converse Trucking Company of California, and to inform Mr. Pray that the Commission is holding him and his Officers responsible for proper control of the operations of this company and others who are engaged in the trucking business.

The Commission also discussed overweight violations committed by the Ostrander Logging Company and several other log haulers. The case of the Ostrander Logging Company involves an overload of 22,100 pounds in excess of statutory weight limits, or 18,700 pounds in excess of approved tolerances. The Engineer advised that according to information at hand this particular load of logs was delivered to Portland as an exhibit in the war bond drive exposition. The load originated, he said, in the company's timber in the Mollala district and was transported over state highways to Canby, thence to Portland. He inquired whether or not the Commission wishes to penalize this operator. The Commission deferred its decision in the matter pending investigation as to whether or not the company really was requested by the officials in charge of the Bond Drive Exposition to furnish the logs. The Secretary was instructed to obtain such information and report back to the Commissioners. Inspection of the violations committed by the other operators revealed them to be not excessive, in view of which the Commission decided to take no action.

In this connection the Engineer reported a request from Mr. Charles P. Pray, Superintendent of the Department of State Police, for full cooperation from the State Highway Commission with respect to the control of overweight movements, particularly with respect to a proposed requirement that the offending operator shall remove a sufficient portion of his load or adjust the load so that the axle, unit and gross weights will not exceed those approved. The Commission declared its desire to cooperate fully with the Police Department in such matter and instructed the Engineer to convey such information to Mr. Pray. The Commission also instructed the Engineer and the Attorney to discuss with Mr. Pray a basis of cooperation and arrange with him a

plan of procedure to be followed in the control of overloads. A motion to that effect which was offered by Commissioner Schaupp was seconded by Commissioner Chessman and received the unanimous vote of the Commission.

The Commission discussed briefly and ordered filed a report on overweight violations committed by log haulers during the month of September.

The Commission also discussed briefly and ordered filed a report on violations committed by log haulers in the employ of the Roaring River Logging Company, particularly one case involving a truck driver who refused to permit his load to be weighed at the state scales.

Mr. A. K. York, Portland, came before the Commission and requested the improvement of the Cottonwood Grade Section of the Wasco-Heppner Secondary State Highway #300 in Morrow and Gilliam Counties. He advised that this section of highway is very narrow and crooked and that widening of the same would greatly facilitate the marketing of crops which have to be trucked thereover. Chairman Banfield advised that the Commission recently traveled this road and is fully cognizant of the condition; also, that the improvement of the entire section is a costly proposition which the Commission cannot undertake in the immediate future although the Commission has previously authorized an expenditure of about $5,000.00 to improve some of the worst places. The Commission has the project in mind, he said, and intends to give it fair consideration in the formulation of its post-war construction program but is not in a position at the present time to make any definite commitment or promise with respect thereto. Mr. York stated that his purpose in coming before the Commission at this time was simply to bring the condition to the Commission's attention and to request that the project be kept in mind.

County Judge Guy Boyington, Clatsop County, was present in regard to the recommendations heretofore made by the County Court with respect to post-war highway projects. He advised that since filing its previous report the County Court has conferred with the Astoria Chamber of Commerce and it is now their joint recommendation that the construction of a new highway between Elsie on the Wolf Creek Highway and Miles Crossing on the Oregon Coast Highway should be substituted in the program as the county's first choice of projects for post-war performance. He gave as his thought that it would not cost any more to build this new road than to modernize the present road, and urged favorable consideration by the Commission. He added that the County Court is not particular as to the second and third choice projects and will confirm its request in writing.

Chairman Banfield inquired as to the right-of-way on the new section to which Judge Boyington replied that the location traverses an entirely new section where there is no development so the right-of-way in his estimation would cost very little. The Commission thereupon by unanimous vote agreed to such substitution of projects.

Mr. L. W. Liljenquist, Transportation Coordinator for the U. S. Maritime Commission, Portland, came before the Commission with regard to the use by the U.S. War Shipping Board of certain property that was acquired by the state and the City of Portland in connection with the Front Avenue Project, said property being situate near the Steel Bridge in Portland. Mr. Liljenquist advised that the property he has in mind is that which the Oregon Shipbuilding Corporation leased as an automobile parking area for the benefit of shipyard workers who were transported by boat to the shipyards. It no longer is being

used for such purposes, he said, and in view thereof, the War Shipping Board would like to use it as a storage site for lend-lease materials that are to be loaded onto ships. He inquired whether or not the Commission has any objections to such use of the property as an emergency proposition. Chairman Banfield advised that the Commission has tentative plans to continue construction of the Front Avenue Project when the war is over and in his estimation the Commission should not do anything prior to that time that might handicap such project. He pointed out that the Oregon Shipbuilding Corporation's use of the property is covered by a joint agreement between the Corporation, the City and the State and does not expire until the war is over, so in the event that the Commission should approve letting the War Shipping Board use the property the matter would have to be covered by a new lease and the old lease would have to be cancelled. Commissioner Chessman stated his approval of Mr. Liljenquist's request as did also Commissioner Schaupp. Chairman Banfield questioned the advisability of his voting in the matter because he is Chairman of the Operating Committee of the Portland Dock Commission which controls Portland dock facilities. He agreed, however, at the request of the other members of the Commission, to discuss the matter with Commissioner Bowes of the City of Portland and it was understood that the U.S. War Shipping Board would be allowed the use of the property if there are no objections on the part of the city.

The Commission had under discussion a request from the City of Pendleton for surveys of several proposed railroad underpass and overpass projects within the Pendleton city limits. The Engineer pointed out that there are no federal funds available at the present time for elimination of railroad grade crossings and that the post-war bill that is now pending in Congress does not provide for funds for such purpose. It was his thought that the time is not propitious to make the surveys because, in the first place, there appears to be no special funds available for this type of construction in the proposed post-war bill and secondly, men to conduct the surveys cannot be spared from their current assignments without delaying surveys of other projects which can be financed with federal moneys. He pointed out that a number of years ago surveys were made of a couple of these projects and suggested that the data gathered at that time might serve the city's purposes although the information now is rather obsolete. He also suggested that the city be informed of the facts with respect to the federal funds and that the Commission consider authorizing new surveys when additional funds become available for the construction of projects of this kind. After discussion the Commission approved the suggestions by unanimous vote and it was agreed that the information should be conveyed to the city by Commissioner Chessman when he is in Pendleton later in the week. The Engineer was instructed to write Commissioner Chessman in the meantime at Pendleton advising him of the facts.

The Engineer requested authority to submit to the Public Roads Administration for approval a partial program of survey projects, including plans, specifications, et cetera, for post-war highway improvements so that work on them can go forward without delay. He submitted a list of the projects, as follows, and pointed out that they are estimated to cost a total of $125,000.00 of which amount the Federal Government through the Public Roads Administration is being requested to assume $77,500.00 as its share of the cost:

OCT 13 1943

FIRST PARTIAL PROGRAM FOR SURVEYS, PLANS, SPECIFICATIONS AND ESTIMATES FOR POSTWAR HIGHWAY IMPROVEMENTS

County	Location and Termini	Contemplated Construction	Work To Be Done Now	Estimated Cost	Federal Funds Requested
Columbia	Goble-St.Helens Sec. of Col. R. Hwy. MP 41 to 29 (12.0 miles)	Widen and improve alignment	Survey & plans	$ 15,000	$ 9,300
Wash.	Beaverton-West Slope Sec.of Tualatin Hwy.,MP 1.5 to 3.5 (2 mi.)	Widen to four lanes	Survey & plans	1,700	1,050
Mult.	Denver Ave.-Columbia Blvd. Sec.of Pac.Hwy.E. in Portland (2 mi.)	Widen to four lanes	Survey & plans	2,000	1,240
Clack.	Harmony Hill-Oregon City Sec. of Cascade Second. Hwy., MP 8.8 to 13.8 (5 miles)	Widen and improve alignment. Provide grade separation & new bridge.	Survey, structure designs and plans.	5,000	3,100
Yamhill	Bringle Corner-McMinnville Sec. of Salmon River Hwy., MP 40.9 to 45.1 (4.2 miles)	Widen and improve alignment	Survey & plans	4,200	2,605
Marion	Middle Grove-Silverton Sec.of Salem Silverton County Road (11 miles)	Widen and improve alignment	Surveys & plans	11,000	6,820
Polk	Rickreall-Monmouth Sec. of Pacific Hwy.W., MP 59 to 65 (6 miles)	Widen and improve alignment.	Surveys & plans	6,000	3,720
Polk	Salt Creek School-Rickreall Sec. of Dallas-Coast Second. Hwy., MP 8.7 to 16.7 (8 miles)	Construct new sec. of highway	Complete making of surveys & plans	1,600	990
Lincoln	Cedar Creek-Siletz Sec. of Siletz Second.Hwy., MP 15 to 24 (9 mi.)	Construct on new alignment	Surveys & plans	9,000	5,580
Lincoln	Salt Creek-Alsea Crossing Sec. of Alsea Hwy., MP 36 to 43.5 (7.5 mi.)	Widen and improve alignment	Surveys & plans	7,500	4,650
Lane	Crow-Lorane Sec.of Territorial Second. Hwy., MP 24 to 39 (15 miles)	Widen and improve alignment	Surveys & plans	5,000	3,100
Lane	High St.Sec. of Coburg-Eugene County Rd. in Eugene. Pacific Hwy. E. to point north of Willamette River Crossing (1 mile)	Widen and improve alignment. Provide grade separation & new bridge.	Survey, structure designs and plans.	4,000	2,480

First Partial Program for Postwar Highway Improvements (Cont.):

County	Location and Termini	Contemplated Construction	Work To Be Done Now	Estimated Cost	Federal Funds Requested
Wasco	Tygh Valley-Deschutes River Sec. of Sherars Bridge Second. Hwy., MP 0 to 8 (8 miles)	Construct on new alignment	Survey & plans	$ 4,000	$ 2,480
Sherman	Fulton Canyon-Wasco Sec. of Fulton Canyon-Wasco Second. Hwy., MP 0 to 11 (5 miles)	Widen and improve alignment	Surveys & plans (Except MP 1.5 to 8.0)	3,000	1,860
Crook	Crooked River Dam Sec. of Crooked River Hwy. MP 18 to 22 (4 miles)	Construct on new alignment	Survey & plans	3,200	1,985
Crook	Prineville-Davis Ranch Sec. of Crooked River-Paulina Second. Hwy., MP 0 to 16 (16 miles)	Construct on new location	Survey & plans	5,000	3,100
Lake	Muddy Creek-Adel Sec. of Warner Second. Hwy., MP 13 to 29 (16 miles)	Construct on improved alignment	Survey & plans	6,400	3,970
Union	Elgin-Boswell Ranch Sec. of Wallowa Lake Hwy., MP 19.7 to 27.7 (8 miles)	Widen and improve alignment	Surveys & plans	7,500	4,650
Grant	Dry Creek-Long Creek Sec. of Kimberly-Long Creek Second. Hwy., MP 6 to 34 (28 miles)	Construct on improved alignment	Surveys & plans	10,000	6,200
Baker	Bridge Creek-Salisbury Sec. of Sumpter Second. Hwy., MP 10 to 0 (10 mi.)	Construct on improved alignment	Survey & plans	5,000	3,100
Harney	Burns-Crane Sec. of Burns Crane Hwy. MP 0 to 29 (29 miles)	Widen and resurface	Surveys & plans	8,900	5,520
				$125,000	$77,500

After discussion and careful consideration of each item the Commission by unanimous vote approved all of the projects listed, subject to the condition that such approval covers surveys only and that no commitments whatsoever are being made as to construction.

The Commission had under discussion a request from Mr. Henry F. Severance, Post, Oregon, for the installation of a cattle guard on the Crooked River Secondary Highway near Paulina, in Crook County. Mr. Severance advises that fenced ranges and open range meet at this point and there is nothing to prevent his stock from bedding down on the highway, which is frequently done, with the result that, in many instances stock is severely injured and sometimes killed by highway traffic. The installation of the cattle guard, he said, would eliminate this condition. In the discussion of the matter Commissioner Schaupp expressed himself as in favor of such installations on highways in "out of way" places because it would conserve manpower in that it would relieve the necessity for herders. Commissioner Chessman expressed himself similarly. Motion was thereupon made by Commissioner Schaupp that Mr. Severance be allowed to install a cattle guard at the point desired if he will build it in conformity with a design prepared by the State Highway Engineer and at no cost to the state, and that he will maintain the guard in a condition satisfactory to the Engineer, such arrangement to be for the duration of the war only. The motion was seconded by Commissioner Chessman and received the unanimous vote of the Commission. The Commission referred the matter to the Engineer and the Attorney to work out the details. The matter is to be covered by a written agreement between Mr. Severance and the state.

The Attorney reported a request from Mr. William Hotchkiss, Valley Falls, Oregon, for permission to construct a culvert across the Fremont Highway near the town of Paisley for use in connection with his irrigation system. He advised that if the Commission approves this request and the culvert is installed according to legal requirements then the state would have to maintain it after it is built. The Commission deferred a decision in the matter pending investigation by the Engineer who is to discuss the matter with the Commission over the telephone when he is ready to report.

A letter was presented from the U. S. War Department, requesting permission to construct and maintain three waiting rooms on state highway right of way for the benefit and convenience of men in the armed service, two to be located on the right of way of the Crater Lake Highway, within the boundaries of Camp White Cantonment, and the other to be located on the Oregon Coast Highway, just north of the highway bridge at Florence. The Commission approved the request by unanimous vote, subject to the condition that the buildings be placed in locations satisfactory to the Engineer and be maintained in a sightly condition.

The Commission had under discussion the claim of Contractor C. J. Eldon, for reimbursement of unanticipated expenses incurred by him in connection with his contract No. 2557, for the construction of the Wright Ranch-Milo Section of the Tiller-Trail Highway, in Douglas County. Mr. Eldon alleges that he did not know at the time he submitted his bid for this project that he would be obliged to pay a federal war tax on freight shipments, which

aggregated the sum of $48.32 on this job; also, that because of wartime restrictions, he was required to pay an extra amount for his RC-3 asphalt, and his extra expense in connection therewith amounted to $211.61. He asked the Highway Commission to reimburse him in the amount of $259.93, covering both items. The Commission took the attitude that every bidder on public contracts must assume certain risks and, in this particular instance, it does not appear from the evidence that the state is justified in assuming the extra costs that have been incurred by Mr. Eldon. It also appeared to the Commission that the approval of Mr. Eldon's claim would open the way for contractors generally to file similar claims in the future, which eventually would cost the state a large sum of money. In view thereof, the Commission voted unanimously to deny the claim, on motion of Commissioner Schaupp, which was seconded by Commissioner Chessman.

For a like reason the Commission denied the claim of the Eugene Sand and Gravel Company, for reimbursement for extra expense of shipping crushed material from Eugene to its rock production project on the Salt Creek Falls-Odell Butte Section of the Willamette Highway, contract No. 2604. This particular claim amounts to $550.00, and represents the federal transportation tax on the shipment of 14,000 cu. yds. of material, at $0.0375 per cubic yard.

The Commission also discussed the claim of Mr. John Copley for reimbursement for the cost of repairing his car that was damaged as a result of a defect in the bridge located on the Pacific Highway East, at Mile Post 90.09, near Albany. Mr. Copley requests reimbursement in the amount of $99.75. The Attorney advised that he has carefully studied the circumstances surrounding this accident and, from the information available to him, he is of the opinion that the state is not legally liable, because the facts disclose that the state highway department was not delinquent in maintaining the bridge, and the defect was not caused by neglectful maintenance on the part of highway-department employees. He gave as his further opinion that Mr. Copley could not recover damages legally. In view of the report, the Commission decided unanimously to disallow the claim, as a matter of policy.

The Commission discussed the matter of formally adopting the new route of the Old Oregon Trail Highway through the town of Hermiston, and the abandonment of the former route. The following resolution with respect thereto was adopted by the Commission by unanimous vote, upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman:

> WHEREAS, the Old Oregon Trail as heretofore located and routed through the town of Hermiston has been directed over a portion of Fourth Street and a portion of Main Street; and
>
> WHEREAS, for the purpose of affording a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Commission has found it necessary to relocate said highway into and through said town of Hermiston; and
>
> WHEREAS, by reason of said relocation and rerouting the use of Fourth Street and Main Street as streets of said town over which to route the Old Oregon Trail will be made unnecessary; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to relocate and reroute said section of said Old Oregon Trail and to abandon as streets of said town over which to route Old Oregon Trail traffic the portion of Fourth Street and Main Street hereinafter designated;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating as follows:

1. That the route and location of the Old Oregon Trail into and through the town of Hermiston shall be changed so that the route and location of said Old Oregon Trail in said town shall be as follows:

> Beginning at the intersection of First Street and Main Street in the town of Hermiston, thence in a southeasterly direction of a connection with the old route at the intersection of Fourth Street and the southerly city limits.

2. That that part of Fourth Street in said town beginning at the intersection of Fourth Street and Main Street and running thence southerly to the southerly city limits, and that part of Main Street from its intersection with First Street to Fourth Street shall no longer be streets of said town over which there shall be routed traffic using the Old Oregon Trail, and said sections of said streets, so far as Old Oregon Trail traffic is concerned, shall be permitted to revert to the exclusive jurisdiction of the municipal authorities of said town.

3. That Main Street from its intersection with East Seventh Street in said town to its intersection with the Old Oregon Trail as now located shall be and is designated as the street of said town over which to route traffic using the state highway known as the Hermiston Highway.

4. That the Engineer be and he hereby is instructed to erect or cause to be erected and thereafter maintained appropriate highway and traffic signals, signs or markers along said Old Oregon Trail as relocated, and along said street designated as the street over which there shall be routed Hermiston Highway traffic.

5. That there is attached hereto and by this reference made a part hereof a map* on which is shown colored in red the relocated Old Oregon Trail within the town of Hermiston, and there likewise is shown colored in green the portion of Main Street designated as the street of said town over which to route Hermiston Highway traffic, and there is shown colored in yellow the portion of Fourth Street which is relinquished by the State Highway

*(Map filed New Highway Routes File - No. 51)

OCT 12 1943

Commission to the jurisdiction and authority of the town of Hermiston and which street shall no longer be designated as a street of said town over which to route Old Oregon Trail traffic. *

6. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof delivered to the County Court of Umatilla County, and a like copy to the Mayor of the town of Hermiston and a like copy to the District Engineer of the Public Roads Administration, Portland, Oregon.

The Commission by unanimous vote also adopted the following resolution abandoning certain portions of the Columbia River Highway (old route), in Multnomah and Hood River Counties, which portions the Engineer advised are no longer of value from the state-highway standpoint in view of the fact that the highway has been reconstructed on new alignment:

WHEREAS, when the Columbia River Highway in Multnomah County was originally constructed the rights of way over which said highway was constructed were procured by Multnomah County and title thereto was taken in the name of said county; and

WHEREAS, said highway throughout its entire length in Multnomah County has been by law declared to be a state highway and as such is under the exclusive control and jurisdiction of the State Highway Commission; and

WHEREAS, the legislature of the State of Oregon enacted into law Section 100-132, O. C. L. A., which reads as follows:

> "That all rights of way owned or held by the several counties over and along any roads heretofore or hereafter adopted as state highways are hereby declared to be vested in the state of Oregon, by and through its state highway commission.
>
> "The provisions of this act shall not apply to any rights of way now owned or hereafter acquired by any city of this state for city streets.";

and

WHEREAS, the construction of Bonneville Dam by the Federal Government made necessary the relocation and reconstruction of a section of the Oregon-Washington Railroad & Navigation Company and the relocation and reconstruction of a section of the Columbia River Highway; and

---

*(Map filed Right of Way Abandonment and Retention File - No. 116.)

WHEREAS, by reason of relocation of railroad and relocation of highway, certain sections or parts of the highway right of way are no longer occupied by the highway but are occupied by the railroad and have become a part of railroad right of way; and

WHEREAS, in connection with the construction of said Bonneville Dam and the relocation and reconstruction of said railroad and said highway it was agreed that all title to or jurisdiction over the hereinafter described sections or parts of the original parts of the original right of way of the Columbia River Highway should be relinquished by the Highway Commission to the Railroad; and

WHEREAS, by the enactment of chapter 272, Oregon Laws 1943, it is provided that whenever, by reason of the relocation or realignment of a state highway, fragments or parcels of land originally within the right of way are no longer needed for right of way purposes, then such eliminated fragments or parcels of right of way shall revert to and title thereto shall vest in the abutting owner or owners, or in those holding fee title thereto; and

WHEREAS, the parcels of land hereinafter described constitute and are parts and fragments of the old right of way of said Columbia River Highway prior to the relocation of said highway as herein stated, and said fragments or parcels of land are no longer needed for right of way purposes and therefore, pursuant to the provisions of said chapter 272, Oregon Laws 1943, said fragments or parcels of land may revert to and title thereto vest in the Oregon-Washington Railroad & Navigation Company as the owner in which fee title is vested;

NOW, THEREFORE, the Oregon State Highway Commission in regular session assembled, all members being present and affirmatively voting, does hereby resolve as follows:

1. There is hereby eliminated from the right of way of the Columbia River Highway and the State Highway Commission does hereby relinquish to the Oregon-Washington Railroad & Navigation Company all of the State's right, title, or interest of every kind and character in and to the following described parcels of real property situated in Multnomah County, Oregon, to-wit:

Parcels 1

All those parts of the abandoned right of way of the Columbia River Highway situate in Government Lots Two (2) and Three (3) and the Southeast Quarter of the Northeast Quarter (S.E. 1/4 of N.E. 1/4) of Section Twenty-two (22), Township Two (2) North, Range Seven (7) East of the Willamette Meridian, Multnomah County, Oregon, that lie

northwesterly of the northwesterly lines of those certain strips of land heretofore granted to the State of Oregon and County of Multnomah for highway purposes by agreement dated November 6, 1941 and southeasterly of the northwesterly line of the right of way of the Oregon-Washington Railroad & Navigation Company, leased to the Union Pacific Railroad Company. Also,

Parcels 2

All those parts of said abandoned highway right of way situate in Government Lot One (1) of Section Twenty-two (22), Township Two (2) North, Range Seven (7) East of the Willamette Meridian in Multnomah County, and in the Northwest Quarter of the Northwest Quarter (N.W. 1/4 of N.W. 1/4) of Section Twenty-three (23) said township and range in Hood River County that lie southeasterly of the southeasterly line of those certain strips of land heretofore granted to the State of Oregon, County of Multnomah and County of Hood River for highway purposes by agreement dated February 19, 1938. Also,

Parcel 3

All those parts of said abandoned highway right of way, situate in Government Lot Four (4) of Section Fourteen (14) said township and range that lie northerly of the southerly right of way line of said Railroad Company, which line is the southerly line of said abandoned highway right of way, excepting therefrom however any part of said abandoned highway right of way in said Government Lot Four (4) included within the limits of those certain strips of land heretofore granted to the State of Oregon and County of Hood River for highway purposes by said agreement dated February 19, 1938. Also,

Parcel 4

All those parts of said abandoned highway right of way situate in Government Lots Two (2) and Three (3) in said Section Fourteen (14) that lie northwesterly of the northwesterly line of that certain strip of land heretofore granted to said State of Oregon and County of Hood River for highway purposes by said agreement dated February 19, 1938. Also,

Parcels 5

All those parts of said abandoned highway right of way situate in Government Lot One (1) of Section Thirteen (13),

said Township Two (2) North, Range Seven (7) East that lie westerly of the easterly right of way line of said Railroad Company and which line is also the center line of said abandoned highway right of way, excepting therefrom however any part of said abandoned highway right of way in said Government Lot One (1) included within the limits of that certain strip of land granted to the State of Oregon and County of Hood River for highway purposes by said agreement dated February 19, 1938.

There is attached hereto, marked Exhibit "A" and made a part hereof, a blueprint or map on which are shown the above described parcels of land, the new location of the highway, and the new location of the railroad.*

2. The Commission does hereby declare it to be the purpose of the State by this resolution to divest itself of all its right, title, or interest in or to the above described parcels of real property and to vest in the Oregon-Washington Railroad & Navigation Company all of such right, title, or interest, and for such purpose the Commission does hereby authorize the execution of a quitclaim deed in favor of the Oregon-Washington Railroad & Navigation Company quitclaiming to said company all of the State's rights, interest, or title in and to the real property hereinbefore described.

3. That this resolution be entered in the minutes and records of the Commission and a duly certified copy thereof delivered to Oregon-Washington Railroad & Navigation Company, a like copy to the Board of County Commissioners of Multnomah County, Oregon, and a like copy to the Public Roads Administration.

The Commission considered, and ordered filed, communications from the Portland Chamber of Commerce, City of Portland, Multnomah Community Club and the Baker County Chamber of Commerce, in which the Commission was encouraged in its program of acquisition of roadside scenic strips.

The Attorney presented for the Commission's consideration a form of stipulation concerning the case of the United States of America versus the State of Oregon, et al., arising out of the War Department's acquisition of a state-owned stock-pile site, within the boundaries of Camp Adair. He advised that the stipulation provides for the payment of $100.00 for the land only, and petitions for an order fixing the value of the land and for the distribution of funds, but it does not include the state's claim for materials stock-piled on the land appropriated, which materials were taken and used by the Army. The state, he said, must seek recovery for said materials by some other procedure. He recommended acceptance of the stipulation.

---

*(Map filed Right of Way Abandonment and Retention File - No. 117.)

The Commission approved the recommendation by unanimous vote, and thereupon signed the stipulation.

The Assistant Attorney brought up for discussion a right-of-way settlement with J. G. Patterson, along South Sixth Street, in Klamath Falls. He advised that the highway embankment in front of Mr. Patterson's premises will be about seven-feet high, and that the embankment slope will extend onto Mr. Patterson's property a distance of about ten feet, which is the width of the strip on which the state wants to obtain a slope easement. Mr. Patterson, he said, has indicated a willingness to give the easement to the state for the sum of $100.00; however, he insists that the state construct a rock wall along the frontage, which would cost about $1,200.00. He declared Mr. Patterson's demand exhorbitant, and not within reason, because, if the state constructed the rock wall, then it would not need the slope easement from Mr. Patterson. He advised that the property is not needed immediately, and recommended that the matter be allowed to rest until the Commission orders the construction of this project. The Commission approved the recommendation by unanimous vote.

The Attorney brought up for discussion the Commission's condemnation case with Harry W. Hopkins and wife, which arises out of the reconstruction of the Oregon Coast Highway, at Depoe Bay, in Lincoln County. It appears that when this case came to trial, there was a dispute relative to the description of the property, there being those who allege that the Hopkins's store building encroaches on the highway right of way, while others, including highway department engineers, allege that the right of way description does not include any part of the building. He advised that it would be helpful if the Commission would adopt another resolution clarifying this point of discussion and definitely excluding any part of the real property that is occupied by the Hopkins building. Commissioner Schaupp moved the adoption of the following resolution with regard thereto, which motion was seconded by Commissioner Chessman, and carried by the unanimous vote of the Commission:

> WHEREAS, the Highway Commission on the eighteenth day of December, 1940, adopted a resolution by which the Commission declared the necessity for the acquisition of certain real property then owned by the defendants Harriett Beatrix Hopkins and Harry W. Hopkins, which real property was described in said resolution as follows:
>
> A parcel of land lying in Lot 8, Block 6, of Depoe Bay, situated in Section 5, Township 9 South, Range 11 West, W. M., Lincoln County, Oregon, the said parcel being described as follows:
>
> Beginning at the northwest corner of said Lot 8; thence South 89° 43' East along the north line of said lot a distance of 7.7 feet; thence South 4° 58' 30" East a distance of 50.2 feet to the south line of said lot; thence North 89° 43' West along said south line a distance of 4.1 feet to the southwest corner of Lot 8; thence

North 9° 08' West along the west line of said lot 50.7 feet to the point of beginning, containing 294 square feet.

AND, WHEREAS, in accordance with the terms and provisions of said resolution a condemnation proceeding was instituted in the Circuit Court of the State of Oregon for Lincoln County, which said proceeding is now pending and which proceeding was instituted for the purpose of acquiring the property described in the complaint and having the compensation and damages to be paid therefor assessed by a jury, which said real property described in the complaint is the same real property described in said resoluction; and

WHEREAS, it appears that there is disagreement between the defendants and the plaintiff with respect to the real property described in said complaint and described in said resolution, it being contended by the defendants that the real property described in said resolution and in said complaint includes real property upon which a portion of the store building owned by the defendants is situated; while on the contrary it is contended by the plaintiff that no part of the real property upon which defendants' building is situated is included in the real property described in the resolution and described in the complaint; and

WHEREAS, for the purpose of clarifying said issue with respect to the real property sought to be condemned the Commission directed that a description be prepared which will definitely exclude any part of defendants' real property occupied by defendants' store building; and

WHEREAS, there has been submitted to this Commission for consideration and approval the following description, to wit:

A parcel of land lying in Lot 8, Block 6 of Depoe Bay, situated in Section 5, Township 9 South, Range 11 West, W. M., Lincoln County, Oregon, the said parcel being described as follows:

Beginning at the northwest corner of said Lot 8; thence South 89° 43' East along the north line of said lot a distance of 7.7 feet; thence South 4° 58' 30" East a distance of 50.2 feet to the south line of said lot; thence North 89° 43' West, along said south line a distance of 4.1 feet to the southwest corner of Lot 8, as determined by the easterly line of the Roosevelt Highway dedication, said corner also being 101.9 feet west of the Iron Pipe now accepted as the southeast corner of said Lot 8; thence North 9° 08' West along the west line of said lot 50.7 feet to the point of beginning, containing 294 square feet.

This parcel is being acquired for right of way and lies westerly of a line 47 feet easterly from the center line of the reconstructed Oregon Coast Highway, formerly called the Roosevelt Highway, and does not include any part of the Variety Store Building occupying a part of said Lot 8.

AND, WHEREAS, it appears that the two descriptions given above cover and include one and same parcels of real property and do not include any of the real property occupied by defendants' building; and

WHEREAS, after the filing of the complaint in said condemnation proceedings the State, pursuant to the provisions of Chapter 529, Oregon Laws, 1939, took possession of the real property described in the complaint and in said resolution and constructed thereon a highway; and

WHEREAS, it appears that an amended complaint should be filed for the purpose of clarifying disagreements with respect to the particular real property sought to be condemned and for the purpose of vesting in J. H. Devers, Chief Counsel for the Oregon State Highway Commission, certain authority with respect to the conduct of said condemnation proceedings;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, all members of the Highway Commission being present and affirmatively voting, as follows:

1. That the resolution adopted by this Commission on the eighteenth day of December, 1940, be and the same hereby is amended in the following particulars:

A. The property sought to be condemned and appropriated shall be and is described as follows:

A parcel of land lying in Lot 8, Block 6 of Depoe Bay, situated in Section 5, Township 9 South, Range 11 West, W. M., Lincoln County, Oregon, the said parcel being described as follows:

Beginning at the northwest corner of said Lot 8; thence South 89° 43' East along the north line of said lot a distance of 7.7 feet; thence South 4° 58' 30" East a distance of 50.2 feet to the south line of said lot; thence North 89° 43' West along said south line a distance of 4.1 feet to the southwest corner of Lot 8 as determined by the easterly line of the Roosevelt Highway dedication, said corner also being 101.9 feet west of the Iron Pipe now

accepted as the southeast corner of said Lot 8; thence North 9° 08' West, along the west line of said lot 50.7 feet to the point of beginning, containing 294 square feet.

This parcel is being acquired for right of way and lies westerly of a line 47 feet easterly from the center line of the reconstructed Oregon Coast Highway, formerly called the Roosevelt Highway, and does not include any part of the Variety Store Building occupying a part of said Lot 8.

B. That J. M. Devers, Chief Counsel for the Oregon State Highway Commission, hereby is authorized and directed to file an amended complaint, in which amended complaint the real property sought to be acquired and condemned shall be described as given in the foregoing paragraph.

C. J. M. Devers, as Chief Counsel for this Commission, shall be and he hereby is authorized and empowered to take such action, do such things and make such commitments in the trial of said case as in his judgment will best preserve and promote the interests and welfare of the State and this Commission, and as will protect and preserve the lawful rights and interests of the defendants, consistent, however, with the Commission's declaration with respect to the area required.

D. That this resolution shall be entered in the minutes and records of the Commission as an amendment to said original resolution as of the 12th day of October, 1943.

The Commission recessed at 12:00 noon, for luncheon, and reconvened in the same room at 2:00 p. m. with the same persons present and participating.

Mr. Ralph Moody, Attorney, Salem, came before the Commission in regard to the claim of Contractor Homer G. Johnson, for extra compensation arising out of his contract No. 2390, with the State Highway Commission, for the construction of the Siletz-Toledo Section of the Siletz Secondary Highway, in Lincoln County. Mr. Moody advised that it was his intention to discuss the merits of this claim with the Commission at this meeting; however, due to the absence from the state of his associate Mr. Jay Bowerman, of Portland, who wishes to be heard on the subject, it would not be convenient to do so. He asked the Commission to postpone the hearing until its next meeting, when Mr. Bowerman will have returned from his eastern engagement. The Commission's Attorney advised that so far as he is concerned that will be satisfactory.

The Commission thereupon approved Mr. Moody's request. The Secretary was instructed to inform Mr. Moody when the date of the next meeting has been set.

The Commission considered and approved resolutions from the following counties and the City of Medford, with respect to certain state-owned real properties which heretofore have been abandoned by the state as rights of way because of highway relocations, rendering such properties of no value for state-highway purposes:

1. Resolution from the Clackamas County Court with respect to the abandonment of a portion of the old Cascade Highway, near the Clackamas Overcrossing.

2. Resolution from the Jackson County Court with respect to the abandoned section of the old Crater Lake Highway, north of Medford.

3. Letter from the City of Medford with respect to the abandonment of the old route of the Crater Lake Highway, within the city limits of Medford.

The Assistant Attorney presented the offer of Mr. A. Schubring to pay $250 for a small parcel of state-owned property at Tigard. He advised that this property is isolated, and is of no value to anyone except Mr. Schubring, who owns the abutting property. He recommended acceptance of the offer, notwithstanding that the price is slightly less than what the state paid for the property. The Commission approved the recommendation by unanimous vote, upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman.

Reconsideration was given by the Commission to the request of the Coos Bay Logging Company to purchase 2.2 acres of state-owned land, situate at the old Coos Bay ferry landing at North Bend. The State Parks Superintendent, who was present, recommended that the Commission do not sell this property, because it adjoins Simpson State Park and will be a convenience as a boat landing for people who patronize the park. The State Highway Engineer concurred in the recommendation. Motion was thereupon made by Commissioner Schaupp that the request of the Coos Bay Logging Company be denied. The motion was seconded by Commissioner Chessman, and declared by Chairman Banfield to have received the unanimous vote of the Commission.

The Commission discussed briefly matters pertaining to the acquisition of right of way along the new route of the Oregon Coast Highway, between Cannon Beach Junction and Cannon Beach, but deferred action thereon until its next meeting, in order to give County Judge Boyington, of Clatsop County, an opportunity to be heard on the subject.

The Commission, by unanimous vote, confirmed action as follows on certain State Park matters that were discussed with the State Parks

Superintendent during the progress of the Commission's Central Oregon trip, August 24 to 27, 1943, inclusive:

ACQUISITION OF JOHN DAY FOSSIL AREAS

The Commission authorized the Parks Superintendent to determine the necessary units to comprise the proposed John Day Fossil State Park. These units are located along the John Day Highway between Picture Gorge and Kimberly. The Commission asked for a report detailing the units in their relation to the park as a whole and requested that a description of the various units be prepared for the Right of Way Department that they may secure prices of the areas needed for the consideration of the Commission.

JOHN DAY WAYSIDE AREAS

The Commission authorized the Parks Superintendent to select the necessary timbered waysides between the junction of Camas Creek and the North Fork of the John Day River and Ukiah on the John Day Highway (Three Flags) and to prepare descriptions of said property that the Right of Way Department may secure options for the consideration of the Commission.

LAKE COUNTY CUTOVER WAYSIDES

The Commission authorized the Parks Superintendent to select the cutover bordering waysides between the west end of Drews Valley to the Lake-Klamath County line and to prepare descriptions of the necessary property for the Right of Way Department for negotiations as to cost for the consideration of the Commission.

PROPOSED CROWN POINT ADDITION

The Commission authorized the Parks Superintendent to negotiate for the NE¼ SW¼ of Section 30, and the west ten acres of the SW¼ SE¼ of Section 30, Township 1 North, Range 5 East. These two tracts connect Crown Point and the Crown Point loops. The area is particularly needed to eliminate signs and hot dog stands that the view from Crown Point to the east may not be despoiled. Descriptions will be prepared for the Right of Way Department for negotiation purposes.

PROPOSED SHORT SAND BEACH ADDITION

The Commission authorized the Parks Superintendent to prepare descriptions for the Right of Way Department for the purchase of cutover areas located in Short Sand Beach State Park described as follows: E½ NW¼ and that portion of the SW¼ NE¼, Section 6, Township 3 North, Range 10 West not already owned by the state for right of way purposes. This tract is a necessary unit and should have been bought with the standing timber. Lack of finances prevented its

acquisition. The purchase of the cutover area is necessary at this time.

CRASH OF BOMBER ON CAPE LOOKOUT

A four engined bomber landed on Cape Lookout State Park, doing minor damage to the park. Nine of the ten members of the crew were killed. The War Department Air Corps sent to the Parks Superintendent a Damage to Property Certificate requesting his signature as to damage done or not done. As the damage done to the park was of minor nature the Parks Superintendent recommended that no damage claim be made and the Commission approved the same.

BLY MOUNTAIN PROPOSED CUTOVER ACQUISITION

The Parks Superintendent outlined to the Commission the proposed acquisition of the cutover areas on Bly Mountain while passing through. Commissioner Schaupp stated that the property had recently been sold and that he doubted if the new owner would be willing to sell the bordering waysides; that he would try at a later date to contact the party to see what could be done. Further action was held in abeyance until Commissioner Schaupp's report is made.

PROPOSED ACQUISITION OF ANTELOPE CANYON SECTIONS

The Commission authorized the taking of options on four forties located in Antelope Canyon on the Klamath Falls-Lakeview Highway. These four forties are located between Drews Gap and Booth State Park. They are a complement to four forties already acquired and are necessary in the completion of the wayside between the two above points.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following State Park matters:

1. Proposal of Mr. Seneca Fouts, Portland, to sell to the state for the sum of $5,000, 160 acres of land, situate adjacent to the Columbia River Highway, at Mitchell Point, Hood River County:- The Parks Superintendent advised that Mr. Fouts originally asked $30,000 for this property, but has reduced his price to $5,000. He recommended against the purchase of the property, even at the reduced price, because the property is mountainous in character, has no direct bearing on the highway, and is not particularly suitable for state-park purposes. The Commission approved the recommendation.

2. Acquisition of wayside timber strips, in Douglas County:- The Parks Superintendent advised that he has effected an arrangement with the Douglas County Court for the preservation of 360 acres of wayside timber which the state has had under lease from the federal government since 1932. He advised that there are two

tracts, one containing 160 acres, located on the summit of Camas Mountain, between Roseburg and Coquille, and the other a 200-acre tract, adjacent to the Umpqua Highway at the end of the Elkton Tunnel. He explained that the former Highway Commission leased these properties from the federal government, under the Recreational Act of June 14, 1926, it being understood at that time that the state could purchase the property outright at some future time if it so desired; however, since then, the federal law has been amended so it is no longer possible for the state to purchase the properties, and it cannot acquire them except by exchange through the counties. The Douglas County Court, he said, has effected such an exchange, and is now ready to deed the two properties to the state at the rate of $1.00-per-thousand board feet for the timber standing thereon, or a total of $5,485. He recommended acceptance of this offer. After discussion the Commission approved the recommendation by unanimous vote, upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman.

3. Offer of the Henry Sengstacken Company, Marshfield, to sell to the state 140 acres of land adjoining Cape Arago State Park:- The Parks Superintendent advised that the Henry Sengstacken Company has offered to sell this tract to the state at the rate of $10.00 per acre, or a total of $1,400.00. The property, he said, has one mile of ocean frontage, and a portion of it will be needed as right of way for the Cape Arago Secondary State Highway, when such highway is extended southerly from its present terminus. He gave as his thought that, if the Commission approves this item, the road department should assume 50 per cent of the cost thereof, because of the value of this property from the right-of-way standpoint, the remainder of the purchase price to be assumed by the Parks Department. He advised that the area is not absolutely necessary to fill out the present park which already has a long frontage on the ocean; nevertheless, he is willing to assume 50 per cent of the purchase price if the Commission wants the property; notwithstanding that there are other park areas that he considers of more value from the parks standpoint. The Engineer advised that eventually the Cape Arago Secondary Highway will be extended down the coast, and probably will pass through this property; however, that is a long time in the future. The matter was discussed by the Commission at considerable length, during which the sentiment was expressed that the state should acquire all of the ocean-frontage property that it is possible to obtain, provided it is of value, and the price is not exhorbitant. In this particular instance, however, the Commission deferred its decision pending further investigation by the Parks Superintendent and the Engineer, and receipt of their joint recommendation with respect thereto.

4. Report on the sale of peaches and other fruit from The Cove Palisades State Park:- The Parks Superintendent advised that total receipts from sales aggregated $3,024.75, and that necessary expenditures, including labor, equipment, supplies, et cetera, amounted

to $2,355.49, leaving a net profit to the state of $669.26. The Commission approved the report and complimented the Parks Superintendent on his successful handling of this matter.

5. Financial report:-The Parks Superintendent submitted the following financial report on the activities of his department for the period of January 1 to September 30, 1943:

	1943 Budget	Credit	Gross Expenditures	Unexpended Balance
Acquisition:				
Coos County: L.J.Simpson (balance on Shore Acres)			$23,500.00	
Curry County: Newburgh State Park			2,892.96	
Linn County: Cascadia-Geisendorfer Account			450.00	
Tillamook County: Nehalem Sandspit-Peterson			12.50	
Legal Costs			263.92	
Total acquisition	$12,210.00		$25,119.38	$12,909.38 (Def.)
Betterment	none		395.68	395.68 (Def.)
Operation and Maintenance:				
Expenditures	46,757.28		28,697.43	18,059.85
Income:				
Sale of cinders-Round Butte		$4,000.00		4,000.00
Sales of fruit-The Cove State Park		1,827.26		1,827.26
Sale of danger trees-Salmon River Corridor		108.00		108.00
Rental of quarters		1,287.86		1,287.86
Transfer of balance from general fund-Champoeg Park		574.99		574.99
Total operation, etc.	46,757.28	7,798.11	28,697.43	25,857.96
Grand Total	$58,967.28	$7,798.11	$54,212.49	$12,552.90

The Commission approved the report by unanimous vote.

The Attorney brought up for discussion the proposed leasing of the Floras Lake State Park property, in Curry County, for use as a naval aircraft landing field. He advised that the Commission earlier in the year approved the leasing of the property under certain conditions which were later satisfied, and on July 7, 1943, executed a lease agreement with Curry County covering the matter; however, subsequent thereto, the Civil Aeronautics Administrator and the United States Navy revised portions of the county's resolution with respect thereto, in view of which it now seems necessary to amend the original lease agreement, to conform. The proposed change, he said, does not affect the conditions of the original lease, and, in view thereof, he recommended approval by the Commission. The Commission approved the recommendation, and thereupon, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, this Commission on the seventh day of July, 1943, entered into a lease agreement with Curry County, by which there was leased to Curry County for airport purposes certain real property located in said County; and

WHEREAS, there is attached to said lease and for certain purposes made a part thereof a form of resolution prepared by the Government for adoption by the County Court in connection with the operation and maintenance of said airport; and

WHEREAS, subsequent to the execution of said lease and prior to the adoption of said resolution by the County the Civil Aeronautics Administrator and the United States Navy revised parts of said resolution, which revision has been incorporated in the resolution actually adopted by the County; and

WHEREAS, it was deemed advisable that the original lease be amended to conform to said revised resolution adopted by the County; and

WHEREAS, an agreement amendatory of said lease has been prepared and has been duly considered by the Commission;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED:

1. That said amendatory agreement be approved and its execution by this Commission, for and on behalf of the State, authorized.

2. That J. M. Devers, as Chief Counsel for the Commission, be and he hereby is authorized to present said amendatory agreement to Curry County for execution and thereafter make appropriate record and filing of two executed copies of said agreement in the records and files of the Commission at Salem, Oregon, and that at least one executed copy be delivered to the County and one to the Civil Aeronautics Administrator.

The Attorney requested instructions with regard to the issuance of a duplicate warrant to Mrs. F. E. Garle, in connection with a real-property settlement, the original warrant having been lost in the mail. He advised that the amount involved is only $100.00, but, in conformity with standard practice, a duplicate warrant cannot be issued until the payee has furnished a bond in an amount double the amount of the original warrant. Mrs. Garle, he said, does not feel that she should be required to pay for a commercial bond, and she does not like to ask her friends to sign a personal bond. Furthermore, the Secretary of State will not issue the duplicate warrant unless the bond is filed in his office. Mrs. Garle, he said, is entitled to the full amount of the purchase price of her property, and should not be required to go to the expense of correcting a situation over which she had no control. He suggested that the Commission could reimburse Mrs. Garle for the expense of the bond, by

means of a separate voucher. After discussion the Commission referred the matter back to the Attorney to work out a solution.

The Assistant Attorney presented an offer from a Mr. Sam Alderson to purchase, for the sum of $75.00, several old buildings that were acquired by the State Highway Commission from the State Land Board, in connection with the acquisition of right of way for the revision of the Pacific Highway between Wolf Creek and Grave Creek, in Josephine County. He advised that these are small, old, dilapidated buildings which are of no value whatsoever to the state, and recommended that Mr. Alderson's offer be accepted. The Commission approved the recommendation by unanimous vote.

The Attorney brought up for discussion the settlement for property that is needed from Mr. F. R. Salway as extra right of way in connection with the improvement of the Miner Creek-Spencer Creek Section of the Oregon Coast Highway, in Lincoln County. He advised that Mr. Salway is rather a difficult man to deal with, and, because he is demanding that the state do certain things that appear to be unnecessary, it very likely will be necessary to acquire the property by condemnation. He requested authority from the Commission to institute the condemnation proceedings if he cannot reach a satisfactory settlement with Mr. Salway in any other manner. The Commission approved the request by unanimous vote. (Resolution to be adopted at next meeting.)

A letter was presented from the Oregon Lumber Company requesting the privilege of operating their logging trucks, which are ten feet wide, over the John Day Highway, from Dixie Summit to Bates, for a period of six weeks, to enable them to market the timber from a small tract that the company has recently acquired. The Commission denied the request as a matter of policy, it being the thought of the Commission that the operations would create too great a hazard to other traffic.

The Commission discussed a letter from the Oregon State Building and Construction Trades Council, requesting a conference for discussion of labor and wage matters. The Engineer advised that he discussed this matter with a representative of this organization some time ago, and believes that he knows what they have in mind. He was instructed to confer with the Trades Council and to make a written report to the Commission on the results thereof. The question whether or not to discuss the matter further with representatives of this organization will then be decided.

A letter was presented from Mr. Elmo E. Smith, Mayor of the City of Ontario, inquiring whether or not, under a recently enacted federal law, the State Highway Commission is willing to help the cities of Oregon in planning for future street improvements. The Engineer advised that according to the act referred to, the federal money is limited to the planning of improvements to state highways into and through cities, and it is not for city streets, and that the bill that is now pending in Congress limits the expenditure of federal funds largely to cities and towns having 10,000 or more population. He was instructed by the Commission to convey such information to Mr. Smith.

The Engineer asked the Commission to confirm the oral authority previously granted him to attend, at state expense, a meeting of the "Advisory Committee of the Northwestern States Development Association," which was held in Boise, Idaho, on October 4 and 5, 1943. The Commission approved the Engineer's attendance at such meeting, with the understanding that the expense involved would not exceed $50.00.

In this connection, the Engineer requested authority to attend the Congressional hearings with respect to the post-war construction bill now pending in Congress, when such hearings are held, in Washington, D. C. The Commission considered it important that the Engineer attend these hearings, and thereupon approved the request by unanimous vote, upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp. Motion was made by Commissioner Schaupp that all members of the Commission should also attend the hearings, if possible. The motion was seconded by Commissioner Chessman, and carried by unanimous vote.

The Attorney reported receipt of a letter from Mr. Brewer A. Billie, City Manager of Astoria, requesting the installation of additional speed-limit signs at the highway entrances into Astoria, designating a speed limit of 15-miles-per-hour for vehicles during dim-out periods. Commissioner Chessman suggested that perhaps the reasons that prompted the request have been satisfied, in view of the fact that the dim-out regulations have been modified since the request was made. The Commission referred the matter back to the Attorney to ascertain whether or not the city still wants the signs.

The Commission reviewed the bids received at the morning session, for state highway construction work, and for the purchase of a building in Milton, Oregon. It was decided unanimously to reject the bid received for the Baker-Weiser Junction Rock Production Project, on the Old Oregon Trail; and to refer to the Engineer the bids received for the Umatilla Oil Depot Access Road Project, with authority to award the contract to the low bidder, when certain conditions have been satisfied. The Commission decided to accept the low bid in each instance for the remaining projects, and to reject the offer submitted for the purchase of the building in Milton.

At 3:00 p. m. Chairman Banfield made the following announcement of awards:

"Baker-Weiser Junction Rock Production Project on the Old Oregon Trail, in Baker and Malheur Counties. One bid was received for this project, being that of the Rogers Construction Company, Dayton, Washington, in the amount of $98,524.00. The Commission rejects this bid.

"Wren-Philomath Section of the Corvallis-Newport Highway, in Benton County. 1.1 mile of rock surfacing; also furnishing crushed rock in stock piles. R. O. Dail and Warren Brothers, Portland, submitted the only bid for this project, in the amount of $16,050.00. The Commission awards this contract to R. O. Dail and Warren Brothers, at their bid of $16,050.00.

"Redmond-Marks Creek Rock Production Project on the Ochoco Highway in Crook and Deschutes Counties. E. C. Hall Company, Eugene, submitted the low bid for this project, in the amount of $46,800.00. C. H. Wheeler, Portland, submitted the second-low bid, in the amount of $48,780.00. There were eight other bidders. The Commission awards this contract to E. C. Hall Company, Eugene, at their low bid of $46,800.00.

"Lapine Rock Production Project on The Dalles-California and Fremont Highways, in Deschutes and Klamath Counties. E. C. Hall Company, Eugene, submitted the low bid for this work, in the amount of $55,000.00. T. W. Thomas, Ilwaco, Washington, submitted the second-low bid in the amount of $57,000.00. There were four higher bidders. The Commission awards this contract to E. C. Hall Company, Eugene, at their low bid of $55,000.

"Ashland-State Line Rock Production Project on the Pacific Highway, in Jackson County. E. C. Hall Company, Eugene, submitted the low bid for this project, in the amount of $23,900.00, and M. C. Lininger & Sons, Medford, submitted the next-low bid, in the amount of $31,160.00. There were three higher bidders. The Commission awards this contract to E. C. Hall Company, at their low bid of $23,900.00.

"Madras-Redmond Air Base Target Range Access Road Project, in Jefferson County. 1.42 miles grading, surfacing and oiling. Babler Brothers, Portland, submitted the only bid for this project, in the amount of $14,035.00. The Commission awards this contract to Babler Brothers, Portland, at their bid of $14,035.00.

"Cold Springs Rock Production Project on the Columbia River, Hermiston and Pendleton-Cold Springs Highways, in Umatilla County. Oscar E. Joelson, Eugene, submitted the low bid for this project, in the amount of $33,120.00, and E. C. Hall Company, Eugene, submitted the next-low bid, in the amount of $33,740.00. There were five other bidders. The Commission awards this contract to Oscar E. Joelson, Eugene, at his low bid of $33,120.00.

"Umatilla Oil Depot Access Road Project, in Umatilla County. 1.23 miles of grading, surfacing and oiling. Western Rock Company, Salem, submitted the low bid for this project, in the amount of $24,824.50; Newport Construction Company Portland, submitted the second-low, and only other bid, in the amount of $34,150.00. The Commission refers these bids to the Engineer with power to award the contract to the low bidder, when certain conditions have been satisfied.

Residence Building in Milton (formerly owned by Irene Troyer):

"The only bid received for this building was that of J. J. Howard, Milton, Oregon, in the amount of $60.00. The Commission rejects this bid."

The Attorney brought up for discussion the property settlement with J. A. Sansbury, concerning right of way needed for the proposed revision of the Oregon Coast Highway, at Gleneden Beach, in Lincoln County. He advised that he has secured an option from Mr. Sansbury, which provides for payment by the state of the sum of $3,500.00, which amount includes the sum of $1,200.00 for the remodeling of a house that, as the right-of-way line now exists, will encroach out into the right of way several feet. He suggested that it might be possible to reduce the width of the right of way about ten feet through the Sansbury property, if that would not be objectionable from the engineering standpoint, which would make the remodeling of the house unnecessary, and would save the state $1,200.00. He requested authority to consult with Mr. Sansbury on such basis. After discussion, the Engineer was instructed to ascertain definitely whether or not the width of the right of way can be reduced ten feet at this point without adversely affecting the proposed improvement. In the event there are no objections to such narrowing of the right of way, then the Attorney is to negotiate a new option with Mr. Sansbury on the basis of his report.

The Attorney also brought up for discussion a letter from Mr. L. M. Huntington, Attorney for Mr. Rey Early, President of the Arch Cape Land Company, with respect to the company's claim for damages that it alleges occurred to its property as a result of highway construction at Arch Cape Tunnel. He advised that Mr. Huntington has offered a compromise settlement in behalf of the company, which involves payment by the state of the sum of $3,000.00, for land and damages, and requires the state to clean up the premises. The Commission rejected the offer by unanimous vote, upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman; however, agreed to discuss the matter with Mr. Huntington at the next meeting of the Commission, if he wishes to be heard on the subject.

The Engineer presented a request from Guerin Brothers, contractors on the Clatsop County Airport, for permission to use the old state scalehouse at Warrenton Junction, in the weighing of materials for their project. He stated that the company will install its own scales and has declared its willingness to comply with all the

requirements that the Highway Commission may prescribe. Furthermore, the company will furnish the Highway Commission with a bond, in the amount of $500.00, to guarantee repairs to the state's property, should any damage occur thereto. In this connection, a letter was presented from L. M. Haynes, Civil Aeronautics Administration, endorsing the contractor's request. The Engineer recommended approval of the request for the duration of the current contract, provided the company furnishes the $500.00 bond. The Commission approved the recommendation by unanimous vote, and thereupon signed a form of permit covering the matter.

The Engineer brought up for discussion a slight modification of the plans for the Fern Creek-Monmouth Access Road in Polk County. He advised that the contract for this project was awarded on the basis of using the present road as to both grade and alignment, merely adding additional surfacing and constructing a new bridge at the Fern Creek crossing. As presently constructed, he said, the existing bridge is a little out of line, and it was his thought that when the new bridge is built it should be placed in the proper location, which could be done at no extra cost so far as the structure is concerned, but would involve an expenditure of about $15,000.00 for the approaches thereto. He requested authority for the additional expenditure, pointing out that while the road is now a county road it eventually will be designated a state secondary highway, inasmuch as it replaces the present secondary highway that has been closed through the Army Cantonment at Camp Adair, and it would be entirely wrong to build the bridge on improper alignment. He also pointed out the possibility of securing federal-access road moneys to pay the costs. After considerable discussion, the Commission by unanimous vote approved the change as recommended by the Engineer and authorized the use of state funds to finance the work, if federal funds cannot be obtained.

The Commission had under discussion a request from A. L. Harader and wife, Woodburn, to remove three oak trees which are located within the limits of the right of way of the Pacific Highway East, directly in front of the Harader's business establishment, known as "George's Place," in Woodburn. The Commission deferred a decision in this matter, pending inspection of the premises.

The Assistant Attorney brought to the attention of the Commission a proposed exchange of properties with the Union Pacific Railroad Company, on the Columbia River Highway, near Lindsey Creek, in Hood River and Multnomah Counties, the particular area being that which

was acquired by the state from Mr. and Mrs. Harper, north of the railroad right of way. He advised that the state acquired this property quite some time ago, and examination of the title record at that time showed that it was free and clear of encumbrances. It now appears that the railroad company has certain rights to the property, which it is willing to relinquish if the Highway Commission will let the railroad company have the use of certain state property on the opposite side of the railroad. If the Commission approves this transaction, he said, the state will acquire 4.42 acres, and will relinquish only 1.86 acres. He recommended approval of the exchange, in order to clear the state's title, and to forestall the sale of the railroad company's property to another buyer. The Commission approved the recommendation by unanimous vote.

The Assistant Attorney requested authority to purchase certain parcels of real property that are needed in connection with various highway improvements throughout the state. He presented a list of such properties together with offers that he recommended be made in connection therewith. After careful consideration of each item, the Commission approved the request and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

FRONT STREET PROJECT, CITY OF PORTLAND, PACIFIC HIGHWAY WEST

10162-Mead, George W. Right of Way	5,868 sq.ft. at 30¢ minus, Building	$1,750.00 3,250.00 $5,000.00	McCallister

10280	Mark Devlin Estate	" " "	650.00
6776	B. A. Young	" " "	320.70

After careful consideration, the Commission approved the request and the recommended offers. The following resolutions with regard thereto were adopted by the Commission by unanimous vote, upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Paul B. Peterson and D. P. Peterson, which property is located in the south half ($S\frac{1}{2}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 26, Township 28 South, Range 36 East, W. M., Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 11027, which property is being acquired for the purpose of securing roadbuilding materials therefrom in connection with the Rome-Princeton Highway;*

Real property owned by Joseph Fracasso and Mary Ann Fracasso, which property is located in Lots 1, 2, 7, and 8, Block 106, Caruthers Addition to Portland, Multnomah County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 8917, and which property is being acquired for right of way purposes in connection with the Front Avenue project on the Pacific Highway West;*

Real property owned by Etta Alexander and Pearl Hummel, which property is located in Lots 13 and 14, Block 30, Crescent, situated in Section 30, Township 24 South, Range 9 East, W. M., Klamath County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3, and is further identified in the records of the Highway Commission as file R 7488, and which property is being acquired for right of way purposes in connection with The Dalles-California Highway;*

Real property owned by Dorcas I. Bazinette, et vir., which property is located in the northwest quarter ($NW\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 31, Township 24 South, Range 9 East, W. M., Klamath County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4, and is further identified in the records of the Highway Commission as file R 10713, and which property is being acquired for right of way purposes in connection with The Dalles-California Highway;*

Real property owned by John A. Periman, et ux., which property is located in the northwest quarter ($NW\frac{1}{4}$) of Section 31, Township 24 South, Range 9 East, W. M., Klamath County, Oregon, and is more particularly described on the

attached sheets and designated as Parcel No. 5, and is further identified in the records of the Highway Commission as file R 10757, and which property is being acquired for right of way purposes in connection with The Dalles-California Highway;*

Real property owned by the Mark Devlin estate, which property is located in Government Lots 1 and 2 and in the south half ($S\frac{1}{2}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 17, Township 3 North, Range 18 East, W. M., Gilliam County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 6, and is further identified in the records of the Highway Commission as file R 10280, and which property is being acquired for right of way purposes in connection with the Columbia River Highway*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 39, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

WHEREAS, the Highway Commission, on the 18th day of May, 1939, adopted and entered in its records a resolution authorizing the acquisition by agreement, and in the absence of agreement by condemnation proceedings, of certain real properties, among which real properties were two parcels owned by B. A. Young and Lova Young; and

WHEREAS, because of the fact that said real property could not be acquired by agreement a condemnation proceeding was instituted in the Circuit Court of the State of Oregon for Douglas County; and

WHEREAS, subsequent to the adoption of said resolution and subsequent to the institution of said condemnation proceedings it was found necessary to acquire for right of way purposes an additional parcel of real property, which additional parcel is hereinafter described; and

WHEREAS, because of the necessity of acquiring said additional parcel of land and because of the fact that the Highway Commission has been unable to reach an agreement with the owners of said property for acquisition of the same by agreement it is necessary that the complaint heretofore filed be amended so as to include the said additional parcel;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the real property hereinafter described is necessary and is required for right of way purposes in connection with the further development, improvement, and reconstruction of the Pacific Highway in Douglas County, which said additional parcel of real property is described as follows, to wit:

> A parcel of land lying in Lot 1 of Section 36, Township 27 South, Range 6 West, W. M., Douglas County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to B. A. Young recorded in Book 96, Page 259, of Douglas County Record of Deeds; the said parcel being described as follows:

Beginning at a point on the northeasterly right of way line of the Southern Pacific railroad; said point being 100 feet distant westerly from (when measured at right angles to) the relocated center line of the Pacific Highway at Engineer's Station 1444+78.7; said point being also 2011.8 feet north and 1899.8 feet west of the southeast exterior corner of the W. C. Wagner D. L. C. #55 in Section 36, Township 27 South, Range 6 West, W. M.; thence along the northeasterly right of way line of said Southern Pacific railroad on a 704.7 foot radius curve left (the long chord of which curve bears North 73° 01' West 240.5 feet) a distance of 241.7 feet; thence North 42° 39' East a distance of 109.0 feet to a point which is opposite and 100 feet distant westerly from Engineer's Station 1447+00 of said highway center line; thence on a spiral curve to the right parallel to the center line of said Pacific Highway (the long chord of which curve bears South 46° 04' East 216.8 feet) a distance of 216.8 feet to the point of beginning; containing 0.23 acre.

2. That J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, be and he hereby is authorized and directed to amend the complaint now pending in the Circuit Court of the State of Oregon for Douglas County by incorporating therein the above described parcel of real property.

3. That this resolution be entered in the minutes and records of the Commission as of October 12, 1943.

The Commission considered the following requests for extensions of time within which to complete highway construction projects:

C. J. Eldon, contract No. 2557, for grading, surfacing and oiling the Wright Ranch-Milo Section of the Tiller-Trail Secondary Highway, in Douglas County, requested an extension of time from August 31, 1942, to September 3, 1943, within which to complete this job. He gave the following reasons for failure to complete the project within the specified time limit: (1) delays on account of right-of-way difficulties, (2) labor shortage, (3) losses incident to priority rating, which made it difficult to secure repair parts for equipment, (4) adverse weather conditions, particularly heavy rains in the fall of 1942, which flooded his plant; and numerous delays caused by wartime conditions. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are substantially correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Clifford A. Dunn, contract No. 2603, for grading, surfacing and construction of bituminous macadam, on the Rome Flight Strip, adjacent to the I.O.N. Secondary Highway, in Malheur County, requested an extension of time of nine days, from June 15 to June 24, 1943, within which to complete this job. He attributed his failure to

complete the project within the specified time limit to adverse weather conditions. The Engineer advised that the primary cause of the contractor's overrunning the time limit was his failure to start work on the project until November 10, 1942, some seventy days after the award of the contract. He recommended nevertheless that the extension of time requested be granted without penalty, because the state has not incurred any extra engineering expense in connection therewith, and the delay has not inconvenienced the general traveling public. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Jed Wilson, contract No. 2608, for the Banzer Bridge-Washington County Line Rock Production Project, on the Nehalem Secondary Highway, in Columbia County, requested an extension of time of twenty days, from June 30 to July 20, 1943, within which to complete his job. He attributed his failure to complete the project within the specified time limit to breakdown of his equipment, and difficulties in securing repair parts. The Engineer advised that the reasons given by the contractor for the delay are substantially correct. He further stated that the state has not incurred extra engineering expense because of the delay, and the public has not been unduly inconvenienced thereby. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Oscar E. Joelson, contract No. 2610, for the Buchanan Rock Production Project, on the Central Oregon Highway, in Harney County, requested an extension of time of twenty-two days, from June 30 to July 22, 1943, within which to complete this job. He advised that his failure to complete the project within the specified time limit was due to delays encountered in securing repair parts for his equipment. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are correct. He further stated that the delay would not affect the state's oiling program; neither would the state incur any additional engineering expense by reason thereof. He recommended that the extension of time requested begranted without penalty. The Commission approved the recommendation by unanimous vote.

Tru-Mix Concrete Company, contract No. 2612, for grading, surfacing and oiling the Tolo-Camp White Access Road, in Jackson County, requested an extension of time of fifty-nine days, from June 30 to August 28, 1943, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions and to labor shortages. The Engineer advised that the reasons given by the contractor for the delay are substantially correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

A. H. Saxton and Son, contract No. 2616, for the stock-piling of maintenance materials on the Trent-Salt Creek Falls Section of the Willamette Highway, in Lane County, requested an extension of time of twelve days, from July 31 to August 12, 1943, within which to complete this job. They gave no reason for their failure to complete the project within the specified time limit. The Engineer advised that the principal reason for the overrun of the specified time limit was high-water in the Willamette River from which the contractors obtained materials. Conditions were such, they said, that it was not practical for the contractor to work the gravel bars, and even after operations were started it was necessary on several occasions for the work to be suspended on such account. He recommended, in view of the circumstances, that the extension of time requested by granted without penalty. The Commission approved the recommendation by unanimous vote.

Porter W. Yett, contract No. 2626, for grading and paving the Vanport Junction Section of the Swift Secondary Highway, in Multnomah County, requested an extension of time of seventy-five days, from May 31, to August 14, 1943, within which to complete this job. He attributed his failure to complete the project within the specified time limit to unusually high water conditions which interfered with the operations. The Engineer advised that the reason given by Mr. Yett for failure to complete the job on time is correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

J. F. Johnston, contract 2630, for the construction of the Baker Creek Bridge on the Scholls Secondary Highway, in Washington County, requested an extension of time of twenty-five days, from July 31, to August 25, 1943, within which to complete this project. He attributed his failure to complete the project within the specified time limit to delays in the delivery of needed materials. The Engineer advised that the contractor's statement as to the reason for the delay is correct. He recommended, in view thereof, that the extension of time requested by granted without penalty. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contracts Nos. 2557, 2603, 2608, 2610, 2612, 2626, 2630, 2639, and 2646, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission, on motion of Commissioner Schaupp, which was seconded by Commissioner Chessman:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway

projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2557, with C. J. Eldon, for grading, surfacing and oiling on the Wright Ranch-Milo Section of the Tiller-Trail Secondary Highway in Douglas County, completed September 3, 1943;

Contract No. 2603, with Clifford A. Dunn, for grading, surfacing and bituminous macadam on the Rome Flight Strip Project, in Malheur County, completed June 24, 1943;

Contract No. 2608, with Jed Wilson, for furnishing crushed rock in stockpiles on the Banzer Bridge-Washington County Line Section of the Nehalem Secondary Highway, in Columbia County, completed July 20, 1943;

Contract No. 2610, with Oscar E. Joelson, for furnishing crushed rock in stockpiles on the Buchanan Section of the Central Oregon Highway, in Harney County, completed July 22, 1943;

Contract No. 2612, with Tru-Mix Concrete Co., for grading, surfacing and oiling on the Tolo-Camp White Access Road Project in Jackson County, completed August 28, 1943;

Contract No. 2626, with Porter W. Yett, for grading and paving on the Vanport Junction Section of the Swift Secondary Highway, in Multnomah County, completed August 13, 1943;

Contract No. 2630, with Johnston Bros., for construction of a bridge over Baker Creek, on the Scholls Secondary State Highway, in Washington County, completed August 25, 1943;

Contract No. 2639, with Edlefsen-Weygandt Co., for grading and paving on the Yeon Avenue-Nicolai Street Access Road Project, in Multnomah County, completed August 30, 1943;

Contract No. 2646, with E. C. Hall Co. and J. C. Compton, for oiling on the Suver Road-Wells Road Section of the Independence-Granger County Road, in Benton and Polk Counties, completed September 3, 1943;

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Standard Oil Company, surrendering the lease of certain property adjacent to the Oregon Coast Highway, in Gardiner;

Agreement with Umatilla County relative to the maintenance of the Umatilla Oil Depot Access Road;

Amendatory agreement with Curry County with respect to the use of Floras Lake State Park as a United States Naval Aircraft Landing Field;

Permit authorizing Guerin Bros., contractors, to use the state's scale site at Warrenton Junction;

Stipulation with the United States of America, relative to a small tract of state-owned land within the boundaries of Camp Adair Army Cantonment;

Quitclaim deed conveying unto the Union Pacific Company portions of the right of way of the old Columbia River Highway, in Multnomah and Hood River Counties;

Easement granting to the United States Government usage of certain state-owned property in Lincoln County;

Easement granting to the United States Forestry Service the right to use certain highway property adjacent to the Oregon Coast Highway, at Waldport Ranger Station;

Supplemental recreational application, with respect to the lease of government-owned lands situate in the SE¼ of the SE¼ of Section 1, Township 16 South, Range 7 West, W. M., in Lane County;

The Commission had under discussion the setting of a date for its next regular meeting, and decided to hold such meeting on November 8, 1943, unless such time interferes with attendance at the committee hearings on the post-war highway construction bill, in Washington, D. C. The Secretary was instructed to make the usual arrangements to hold the meeting in the auditorium of the Public Service Building, Portland. (Meeting date later set definitely as Monday, November 8, 1943.)

There being no further business to come before the Commission at this time, the meeting was adjourned at 4:45 p. m.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

..., 194..

Portland, Oregon, November 8, 1943

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner A. W. Schaupp arrived at 10:30 a. m.

Bids as follows, for highway construction work and for the sale of a building at Gardiner, were opened and read in conformity with previously published notices, following which Chairman Banfield announced that the awards of contracts would be made at 2:30 p. m. in the same room:

OLD OREGON TRAIL
BAKER-WEISER JUNCTION ROCK PRODUCTION

Western Rock Company	$77,410.00
M. C. Lininger & Sons	78,710.00
Rogers Construction Company	90,070.50
C. H. Wheeler	91,638.00

CROOKED RIVER AND CROOKED RIVER-PAULINA SECONDARY HIGHWAYS
REPAIR OF FOUR BRIDGES

J. F. Johnston	$16,265.00
Norris & Philpott	17,904.00
Tom Lillebo	21,962.00
Lindstrom Bros.	23,772.50

OREGON COAST HIGHWAY
HUNTER CREEK-LONE RANCH CREEK ROCK PRODUCTION

R. O. Dail & Warren Bros., Inc.	$41,000.00
Rogers Construction Company	43,650.00

CENTRAL OREGON HIGHWAY
JUNTURA-HOPE ROCK PRODUCTION

R. O. Dail & Warren Bros., Inc.	$51,820.00
Western Rock Company	52,060.00
Rogers Construction Company	55,512.50
C. H. Wheeler	60,608.00

SERVICE STATION BUILDING IN GARDINER

No bids received

The Commission by unanimous vote approved the minutes of the Highway Commission meetings that were held on October 11 and 12, 1943.

The Engineer explained briefly the matters concerning which delegations were scheduled to appear at this meeting.

The Commission discussed the Engineer's letter of November 3, 1943, directed to Chairman Banfield, with respect to waterway conditions in Willow Creek, in the city of Heppner, concerning which Mayor Turner of Heppner complained to the Commission at the meeting in Heppner on October 25. (See letter in general files for details.) It appeared from the report that the overflowing of Willow Creek is not directly attributable to a constricted waterway under the bridge, but was probably caused by the lodging of debris in the Willow Creek channel at some point upstream from the bridge. In view of this report, the Commission decided unanimously not to take any corrective measures at the present time; however, instructed the Engineer to bear the matter in mind and observe the conditions during the next flood period.

The Engineer reported on the request of Mr. W. B. Snider, Paisley, for snow removal on a four-mile section of the Clover Flat County Road which extends southerly from the town of Paisley, the cost of which Mr. Snider stated would be paid by the county. He advised that there is insufficient snow-removal equipment available at the Paisley headquarters to handle any additional work of this kind, particularly in view of the Commission's agreement with the army authorities for removal of snow from emergency landing strips, one of which is located at Alkali Lake, and will be serviced from the Paisley headquarters. He pointed out that the request for the removal of snow from the county road mentioned by Mr. Snider was made by Mr. Snider as an individual and did not come from the county court which has not indicated as yet that it would pay for the work. After discussion, the Commission decided unanimously not to authorize the performance of such snow removal operations unless requested to do so by the county court and not then unless there is equipment available to do the work without handicapping similar operations on state highways, and assurance is given by the county court that the state will be reimbursed for the expense involved.

County Judge J. B. Kirk and County Engineer C. P. Fauerso, Wasco County, came before the Commission with regard to the claim of J. O. Chastain and others for damages to their irrigation flume which partially occupies the right of way of The Dalles-California Highway near Tygh Valley. Judge Kirk advised that the owners of this flume consider that it is the obligation of either the county or the state to maintain it, alleging an agreement covering the matter when the highway was reconstructed along this section; however, diligent search of the county and the state records fails to reveal any such written agreement and, while there may have been some such an arrangement it apparently never was reduced to writing. He said that this matter is of quite long standing and that the owners who are urging disposal of the case for all time have indicated a desire to be reasonable in their demands. Any arrangements to that end, he said, should be covered by written agreement. Judge Kirk went on to say that the county acquired the right of way for the

highway in the first instance and turned it over to the state at which time, the court feels, the county's responsibility ceased; also, that the existing flume which was constructed by the state as a replacement for an irrigation ditch that interfered with the highway improvement was not well supported and, as a result, slid out of line so that it no longer functions properly.

Mr. Fauerso gave as his thought that the owners have just cause for complaint and suggested that the matter could be satisfactorily disposed of if the flume were replaced with concrete pipe placed on proper footings.

Chairman Banfield inquired whether or not the county court would pay 1/3 of the cost of the repairs. Judge Kirk replied that he thought that the county court would be willing to cooperate to such extent but could not say definitely until he had consulted the other members. The Commission thereupon agreed to pay 1/3 of the cost to repair the flume with the understanding that that would definitely complete the state's obligation.

The matter of performance of the work was then discussed and it was decided definitely that it would not be done with state forces, inasmuch as state workmen cannot be spared for the purpose. It was mutually agreed that negotiations with the owners of the flume should be carried on by the county court and the results thereof transmitted to the Commission. If satisfactory, an appropriate form of agreement will then be prepared for execution by all parties.

Following the discussion of this matter Judge Kirk filed with the Commission a list of projects that the Wasco County Court wants the Commission to consider in the formulation of its post-war construction program.

The Secretary submitted a report on overweight violations that have been committed during the month of October by the following log haulers: Beryl Jackson, Garibaldi; Peter Murphy, Grand Ronde; G. R. Van Vleet, Cannon Beach; Harold D. Duncan, Seaside; Hugh H. Honnen, Falls Creek; and Currier Lumber Company, Springfield.

The Commission discussed these violations but decided to take no special action against the offenders, it being considered advisable to let the State Police handle the situation in accordance with previous understanding which requires the unloading of the excess weight in each instance. The Engineer was instructed to keep the Superintendent of the State Police advised of the weighmaster's schedule, particularly as to the commencement of weighing activities in a new or isolated district, so that arrangements can be made for a State Police Officer to be present when weighing operations are under way.

In this connection the Secretary reported receipt of a communication from the Oregon War Finance Committee relative to the overweight load that was observed by highway department weighmasters on September 18, 1943, on a truck owned by the Ostrander Logging Company. According to this letter the Finance Committee takes full responsibility for the violation because it was at their request that the overload occurred, the logs being used as an

exhibit during the Portland War Bond Invasion Exposition. The Committee asks the Highway Commission to intercede in its behalf so as to secure relief from the payment of the fine imposed by the Justice of Peace at Molalla. After discussion the Commission denied the request in view of its past efforts to secure the proper loading of logging trucks, and because it was thought that to do so would react adversely in the disposition of similar cases in the future; however, the Commission decided unanimously not to impose an additional penalty for this offense.

Mr. David Eccles, State Administrator, War Savings Staff, appeared before the Commission later in the session with respect to this matter. He advised that the fine imposed by the Justice of Peace amounted to $100.00; however, due to the fact that the fine was not paid when due, an extra $81.00 was added. He asked the Commission to intercede with the Justice in order that the Treasury Department may be relieved of payment of both fine and penalty and advised that the Justice of Peace has stated his willingness to do whatever the Highway Commission requests in the matter.

Chairman Banfield advised that it is now too late for the Commission to act. It was his thought that the Commission cannot overlook this offense without doing a gross injustice to other log haulers, and without deviating from the Commission's state wide policy with respect to the penalizing of such operators for overloading their equipment. Commissioners Schaupp and Chessman concurred. It was thereupon decided not to interfere with the imposition of the fine.

The Secretary also reported overweight violations committed during the month of October by freight carriers who are operating under emergency transportation permits. The Commission decided not to take special action against any of these carriers except the Los Angeles-Seattle Motor Express, whose equipment was observed by State Police Officers on October 19, with an unauthorized overweight load of general freight. It appears from the police report that the driver was arrested and brought before the Justice of Peace at Klamath Falls who allowed him to proceed with the overload upon being assured that a permit had been issued by the Highway Commission and was on file in the company's Seattle office, such information being confirmed by telephone to that office. The Secretary advised that inspection of the records reveals that no permit has ever been issued covering the equipment involved in this violation; hence, the information given by the truck driver to the Justice of Peace was untrue and not in conformity with the facts. He was instructed by the Commission to again check the records and to bring the facts to the attention of the District Attorney of Klamath County in the event the report is found to be correct.

In this connection the Commission had under discussion the adoption of a policy to be followed hereafter in connection with the granting of special permits for the movement of overweight and/or overdimension loads, other than logs, poles or piling, over state highways. The Secretary presented the following rules heretofore adopted by the former Highway Commission on June 12, 1941, and as slightly revised by the Engineer subsequent thereto:

1. Individual axle loads may exceed 18,000 pounds but shall not exceed 19,000 pounds.

2. The gross weight of any group of axles spaced eighteen (18) feet or less apart shall not exceed that determined by the formula 715 x (L+40), provided that the gross weight of any individual axle in such group shall not exceed 19,000 pounds. (This is equivalent to the gross weight provided by the formula 650 x (L+40) plus ten (10) per cent.)

3. The gross weight of any vehicle of combination of vehicles having an overall wheel base of more than eighteen (18) feet shall not exceed that determined by the formula 750 x (L+40), except that when "L" is 47' 9" or less than 47' 9" the formula 775 x (L+40) may be used.

4. The tire width of any individual wheel or axle shall be sufficient to provide one inch of tire width (manufacturer's rating) for each 600 pounds of the gross weight of such wheel or axle.

5. The maximum height of any vehicle and load shall not exceed fifteen (15) feet, where the overhead clearance permits such height.

6. The maximum width of vehicle and load shall not exceed twelve (12) feet and the maximum length of vehicle and load, involving an overwidth, shall not exceed sixty (60) feet.

7. (Incorporate rules concerning logs).

8. Any application to move any vehicle or combination of vehicles and loads exceeding the weights and dimensions set forth in the above rules must receive the consideration of the State Highway Commission.

After discussion the Commission by unanimous vote adopted such rules as its policy with respect to movements of this kind and authorized the Engineer to approve issuance of permits in conformity therewith, except that, as to Rule No. 8, the Commission further authorized him to pass on applications for permits covering movements that exceed the standard prescribed weight and dimension limitations without specific approval of the Commission, if, in his opinion, such movements can be made, in any specific instance, without undue hazard to the public and without excessive strain on the highway facilities.

The Engineer asked the Commission to confirm the authority previously given him by letter to advertise for bids to be received at the next meeting of the Commission, for the furnishing of maintenance materials for the Heppner-Spray Secondary Highway in Morrow County, which work is estimated to cost $19,500. The Commission confirmed such letter of authority by unanimous vote.

A letter was presented from Lt. Col. Ralph A. Tudor, District Engineer, U. S. War Department, concerning the reconstruction of the North Santiam Road between Mill City and Detroit. Colonel Tudor explains that the War Department is now preparing plans and specifications for the construction of the

Forest Highway Section which extends from a place known as Niagara to Detroit, such project being planned for immediate post-war construction, and inquires as to the plans of the Highway Commission to construct the remaining section between Niagara and the end of the present improved section at Gates, a distance of about four miles. The Engineer confirmed a statement by Colonel Tudor that the reconstruction of the state section is a vital prerequisite to the construction of the Forest Highway Section and recommended that the work be done at the same time that the army undertakes the construction of the Forest Highway Section, so as to insure the completion of both projects simultaneously. He estimated that the state's section would cost about $400,000.00 and advised that it is a meritorious project, well qualified for undertaking in the post-war program.

After considerable discussion the Commission voted unanimously to proceed with the construction of the state section as soon as the army and the Public Roads Administration commence the improvement of the Forest Highway Section, and ordered that Colonel Tudor be so informed.

A letter was presented from the Hood River County Court urging the Commission to complete the reconstruction of the Hood River Secondary Highway No. 281 north from Parkdale. The Commission denied the request for immediate undertaking; however, instructed the Secretary to inform the Court that the Commission will be pleased to consider the project in the formulation of its post-war construction program. He was also instructed to make similar replies to the following requests for highway improvements:

Request from L. W. Dierking, Homedale, Idaho, for the improvement of the Oregon Section of the road which extends from Adrian, Oregon, to Homedale, Idaho;

Request from Oregon Pacific Highway Association, Inc., for the preparation of plans and specifications for the improvement of the Pacific Highway as a post-war project.

Petition from tax payers of Sherman, Wasco, and Gilliam Counties, and letter from Barlows Gate Grange, for the improvement of Shearers Bridge Secondary Highway; also for the construction of a new highway extending westerly from Tygh Valley through Wamic, to connect with existing highway to Portland.

Mr. Ray Early, representing the Arch Cape Land Company, and his Attorney, Mr. Walter Huntington, Portland, came before the Commission with respect to the company's claim for damages that it alleges occurred to its property just south of Arch Cape Tunnel in Clatsop County, by reason of the construction of the Oregon Coast Highway at this point. Mr. Huntington offered the following compromise settlement of the claim:

1. The state to clean up all of the debris on the claimant's property, caused by the highway improvement.

2. The Arch Cape Land Company to deed to the state 3½ acres of land that the company believes the state needs to accommodate the highway fill.

3. The state to pay the Arch Cape Land Company the sum of $3,000.00 in cash as settlement in full of the claim.

The matter was discussed at some length during which the Attorney advised that the former Highway Commission agreed at one time to pay the company $1,500.00 for the 3½ acres and to clean up the premises if the company would agree to such settlement. He recommended that the Commission renew such offer, which, he said, is $1,500.00 less than the compromise offer suggested by Mr. Huntington. The Commission took the matter under advisement but agreed to give the Arch Cape Land Company its answer before the meeting adjourns. The matter was reconsidered following the departure of Messrs. Early and Huntington. Chairman Banfield then stated his willingness to settle with the company on the following basis: the state to pay to the company $500.00 an acre for the 3½ acres concerned and to clean up the company's premises; the company to deed the 3½ acres to the state and to accept such settlement as final. Commissioners Schaupp and Chessman stated their approval of such arrangement, making the decision unanimous. The Attorney was instructed to advise Mr. Huntington of the action taken.

The matter of allowing the Ostrander Railway and Timber Company to operate its logging trucks at grade across two secondary highways at Molalla in Clackamas County was discussed by the Commission. The Commission voted unanimously to deny the company such privilege in view of the report made by the Engineer on this subject at the previous meeting and declared such action as its general policy to be followed hereafter in the disposal of grade crossing matters.

A letter was presented from the Gardiner Lumber Company, Gardiner, Oregon, requesting the privilege of constructing a railroad spur track on the right of way of the Oregon Coast Highway from a point near the mouth of Smith River to the company's mill property in Gardiner, a distance of about 1 1/8 miles, with a grade crossing of the highway at the southerly end thereof. The Engineer advised that the encroachment of the spur track on the highway right of way as a temporary proposition would not be objectionable if the track were located a sufficient distance from the traveled portion of the roadway; however he recommended against permitting the company to construct its track across the highway at grade level because of the hazard that would be created to highway traffic. He recommended that the company be authorized to construct its track on the highway right of way as a temporary expedient provided it will conduct the track over the highway at the point of crossing by means of an overpass constructed in conformity with a design approved by himself. The Commission approved the recommendation by unanimous vote and referred the matter back to the Engineer and the Attorney to work out the details.

The Commission had under discussion a request from the Ci y of Lebanon for approval of the designation of the following described truck

by-pass route in the City of Lebanon, and of the installation of stop signs prohibiting traffic from entering such route without first coming to a stop:

> Beginning at the intersection of Main Street (Santiam Highway) and Milton Street, and extending east on Milton Street to Williams Street; thence north on Williams Street to Wheeler Street; thence west on Wheeler Street to its intersection with Main Street (Santiam Highway).

The Engineer advised that the city has already passed appropriate ordinances both as to the routing and the signing and is simply asking the Highway Commission to approve the same as is required by law. He recommended approval of the designation and the installation of the stop signs subject to the condition that Grant Street traffic shall not be required to stop before entering Williams Street and that Santiam Highway traffic shall not be required to stop at the Wheeler Street and Milton Street intersections. The Commission approved the recommendation by unanimous vote on the condition that the designation of this by-pass route will in no way obligate the state to maintain such route or to be in any way responsible for its maintainance. The Engineer was instructed to convey the action to the Lebanon City Council.

In this connection the question arose whether or not the Commission should make provision in its 1944 budget for the improvement of city streets that are not on state highway routes, as has been done during the past two years. In view of the fact that the 1943 Legislature adopted legislation which provides that a certain percentage of state highway funds shall hereafter be allotted to cities and towns for street improvements, the Commission decided by unanimous vote not to continue such street improvement program after this year and ordered that the cities be informed of the action taken.

The Engineer requested authority to purchase six tractor loaders of one-half-yard capacity for use by paving plant crews as a substitute for wheelbarrow men. He estimated the cost at $2,700.00 each or a total of $16,200.00, and recommended approval of the purchase because of the existing labor shortage. After discussion motion was made by Commissioner Chessman that the Engineer be authorized to purchase such equipment. The motion was seconded by Commissioner Schaupp and received the unanimous vote of the Commission.

The Commission also authorized the purchase of a second-hand truck trailer from Mr. Art Eldropp, Langlois, Oregon, at a cost of $850.00. The Engineer advised that this trailer can be used to good advantage by the Bridge Superintendent at Coquille in connection with the transportation of a pile driver which he uses on bridge work. The trailer that the Superintendent is now using, he said, is not standard and has no brakes; also, that a new trailer of the type that Mr. Eldropp has to offer would cost about $1,600.00 if it could be purchased, but none are available.

The Engineer requested instructions relative to the disposal of certain miscellaneous properties consisting of a cash register, candy jars and a

glass show case that have been salvaged from the Perkins Service Station at Gardiner which was recently acquired by the Commission. He estimated the value of the cash register at $3.00, the show case at $5.00 and the candy jars at nothing and suggested that this material be sold at private sales for whatever can be gotten for them. Commissioner Chessman suggested that the candy jars would be of value to the State Fish Commission. The Engineer was instructed to contact a representative of such Commission and to let them have the jars without cost if they can use them. As to the remaining articles, the Commission deferred a decision until later in the session at which time there was also considered by the Commission the matter of the disposal of the service station building which was advertised for sale at this meeting but for which no offers were received. At such time motion was made by Commissioner Schaupp that the Engineer be authorized to sell the building and its contents at private sale and to the state's best advantage. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission.

The matter of continuing the special police guard that has been employed for some time past to guard the Umpqua River Bridge on the Oregon Coast Highway at Reedsport was discussed. The Engineer gave as his thought that special police guards on this structure no longer are necessary in view of the fact that an operator is maintained on this structure 24 hours per day who could act in such capacity if he were deputized as a special officer. He recommended that the services of the special police guard be dispensed with and that the Superintendent of the State Police be requested to deputize the bridge operator as a special officer, as was done in the case of the operators on the Interstate Bridge between Portland and Vancouver. The Commission approved the recommendation by unanimous vote provided the Superintendent of State Police will deputize the bridge operator.

The Engineer reported that on October 19, 1943, in conformity with authority previously given him by the Commission he awarded to the Western Rock Company of Salem, the contract for the construction of the Umatilla Oil Depot Access Road, bids for which were taken by the Commission on October 12, 1943, the bid of this company being the lowest submitted and the conditions of the award being satisfied. The Commission approved the award of this contract as reported.

The Commission discussed briefly and referred to the Engineer for investigation a letter from Mr. Ralph J. Staehli, Portland, suggesting a method of quickly weighing loads of logs. It was Mr. Staehli's thought that the device that he has in mind could be made available to the Highway Commission without delay and that its use would end for all time the constant argument as to the weighing of such loads in the woods.

The Secretary presented the application of the E. D. Hamacher Lumber Company, Klamath Falls, for permission to "skid" logs across the Klamath Lake Secondary Highway in Klamath County at different locations between mile posts 19.40 and 22.30. The Commission as a matter of policy denied the request by unanimous vote.

The Engineer asked the Commission to confirm authority granted by letter for C. B. McCullough, Assistant State Highway Engineer, to attend the meeting of the American Association of State Highway Officials which is to be held in Chicago, December 1, 2 and 3, 1943. The Commission by unanimous vote approved Mr. McCullough's attendance at this meeting if there are no objections on the part of Governor Snell as to the out-of-state travel expense. The Commission by unanimous vote also authorized the State Highway Engineer to attend at state expense the meeting of the Advisory Committee to the Northwest States Development Commission which is to be held in Spokane, Washington, November 16 and 17, 1943.

The Secretary presented a resolution from the County Court of Curry County with respect to the abandonment of the old right of way of the Oregon Coast Highway in the town of Brookings. The Commission approved the resolution and ordered it filed.

The Secretary also presented a letter from the City of Klamath Falls requesting state cooperation in the preparation of a general plan of arterial highway development within and around the City of Klamath Falls, for post-war undertaking. The Commission approved the request by unanimous vote as a matter of general policy which was heretofore established in connection with a similar request by the City of Eugene. The Engineer was authorized to assist the City of Klamath Falls to the same extent that the City of Eugene was aided in its problem.

A letter was presented from Mr. L. L. Lombard, Klamath Falls, requesting permission in behalf of the Knights of Columbus of that city to maintain "way stations" on state highway approaches to Klamath Falls for the benefit of men in the armed service. The Commission referred the matter to the Engineer for investigation, with authority to approve the request if this case is similar to those recently approved by the Commission at Camp White and at Florence and if the Knights of Columbus will meet the requirements.

County Judge Guy Boyington, Clatsop County, was present and discussed with the Commission matters pertaining to the acquisition of right of way and wayside areas along the new location of the Oregon Coast Highway between Cannon Beach Junction and Cannon Beach. Judge Boyington advised that Clatsop County approves of the Highway Commission acquiring sufficient land to accommodate the new highway between these two points but for several reasons objects strenuously to the taking of extra land beyond the limits of the right of way. He pointed out that the Crown Willamette Company, which owns a considerable part of the cut-over lands between Cannon Beach Junction and the summit westerly thereof, already has reforested a considerable portion of this area and plans to continue such reforestation work, in view of which, in his estimation, the state would gain nothing so far as road side beauties are concerned by acquiring title to such properties. He gave as his belief if the state acquires this property, that it should be under the control of the State Forester rather than the State Highway Commission, because under a new law the county will benefit by future timber sales which would not be possible if the land were under the control of the State Highway Commission.

It was his thought that the Legislature, when it authorized the Highway Commission to acquire parks and recreational areas, did not intend that the Commission should embark on a program of forest preservation which, in his estimation, rightfully belongs to the Forestry Department, but intended to limit the Highway Commission to the acquisition of strictly park areas and not the wayside strips. Judge Boyington also mentioned the hazard of fire, pointing out that if a fire originates on land owned by the Commission and spreads to other properties then, under the state law, the Highway Commission could be held responsible and would have to pay losses. He gave as his opinion that it would be unwise for the Commission to place itself in a position of that kind and that the Commission should limit its purchases of real property to strictly state parks and areas of value from the view standpoint. This matter was discussed at considerable length but no decision was reached, the Commission deferring its action pending a complete report from the Engineer who was instructed to inform the Commission just what land is needed and to furnish a map visually disclosing the area. Judge Boyington was informed that he would be given another opportunity to discuss the matter with the Commission again when the Engineer's report has been received. Commissioner Chessman stated his desire and intention to inspect the properties again before the Commission takes its final action. This concluded the discussion of this subject.

The Commission inquired as to the attitude of Judge Boyington with respect to the claim of the Arch Cape Land Company which was discussed with Messrs. Huntington and Early earlier in the session. Judge Boyington advised that he is not qualified to pass on the matter. He did state, however, that the right of way through this company's property was donated on the premise that the company would be given a roadway approach from the highway to the remainder of their property, although no special place was designated for the road. It was his thought that the company is entitled to the roadway.

Judge Boyington brought up for discussion the hauling operations of the state's contractor in connection with the improvement of the Oregon Coast Highway at the Astoria Airport. He advised that the contractor is securing materials from a source several miles up the Lewis and Clark River and that he is truck-hauling the materials over a paved county road, which is being severely damaged by the operations. It was his thought that the Federal Government should make good the damage by reimbursing the county for cost of repairs, and inquired as to the necessary procedure to secure such reimbursement. He was informed by the Engineer that according to prescribed procedure, the county should file its claim with the State Highway Department and that upon receipt of the claim a joint inspection of the road would be made by Engineers representing the state and the Public Roads Administration who would submit a recommendation with respect thereto. He suggested that the county should file its claim at once.

The Commission recessed for luncheon at 12:00 noon and reconvened at 1:30 p. m. in the same room with the same persons present and participating.

The Engineer presented a tentative program of survey projects involving work contemplated for construction in the post-war program, and requested authority to submit the list to the Public Roads Administration for approval

as to financing with federal funds. He explained that the surveys listed are estimated to cost $280,000, and that approval by the Commission of the making of the surveys does not commit the Commission in any way as to subsequent construction. After careful consideration of the individual items the Commission by unanimous vote approved them upon assurance by the Engineer that none of them involved work that is not contemplated for immediate undertaking when the war is over, and with the strict understanding that no commitment whatsoever is being made as to construction. The Commission thereupon authorized the Engineer to submit the following projects to the Public Roads Administration for approval:

SURVEY AND PLANS PROJECTS
CONTEMPLATED FOR CONSTRUCTION IN POST-WAR PROGRAM

(60% of cost to be paid by PRA out of federal funds previously allotted for construction projects.)

County	Highway	Section and Length	Est. Cost
Columbia & Washington	Vernonia-Timber County Road	Treharne-Sunset Camp(11.0 mi.)	$ 11,000
Washington	Hillsboro-Cornelius Pass County Road	Orenco-Cornelius Pass (7.5 mi.)	5,000
Multnomah	Columbia River	Parkrose-Bonneville (36.3 mi.)	10,000
Tillamook	Oregon Coast	Tillamook-Pleasant Valley (9.0 mi.)	5,000
Yamhill	Pacific Hwy. West	Newberg-McMinnville (4.5 mi.)	2,000
Yamhill	Three Mile Lane	Yamhill River Bridge (1.0 mi.)	3,000
Yamhill	Amity-Dayton	Grubb College-Dayton (4.3 mi.)	4,000
Mult., Wash., & Clack.	West Portland-Hubbard	Barbur Blvd.-Marion County Line (13.1 mi.)	5,000
Clackamas & Marion	Pacific Hwy. East	Pudding River (0.3 mi.)	1,000
Clackamas	Woodburn-Sandy	Eagle Creek-Sandy (5.5 mi.)	5,500
Marion & Polk	South River Co. Road	Independence Bridge (2.3 mi.)	3,000
Marion & Linn	Pacific Hwy. East	Steiwer Hill-Albany (12.1 mi.)	5,000
Lincoln	Oregon Coast	Siletz Bay-Newport (21.6 mi.)	8,000
Lane	Territorial	Benton Co. Line-Smithfield (10.0 mi.)	5,000
Lane	Eugene-Richardson	Noti-Veneta (5.0 mi.)	2,000
Lane	Pacific	Eugene (6th & High)-Springfield Junction (2.1 mi.)	3,000
Lane	Pacific	Judkins Point-Goshen (5.4 mi.)	2,500
Douglas	Elkton-Sutherlin	Elkton-Kellogg Bridge (4.2 mi.)	4,000
Coos	Oregon Coast	Marshfield-Coquille (16.4 mi.)	5,000
Douglas	North Umpqua Co. Road	Marks Creek-Idleyld (8.5 mi.)	4,000
Douglas & Josephine	Pacific	Glendale Junction-Grave Creek(12.0 mi)	5,000
Josephine	Rogue River Loop	Gunnell Road-Robertson Bridge (5.5 mi.)	5,000
Jackson	Crater Lake	Antelope Cr.-Cascade Gorge(30.0 Mi.)	35,000
Jackson	Little Butte	McCallister Springs-Fish Lake (9.0 mi.)	6,000

[illegible] 3 1940

Surveys and Plans Projects (cont.):

County	Highway	Section and Length	Est. Cost
Wasco	Mill Creek Co. Road	The Dalles-Forks (7.0 mi.)	$ 5,000
Wasco	Fifteen Mile Creek County Road	E. Unit, Petersburg, Fairbanks (3.0 mi.)	2,000
Gilliam	Columbia River	John Day River-Quinton (9.6 mi.)	2,000
Jefferson & Wasco	Warm Springs	Forest Boundary-Warm Springs Agency (24.9 mi.)	5,000
Jefferson	The Dalles-California	Madras-Crooked River (18.7 mi.)	1,000
Crook & Jefferson	Madras-Prineville	Madras-Prineville (30.1 mi.)	6,000
Deschutes	Cline Falls	Cline Falls-Tumalo (10.1 mi.)	3,000
Harney & Lake	Lakeview-Burns	Wagontire-Valley Falls (61.5 mi.)	12,000
Klamath	The Dalles-California	Modoc Point-Algoma (10.3 mi.)	2,000
Klamath	Klamath Lake	Aspen Lake Jct.-Wocus Marsh (10.0 mi.)	10,000
Umatilla	Athena-Holdman	Gerking School-Holdman Jct. (14.6 mi.)	10,000
Umatilla	Weston-Elgin	Weston-McDougall (15.0 mi.)	3,000
Union	Island City-Summerville Co. Road	West Ranch-Summerville (4.5 mi.)	1,000
Wallowa	Enterprise-Lewiston	2 Sections, MP 0.0-9.5 and 21.0-44.0 (32.5 mi.)	22,000
Wallowa	Little Sheep Creek	Joseph-Hayden Gulch (16.0 mi.)	8,000
Union	Cove	Cove-Union (8.5 mi.)	5,000
Baker	Baker-Homestead	Love Bridge-Black Bridge (15.0 mi.)	15,000
Baker	Baker-Homestead	Halfway Jct.-Robinette (4.3 mi.)	4,000
Grant & Harney	John Day-Burns	Silvies-Poison Creek (23.2 mi.)	15,000
Harney	Diamond Valley	Crane-Rome Junction (11.2 mi.)	5,000
			$280,000

In the discussion of this matter the Commission instructed the Engineer not to authorize any new surveys and not to ask the Commission to approve any new surveys hereafter, except those needed for projects that are being seriously considered for construction during the first three years immediately following the war, or unless the survey is of an emergency nature requiring immediate attention.

The Commission discussed with the Engineer bids received at the morning session for several highway construction projects and decided by unanimous vote to reject all bids received for the Juntura-Hope Rock Production Project in Malheur County and to award contracts for the remaining projects to the low bidder in each instance.

Attorneys Ralph Moody, Salem, and Jay Bowerman, Portland, appeared before the Commission in regard to the claim of Contractor Homer G. Johnson for extra compensation arising out of his contract No. 2390 with the Commission, for the construction of the Siletz-Toledo Section of the Siletz Secondary Highway, in Lincoln County. Mr. Johnson was also present.

Mr. Moody made a strong plea in behalf of Mr. Johnson, alleging that Mr. Johnson suffered considerable losses in connection with this job which are directly attributable to misrepresentations made to him by the highway department engineers, in that mention was made in the specifications that a probable source of materials was a gravel deposit in the vicinity of the town of Siletz, whereas, after the pit was opened up, it was found that the quantity of material obtainable therefrom was far less than that required to complete the job. Mr. Johnson, he said, selected this gravel pit in preference to others that were suggested in the specifications because he had faith in the engineers and when it developed that the gravel required was not available at this source, it was necessary for him to change to a new location, which necessitated a much longer haul and added greatly to his expense. Mr. Moody recalled that there were seven bidders for this work, and advised that he has interviewed six of them, all of whom stated that their bids were based on the use of the same pit on which Mr. Johnson based his bid. The seventh bidder, he said, was Mr. Milne, whose bid on the surfacing materials was about $10,000 higher than that of Mr. Johnson, which is accounted for by the fact that he anticipated the use of the state's quarry at Agate Beach, which he was then operating under another contract. He pointed out that Mr. Milne was in a position to submit a lower bid than Mr. Johnson based on the use of the Agate Beach quarry, because he could use his existing setup; furthermore, according to the specifications Mr. Johnson was not allowed the use of this quarry unless he could make satisfactory arrangements therefor with Mr. Milne.

Mr. Moody cited the court case of Pyle vs. Kernan (148 Oregon Reports, Page 666), evidence in connection with which, he pointed out, reveals that the State Highway Commission has the power to adjust a contract if it determines that an honest mistake has been made in connection therewith. He declared that Mr. Johnson's contract is in the same category, and urged the Commission in view thereof to approve Mr. Johnson's claim for extra compensation, which he declared is morally right and just, inasmuch as Mr. Johnson acted in good faith on representations made by the highway department's engineers.

Mr. Bowerman endorsed the statements made by Mr. Moody. He emphasized the fact that the state's quarry at Agate Beach was suggested in the State's specifications and gave as his opinion that such suggestion was a misrepresentation because the quarry was being operated by another contractor at the time of the award of the contract to Mr. Johnson; hence, was not available to him. It was his thought that Mr. Johnson is entitled to reimbursement for the excess cost of his job without the expense of court appeal.

Chairman Banfield advised that the former Highway Commission, and also the present Commission both previously passed on this claim and rendered decisions with regard thereto. However, in view of the presentation made at this time, the Commission will again review the case and will advise as soon as a definite decision has been reached.

The matter was reconsidered by the Commission following the departure of Mr. Johnson and his attorneys, at which time the Commission voted

unanimously not to change its previous decision denying the claim. The Attorney and the Engineer were instructed to prepare an appropriate letter notifying the contractor that "the answer is still 'no'."

At 2:30 p. m. Chairman Banfield announced the following awards of contracts, bids for which were received at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Baker-Weiser Junction Rock Production Project on the Old Oregon Trail in Baker and Malheur Counties. Western Rock Company, Salem, submitted the low bid for this project, in the amount of $77,410.00, and M. C. Lininger & Sons, Medford, submitted the next-low bid, in the amount of $78,710.00. There were two higher bidders. The Commission awards the contract to the Western Rock Company, at its low bid of $77,410.00.

"Repair three bridges on Crooked River Highway and one timber bridge on the Crooked River Secondary Highway, in Crook County. J. F. Johnston, Newberg, submitted the low bid for this project, in the amount of $16,265.00, and Norris & Philpott, Portland, submitted the second-low bid, in the amount of $17,904.00. There were two higher bidders. The Commission awards this contract to J. F. Johnston, Newberg, at his low bid of $16,265.00.

"Hunter Creek-Lone Ranch Creek Rock Production Project on the Oregon Coast Highway, in Curry County. R. O. Dail & Warren Bros., Portland, submitted the low bid for this project, in the amount of $41,000.00; Rogers Construction Co., Dayton, Washington, submitted the second-low, and only other bid, in the amount of $43,650.00. The Commission awards this contract to R. O. Dail & Warren Bros., Portland, at their low bid of $41,000.00.

"Juntura-Hope Rock Production Project on the Central Oregon Highway, in Malheur County. R. O. Dail & Warren Bros., Portland, submitted the low bid for this project, in the amount of $51,820.00. Western Rock Company, Salem, submitted the second-low bid, in the amount of $52,060.00. There were two higher bidders. The Commission rejects all bids submitted for this job.

Standard Oil Service Station Building in Gardiner, in Douglas County (formerly operated by Perkins and Helgerson):

"The Commission received no bids for this building."

Mr. John A. Laing, Chairman, and Dr. E. B. McDaniel, member, of the Highway Advisory Committee on Travel Matters came before the Commission at this time and reported the recommendations of the committee with respect to the Highway Department's Advertising Budget for the year 1944. Mr. Laing advised that the committee held a meeting on Friday, November 5, which was attended by seven committee members, all of whom are in agreement with respect to the committee's recommendation, except for one item, that being an amount

of $10,000 for magazine advertising. Opposed to such advertising, he said, were Dr. McDaniel and Mr. Sterling, Mr. Sterling's objection being offered later inasmuch as he was not present at the meeting. Both of these gentlemen, he said, are definitely of the opinion that such advertising is not necessary and should be deferred until the war is over and normal travel is resumed. The balance of the committee, he said, feels that the state is very much interested in keeping its products before the public so they will be in the minds of the people when times return to normal. He submitted for the Commission's consideration the following budget and advised that with the exception of the item of magazine advertising the program received the approval of all members present at the meeting:

BUDGET REQUIREMENTS TRAVEL & INFORMATION DEPARTMENT
For Calendar Year 1944

Supervision and General Expense	
Salaries	$ 7,000.00
Travel, Stationery, Supplies & Miscellaneous	1,000.00
Magazine Advertising	10,000.00
Specialty Advertising	3,000.00
Literature Distribution	300.00
Maps	2,750.00
Booklets	1,450.00
Cuts and Mats	250.00
Photographs	250.00
Postage and Express	1,000.00
Photographic Laboratory Charges	1,500.00
Total	$28,500.00

Dr. McDaniel explained his objection to the item of magazine advertising. After discussion Chairman Banfield thanked the committee for its interest and cooperation and advised that the Commission will be pleased to study the recommended budget and will advise later whether or not it approves. The matter was reconsidered by the Commission following the departure of Mr. Laing and Dr. McDaniel. Commissioner Chessman expressed himself in favor of advertising in magazines notwithstanding existing conditions, in order to keep people throughout the nation advised as to the resources of the state. He referred to such advertising as "planting the seed for future returns". Commissioner Schaupp expressed himself similarly as did also Chairman Banfield. The Commission thereupon by unanimous vote approved the budget recommended by the Advisory Committee in its entirety, including the $10,000 allotted for magazine advertising if it is possible to secure such advertising, and left it with the Advisory Committee to pass on such feature.

The Engineer reported that in conformity with instructions given him by the Commission at the previous meeting he contacted the Public Roads Administration relative to the securing of federal funds with which to finance the improvement of the northern end of the Siletz-Toledo Secondary Highway where extensive log hauling operations are being carried on, and is now in receipt of a letter advising that federal timber access road monies are available

to the extent of $33,000, which represents about 50% of the cost of the entire project, and that the local representative of the War Production Board has indicated that he will endorse the project on the basis of the state paying 50% of the total cost. He requested authority to accept the government's offer and to advertise the project for bids to be received as soon as plans and specifications can be prepared. The Commission by unanimous vote approved the project on the basis outlined by the Engineer and thereupon authorized the Engineer to advertise it for bids.

The Engineer reported the results of an investigation of the request of Mr. William Hotchkiss, Paisley, Oregon, for permission to install an irrigation pipe across the Fremont Highway near Valley Falls, as instructed by the Commission at the previous meeting. He advised that Mr. Hotchkiss really wants to install two concrete pipes across the highway which could be done at the cost of about $275.00. He recommended approval of the request if Mr. Hotchkiss will pay for the original installation, and that the work be done by state forces because, according to the Attorney, it will be the responsibility of the state to maintain the pipes after they are placed. The Commission approved the recommendation by unanimous vote subject to the condition that Mr. Hotchkiss will deposit with the Commission in advance, a certified check in the amount of the estimated cost of the work.

The Attorney presented for the Commission's approval and execution a deed quitclaiming unto the City of Portland the state's interest in certain property located adjacent to the Lower Columbia River Highway within the Portland city limits. He explained that the state has no interest in this property and became joint owner of the tract with the city by mistake which was not discovered until the deed had been recorded, so in order to clarify the situation it is now necessary for the state to execute a quitclaim deed. In view of this explanation the Commission signed the deed.

The Attorney reported an offer of settlement by the defendants in the Algoma flood case at Klamath Falls. He advised receipt of a letter from the attorneys for the defendants offering to pay the state $25,000 as settlement in full of the state's claim, which, he pointed out, is $10,000 less than the amount that the Commission previously agreed to accept. After careful consideration of this matter the Commission decided unanimously to refuse such offer and instructed the Attorney to inform the defendants that the Commission feels that it cannot accept less than $35,000 in full settlement of its claim, which amount is considerably less than the amount of the claim as originally presented.

The Engineer reported that in conformity with instructions given him by the Commission at the previous meeting he has discussed with the State Parks Superintendent the advisability of acquiring the Henry Sengstacken ocean frontage property just south of Cape Arago State Park in Coos County and that it was mutually agreed to recommend to the Commission that this property be not purchased at this time. The State Parks Superintendent, who was present, indicated his concurrence with the report. The Commission approved the report and so ordered.

The Assistant Attorney requested instructions relative to the acquisition of the Livasa Jarvin property at Astoria. He explained that the Commission at a previous meeting authorized the purchase of this property for the sum of $3,500 which at that time was acceptable to the owner who signed an option on such basis; however, the lady now refuses to sign the deed unless the Commission will pay her an additional $500, making a total purchase price of $4,000. He recommended payment of the increased amount as did also the Commission's Chief Counsel, in view of the fact that the property is located in a place where there is danger of serious slides, and unless the Commission takes quick action in the matter it probably will cost the state considerably more in damages because the slide condition was caused by the adjacent highway construction. It appears that the slide is now moving and immediate action by the Commission is necessary unless the Commission wishes to take a chance on additional claims. After discussion the Commission voted unanimously to pay the extra amount.

The Commission approved and by unanimous vote adopted the following resolution authorizing the Attorney to pursue condemnation proceedings to acquire right of way across property owned by F. R. Salway in Lincoln County which matter was discussed at the previous meeting:

> WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purpose hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

> Real property owned by F. R. Salway, which property is located in Government Lot 4 of Section 5, Township 10 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheet and designated as Parcels Nos. 1 and 2, and is further identified in the records of the Highway Commission as file R 4251A, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purpose hereinabove set forth, and the said properties are being acquired for the express and specific purpose in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner and/or with the tenants or persons in possession, if there be any, of said parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby

is requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

---

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the ori inal resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 40, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

Commissioner Schaupp presented a letter from Mayor John H. Houston, Klamath Falls, inquiring in behalf of Mr. Cantrall of the City Cemetery Committee whether or not the Commission plans to use all of Lots 7, 8, 9 and 10 of Block 2, Westover Terraces, Klamath Falls, in the proposed development of the Greensprings Highway at that point. It appears that the committee is desirous of securing a portion of these lots for use in connection with the development of a memorial park provided the Highway Commission does not need the property. This matter was referred by the Commission to the Engineer for investigation and report.

A letter was presented from Mr. Alfred A. Loeb, Portland, in which complaint is made that log haulers operating over state highways are not tying their loads with three binder chains as is required by the provisions of their P. U. C. permits, and suggesting that something should be done to enforce such provision as a precaution against the loss of logs and accidents occurring to other highway traffic. The Secretary advised that in conformity with instructions previously given him by the Commission he inquired of a number of logging operators why three binder chains were not being used on their loads and ascertained that the principal reason was that such chains are very difficult to obtain due to war time conditions, and that the use of cables for such purpose is impractical. He was instructed to convey such information to Mr. Loeb and to inform him further that the Commission is endeavoring to obtain compliance with this requirement as best it can and intends to follow up as cases of noncompliance therewith are reported.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amount allocated for each. After due consideration and upon assurance by the Engineer that none of the surveys listed involve highway improvements that are not contemplated for construction during the 3-year period immediately

following the war, the Commission by unanimous vote authorized and instructed the Engineer to make such surveys on various sections of the highways in this state, which said sections of highways together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditure are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Plans	216-1413	Jefferson	Redmond-Madras Target Area Access Road	1st - $225.00
Reconnaissance	11-1414	Gilliam & Morrow	Arlington-Boardman Section, Columbia River Highway	1st-$1,300.00
Stockpile, Quarry & Plans	1-1434	Baker & Malheur	Baker-Dead Ox Flat Section, Old Oregon Trail Highway	1st - $500.00
Stockpile, Quarry & Plans	21-1464	Lincoln	Waldport Maintenance Material Project, Oregon Coast and Alsea Highways	1st - $400.00
Plans	29-1444	Tillamook	M.P. 67 to 81, Oregon Coast Highway	1st - $700.00
Plans	26-1468	Multnomah	Denver & Union Avenues to Housing Project at Old Peninsula Golf Course	1st - $300.00
Plans	30-1449	Umatilla	Milton-Washington State Line Section, Oregon-Washington Highway	1st - $200.00
Stockpile, Quarry & Plans	30-1450	Umatilla	Cold Springs Rock Production Project, Columbia River, Pendleton-Cold Springs and Hermiston Highways	1st - $250.00
Plans	121-1465	Lincoln	Euchre Mountain Section, Siletz Secondary Highway	1st - $300.00
Plans	34-1434	Washington	Davies-Sylvan Section, Wolf Creek Highway	2nd-$4,000.00 Total to date $10,000.00
Location	34-1435	Washington	Connection, West Portland-Hubbard Highway to Wolf Creek Highway near Cedar Mills	1st-$7,000.00
Plans	26-1465	Multnomah	Front Avenue from Interstate Avenue to Barbur Boulevard	3rd-$13,000.00 Total to date $22,000.00

FEB. 3 1943

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Prospect.	13-1425	Harney	Burns-Crane Section, Burns-Crane Highway	1st - $500.00
Reconnaissance	15-1445	Jackson	Trail-Prospect Section, Crater Lake Highway	1st-$1,900.00
Plans	22-1458	Marion & Linn	Steiwer Hill-Albany Section, Pacific Highway	1st-$1,000.00
Location	133-1433	Wasco	White River School-Shearers Bridge Section, Shearers Bridge Secondary Highway	1st-$1,938.00
Prospect.	101-1435	Baker	Union County Line-Baker Section, Medical Springs Secondary Hwy.	1st - $250.00
Prospect.	1-1436	Baker	Ruckles Creek-Middle Bridge Section, Baker-Homestead Highway	1st - $400.00
Prospect.	13-1424	Harney	Burns Buchanan Section, Central Oregon Highway	1st - $300.00
Bench Marks	19-1431	Lake	Alkali Lake Flight Strip, Lakeview-Burns Highway	1st - $100.00
Plans	22-1457	Linn	City of Lebanon, Storm & Sewer Project	1st - $100.00
Stockpile, Quarry & Plans	25-1413	Morrow	I.O.N.-Heppner Section, Heppner Highway	1st - $300.00
Stockpile, Quarry & Plans	125-1414	Morrow	Rhea Creek-Chapman Creek Section, Heppner-Spray Highway	1st - $350.00
Plans	26-1470	Multnomah	Connection, North side of Bybee Blvd. at east end of Bybee Overcrossing project to east side of Pacific Highway East	1st - $100.00
Plans	127-1424	Polk	Burns Corner Section, Dallas-Kings Valley Highway	1st-$1,200.00
Plans	30-1451	Umatilla	Meacham Section, Old Oregon Trail Highway	1st - $300.00

, 1945

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Stockpile, Quarry & Plans	131-1426	Union	Union-Baker County Line Section, Medical Springs Secondary Hwy.	1st - $250.00
Plans	24-1441	Marion	Salem-Hayesville School Section, Pacific Highway East	2nd - $950.00 Total to date $1,800.00
Location & Plans	26-1469	Multnomah	Portland-Bonneville Section, Columbia River Highway	1st-$10,000.00

In the discussion of this matter the Commission reaffirmed its previous decision not to approve surveys for projects that are not to be included in the 3-year post-war construction program. The Engineer was instructed accordingly and was further advised that the Commission does not expect to approve surveys for projects other than those involved in such 3-year post-war program, unless the survey is of an emergency nature.

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

McNutt Brothers, Contract No. 2572, for surfacing and construction of bituminous macadam on the Grave Creek-Jumpoff Joe Section of the Pacific Highway in Josephine County, requested an extension of time from September 30, 1942, to October 11, 1943, within which to complete this job. They gave the following reasons for failure to complete the project within the specified time limit: (1) difficulties in securing the gravel pit which was to be furnished by the state, (2) adverse weather conditions during the winter and spring months of 1942-43, (3) shortage of both skilled and unskilled labor due to war time conditions. The Engineer advised that the reasons given by the contractor for over-running the time limit are substantially correct, although the principal reasons for the delay were difficulties encountered in crushing rock and the contractor's inability to secure competent help. He recommended in view of the circumstances, that the extension of time requested be granted without penalty, notwithstanding that the state incurred extra expense for engineering supervision and that the traveling public was somewhat inconvenienced by the delay. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

E. C. Hall Company and J. C. Compton, Contract No. 2595, for construction of bituminous macadam surfacing on Section "A", Monmouth-Benton County Line Section of the Pacific Highway West in Polk County, requested an extension of time from July 31 to September 30, 1943, within which to complete this job. They attributed their failure to complete the contract within the specified time limit to adverse

weather conditions. The Engineer advised that this job was performed as expeditiously as weather and labor conditions would permit so, in his estimation, the contractors should not be penalized for over-running the time limit. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

E. C. Hall Co., J. C. Compton & McNutt Bros., Contract No. 2596, for construction of Unit "B" of the Monmouth-Benton County Line Section of the Pacific Highway West in Polk County, requested an extension of time of 60 days from July 31 to September 30, 1943, within which to complete this job. They alleged that extremely bad weather conditions during the spring months hindered construction operations and was directly responsible for over-running the specified time limit. The Engineer advised that the reasons given by the Contractors for failure to complete the job on time are correct; furthermore, the contractors experienced difficulty in securing competent labor. He recommended in view of the circumstances that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Eugene Sand & Gravel Company, Contract No. 2604, for furnishing crushed materials in stock piles for use on the Salt Creek Falls-Odell Butte Section of the Willamette Highway in Klamath and Lane Counties, requested an extension of time of 70 days from July 31 to October 9, 1943, within which to complete this job. The Engineer advised that the contractor experienced difficulties in securing suitable railroad cars on which to ship material from its plant in Eugene; also, that the company was hindered in trucking the material over the hauling roads because of snow conditions. He recommended that the extension of time requested be granted without penalty. The recommendation was approved by the Commission by unanimous vote.

M. C. Lininger & Sons, Contract No. 2619, for furnishing crushed rock for the Chemult Rock Production Project on The Dalles-California Highway in Klamath County, requested an extension of time of 34 days from July 21 to September 23, 1943, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulties in securing labor and to breakdown of equipment. The Engineer advised that the state has suffered no loss due to the contractors' failure to complete the job on time and recommended, in view thereof, that the extension of time requested be granted without penalty. The recommendation was approved by the Commission by unanimous vote.

The Engineer reported that contracts Nos. 2595, 2596, 2604, 2616, 2619, and 2636, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications

thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission, on motion of Commissioner Chessman, which was seconded by Commissioner Schaupp:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2595, with E. C. Hall Co. and J. C. Compton, for bituminous macadam surfacing on Section "A", Monmouth-Benton County Line Section of the Pacific Highway West in Polk County, completed on September 30, 1943;

Contract No. 2596, with E. C. Hall Co., J. C. Compton and McNutt Bros., for grading and bituminous macadam surfacing on Section "B", Monmouth-Benton County Line Section of the Pacific Highway West in Polk County, completed on September 30, 1943;

Contract No. 2604, with Eugene Sand & Gravel Co., for furnishing crushed material in stockpiles on the Salt Creek Falls-Odell Butte Section of the Willamette Highway in Klamath and Lane Counties, completed on October 9, 1943;

Contract No. 2616, with A. H. Saxton & Son, for furnishing crushed material in stockpiles on the Trent-Salt Creek Falls Section of the Willamette Highway in Lane County, completed on August 12, 1943;

Contract No. 2619, with M. C. Lininger & Sons, for furnishing crushed material in stockpiles on the Chemult Section of The Dalles-California and Willamette Highways in Klamath County, completed on September 23, 1943;

Contract No. 2636, with D. C. and A. L. Williams, for furnishing crushed material in stockpiles on the Weston Section of the Oregon-Washington and Weston-Elgin Highways in Umatilla County, completed on September 24, 1943;

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with George H. Wells Company for furnishing and placing 200 to 300 tons of asphalt material adjacent to railroad tracks on Main Street, in town of Milton;

Modification of project agreement with Public Roads Administration covering Boardman Flight Strip;

Modification of project agreement with Public Roads Administration covering Rome Flight Strip;

Project agreement with the Public Roads Administration covering Aurora Flight Strip;

Modification of project agreement with the Public Roads Administration covering the Siletz-Toledo Section;

Bargain and sale deed conveying unto August L. Schubring and wife 19,840 square feet of land in Washington County;

Quitclaim deed conveying to the City of Portland certain property adjacent to the Lower Columbia River Highway within the Portland city limits. (This deed is to correct a deed in which the State Highway Commission was inadvertantly included as grantee.)

Acceptance of revokable permit from U. S. of America, covering use of government-owned property near Astoria, in Clatsop County.

The Commission had under discussion the setting of a date for its next regular meeting for the receiving of bids and decided to hold such meeting in Portland on Tuesday, December 21, 1943. The Secretary was instructed to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building. (Later changed to Thursday, December 23, 1943.)

There being no further business to come before the Commission at this time, the meeting adjourned at 4:40 p. m.

T H Banfield
Chairman

State Highway Engineer

Secretary

Commissioner

Commissioner

Portland, Oregon, December 23, 1943

The State Highway Commission was scheduled to meet in regular session at 9:00 a. m., in the auditorium of the Public Service Building, Portland. Due to the illness of Commissioner Chessman and the unavoidable detention of Commissioner Schaupp, Chairman Banfield announced at 9:00 a. m. that the opening of bids, scheduled for that hour, would be postponed until 11:15 a. m., and that no official business would be transacted until the arrival of Commissioner Schaupp. Commissioner Schaupp arrived at 11:00 a. m. and the Chairman declared the Commission in session. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney

The first order of business was the appointment of Oscar Cutler as Acting Secretary, due to the absence of the Commission's Secretary, H. B. Glaisyer The following resolution was adopted with regard to the matter:

WHEREAS, H. B. Glaisyer, the duly appointed, qualified and acting Secretary to the Oregon State Highway Commission, will be absent from the State of Oregon for the period beginning December 22, 1943, and ending January 6, 1944; and

WHEREAS, it is necessary that someone be appointed to serve as Acting Secretary during the absence of the said H. B. Glaisyer; and

WHEREAS, Oscar Cutler is, in the opinion of the Commission, qualified to perform the duties of such office and serve as Acting Secretary during the absence of the regular Secretary;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That Oscar Cutler be and he hereby is appointed as Acting Secretary to the Oregon State Highway Commission, and that he serve in such capacity during the period beginning December 22, 1943, and ending January 6, 1944.

2. That as such Acting Secretary the said Oscar Cutler is hereby authorized and empowered to do and perform all of the duties appertaining to the said office for said period.

Bids, as follows, for highway construction projects, were opened and read in conformity with previously published notices, following which Chairman Banfield announced that the award of contracts would be made at 4:00 p. m.:

PACIFIC HIGHWAY EAST
CONSTRUCTION OF PEDESTRIAN WALKWAY NEAR MILWAUKIE

Birkemeier & Saremal	$1,401.00
Tower Sales & Erecting Co.	1,442.50

D. C. & A. L. Williams	39,000.00
P. B. Doherty	39,200.00

The Highway Commission confirmed the authority previously granted the Engineer to complete the 1943 agreements for maintenance in cities during the year of 1944.

In connection with the 1943 act by which the Legislature appropriated certain of the state highway funds to the cities, the Commission approved forms of resolutions required to carry out the provisions of the law, as follows

WHEREAS, it is provided by Chapter 371, Oregon Laws, 1943, that:

> "Beginning with the year 1943 and annually thereafter there shall be and hereby is appropriated out of the state highway fund such sums of money as will equal 5 percent of all moneys credited to the state highway fund by the state treasurer between January 1 and December 31 of each year, and which have accrued from funds transferred to the state highway fund by the state treasurer under the provisions of section 115-135, O. C. L. A., and under the provisions of section 115-528, O. C. L. A., and under the provisions of section 110-1705, O. C. L. A., and from fines and penalties assessed and collected for violations of the motor vehicle and transportations laws, and which have been paid to the state treasurer, which appropriation shall be distributed among the several cities as provided in this act; but in no event shall payment under this act be made to cities for any year unless more than $11,000,000 is credited to such fund, and allocations hereunder shall be made to cities only from any excess over $11,000,000 credited to such fund in any year."

AND, WHEREAS, pursuant to the laws of the State of Oregon there was credited to the state highway funds by the State Treasurer for the calendar year_____, the sum of $_____; and

WHEREAS, by applying the factors of allocation provided for in said act the State Highway Commission has apportioned to the several cities of the State their respective shares in said state highway funds;

NOW, THEREFORE, the State Highway Commission does hereby certify to the Honorable Robert S. Farrell, Jr., Secretary of State of the State of Oregon, the following apportionment or appropriations out of said state highway fund for the calendar year_____; to wit:

City	Amount
_____	_____
_____	_____

That of the above enumerated cities the following cities are incorporated cities of the State of Oregon having a population less than 1,000:_____

_____ 3, 1943

That before said last named cities may expend funds apportioned to them out of said state highway fund they must first qualify by submitting to the State Highway Commission for approval plans for the expenditure of such funds.

That a certified copy of this resolution and certificate be delivered to the said Secretary of State for his use and guidance in the administration of said law.

That this resolution be entered in the minutes and records of the Commission as of _____.

_____

WHEREAS, by and under the provisions of Chapter 371, Oregon Laws, 1943, there is appropriated annually out of the state highway fund sums of money, which sums so appropriated are by the terms of said act dedicated for the "construction, reconstruction, improvement, repair and maintenance of city streets which have not been designated as connecting links between state highways by the State Highway Department in the manner provided by law"; and

WHEREAS, said act provides "that cities of less than 1,000 population may not expend funds allocated to them hereunder, unless and until plans for such expenditure have been submitted to the State Highway Commission and received the written approval thereof" and

WHEREAS, _____ is an incorporated city of the State of Oregon having a population of less than 1,000; to wit, has a population of _____; and

WHEREAS, in response to the requirements of said act there has been apportioned by the State Highway Commission to said city for use and disbursement under the terms of said act, for the calendar year of _____, the sum of _____; and

WHEREAS, it is the purpose of said city to conform in all respects to and with the provisions of said law and therefore and for that purpose there is submitted to the State Highway Commission for its approval plans, estimates and specifications which have heretofore been approved by the municipal authorities of said city;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. There hereby is created a fund to be known as the "State Tax Street Fund", into which fund shall be paid and credited all of the money allocated to and received by said city by virtue of the provisions of said law.

2. That said sum of $_____allocated to said city and made available for expenditure during the calendar year 194__ is hereby set aside and dedicated for the street projects hereinafter designated.

3. That the following named streets hereby are selected and designated as the streets to be improved during said calendar year and the cost thereof to be paid out of said street fund; to wit: _____

_____

4. That the type, character and extent of street construction, reconstruction, repair, improvement and maintenance proposed with respect to said above named streets shall be _____

_____

5. That _____ as mayor or city manager of said city be and he hereby is instructed and authorized to submit to the State Highway Commission for its written approval the said proposed plans and that said submission be by a certified copy of this resolution.

6. That upon receipt of the written approval of said plans and projects all necessary steps shall be taken and all procedure adopted necessary for the accomplishment of said street improvement, all of which work shall be done in strict conformance with the plans and specifications approved by the State Highway Commission and in compliance with the provisions of said law.

7. That this resolution shall be entered in the proper and appropriate records of said city and a duly certified copy thereof prepared for delivery by the said mayor or city manager to the State Highway Commission.

Dated this _____day of _____, 194__.

City of _____

Attest: By_____

_____ By_____

City Recorder

By_____

_____

_ 23 1943

WHEREAS, under the provisions of Chapter 371, Oregon Laws, 1943, there has been by this Commission apportioned to _____ for use and disbursement during the calendar year _____for street purposes as provided in said law the sum of $_____; and

WHEREAS, said city being a city of less than 1,000, to wit: a city of _____, has submitted to this Commission for approval plans for the expenditure of said sum of $_____ during said calendar year; and

WHEREAS, said plans and projects, having been submitted by this Commission to the State Highway Engineer for examination and approval, have been approved by him;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the following named streets of the city of _____ proposed for improvement by said city as evidenced by a certified copy of a resolution adopted by said city and served on this Commission be and said streets hereby are approved and thereby qualified for funds apportioned to said city by this Commission under the provisions of said law, the streets so approved being as follows: _____

_____.

2. That the type, plan and character of improvement suggested in said resolution be and said plans, type and character of improvement hereby are approved.

3. That by the adoption of said resolution said city shall be deemed to have qualified under the provisions of said law and is therefore entitled to receive the funds apportioned to said city by this Commission.

4. That a certified copy of this resolution be delivered to the mayor of said city and a like certified copy delivered to the Secretary of State for such purpose as it may serve in connection with the administration of said act.

5. That this resolution shall be entered in the minutes and records of the Commission as of the _____day of _____, 194__.

_____

The Commission approved an estimated expenditure of $33,000 for the improvement of the Rhea Creek-Chapin Creek Section of the Heppner-Spray Secondary Highway, in Morrow County.

The Commission denied the request of the Pacific Plywood Corporation for the construction of a sidewalk along the Salmon River Highway westerly from Willamina a distance of about one-fourth mile to the company's plant.

The Commission likewise denied the request of the City of Willamina for the widening of the Willamina River Bridge at Willamina. All such projects must wait for proper consideration after the war. Chairman Banfield stated that no project of this kind can be built in wartime without the express approval of the Army, Navy or the War Production Board.

The Commission took similar action with reference to the Klamath Falls City Council's request for the immediate improvement of South Sixth Street, Klamath Falls.

Similar action was taken with reference to the request of Gilliam-Wheeler Pomona Grange No. 7, for the improvement of the Wasco-Heppner Secondary Highway, between Condon and Moro.

The Commission considered and signed project agreements with the Public Roads Administration, as follows:

Agreement covering the Astoria Airport Section
Agreement covering the Monmouth-Pedee Section

The Commission instructed the Secretary to advise the Nyssa Chamber of Commerce that the oiling of certain highways connecting Adrian with U. S. 95 would be considered as a postwar project, but that no commitments would be made at this time.

The Commission next considered the Maintenance Budget, and requested the Engineer to make a detailed report, approving in the meantime such expenditures as are necessary to carry on maintenance work on the highway system until the report can be considered.

Based on the opinion of the Chief Counsel, the Engineer was advised to inform the State Budget Director that the State Highway Commission is without authority to operate bus service for state employees between Portland and Salem.

The Commission considered and signed a settlement with the City of Corvallis for a claim for the maintenance and repair of certain water pipe lines disturbed during highway construction north of the Corvallis city limits.

The Commission accepted as a compromise settlement of its claim against the P & M Lumber Company, the sum of $600.00 for damages to a bridge at Mile Post 226.76 on the Pacific Highway.

The Engineer reported to the Commission that stop signs are no longer considered necessary at railroad grade crossings where automatic signals are maintained. After careful consideration the Commission ordered such stop signs removed.

The Commission considered the request of the City of St. Helens for establishment of a 25-mile-per-hour speed limit along the Lower Columbia River Highway through West St. Helens. No action was taken, because the establish-

ment of speeds on state highways in cities is a function of the State Speed Board, of which the Chairman of the Highway Commission is a member.

On the recommendation of the Engineer, the Highway Commission established a 25-mile-per-hour speed limit on the Airport Detour Road at Astoria during the period that this road is used as a detour for U. S. 30. The Commission adopted the following resolution with respect thereto:

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Oregon Coast

Highway number: 9 Route number: U. S. 101

Location of Termini	Established Speed
M.P. 5.37 (Lewis & Clark River Bridge to M.P. 7.07 (Approximately E. City Limits of Warrenton	25 miles per hr.

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

The Commission denied the request of Oretown Grange Number 354 for state aid in moving a church building back from the highway, in order to provide parking space for automobiles.

The Commission approved payment of $100 toward the cost of constructing a drainage ditch opposite Mile Post 276.97 on the John Day Highway, with the understanding that Malheur County and the Warm Springs Irrigation District will each pay $50 toward this project, based upon the recommendation of the Engineer that the drainage facilities would be of benefit to the highway. The Chief Counsel was instructed to prepare the necessary agreement.

The Commission considered the request of Leonard and Slate for increased compensation in connection with the operation of the Wilsonville Ferry. The Secretary was instructed to advise Leonard and Slate that if they appeared before the Commission personally, the Commission would discuss this matter with them.

The Commission considered the request of the City of Willamina for engineering assistance in the establishment of street grades along the route of the state highway in the city. The Engineer was instructed to provide this service.

The request of Ishams Transfer and Storage for permission to use the state scales at Grants Pass for the weighing of chrome ore was denied and the Secretary was instructed to advise them of the Commission's action.

The Commission accepted the offer of Roy Montague, Arlington, to pay $15 for an old water tank owned by the State Highway Department, located about four miles east of Arlington.

The Commission authorized the purchase of one pneumatic wood-boring air drill, at an estimated cost of $190.

The Commission approved renewal of present contracts with the Hospital Associations.

The Engineer reported that he had been unable to purchase the truck scales authorized by the Commission, because of the refusal of the War Production Board to release the scales; therefore, consideration of Glenwood as a suitable scale site will have to be deferred.

F. H. Brundage, Western Log and Lumber Administrator, War Production Board, requested by letter reconsideration by the Commission of its refusal to grant a permit to the Byerly Logging Company for permission to operate logging trucks with excessive overhang. The Engineer reported that such operation was inimical to the safety of the public, because in swinging around the curves the rear of the load would encroach upon the opposite traffic lane; furthermore, the long overhang caused the logs to oscillate up and down, which increased the impact on the rear axle. The Commission discussed various ways and means of overcoming these difficulties by various safeguards, but was advised by the Chief Counsel that he could find nothing in the law that would permit the Commission to grant the request for the additional overhang, over and above that specified under the law. On the basis of this information the Commission again denied the request.

The Engineer reported briefly on his personal inspection of the proposed crossings at grade of the Ostrander Railway & Timber Company's new logging road on state routes 211 and 215. In both cases the Engineer reported that he found the sight distance quite impaired and it was his considered opinion that the crossings would be hazardous to the general public and he recommended that the request for grade crossings be denied. He further stated that if the Commission did approve grade crossings, flagmen would be required to safeguard the traveling public, and all logging trucks required to stop before entering or crossing these highways. He gave as his thought that the cost of watchmen and the cost of stopping the trucks would equal an annual sum which would in a short time amortize the cost of grade separation structures, which he estimated at about $50,000. Shortly afterward, Mr. Charles McCulloch, Attorney for the Ostrander Railway & Timber Company, appeared and again requested that the Ostrander Railway & Timber Company be permitted to cross the highways at grade. He gave as his thought that it might be possible to work out an agreement wherein the lumber company would be permitted to operate grade crossings for the duration of the war and install separation structures thereafter, when labor and materials would be more available. The Engineer was instructed to meet with Mr. McCulloch and the engineers of the Ostrander Railway & Timber Company on the ground, and discuss the proposition in more detail and the Engineer to report back his findings to the Commission at the next meeting.

The Commission considered complaints concerning the weighing of logging trucks and overweight violations committed by log haulers, and discussed the advisability of imposing special penalties on log haulers for overloading. No definite action with regard to this matter was taken by the Commission. After a discussion of the subject the Commission instructed the Engineer and Attorney or their representatives to contact the officials in the State of Washington who are charged with the enforcement of Washington's laws and regulations relative to log hauling, and make a report to the Commission

at its next regular meeting. The Commission authorized the payment of expenses of the engineers and attorney for travel in the State of Washington, if such travel is necessary, subject to the usual approval by the Governor.

Bruce Spaulding, Attorney, and William Swindells, representing the Willamette Valley Lumber Company of Dallas, likewise appeared and made a request for a proposed grade crossing for a logging road in the vicinity of Dallas. The Engineer was instructed to make a personal inspection with these gentlemen, on the ground, and report back to the Commission at the next meeting.

The Commission then considered communications received since the last meeting.

With reference to the letter from School District 138, Wauna, Oregon, requesting operation of a small waiting room on the Lower Columbia River Highway one-half mile west of Taylorville, for the benefit of school children and others who take the bus at that point, the Commission decided that the erection of waiting rooms of this kind was not the responsibility of the Commission.

The Commission denied action requested by the Redwood Empire Association opposing the proposed increase in the tax levy on passenger and pullman fares, as being a question beyond the jurisdiction of the Highway Commission.

A letter from the Manzanita Community House, Inc., endorsing a proposal for a wild game preserve on Neahkahnie Mountain was presented. Action on the letter was deferred until Commissioner Chessman could be present.

The Highway Commission considered the suggestions of Harry Hansen of Junction City and C. E. Moyer of Dillard and decided not to present a request to the Army Engineers for revetment projects on the Willamette Highway, near Junction City and on the Umpqua River at Dillard, for the reason that the highway department is not particularly concerned, and there appears to be no hazard to the highway at these points.

The Commission further stated that they would only take up these matters with the Army Engineers when it directly concerned the highways.

No action was taken on the request of the Columbia County Court to designate the Scappoose-Vernonia County Road as a secondary highway.

Communications from the Reverend Luke Powleson and Mayor C. A. Meeker, expressing appreciation of the Commission's activities, were ordered filed for the record.

Upon recommendation of the Assistant Attorney the issuance of permits for the utilization of right of way for "victory gardens" was approved for the calendar year 1944.

The Commission approved and accepted the amended offer of Sam Alderson for the purchase of buildings on the Wolf Creek-Grave Creek Section of the Pacific Highway.

The claim of George W. White for alleged damages to crops on property acquired from him for right of way for the Wolf Creek Highway, was referred to the Engineer for investigation of the drainage facilities.

The Attorney presented a letter from Dr. Moser's attorney, Neil Allen, Grants Pass, suggesting that the Highway Commission abandon its condemnation in connection with a gravel pit which Dr. Moser owns, and in lieu thereof execute a lease for the maintenance of the stock piles and for such gravel as has been or may be taken, at an agreed price per cubic yard. This matter was referred to the Engineer with a request for investigation and recommendation with reference to this offer.

The Commission did not approve the deeding to Marion County of a strip of land acquired by the state as right of way for a county road to replace a section of the old county road across the Aurora Flight Strip, in view of the fact that there might be some change there in the future. There appears to be no necessity for immediate action.

The Commission decided not to employ special counsel to assist the Chief Counsel in the condemnation of part of the Public Market property along the route of Front Street in the City of Portland.

The State Parks Superintendent reported on several matters which he had had under discussion with Chairman Banfield with reference to the purchase of additional property for parks. The matter was deferred until Commissioner Chessman could be present.

The State Parks Superintendent was instructed to appear at the next meeting of the Highway Commission, at which time the several matters which he had in mind could be presented before the entire Commission.

The Commission approved the following surveys authorized by the Engineer since the last meeting:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Prospect.	12-1432	Grant	Wheeler County Line-Flat Creek Section, John Day Highway	1st - $350.00
Plans & Relocation	12-1433	Grant	Soda Mountain-Harney County Line Sec., John Day-Burns Hwy.	1st - $500.00
Prospect.	113-1426	Harney	Crane-Diamond Section, Diamond Valley Secondary Highway	1st - $200.00

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Prospect.	12-1430	Grant	John Day-Harney Co. Line Sec., John Day-Burns Highway	2nd - $200.00 Total to date $500.00
Prospect.	13-1422	Harney	Grant Co. Line-Burns Section John Day-Burns Highway	2nd - $200.00 Total to date $700.00
Prospect.	13-1424	Harney	Burns-Buchanan Section, Central Oregon Highway	2nd - $200.00 Total to date $500.00
Retracing Center Lines	22-1458	Linn	Steiwer Hill-Murder Creek Section, Pacific Hwy. East	2nd-$1,000.00 Total to date $2,000.00

The Commission considered and ordered the extensions of time for the completion of highway contracts as follows:

A. C. Suhre, dba Bend Sand and Gravel Company, Contract No. 2565, for the Redmond Rock Production Project, in Crook and Deschutes Counties, requested an extension of time from August 31, 1943, to October 11, 1943. The Engineer advised that the contractor had difficulty in obtaining equipment and parts, and also experienced difficulty in producing material from the specified pit, and on his own volition moved to another pit. Inasmuch as the state maintenance work was not delayed in any manner, the Engineer recommended that the extension be granted without penalty. Mr. Schaupp moved that the recommendation be approved. It was so ordered by Chairman Banfield.

Chester T. Lockey, Contract No. 2600, for the Dead Ox Flat-Cairo Junction Rock Production Project, in Malheur County, requested an extension of time from April 30, 1943, to October 16, 1943. The Engineer reported that he had examined the contractor's claim and the delay was due to shortage of labor, difficulty in getting repair parts, and government work that the contractor had on the airport at Ontario. He recommended that the extension be granted without penalty. Mr. Schaupp moved that the recommendation be approved and it was so ordered by Chairman Banfield.

P. B. Doherty, Contract No. 2632, for the Alsea Mountain Rock Production Project, in Benton County, requested an extension of time from September 30, 1943, to November 24, 1943. The contractor gave as his reason the shortage of labor and inability to secure hauling equipment. The Engineer stated that the delay in the completion of the work did not cost the state extra money, and the reason given by the contractor was substantially correct, and he

recommended that the extension of time be granted without penalty. Mr. Schaupp moved that the recommendation be approved, and it was so ordered by Chairman Banfield.

Newport Construction Company, Contract No. 2641, for grading and paving the North Bend Airport Road, in Coos County, requested an extension of time from October 31, 1943, to November 1, 1943. The Engineer reported that the contractor was delayed in performing the work by reason of his contract on the North Bend Airport. He pointed out that the extension of time was for one day only, and recommended that it be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. Mr. Schaupp moved that the recommendation be approved, and it was so ordered by Chairman Banfield.

C. H. Grimstad and T. Vanderveldt, Contract No. 2647, for sidewalk construction between Miles Crossing and the Lewis and Clark Bridge on the Oregon Coast Highway, in Clatsop County, requested an extension of time from September 30, 1943, to October 30, 1943. The Engineer reported the contractor had difficulty in securing labor and matetials and recommended that the extension of time be granted without penalty. Mr. Schaupp moved that the recommendation be approved, and it was so ordered by Chairman Banfield.

The Engineer reported that contracts No. 2483, 2565, 2600, 2641, 2647 and 2655, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2483, with Leonard & Slate, for grading, surfacing and oiling on the Boswell Ranch-Follett Ranch Section of the Wallowa Lake Highway in Union County, completed on July 30, 1943.

Contract No. 2565, with A. C. Suhre (Bend Sand & Gravel Co.), for furnishing crushed gravel in stockpiles on the Redmond Section of the McKenzie, Ochoco, The Dalles-California and Redmond-Bend Highways in Crook and Deschutes Counties, completed on October 11, 1943.

Contract No. 2600, with Chester T. Lackey, for furnishing crushed gravel in stockpiles on the Dead Ox Flat-Cairo Junction Section of the Old Oregon Trail and Central Oregon Highways in Malheur County, completed on October 16, 1943.

Contract No. 2641, with Newport Construction Co., for grading and paving on the North Bend Airport Access Road in Coos County, completed on November 1, 1943.

Contract No. 2647, with C. H. Grimstad & T. Vanderveldt, for construction of an oiled-rock footpath on the Miles Crossing-Lewis & Clark River Section of the Oregon Coast Highway in Clatsop County, completed on October 30, 1943.

Contract No. 2655, with Babler Bros., for grading, surfacing and oiling on the Madras-Redmond Air Base Target Range Access Road in Jefferson County, was completed on November 6, 1943.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Assistant Attorney requested authority to purchase certain parcels of real property that are needed for various highway improvements. He submitted a list of such properties and suggested offers in connection with each. After careful consideration of each item the Commission approved the request and the offers recommended. The following resolution with respect thereto was adopted by the Commission by unanimous vote of the Commissioners present upon motion of Commissioner Schaupp:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete

the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

FAIRVIEW TROUTDALE SECTION, COLUMBIA RIVER HIGHWAY

7547-Chase, M. and Anna Right of Way	4,500 sq.ft. at 10¢	$450.00	Parker
	1,774 sq.ft., concrete floor at 20¢	354.80	
	1,500 sq.ft. graveled surface	75.00	
	Damage to remainder of property	400.00	
	Destruction shed, cannot be utilized	100.00	
	Dismantling, removing, reconstructing buildings, tanks (gas), pumps, etc.	3,620.20	
		$5,000.00	

LITTLE LUCKIAMUTE RIVER-MONMOUTH SECTION, BRIDGEPORT-MONMOUTH HIGHWAY

11097-Fern, Henry Right of Way	0.37 acre at $100.00	$37.00	McChesney
	60 rods fence at 75¢ per rod	45.00	
		$82.00	
11096-Ennis, Gilbert Right of Way	2.04 acres at $100.00	$204.00	"
	130 rods fence at $1.50 per rod	195.00	
		$399.00	
11098-Ennis, Gilbert Right of Way	0.38 acre at $100.00	$38.00	"
11099-Dixon, E. S. Right of Way	0.43 acre at $100.00	$43.00	"
	60 rods fence at 75¢ per rod	45.00	
		$88.00	

BUTTEVILLE ROAD-HUBBARD SECTION, WEST PORTLAND-HUBBARD HIGHWAY

3222-B-Jeskey, William and Maude Easement	Payment for falling, damaging and injuring additional trees not included in original flight strip easement	$350.00	Witt
3222-A-Jeskey, William and Maude Right of Way	9.81 acres at $125.00	$1,226.25	"
	8.27 acres at $62.50	516.88	
		$1,743.13	

EUCHRE MOUNTAIN SECTION, SILETZ HIGHWAY

11158-C. D. Johnson Lbr. Co. Right of Way & Slope Easement	2.4 acres	$00.00	Landon
	200 foot slope	00.00	
		$00.00	

MCKENZIE RIVER BRIDGE SECTION, MCKENZIE HIGHWAY

11088-Harris, Lawrence T. Park	4.0 acres	GRATIS	Parker

WOLF CREEK-GRAVE CREEK SECTION, PACIFIC HIGHWAY

10432-A -State Land Board Restriction of Access (Correction)	146.08 acres at $3.52	$513.50	DeSouza

LEXINGTON-HEPPNER SECTION, HEPPNER HIGHWAY

11136-Oregon-Washington Quarry Site and Stockpile Site	Joint Land Bank and Newt O'Hara 8.81 acres at $27.50 per acre plus fencing	$242.17	Cozad

IONE-HEPPNER SECTION, HEPPNER HIGHWAY

11137-Evans Brothers Stock Pile	1.27 acres at $25.00 And fencing	$31.75	"
11135-Cutsforth, O. W. Stock Pile	1.38 acres at $25.00 And fencing	$34.50	"

LEXINGTON-UMATILLA COUNTY LINE SECTION, LEXINGTON-ECHO HIGHWAY

11154-Nichols, Thomas H. Stock Pile	0.93 acre at $20.00 Fencing	$18.60	"

RHEA CREEK-CHAPIN CREEK SECTION, HEPPNER-SPRAY HIGHWAY

11151-Wright, Walter W. Quarry and Stock Pile Site	6.00 acres at $20.00 106 rods fence at $1.00 Release of mortgage - Federal Land Bank	$120.00 106.00 7.50 $233.50	"
11153-Bechdolt, W. W. Stock Pile Site	0.41 acre at $25.00	$10.25	"
11152-Stevens, Harold,& Morrow County Stock Pile Site	0.83 acre at $20.00	$16.60	"
11150-Stephens, Arthur Stock Pile Site	0.71 acre at $25.00 Release of mortgage - Federal Land Bank	$17.75 5.00 $22.75	"

[illegible] 23 1943

FOLLY FARM-CRANE SECTION, ROME-PRINCETON HIGHWAY

11027-Peterson Bros. Quarry Site	12.2 acres at $7.00 (20 year lease)	$85.40	Cozad

JORDAN VALLEY SECTION, I. O. N. HIGHWAY

11054-Malheur County Maintenance Site	2.91 acres	$1.00	"

JORDAN CREEK-JORDAN VALLEY SECTION, JORDAN VALLEY HIGHWAY

10897-Fraser, Wm. M. Right of Way	0.06 acre	$10.00	Parker
10932-Fraser, Wm. M. Haul Road Easement	1.13 acre	$00.00	"

BURNS-CRANE SECTION, DIAMOND VALLEY HIGHWAY

11160-Heinz, Chester Cinder Pit	40.0 acres - Ground Lease- Dec. 6, 1943 to July 1, 1944	$30.00	Van Scoy

---

The Assistant Attorney also requested authority to acquire by condemnation the following properties which are needed in connection with the construction of the Klamath Falls Air Station Access Road and the Siletz Bay-Newport Section of the Oregon Coast Highway:

File 11168-Ellen A. Hannon	Recommended offer if state builds fence	$250.00
	" " if owner builds fence	700.00
File 4050 -Frank Sijota, et ux.	Recommended offer	$225.00

After consideration of both properties the Commission approved the request and the recommended offers. The following resolution with regard thereto was adopted by the Commission upon motion of Commissioner Schaupp, which was seconded by Chairman Banfield:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites,

gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Ellen A. Hannon, which property is located in the south half ($S\frac{1}{2}$) of the south half ($S\frac{1}{2}$) of Section 15 and in the north half ($N\frac{1}{2}$) of the north half ($N\frac{1}{2}$) of Section 22, Township 39 South, Range 9 East, W. M., Klamath County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 11168, which property is being acquired for right of way purposes in connection with the Klamath Falls Air Station Access Road;*

Real property owned by Frank Sijota and Elizabeth Sijota, which property is located in the northwest quarter ($NW\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) (Lot #6) of Section 10, Township 8 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file

R 4050, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resoltuion set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That George Neuner, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 41, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

Major Day, of the U. S. Army, requested the Highway Department to instruct army personnel in the operation of certain drawbridges along the Oregon Coast Highway, to the end that, in the event of a commando raid, the Army could open the bridges, which would constitute an effective road block against the enemy. Major Day stated that the Army had no intention of opening the bridges without a competent man from the Highway Department being present, save and except in times of real emergency when it becomes necessary to delay enemy action. Under these circumstances, the Commission approved the request, and instructed the Engineer to arrange for the necessary instruction.

Appearing for the Committee on Roadside Beautification and Timber Acquisition of the Portland Chamber of Commerce were A. A. Loeb, Arthur Moulton, and Art Kirkham, of Portland. They stated that it was their opinion that the Association of Oregon Counties, which recently passed a resolution against the Commission's acquiring additional wayside strips, had acted without full knowledge of the Commission's procedure and objectives, and that the committee would endeavor to inform the members of the Association of Oregon Counties of the correct objectives of the Commission and its program to carry it out. It was their thought that when the Association fully realized the benefits to be derived from the Commission's action, no further protests would be made.

The Corvallis City Planning Commission, consisting of T. J. Starker, Forestry Department, O. S. C., Charles Whiteside, Whiteside Theatre, and Vic Goodnight, City Engineer, appeared before the Commission at this time. Mr. Goodnight explained to the Commission the objective of the City Planning Commission of Corvallis, relative to the relocation of U.S. 99W through the city. Mr. Goodnight stated that the Engineering Department was well acquainted with the Planning Commission's idea of relocating the Pacific Highway West along the water front in Corvallis.

The Engineer pointed out that among the difficulties of this location is the presence of certain railroad-spur tracks on the street servicing industries adjacent to the street. Mr. Goodnight agreed that this was true and asked the Highway Commission to designate the water front location as the future location of the Pacific Highway, to the end that the Planning Commission of Corvallis might, on this definite commitment, work out the problem of the removal of the track, and the reestablishment of the industries. Chairman Banfield replied that the Highway Commission could not obligate itself on a location of this kind for such a long time ahead, and suggested that the City Council of Corvallis and its Planning Commission try and settle these problems and arrange to clear the right of way of the railroad tracks and then present the matter again to the Commission.

After further conference on the subject, the State Highway Engineer was ordered by the Commission to confer with the City Council and the Planning Commission of Corvallis with relation to the plan, and Mr. Goodnight offered to furnish the Engineer with estimates of cost of the proposed work.

At 4:15 p. m. Chairman Banfield announced the following awards of contracts, bids for which were received at the morning session, such awards having been previously approved by vote of the Commission:

Construction of a Pedestrian Walkway on the Southern Pacific Undercrossing Structure on the Pacific Highway East near Milwaukie in Clackamas County. Birkemeier & Saremal, Portland, submitted the low bid for this project, in the amount of $1,401.00, and Tower Sales & Erecting Co., Portland, submitted the next-low bid, in the amount of $1,442.50. There were four higher bidders. The Commission awards the contract to Birkemeier & Saremal, at their low bid of $1,401.00.

Metolius-Redmond Rock Production Project on The Dalles-California Highway, in Deschutes and Jefferson Counties. M. C Lininger & Sons, Medford, submitted the low bid for this project, in the amount of $30,055.00; D. C. & A. L. Williams, Madras, submitted the second-low bid for this project, in the amount of $31,900.00; and Babler Bros., Portland, submitted the third-low bid, in the amount of $34,800.00. There were three higher bidders. The Commission awards the contract to D. C. &.A. L. Williams, at their second-low bid of $31,900.00.
*(See explanation hereinafter given.)

Brothers-Harney County Line Rock Production Project on the Central Oregon Highway, in Deschutes and Lake Counties. M. C. Lininger & Sons, Medford, submitted the low bid for this project, in the amount of $65,417.00, and J. A. Terteling & Sons, Boise, Idaho, submitted the next-low bid, in the amount of $77,080.00. There were four higher bidders. The Commission awards the contract to M. C. Lininger & Sons, at their low bid of $65,417.00.

Umatilla County Line-Long Creek Rock Production Project on the Pendleton-John Day Highway, in Grant County. M. C. Lininger & Sons, Medford, submitted the low bid for this project, in the amount of $39,640.00, and P. B. Doherty, Portland, submitted the next-low bid, in the amount of $43,800.00. There was one higher bidder. The Commission awards the contract to M. C. Lininger & Sons, at their low bid of $39,640.00.

Klamath Falls Air Station Access Road Project, in Klamath County. 1.02 miles grading and rock base; and 2.76 miles bituminous macadam wearing surface. Clifford A. Dunn, Klamath Falls, submitted the low bid for this project, in the amount of $88,364.00, and Babler Bros., Portland, submitted the second-low, and only other bid, in the amount of $89,996.00. The Commission refers these bids to the Engineer with power to award the contract to the low bidder, when certain conditions have been satisfied.

Kernville-Euchre Mountain Section of Siletz Secondary Highway, in Lincoln County. 0.33 mile of grading and 7.45 miles of surfacing; also furnishing crushed rock in stock piles. J. S. Risley,

Milwaukie, submitted the low bid for this project, in the amount of $56,985.00, and Rogers Construction Co., Dayton, Washington, submitted the next-low bid, in the amount of $75,010.00. There was one higher bidder. The Commission awards the contract to J. S. Risley, at his low bid of $56,985.00.

Idaho State Line-Molloy Ranch Section of the I.O.N. Highway, in Malheur County. 2.26 miles grade widening, surfacing and oiling. Morrison-Knudsen Co., Inc., Boise, Idaho, submitted the only bid for this project, in the amount of $39,420.00. The Commission awards this contract to Morrison-Knudsen Co., Inc., at their low bid of $39,420.00.

Hooker Creek-Jordan Creek Section of the Jordan Valley Secondary Highway, in Malheur County. 5.08 miles regrading and rock subbase; and 10.15 miles surfacing and oiling; also furnishing crushed rock in stock piles. Rogers Construction Co., Dayton, Washington, submitted the low bid for this project, in the amount of $149,587.00, and Morrison-Knudsen Co., Inc., Boise, Idaho, submitted the next-low bid, in the amount of $166,367.00. There were four higher bidders. The Commission awards this contract to Rogers Construction Co., at their low bid of $149,587.00.

Jordan Creek-Scotts Butte Creek Section of the I.O.N. Highway, in Malheur County. 12.82 miles grade widening; 20.10 miles gravel base; and 34.56 miles roadbed topping and oiling; also furnishing crushed material in stock piles. Rogers Construction Co., Dayton, Washington, submitted the low bid for this project, in the amount of $385,937.00, and E. C. Hall Co. and J. C. Compton, Eugene and McMinnville, submitted the next-low bid in the amount of $405,469.00. There were four higher bidders. The Commission awards this contract to Rogers Construction Co., at their low bid of $385,937.00.

Juntura-Hope Rock Production Project on the Central Oregon Highway, in Malheur County. Chester T. Lackey, Ontario, submitted the low bid for this project, in the amount of $42,140.00, and J. A. Terteling & Sons, Boise, Idaho, submitted the next-low bid in the amount of $43,226.00. There were three higher bidders. The Commission awards this contract to Chester T. Lackey at his low bid of $42,140.00.

Lexington Rock Production Project on the Heppner and Lexington-Echo Highways, in Morrow County. Oscar E. Joelson, Eugene, submitted the low bid for this project, in the amount of $33,800.00, and M. C. Lininger & Sons, Medford, submitted the next-low bid in the amount of $35,800.00. There were four higher bidders. The Commission awards this contract to Oscar E. Joelson, at his low bid of $33,800.00.

*NOTE: M. C. Lininger & Sons were low bidders on the following projects: Metolius-Redmond Rock Production Project; Brothers-

Harney County Line Rock Production Project; and the Umatilla County Line-Long Creek Rock Production Project. M. C. Lininger & Sons qualified their bid by the provision that they would accept the award of only two projects at this letting. On the Brothers-Harney County Line Rock Production Project, M. C. Lininger & Sons were $11,663 below the next bidder; and on the Umatilla County Line-Long Creek Rock Production Project, M. C. Lininger & Sons were $4,160 under the next low bidder; whereas on the Metolius Rock Production Project M. C. Lininger & Sons were only $1,845 under the next-low bidder, namely D. C. and A. L. Williams. Therefore, since the bid was qualified, and the bidder would only accept two projects, the Commission found it to the best interests of the state to award the Brothers-Harney County Line Rock Production Project and the Umatilla County Line-Long Creek Rock Production Project to M. C. Lininger & Sons, and to award the Metolius-Redmond Rock Production Project to D. C. and A. L. Williams, of Madras.

The Attorney reported that he had received payment of $30,000.00 as complete settlement for damages in connection with the Algoma flood suit, in Klamath County, which had been in process of negotiation for some time, and which amount had been previously approved by the Commission as a compromise settlement for the claim of approximately $50,000, by reason of the waters of Klamath Lake breaking through a dike and inundating the highway. The Attorney presented the formal release, which was signed by the two Commissioners present. The following resolution was thereupon adopted by the Commission:

RESOLVED, that in the best interests of the State of Oregon and of Oregon State Highway Commission, settlement of that certain law action No. 5338, now pending in the Circuit Court of the State of Oregon for the County of Klamath, wherein State of Oregon, by and through its State Highway Commission, appears as plaintiff, and California-Oregon Power Company, a corporation, et al., appear as defendants, for the sum of Thirty Thousand Dollars ($30,000.00) be and the same is hereby approved.

RESOLVED FURTHER, That upon receipt of said sum of $30,000.00, the members of this Commission, and the Secretary thereof, shall forthwith execute, acknowledge and deliver to the defendants in said action a release in manner and form as follows, to wit:

"RELEASE

In consideration of the payment to the undersigned, STATE OF OREGON, acting by and through its State Highway Commission, of the sum of THIRTY THOUSAND DOLLARS ($30,000.00), receipt whereof is hereby acknowledged, the undersigned, pursuant to resolution of said Oregon State Highway Commission unanimously adopted at its regular session held in Portland, Multnomah County, Oregon, on the 23rd day of December, 1943, does hereby release, acquit and forever discharge California-Oregon Power Company, a

corporation, Southern Pacific Company, a corporation, Central Pacific Railway Company, a corporation, Theodore R. Hughey, J. C. Boyle, H. P. Bosworth, and L. W. Hutchinson, their respective officers, agents, employees, heirs, executors, administrators or assigns of and from any and all claims, demands or causes of action of every nature whatsoever, which it ever had or now has against all or any of said named parties.

For said consideration the undersigned does hereby direct entry of judgment of nonsuit with prejudice in that certain law action No. 5338, now pending in the Circuit Court of the State of Oregon for the County of Klamath, wherein the State of Oregon, by and through its State Highway Commission, composed of Henry F. Cabell, Huron W. Clough, and Herman Oliver, (said individuals being the predecessors in office of the undersigned, Oregon State Highway Commissioners) appears as plaintiff, and said California-Oregon Power Company, and the other above named parties, appear as defendants, the subject matter of said action being included in and fully covered by the release herein.

It is understood and agreed that this settlement is made in compromise of disputed claims, and that said payment is not to be considered as an admission of liability on the part of any of said last named parties, by each of whom liability is expressly denied.

EXECUTED IN SIX ORIGINALS THIS_____day of December, 1943.

STATE OF OREGON
Acting by and through its State Highway Commission, composed of T. H. Banfield, Chairman, Arthur W. Schaupp, Member, and Merle R. Chessman, Member.

T. H. BANFIELD
Chairman

ARTHUR W. SCHAUPP
Member

MERLE R. CHESSMAN

ATTEST: OSCAR CUTLER
Acting Secretary

APPROVED:

J. M. DEVERS
Attorney for Oregon State Highway Commission.

1943

RESOLVED FURTHER, that the members of this Commission, together with the Secretary and Attorney therefor, be and they are hereby authorized and directed to execute, file and deliver on behalf of the State of Oregon, acting by and through the Oregon State Highway Commission, any and all papers, pleadings or motions necessary to release and discharge fully all of the defendants in said above mentioned action from all liability arising out of the subject matter thereof, and to cause judgment of nonsuit with prejudice to plaintiff to be entered in said cause.

The Commission considered and signed the following agreements:

Agreement with the Ostrander Railway and Timber Company covering the construction of an overhead crossing near Canby, in Clackamas County;

Release acknowledging receipt of payment of $30,000.00 as complete settlement for damages in connection with the Algoma flood suit, in Klamath County, (California-Oregon Power Company and Southern Pacific Company, et al.);

Agreement with F. G. Brown, Crystal, Oregon, providing for snow removal on the Klamath Lake Secondary Highway;

Agreement with Ray Fromm, covering grazing of sheep in Humbug Mountain State Park, Curry County;

Agreement with Vernon Turner for grazing sheep in Cape Sebastian State Park, Curry County;

Agreement with City of Long Creek and Alton McBride and wife for lease of Long Creek Maintenance Headquarters;

Satisfaction of mortgage covering property in Marion County which the state has sold to Leo and Zelma A. White;

Agreement with Coast Guard covering the use of state park property in Lincoln County for a lookout station and dog kennels;

Agreement with E. Chester covering construction of a lumber hauling road across Bald Peak State Park;

Letter agreement with City of Corvallis disposing of city's claim for repairing pipe lines during state highway construction north of Corvallis;

Agreement with Public Roads Administration covering Astoria Airport Section;

Agreement with Public Roads Administration covering Monmouth-Pedee Section;

Rental agreement with Henry H. Marr covering rental of Maud Williamson residence, in Williamson Park, Yamhill County;

Agreement with Henry Zorn covering rental of 70 acres of Champoeg State Park property, Marion County.

The Commission set January 11 and 12, 1944, as the next regular meeting date.

There being no further business to come before the Commission at this time, the meeting adjourned at 5:00 p. m.

State Highway Engineer

Acting Secretary

Chairman

Commissioner

Portland, Oregon, January 11, 1944

The State Highway Commission met in regular session at 10:00 a. m. in Room 615, Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner (Arrived at 10:30 a.m.)
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission, by unanimous vote, approved the minutes of the meetings held on November 8 and December 23, 1943.

[illegible] 1943

S. H. Boardman, State Parks Superintendent, was present and reported on the following park matters:

1. Park matters discussed with Chairman Banfield on November 10, 1943:-The Parks Superintendent reviewed for the benefit of Commissioners Schaupp and Chessman the following matters, (items 1A to 1H), which were tentatively approved by Chairman Banfield on November 10:

1A. RENEWAL OF RAY FROMM'S SHEEP LEASE

Mr. Ray Fromm's sheep lease at Humbug Mt. State Park in Curry County was renewed for one year. Mr. Fromm is given the right to pasture in the park fifty sheep. The annual charge is fifty cents per head.

1B. RENEWAL OF VERNON TURNER'S SHEEP LEASE

Mr. Vernon Turner's Sheep Lease at Cape Sebastian in Curry County was renewed for one year. Mr. Turner is given the right to pasture in the park forty sheep. The annual charge is fifty cents per head.

1C. RENEWAL OF HENRY ZORN'S FARMING LEASE

Henry Zorn of Aurora has been farming a seventy-acre unit of Champoeg Park. He farmed it under a lease given to him by the Champoeg Park Commission for a term of three years. This lease is about to expire and Mr. Zorn is requesting the Commission for an extension of this lease for a period of five years. The matter was discussed by Chairman Banfield and the Parks Superintendent and a decision was reached wherein Mr. Zorn's lease would be extended for one year. A payment of three dollars per acre covering the seventy-acre tract was decided upon.

1D. I'CKENZIE HIGHWAY O & C

The Department of the Interior, O & C Division, Portland, Oregon, W. H. Horning, Chief Forester, was to be petitioned at the recommendation of Chairman Banfield for the retention of that part of Section 31, Township 16 South, Range 3 East, W.M., located between the north boundary of the McKenzie River and the south line of the north half of Section 31. This portion of Section 31 is a wooded tract which the McKenzie Highway traverses. A forty to the west of this tract, the recently acquired Ben Dorris property, begins and extends for three quarters of a mile, the highway traversing the same. With the addition of the O & C tract, practically two miles of continuous timbered waysides are preserved. A provision of the forestry law permits the O & C Department to set aside the petitioned property for its wayside values.

1E. DOUGLAS COUNTY DONATION

The Douglas County Court, composed of Judge Busenbark, Commissioners Roadman and Hutchenson, offered to the State Highway Commission a 120-acre tract of land located on the Pacific Highway three miles south of Canyonville, the tract being described as the $N\frac{1}{2}$ $NW\frac{1}{4}$ and the $SW\frac{1}{4}NW\frac{1}{4}$ of Section 12, Township 31 South, Range 5 West, W.M. The tract was to be donated to the Commission for future line changes and wayside development. Upon investigation of the property by the Parks Superintendent, it was found that the $SW\frac{1}{4}$ $NW\frac{1}{4}$ of Section 12 was not needed for road or wayside purposes. Chairman Banfield recommended that this forty be eliminated and that the eighty acres comprising the $N\frac{1}{2}$ $NW\frac{1}{4}$ be accepted.

1F. REQUEST TO LEASE WILLIAMSON PROPERTY

George W. Marr, Sr., of Salem, requested a 99-year lease on the Maud Williamson park property located on the Salem-Dayton Highway, also described as Highway 221. Mr. Marr wishes to construct a store and a group of cabins, the cabins to be rented on a yearly basis. For this privilege he would care for the remainder of the park. The park was given as a recreational memorial by Maud Williamson and never to be commercialized. It consists of twenty acres of beautiful wayside timber. Chairman Banfield denied Mr. Marr's request.

1G. REQUEST TO LEASE OR BUY WILSON RIVER AREA

James C. Caine, realtor of Portland, on behalf of a client, requested the leasing or purchase of a four-acre tract located on the Wilson River Highway, the same being located in Section 36, Township 1 North, Range 8 West, W. M. The area is located about 15 miles east of Tillamook. Waysides along the Wilson River Highway have been acquired for timber coverage, the reforesting of the burnt over areas. To sell any part of the acquired areas would defeat the purpose of the acquisition. Chairman Banfield denied Mr. Caine's request.

1H. OFFER OF JUDGE HARRIS PROPERTY

Through a previous order of the Commission, the Parks Superintendent made an investigation of a four-acre tract located on the McKenzie Highway which Judge L. T. Harris of Eugene wishes to donate to the State. This tract is located on the McKenzie Highway at what is known as the hamlet of McKenzie Bridge, being about fifty miles from Eugene. The tract was the summer home of Judge Harris. The property is situated within a summer residential district, many fine summer homes extending on either side of the Harris property. One residence has been built within ten feet of the north line of the Harris property. To develop the Harris property into a recreational area, the public to participate in its park features,

would defeat the privacy of the summer homes that have been built up in the area. A mile to the west of this proposed park the U. S. Forest Service has developed a recreational area. It has all of the facilities of a fine wayside park. To develop the Harris area for recreational purposes would be a duplication unnecessary for the public needs. At the suggestion of the Parks Superintendent, Chairman Banfield recommended that the Parks Superintendent confer with Judge Harris detailing the foregoing, suggesting that the tract be sold and another bought at a more advantageous location from a recreational standpoint. (Mr. Boardman reported that he later discussed the above arrangement with Judge Harris who offered objections thereto. It was Judge Harris' wish, he said, that the State accept the four-acre tract as a public recreational area and that the development of the same be left to the discretion of the State Highway Commission, both as to time and extent; also, that the area be named Jennie B. Harris State Park in memory of his wife. In view of this report, the Commission voted unanimously to accept the four-acre tract and to name it Jennie B. Harris Park.)

The action taken by Chairman Banfield on all of the above matters was approved by the unanimous vote of the Commission.

2. Request of United States Coast Guard to maintain shelters in certain state parks:-The Parks Superintendent advised that the shelters are small buildings, 6' x 6' in dimension, and that the Coast Guard is simply asking the privilege of maintaining them on the state's property for the duration of the war, the locations being at Ecola State Park, Short Sand Beach, Whale Cove, Boiler Bay, Humbug Mountain, Cape Sebastian, and Harris Beach. The state, he said, will be under no obligation whatsoever concerning them, and the shelters will be removed when they are no longer needed for the purpose intended. He recommended approval of the request. The Commission approved the recommendation by unanimous vote, and ordered that the matter be covered by written agreement between the Commission and the Coast Guard.

3. Water right in Williamson State Park:-The State Parks Superintendent advised that a Mrs. Albert Williamson owns a water share of the Hopewell Water Company which serves this park, and has offered to sell her rights to the state for the sum of $150.00. He recommended acceptance of this offer, because the water is needed for servicing the park. The Commission approved the purchase by unanimous vote.

4. Purchase of Pfeiffer residence in Cascadia State Park:-The Parks Superintendent advised that when the state acquired this park there were two privately owned cottages being maintained on the premises, one owned by Mr. Pfeiffer and the other by Dr. Poling, both of whom were allowed the use of the state's property as a temporary proposition. Mr. Pfeiffer, he said, has since died and his heirs are now offering the building to the state for the sum

of $400.00. He further advised that the Pfeiffer building is a 3-room cottage and that he does not need it for park purposes. The Attorney advised that both buildings are being maintained on the state's property by tolerance only, and that the Commission can require them to be removed whenever it wants to. After discussion the Commission decided not to purchase either of the buildings and instructed the Attorney to discuss with Mr. Willard Marks, Albany, Attorney for the owners, the matter of the removal of the buildings from the state's premises.

5. Request of Civil Aeronautics Administration for right of way for a road across a state park in Curry County:- The Parks Superintendent advised that the Civil Aeronautics Administration is asking the state to deed to Curry County a sixty-foot right of way for an access road across state park property, extending from the Oregon Coast Highway to the Curry County Airport. He recommended approval of this request, as did also the Engineer who advised that if the Commission will donate the right of way the Civil Aeronautics Administration will construct the road which will be of value to the state park. The Commission voted unanimously to deed the right of way to the county for the purpose intended.

6. Proposed bill providing federal aid for state parks:- It was explained by the State Parks Superintendent that this bill provides for a federal appropriation of $1,000,000 for park purposes and that he has been requested to advise the attitude of the State Highway Commission with respect thereto. He explained the provisions of the bill and requested instructions. The Commission decided unanimously not to take any action on the matter.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He presented a list of such parcels, together with offers that he recommended be made in connection with each. After careful consideration of each item the Commission approved the request and thereupon adopted the following resolution with regard thereto, by unanimous vote:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as

bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

HEBO-NESKOWIN SECTION, OREGON COAST HIGHWAY

11157-Rosenberg, H.H., Estate & Henry Heisel Stock pile Haul road Easement	2.21 acres at $100.00 0.16 acre at $156.20 Federal Land Bank Fee	$221.00 25.00 7.50 $253.50	Witt

			$2,115.10	

HALSEY-HARRISBURG SECTION, PACIFIC HIGHWAY

9717 -Headings, John P.	3.33 acres at $100.00		$333.00	DeSouza
Right of Way	215 rods fence at $1.25		268.75	
	12 oak trees at $20		240.00	
	Damages		300.00	
	Payment to owner for acquiring and placing drainage tile		100.00	
			$1,241.75	
	If crop is destroyed by State, add $66.60			

Consideration was given by the Commission to the matter of acquiring wayside strips. During the discussion the question arose whether or not such strips should be continuous in character throughout the length of the highway, and how far they should extend back from the right-of-way line. It appeared to be the consensus of opinion that strips should not be continuous and that they should not extend more than one-fourth mile from the highway. However, definite action in the matter was deferred until later. (See following day for action taken on specific parcels.)

The Engineer reported on the request of the City of Klamath Falls Cemetery Committee for the use of a portion of Lots 7, 8, 9, and 10, Block 2, Westover Terraces, in connection with the proposed development of a Memorial Park at this location. He advised that investigation reveals that all of these lots will be needed for the proposed improvement of the Green Springs Highway so will have to be retained by the state. The Secretary was instructed to so inform Mayor John H. Houston.

The Engineer advised receipt of a request from Lt. Col. Ralph A. Tudor, District Engineer, United States War Department, requesting the Highway Commission's approval of the location and type of traffic signs, signals, et cetera, which he proposes to install on county roads leading to the Salem Army Airport, prohibiting vehicular traffic from using these roads during the landing or taking off of planes on the north and south airfield runway. He advised that the matter has been given very careful study and that it is his recommendation that the request be granted, subject to the following:

1. That the "west" signal, which the Army Engineers have located on a curve, be moved one hundred feet westerly, which will place it on a tangent and will afford better visibility to approaching vehicular traffic.

2. That the advance warning signs be placed at a distance of two hundred feet from the signal.

3. That in addition to the signs warning traffic to stop for a red light certain additional pavement markers and signs be included in conformity with the standard practice.

He explained further that while this installation is being made on county roads over which the Commission has no jurisdiction, the law requires approval by the Highway Commission with respect to the location and the type of signs. The Attorney confirmed the Engineer's statement and advised that the Commission would not be assuming any responsibility if it approved the installation. With this assurance, the Commission voted unanimously approving the project as recommended by the Engineer, and instructed the Secretary to convey such information to the Marion County Court. The Commission also approved the Engineer's letter, directed to the Marion County Court, pertaining to the same subject. (See letter dated January 14, 1944, in General Files)

The Commission discussed briefly and ordered filed a report from the Engineer on the rental of state-highway equipment to contractors and to the United States Army, during the period June, 1942, to January 1, 1944. According to the report rentals in the amount of $88,457.79 have been received and there is now due and payable as of January 1, 1944, from contractors, the amount of $4,888.74. (See detailed report in General Files).

The Commission adjourned at 12:00 o'clock noon, and reconvened at 2:00 p.m. in the same room, with the same persons present and participating.

Messrs. Chas. H. Leonard and Fred H. Slate came before the Commission at this time in regard to their contract for operating the Wilsonville Ferry, Contract No. 2350. They asked the Commission for additional compensation in connection with this operation to offset increased costs. They presented a letter dated January 11, 1944, in support of their oral request. (See letter in General Files.) The matter was discussed at considerable length and as a result thereof the Commission voted unanimously not to grant the contractors' request, but on the other hand to require Leonard and Slate to fulfill their obligations in accordance with the provisions of their contract. The Engineer and the Attorney were instructed by the Commission to follow up the matter and to see that the ferry operations are continued in conformity with the provisions of the contract.

Mr. H. K. Williams, Chairman of the Oregon Petroleum Transportation Advisory Committee, Major M. E. Ericksen, and Lt. E. C. Richardson, of the Army Air Corps, came before the Commission in regard to securing a weight tolerance for the transportation over state highways of gasoline and other

petroleum products. Mr. Williams was spokesman. He requested such weight tolerance for the duration of the war basing his arguments on the fact that there is a shortage of equipment units for the transportation of such products, necessitating the use of equipment that meets the legal requirements in the state of California but is larger than that allowed by law in the State of Oregon. He pointed out that full capacity must be carried in the equipment in order to avoid surge in the tank compartments which would cause leaks, and that by loading to full capacity there would result in some instances an overweight load. He gave as his thought that a two-per-cent weight tolerance would be sufficient to accommodate all movements of this kind. In support of his arguments he presented a copy of the safety regulations promulgated by the Interstate Commerce Commission, which reads as follows:

MOTOR CARRIER
SAFETY REGULATIONS
REVISED
PART 7
Transportation of Explosives and
Other Dangerous Articles
INTERSTATE COMMERCE COMMISSION
Page 16

7,3074 Outage.--No Type A cargo tank or compartment thereof used for the transportation of any inflammable liquid shall be completely filled. The free space (outage) in a Type A cargo tank or compartment thereof used in the transportation of inflammable liquids for distances of 100 miles or more shall not be less than 3 percent of its volume, and in any case the free space shall not be less than 1 percent; sufficient space shall be left vacant in every case to prevent leakage from or distortion of such tank or compartment by expansion of the contents due to rise in temperature in transit. Containers comprising Type B cargo tanks shall be filled in accordance with the regulations for shippers of this Commission.

The Engineer advised that, when the truck is loaded at low temperatures, the petroleum products occupy a less volume therein, causing surge and damaging the equipment. When the equipment is filled to near-capacity, the load is heavier, due to a lower specific gravity of the material. He, therefore, recommended the granting of the two per cent weight tolerance requested by Mr. Williams for the operation of legal-sized equipment transporting petroleum products operating over any highway throughout the state.

The Engineer also stated that the Honorable Joseph B. Eastman, Director of the Office of Defense Transportation, Washington, D. C., had written the Governor and requested permission for the operation of equipment transporting petroleum products, which equipment is legal in California but not legal in Oregon. He requested permission to bring such equipment from the Oregon-California line on US97 to Klamath Falls and from the Oregon-California line on US99 to Medford and thence over ORE62 to Camp White. The Engineer recommended that the permit be granted subject to the following

conditions: (1) That the gross weight shall not exceed that determined by the formula W=800 (L + 40) wherein W represents the gross weight in pounds and L represents the length in feet between the first and last axles of the combination of vehicles; and (2) That the weight on any set of tandem axles shall not exceed 32,000 pounds. The Engineer furthermore recommended that the two per cent tolerance due to the variation in loading temperatures be granted in connection with such movements. The Engineer reported that he had carefully examined the carrying capacities of the highways and bridges over which this special type of equipment would be operated and certifies that they are capable of withstanding such weights without being unduly overstressed.

This matter was discussed at considerable length during which Mr. Williams and both Air Corps officers agreed not to interfere with any penalty that may be imposed on carriers for violations. Mr. Williams also agreed to see to it that the carriers provide ample insurance to protect the State of Oregon and its Governor and its State Highway Commission jointly and separately from liability in the event of accidents occurring. As a result of the discussion the Commission approved the Engineer's recommendation, subject to further approval by Governor Earl Snell, as is required by statute, it being understood that permits issued in conformity therewith shall be revokable in character and shall be effective only for the duration of the war. The following resolutions with regard thereto were thereupon adopted by the Commission by unanimous vote:

> WHEREAS, it has been represented to the Highway Commission that the variation in the temperature of petroleum products affects the specific gravity of the commodity to such an extent that the load capacity of the vehicle on which such products are transported is impaired under certain conditions; and
>
> WHEREAS, limitations which have been imposed on equipment output and other emergency conditions make the movement of capacity loads over highways adequate with respect to structural details and design imperative; and
>
> WHEREAS, if trucks are not loaded to capacity a surge movement is caused which may result in impairment of equipment; and
>
> WHEREAS, war-time emergency demands that for the duration there be a maximum utilization of equipment used for the transportation of petroleum products to the armed forces and to the civilian population; and
>
> WHEREAS, by the enactment of Chapter 266, Oregon Laws, 1943, the Highway Commission, with the approval of the Governor, is authorized "to permit the movement over state highways of vehicles or combination of vehicles having a length and combined and gross weight in excess of all statutory limitations"; and
>
> WHEREAS, the Governor has approved of action by the Highway Commission within the meaning and purpose of said act;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That for the duration of the war, and so far as the Commission has authority so to do, the Commission will deem and consider lawful the movement over certain state highways of a vehicle or combination of vehicles carrying a load of petroleum products which does not exceed by two per cent the maximum gross load capacity fixed by law or fixed in any permit issued by the Commission under the terms of Chapter 266, Oregon Laws, 1943.

2. That a certified copy of this resolution be given to Charles P. Pray, Superintendent of State Police.

3. That this resolution be entered in the minutes and records of the Commission as of January 11, 1944.

WHEREAS, Joseph B. Eastman, Director, Office of Defense Transportation, Washington, D. C., has called to the attention of the Highway Commission the shortage of equipment units used for the transportation of petroleum products and has likewise called to the attention of the Commission the inability of certain petroleum transport companies to load to capacity their equipment operating from the State of California into the State of Oregon because of the variation in the laws of the two states; and

WHEREAS, application has been made for permission to bring transportation units from California into Oregon, the overall length of which units or combinations shall not exceed sixty feet and the gross weight of which shall not exceed a maximum weight determined by the formula W = 800 (L + 40), wherein W equals the weight in pounds and L equals the length in feet between the first and last axles of the combination of vehicles, and in connection with which vehicle the weight on the tandem axles shall not exceed 32,000 pounds; and

WHEREAS, the roads or sections of roads over which the said Director, Office of Defense Transportation, and certain transport carriers have requested permission to move such equipment are: the section of U. S. 97 between the California line and Klamath Falls, the section of U. S. 99 between the California line and Medford, and the section of Oregon 62 between Medford and Camp White; and

WHEREAS, the State Highway Engineer has reported to the Commission that an inspection of the pavements and bridges on said roads discloses that said roads and bridges will not be unduly stressed by the additional weight which such vehicles and loads

will impose, and has further advised the Commission that the geometric design of the said sections of said highways are such as to permit with safety to the general public the movement thereover of a vehicle or combination of vehicles having an overall length of not to exceed sixty feet; and

WHEREAS, by the enactment of Chapter 266, Oregon Laws, 1943, the Highway Commission is authorized, with the approval of the Governor, to permit the movement over state highways of vehicles or combinations of vehicles having a length and combined and gross weight in excess of all statutory limitations; and

WHEREAS, the Governor of the State of Oregon has approved of the granting of the request of Joseph B. Eastman, Director, Office of Defense Transportation, and of the application of motor transport carriers transporting motor fuels into the State of Oregon;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That for the duration a revocable permit shall be issued for the movement of certain motor-fuel-carrying vehicles over the following sections of state highways:

The section of U. S. 97 between the California line and Klamath Falls,
The section of U. S. 99 between the California line and Medford, and
The section of Oregon 62 between Medford and Camp White.

2. That a permit issued pursuant to this resolution shall require that the overall length of the vehicle or combination of vehicles shall not exceed sixty feet and the gross weight shall not exceed a gross weight determined by the formula W = 800 (L +40), wherein W equals the weight in pounds and L equals the length in feet between the first and last axles of the combination of vehicles, and said permit shall provide further that the weight on the tandem axles shall not exceed 32,000 pounds. Except as changed or expressly provided in such permit the statutory requirements and limitations shall be in full force and effect.

3. That a certified copy of this resolution be given to Mr. Charles P. Pray, Superintendent of State Police.

4. That this resolution be entered in the minutes and records of the Commission as of January 11, 1944.

JAN 1. 1944

The Commission had under consideration the adoption of maintenance and minor betterment budgets for the year 1944. The following budgets covering these features were presented by the Engineer, who explained the individual items. He recommended approval of the Budgets, and that he be authorized to make expenditures as may be necessary in connection with each:

MAINTENANCE BUDGET FOR 1944

PRIMARY AND SECONDARY HIGHWAYS

Miles Maintained	*7,150
Average Number Employees	1,300
Section Maintenance Costs	
Roadway Surface	$1,026,110.00
Shoulders	147,100.00
Drainage	253,135.00
Structures	49,855.00
Roadside	328,405.00
Traffic Service	340,140.00
Contingencies	61,255.00
Total Section Maintenance	$2,206,000.00
Extra Gang Maintenance	1,934,000.00
Total General Maintenance	$4,140,000.00
Maintenance of County Roads	27,000.00
Maintenance of City Streets	25,000.00
District Maintenance Offices	145,000.00
Special Maintenance	**1,600,000.00
Contingencies	100,000.00
Grand Total, Maintenance	$6,037,000.00

*Miles maintained do not include county roads or city streets not on highway system.

** Includes $928,000.00 for uncompleted rock production projects contracted in 1943.

JUL 11 1944

MINOR BETTERMENT BUDGET FOR 1944

PRIMARY AND SECONDARY HIGHWAYS

Minor Betterment $78,000.00

The Minor Betterment Budget has been cut 80% since 1941.

The work planned for 1944 consists of:

1. Digging drain tunnels and deep ditches in slides
2. Replacing failed wooden culverts with concrete
3. New culverts and drain ditches required for drainage
4. Constructing road approaches where owner supplies culvert pipe
5. Placing a few fog posts
6. Placing wire mesh to stop raveling slope
7. Building curb at dangerous spot on Columbia River Highway
8. Graveling 2 miles on John Day Highway to cure frost boils and soft spots
9. Filling basement holes on 6th Street in Klamath Falls
10. Oiling shoulders in Gresham
11. Placing cinders on Crane-Diamond Valley Highway.

After careful consideration and full discussion of each item, the Commission, by unanimous vote, adopted both budgets as recommended, on motion of Commissioner Chessman which was seconded by Commissioner Schaupp. The Engineer was thereupon authorized to make expenditures in conformity therewith, including the contracting of the special maintenance projects, as follows:

MAINTENANCE ROCK PROJECTS

Division No. 2		
Albany - Lyons	13,000 cu. yds.	$45,000.00
Blodgett - Pioneer Mtn.	10,000 cu. yds.	35,000.00
Seal Rock - Lane County Line	10,000 cu. yds.	35,000.00
Division No. 3		
McKenzie Bridge - Belknap Springs	13,000 cu. yds.	39,000.00
Division No. 4		
Chemult - Fort Klamath	14,800 cu. yds.	44,000.00
Bend - Camp Abbot	4,800 cu. yds.	17,000.00
Fremont Highway, M.P. 110 - M.P. 130	10,000 cu. yds.	40,000.00
Klamath Falls - Lakeview M.P. 26 - M.P. 50	9,600 cu. yds.	38,000.00
Lakeview - Burns, M.P. 20 - M.P. 45	7,500 cu. yds.	30,000.00

MAINTENANCE ROCK PROJECTS (Cont.)

Division No. 5

La Grande - Meacham	15,000 cu. yds.	$45,000.00
Kimberly - Dayville	14,000 cu. yds.	42,000.00
Heppner - Spray	10,000 cu. yds.	33,000.00
Medical Springs	11,500 cu. yds.	39,000.00
Total	143,200 cu. yds.	$482,000.00

RE-OILING AND PAINTING PROJECTS

Division No. 2

Albany - Lyons, B-2		$20,000.00

Division No. 3

Coos Bay Bridge Painting		60,000.00

Division No. 5

I.O.N. Highway Re-oiling		42,000.00
	Total	$122,000.00
		$604,000.00

The Commission also considered the adoption of a general highway-department budget for the year 1944. The Engineer submitted a proposed budget as follows, and explained each item contained therein:

OREGON STATE HIGHWAY COMMISSION
Estimates of Receipts and Expenditures, Year 1944
State Highway Fund

RECEIPTS

State Funds:	1944 (Estimated)
Motor vehicle license fees and operators' fees	$ 3,000,000
Gasoline tax	8,000,000
Motor transportation fees	1,600,000
Fines for traffic law violations	50,000
Cash discounts	3,000
County cooperation	—
Miscellaneous cooperative funds	—
Sub-total, State Funds	$12,653,000

(Continued on next page)

JAN 1 1944

Highway Department Budget, Year 1944 (Cont.):

RECEIPTS

Federal Cooperative Funds:	1944 (Estimated)
1940 and prior federal funds	$ 119,000
1941 federal funds	373,000
1942 federal aid funds ($1,648,000)	172,000
1942 FLH funds ($64,000)	9,000
1942 federal secondary funds ($288,000)	104,000
1942 federal grade separation funds ($229,000)	23,000
1943 federal aid funds ($1,649,000)	982,000
1943 federal secondary funds ($288,000)	88,000
1943 federal grade separation funds ($229,000)	54,000
Access road federal funds ($4,120,000)	1,264,000
Federal strategic highway funds ($1,250,000)	1,000,000
Federal flight strip funds ($1,000,000)	327,000
Federal advance engineering funds ($165,000)	50,000
Sub-total, Federal funds	$ 4,565,000
Estimated total receipts	$17,218,000
Less contributions to State Police	425,000
Less contributions to Counties (15.7%)	2,313,000
Less contributions to Cities (5%)	737,000
Net receipts for highway purposes	$13,743,000
First of year balance	4,518,000
Estimated total available funds	$18,261,000

EXPENDITURES

Capital Outlays:	
1940 and prior federal projects	$ 30,000
1941 federal projects	50,000
1942 federal aid projects	---
1942 FLH projects ($146,000)	---
1942 federal secondary projects ($459,000)	75,000
1942 federal grade separation projects ($321,000)	---
1943 federal aid projects ($1,936,000)	150,000
1943 federal grade separation projects ($255,000)	---
Access road projects ($4,120,000 Fed., $158,000 State)	700,000
Federal strategic highway projects	1,170,000
Federal flight strip projects	---
WPA highway projects	---
State construction (primary)	40,000*
State construction (secondary)	75,000*
(Sub-total)	$ 2,290,000

(Continued on next page)

JUL 1 1944

Highway Department Budget, Year 1944 (Cont.):

EXPENDITURES

	1944 (Estimated)
Capital Outlays (Cont.)	$ 2,290,000
Cooperation in forest road work	---
Minor betterments (primary)	60,000*
Minor betterments (secondary)	18,000*
Surveys (primary)	300,000
Surveys (secondary)	75,000
Surveys (county roads)	25,000
Engineering county construction	---
Property acquisition, general expense	40,000
Purchase of real property:	
For rights of way, general	385,000*
For right of way on Front Avenue ($800,000)	115,000
For quarries and gravel pits	10,000
For stockpile sites	5,000
For parks	115,000*
For flight strips and miscellaneous sites	---
Construction of buildings and improvements:	
In parks (general)	2,000*
In parks (roadways)	---
At maintenance stations	10,000*
On other properties	13,000*
Equipment:	
Purchase and betterment of equipment	140,000*
Sale and depreciation credits	Cr. 200,000
Contingencies, construction	200,000*
	$ 3,603,000
Maintenance:	
Special maintenance (primary)	$ 1,500,000*
Special maintenance (secondary)	100,000*

General maintenance (secondary)	940,000
Maintenance of county roads	27,000
Maintenance of city streets	25,000
District maintenance superintendence	145,000
Contingencies, maintenance	100,000*
	$ 6,037,000

(Continued on next page)

Highway Department Budget, Year 1944 (Cont.):

EXPENDITURES

Operation:	1944 (Estimated)
Administration and general supervision	$ 430,000
Planning and traffic surveys	60,000
Travel and information bureau	28,000
Radio communication system	8,000
R-W, quarry and stockpile leases	Cr. 10,000
Park operation and maintenance (general)	46,000
Park maintenance (roadways and minor parks)	5,000
Maintenance station operation	35,000
Truck load inspection	60,000
Guarding highway structures	60,000
Drawbridge and ferry operation	80,000
Research and special investigation	10,000
Increase in revolving fund	—
Miscellaneous general expense	75,000
	$ 887,000
Service and Clearing Accounts:	
Equipment, repair shops and storerooms (charges)	$ 1,300,000
Equipment, repair shops and storerooms (credits)	Cr.1,300,000
Other service and clearing accounts (net)	—
Debt service:	
Bond maturities	$ 1,915,000
Bond interest	309,000
Service charge on bond payments	2,000
Estimated total expenditures	$12,753,000
Unexpended balances	$ 5,508,000*

*These are unobligated amounts, except for 1943 carry-over of $65,000 in State Construction and $1,000,000 in Special Maintenance.

After a full discussion of this matter, the Commission indicated its approval of the entire budget except the amounts set up for the following items:

State Parks
Guarding of highway structures
Operation of drawbridges and ferries

JUL 1 194

The Commission deferred a definite decision with respect to the entire budget pending additional information on these items, to be furnished by the Engineer on the following day.

The Commission adjourned at 5:00 p. m., with the understanding that the meeting would be resumed at 9:00 a. m. the following morning in the same room.

Portland, Oregon, January 12, 1944

The State Highway Commission reconvened at 9:00 a. m. in Room 615, Imperial Hotel, with all Commissioners, the State Highway Engineer, the Attorney and the Secretary present.

The Commission resumed its discussion of the proposed general budget for 1944.

In this connection the advisability of continuing the guards that are now being maintained on certain highway structures was discussed. The question arose, "Will the state be amply protected if the guards are discontinued and the bridges insured against damage?" It was the thought of the Commission that it would be satisfactory to do away with the guards if and when the structures are insured. A motion to that effect was made by Commissioner Schaupp and seconded by Commissioner Chessman. Chairman Banfield declared the motion adopted by the unanimous vote of the Commission. The Engineer was thereupon instructed to ascertain how much the insurance would cost and report back to the Commission at the next meeting, when a decision will be reached whether or not to purchase the insurance.

The amount to be expended in 1944 for acquisition of parks and for park operation was also considered. After full discussion of this matter the Commission tentatively approved the amounts listed for such purposes subject to correction. The Parks Superintendent was instructed to revise his proposed budget of park operations to show opposite the several budget items, the amounts actually expended during 1943 for such items. It was understood that whatever amount the Commission approves for acquisition of parks, no purchases of park areas shall be made until the Commission has had an opportunity to pass on the transactions, which is in accordance with previously established policy.

The Commission questioned the amount of the increase in the budget for operating drawbridges and ferries as compared with the actual expenditures for such purposes during 1943. The Engineer was instructed to give this item more study and report back to the Commission.

Approval of the total budget for general purposes was then considered. Chairman Banfield suggested that the budget as submitted by the Engineer be approved subject to correction in the amounts listed therein for the following items:

Guarding highway structures
Operation of drawbridges and ferries
State Parks

The suggestion was approved by Commissioners Schaupp and Chessman whereupon Chairman Banfield declared the budget adopted by unanimous vote of the Commission subject to correction of such items.

The Commission next discussed matters pertaining to the postwar construction program. In this connection the Engineer submitted a list of projects for both primary and secondary highways, from which the Commission after careful consideration tentatively selected the following as a partial program for postwar moneys. It was understood that the Commission is making no definite commitments whatsoever with respect to construction of any of these projects and that the selection of projects at this time is simply to authorize the Engineer to complete the surveys and to do what is necessary to secure approval of the projects by the Public Roads Administration; and to authorize the Attorney to proceed with the securing of options for right of way as may be needed, it being understood that no option shall be closed until the project for which it is being acquired has been approved by the Public Roads Administration, and not then unless approved by the Commission.

PROJECTS TENTATIVELY SELECTED BY HIGHWAY COMMISSION
FOR SUBMISSION OF PLANS TO FEDERAL GOVERNMENT

ARRANGED BY HIGHWAY ROUTES

The purpose of the Commission in submitting plans at this time is to obtain federal commitment on rights of way purchases to insure reimbursement if, and when, the projects are constructed.

Route and Section	Miles	Kind of Work	Estimated Cost	County
I. PROJECTS ON FEDERAL AID SYSTEM AND IN URBAN AREAS

The Engineer brought up for discussion the matter of apportioning highway funds throughout the state by highway divisions. He explained that for the past several years funds have been allocated to the several divisions on the following formula:

60 per cent in proportion to population
30 per cent in proportion to mileage of primary and secondary highways
10 per cent in proportion to area

He suggested that the Commission might wish to change this formula in view of the possibilities of a change in the Federal Government's formula for the allocation of federal funds. He recommended the following formula for the apportionment of federal funds:

1. For municipal funds:

100 per cent in proportion to urban population (Cities of 10,000 or more)

2. For regular federal aid and secondary funds:

25 per cent in proportion to rural population (includes cities under 10,000)

25 per cent in proportion to area

50 per cent in proportion to need (cost to complete primary and secondary state highways)

The Commission discussed the matter at some length, but decided not to take action until it has had time to give it more study.

Reconsideration was given by the Commission to the matter of acquiring right of way strips, particularly along the Wolf Creek Highway, the Oregon Coast Highway and the Pendleton-John Day Highway. The Assistant Attorney presented a list of properties for which options have been obtained, being properties that the Commission inspected personally during its several trips throughout the state in the interests of the postwar program. In the discussion it was pointed out that the list as submitted does not represent all of the holdings in these particular localities for which negotiations are being carried on, in view of which the Commission decided to defer action until options on all of the properties have been acquired.

The Assistant Attorney reported on the application of Mr. R. H. Thom for trapping privileges on the property acquired from Gordon Smith west of Stanfield, Umatilla County, on which is located a small lake. He suggested if the Commission wished to avoid the necessity of granting or rejecting applications for either hunting or trapping privileges in this area, it could either designate the property a wild bird and game refuge under the provisions of Section 82-602, O. C. L. A., or sell the property, which is not needed for state highway purposes. The Engineer confirmed such statement as to the value of the property from the highway standpoint. After discussion, the Commission decided unanimously to sell the property. The Attorney was thereupon instructed to advertise it for bids.

The matter of rental of a state-owned residence building in Pendleton was brought up for discussion by the Assistant Attorney. He advised that the housing situation in Pendleton is quite serious, and that one of the highway department maintenance men, who is headquartered at this place, is having difficulty in finding a suitable place for his family, who now reside in Baker, and it appears that the services of this man will be lost to the department if he cannot obtain the use of the state's building. It also appears that the present renter of the building is willing to move but likewise is having difficulty finding a suitable home. The question arose whether or not the Commission should take an arbitrary attitude in the matter and evict the present renter. It was the opinion of the Commission that the building should be made available to the maintenance man, on condition that he pay $30.00 per month rental for the use of the property. Motion to that effect was made by Commissioner Schaupp and was seconded by Commissioner Chessman. Chairman Banfield declared the motion carried by unanimous vote.

The Commission adjourned at 12:00 o'clock noon and reconvened at 1:30 p. m. in the same room, with all members of the Commission, the Engineer, the Attorney and the Secretary present.

The Attorney reported an offer from Mary Palandri to purchase, for the sum of $750.00 state-owned property described as Lot 6, of Block 1, Caruthers Addition to the City of Portland, which property was acquired in connection with acquisition of right of way for the Front Avenue Project. He

said that the property is appraised at $750.00 and advised that it is not needed for highway purposes. He recommended sale of the property at the price offered. The Commission approved the recommendation unanimously.

The Engineer requested authority for Assistant State Highway Engineer, Mr. C. B. McCullough and Bridge Engineer, G. S. Paxson, to make a trip to Seattle at state expense in connection with bridge matters. He estimated the expense involved would not exceed $30.00, in view of the fact that Mr. McCullough's expenses will be paid by the federal government. The Commission approved the request.

The Commission discussed the matter of penalizing operators of logging and commercial trucks for overloading and, in connection therewith, a report from the Engineer and the Attorney on the practice that is followed in the State of Washington with respect thereto. It appeared from the report that Oregon is more liberal with respect to the weight of loads, and the penalty for overloading is less severe in Oregon than it is in the State of Washington. It appeared to the Commission that the solution of the overloading problem is the removal of the excess weights; however, a definite decision with regard thereto was deferred pending consultation with Governor Earl Snell and representatives of other departments concerned. Commissioner Chessman offered to consult the Governor with regard to the meeting date. The Engineer was instructed to invite the following persons to such meeting: Mr. Charles P. Pray, Superintendent of the Department of State Police; Mr. George Flagg, Public Utilities Commissioner of Oregon; and F. H. Brundage, Western Log and Lumber Administrator, War Production Board. (The conference was later set for Tuesday, January 18, 1944.)

The Secretary submitted a report on overweight violations that have been committed during the previous month by carriers who are operating under war time emergency permits. Action on this matter was deferred by the Commission pending the conference with Governor Snell.

Like action was also taken on reports submitted by the Engineer on overweight violations committed by log haulers in the Eugene-Springfield area, and on drastic overload violations committed by certain individual log haulers.

A petition was presented from persons residing in the vicinity of Corvallis requesting sidewalk construction along the Albany-Corvallis Highway in the vicinity of the Fairplay School, so as to eliminate the pedestrian traffic hazard which, it is alleged, exists at this place. The Engineer estimated that this sidewalk would cost about $9,000.00. After discussion the Commission decided to defer consideration of this project until the war is over and normal conditions return. The Attorney was instructed to advise the Commission as to its responsibility with respect to sidewalk construction,

The Secretary presented a letter from the Harney County Court expressing appreciation for the extra maintenance work that has been performed

by highway crews on the Crane-Folly Farm Secondary Highway and requesting the allocation of additional funds for similar purposes on the Princeton-Diamond Secondary Highway. He was instructed to advise the Court of the amount set up in the 1944 Budget for such purposes.

A letter was presented from the City of Woodburn requesting a survey of Young Street in Woodburn to enable the City to acquire certain right of way for slope easements as may be required to provide a uniform right of way prior to the time the City asks the Highway Commission to designate this street as a state secondary highway. The Engineer advised that very little engineering work would have to be done, and that the cost would be nominal. He recommended approval of the request. After discussion the Commission by unanimous vote approved the performance of such engineering work subject to the strict understanding that the Commission is making no commitments whatsoever with respect to construction or otherwise.

The Commission discussed the employment of an agency to handle advertising for the Travel and Information Department during 1944, the question being whether the arrangement with Botsford, Constantine, and Gardner, who have performed this function for several years past, should be continued or the services of another agency secured. The Commission decided to accept the recommendation of the Advisory Committee on Travel Matters with respect thereto.

Consideration was given by the Commission to the claim of the Bend Lions Club for reimbursement for the cost of repairing a service men's shelter which the club has been maintaining on the right of way of The Dalles-California Highway within the city limits of Bend and which was damaged by Mr. Roscoe Sansom, an employee of the State Highway Department. The Engineer advised that the shelter was located on the portion of the street that is under the control of the state but the club had no authority to locate it there; further, that Mr. Sansom was not on duty at the time of the accident, and was using a state truck without authority. He gave as his thought that the state is not liable. He further stated that he has deducted from the amount due Mr. Sansom as wages the sum of $15.00 to pay for the truck repairs, and that the Bend Lions Club has requested the balance due Mr. Sansom, amounting to $22.00, to apply on the cost of repairing the shelter. Mr. Sansom, he said, disappeared after the accident and his present whereabouts is unknown; however, his wife still resides in Bend. The question arises whether the $22.00 should be paid to the Lions Club or should be forwarded to Mr. Sansom's wife. It was the Commission's decision that the $22.00 due Mr. Sansom should be sent to Mrs. Sansom and it was so ordered. The Attorney was instructed to inform the Bend Lions Club by letter giving reasons why it was necessary for the Commission to take such action.

The Commission by unanimous vote authorized payment of membership dues for 1944 in the American Association of State Highway Officials and in the American Road Builders Association, amounting to $450.00 and $5.00, respectively.

The Attorney reported the need for the Commission to adopt a resolution with respect to the formal revision and relocation of a portion of

the Oregon Coast Highway between Warrenton Park and Lewis and Clark River Bridge, near Astoria, because of the condemnation proceedings that the United States of America has instituted in order to acquire title to a portion of the Oregon Coast Highway between these termini. He presented a form of resolution covering the matter and advised that everything contained therein was considered, acted upon and adopted by this Commission at its meeting on July 7, 1943, but through inadvertence a formal resolution was not prepared or entered in the minutes. He recommended, in view thereof, the adoption of the resolution at this time, nunc pro tunc, as of July 7, 1943. After discussion the Commission approved the recommendation and thereupon adopted the following resolution by unanimous vote, upon motion of Commissioner Chessman which was seconded by Commissioner Schaupp:

WHEREAS, the United States of America, represented by the United States Navy, disclosed to the Highway Commission that as a war measure it is necessary to revise and relocate a portion of the Oregon Coast Highway; namely, that portion beginning in Warrenton Park, thence in an easterly direction to the Lewis and Clark River Bridge; and

WHEREAS, it is required by the United States Navy that said revision and relocation be made so that the runways of the Astoria Airport may be extended; which extension will include a part of the said highway right of way; and

WHEREAS, for the purpose of acquiring title to a portion of the right of way of said highway between said termini the United States of America has instituted and is prosecuting a condemnation proceeding, which action is pending in the District Court of the United States for the District of Oregon;and

WHEREAS, for the purpose of cooperating with the United States Navy the Highway Commission authorized the State Highway Engineer to make the necessary survey or surveys for the selection and determination of a route over which to construct a new section of the Oregon Coast Highway which has been made necessary by reason of the appropriation of a portion of the existing highway by the United States of America; and

WHEREAS, upon completion of said survey the Commission is of the opinion that the survey and route should be approved and the field notes, maps and other data connected therewith filed in the office of the State Highway Commission at Salem, Oregon;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, all members being present and affirmatively voting, as follows:

1. That it is the purpose of the Commission to relocate that section of the Oregon Coast Highway which begins in Warrenton Park and ends at the Lewis and Clark River Bridge.

2. That the survey made by the State Highway Engineer pursuant to the instructions of this Commission, which survey defines the new route and location of and for said section of said highway, be and said survey and route hereby are approved, and the field notes, records and other data connected therewith hereby are ordered filed in the permanent records and files of the Highway Commission at Salem, Oregon.

3. That the relocation and route of said section of said highway shall be as follows:

> Beginning at a point on the center line of the present Oregon Coast Highway at Station 100+60, said point being 150 feet east of the west line of Blocks 86 and 91, Warrenton Park; thence in a southeasterly direction to Station 152+42.7; thence continuing in an easterly direction to Station 215+20; thence continuing in a northeasterly direction to Station 270+29.5 at the west end of the Lewis and Clark River Bridge.

4. That the portion of the Oregon Coast Highway right of way described as follows, to wit:

> All that certain section of the right of way of the Lewis and Clark River-Warrenton Section of the Oregon Coast Highway and situated in Sections 25 and 26, Township 8 North, Range 10 West, W. M., Clatsop County, Oregon, the beginning point being the intersection of the easterly boundary line of the Astoria Airport and the center line of the Oregon Coast Highway at Engineer's Station 182+62; thence westerly along said highway center line 2397 feet to Engineer's Station 158+65 and the westerly end of said section of right of way,

hereby is abandoned for state highway purposes and the possession, title and use thereof hereby is surrendered to the United States of America in so far as its interest may appear or be fixed by reason of the condemnation action now pending in the United States District Court for the District of Oregon, which case is entitled United States of America v. State of Oregon, acting by and through its State Land Board (intended to be State Highway Commission).

5. The following described right of way, to wit:

> All that section of the right of way of the said Lewis and Clark River-Warrenton Section of the Oregon Coast Highway situated in Section 26, Township 8 North, Range 10 West, W. M., Clatsop County, Oregon, and lying within the limits of the Astoria Airport; the beginning point on the easterly end being on the existing center line of said highway at Engineer's Station 158+65; thence westerly along said

highway center line 1529 feet to the intersection of the westerly boundary line of the Astoria Airport and the center line of said highway at Engineer's Station 143+36 and the westerly end of said section of right of way,

shall be and hereby is surrendered and made available to the United States of America so long as said right of way or real property shall be used by the United States of America as an airbase or for other defense purposes, but when said right of way is no longer used by the United States of America for defense purposes possession thereof and control thereover shall be returned to the State of Oregon, by and through its State Highway Commission. Use by the United States of America or any of its agencies of said last above described right of way shall be deemed acceptance of the same within the meaning and purpose of this resolution.

6. All of the remainder of the old right of way of said Oregon Coast Highway not included in paragraphs 4 and 5 shall be and the same hereby is retained for right of way purposes for maintenance thereover of a highway to serve the residents thereon.

7. For the purpose of meeting the needs of the United States Navy in connection with national defense the construction of the highway over said new route between the Lewis and Clark River Bridge and a point designated as highway engineer's station 211+25 shall be undertaken at once or as soon as the necessary plans and specifications can be prepared, but the remainder of said relocated section may be deferred until a later date.

8. That pending the construction of the remainder of said new route a temporary road or detour shall be constructed and maintained along the following defined route:

Beginning at a point on the now existing center line of the Oregon Coast Highway 300 feet west of the west boundary line of the Astoria Airport; thence in a southeasterly direction to a point on the relocated line of the Oregon Coast Highway at Station 211+25,

so that at the earliest date possible public traffic may be diverted from the old route, thus making said old route available for the needs of the United States Navy.

9. A temporary detour shall, with the approval of the County Court of Clatsop County, employ the county road which extends from a point on the new route to the southerly boundary of the Astoria Airport, and the remainder of said detour road shall be over a new road constructed upon right of way owned and controlled by the United States Navy, but over which a revocable permit has been given to the State by the Navy.

10. That for the purpose of further identifying the new route of said section of said highway and the detour route there is attached hereto, marked Exhibit A, and made a part hereof a blueprint which for identification purposes bears the date of July 28, 1943, and on which map the new highway location is shown colored in yellow, the temporary detour road is shown colored in green, the area of the old highway route which by this proceeding is abandoned and surrendered to the United States of America and which is described in paragraph 4 hereof is shown colored in red, and the portion of said old right of way not included in said condemnation proceeding but possession of which is be this resolution made available to the United States of American is shown colored in orange.*

11. That the matters and things covered by this resolution were all considered, acted upon and adopted by this Commission at its meeting held July 7, 1943, but by inadvertence the entry of a formal resolution in its minutes and records was overlooked. Therefore it is now ordered that this resolution be entered in the minutes and records of this Commission nunc pro tunc as of July 7, 1943.

The Engineer reported briefly on his personal inspection of the logging highway which the Ostrander Railway and Timber Company proposes to extend across secondary highways Nos. 215 and 211, near Molalla. He advised that some of the company officials wish to discuss this matter with the Commission in person before the Commission takes final action in the matter. In view thereof the Commission decided to defer a decision until the company has had an opportunity to present its case, and ordered that they be invited to be present at the next regular meeting of the Commission.

Similar action was taken by the Commission on the request of the Willamette Valley Lumber Company to construct a logging road at grade across the state highway in the town of Dallas.

A letter was presented from Manzanita Community House, Inc., and the Pinegrove Progressive Club, of Manzanita, Oregon, suggesting the establishment of a permanent state game preserve along the Oregon Coast Highway, over Neahkahnie Mountain, including Short Sand Beach State Park, which area it was stated is a natural wild-game breeding place. The Commission considered the matter at some length, but deferred a decision pending information whether or not the State Game Commission desires a game preserve at such location. The State Parks Superintendent was instructed to contact Mr. Frank B. Wire, State Game Supervisor, relative thereto.

The Secretary presented a letter from the County Court of Columbia County, requesting designation as a state secondary highway of the Scappoose-Vernonia County Road, approximately twenty-one miles in length. It was the opinion of the Commission that the time is not propitious to add any more roads to the secondary highway system while there remains such a large mileage of

*(Map filed Right of Way Abandonment and Retention File - No. 118.)

uncompleted roads on such system. Furthermore, the Commission considered that the counties are now being treated fairly with respect to highway revenues and should be able to finance the improvement of county roads with the moneys that they now receive from the state out of the highway fund. The Secretary was instructed to convey such information to the County Court.

The Commission considered and ordered filed a resolution adopted by the Association of Oregon Counties with respect to the acquisition of roadside areas.

The Commission discussed an offer from Messrs. Edwin Fleischman, Stanley McCoy, and Harry Blodgett, farmers residing near Monmouth, to pay the sum of $1,000 for a narrow strip of state owned land that lies between their farms and the Pacific Highway West, between Monmouth and Suver. The Engineer advised that the strip is about 120' wide and that it extends from the highway to a parallel county road which these farmers are now forced to use because the state's ownership of the intervening property has cut off their access to the highway. He further stated that the County Court is desirous of vacating the old county road, so when that is done these farmers will be without access to a road of any kind, which is their reason for wanting to purchase the state's property. He also said that the offer submitted includes provision for the construction of three roadway approaches to the highway by the farmers themselves, without expense to the state. He recommended acceptance of the offer, because the land is not needed for highway purposes. After discussion, the Commission approved the recommendation, contingent on the following: (1) that only three approach roads to the highway will be constructed, and that these will be built by the farmers themselves at their own cost and expense in locations to be specified by the Engineer; (2) that the deed of conveyance will contain a provision restricting the use of the property to farm use only, eliminating any possibility whatsoever of signs, hot-dog stands, et cetera, being maintained on the property.

The Attorney brought up for discussion a resolution adopted by the Commission on October 12, 1943, abandoning several sections of old right of way of the Columbia River Highway between Bonneville and Cascade Locks. He explained that some of the parcels abandoned by this resolution are located in Multnomah County and some in Hood River County, but by inadvertence the name of Hood River County was omitted from the resolution, in view of which the railroad company, to whom the Commission is deeding the abandoned parcels, has requested that the resolution be corrected in that respect. He recommended approval of the railroad company's request. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following amendatory resolution relative thereto on motion of Commissioner Schaupp, which was seconded by Commissioner Chessman:

> WHEREAS, on the twelfth day of October, 1943, the Commission adopted a resolution abandoning several sections of the old right of way of the Columbia River Highway between Bonneville and Cascade Locks; and

WHEREAS, it appears that some of the parcels of land so abandoned are located in Multnomah County and some in Hood River County, but by inadvertence the name of Hood River County was omitted from the said resolution; and

WHEREAS, said resolution should be amended to conform to the facts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, a majority of the members of the Commission being present and affirmatively voting, as follows:

That said resolution be amended as follows:

1. That in the first and second "whereas" clauses following the words "Multnomah County" in each instance the words "and Hood River County" be added and that in the first "whereas" clause the word "county" in the last line be changed to the word "counties".

2. That paragraph (1) be amended so as to read as follows:

"1. There is hereby eliminated from the right of way of the Columbia River Highway and the State Highway Commission does hereby relinquish to the Oregon-Washington Railroad & Navigation Company all of the State's right, title, or interest of every kind and character in and to the following described parcels of real property situated in Multnomah County and Hood River County, Oregon, to wit:"

3. That paragraph (3) be amended so as to read as follows:

"3. That this resolution be entered in the minutes and records of the Commission and a duly certified copy thereof delivered to Oregon-Washington Railroad & Navigation Company, a like copy to the Board of County Commissioners of Multnomah County, a like copy to the County Court of Hood River County, and a like copy to the Public Roads Administration."

4. That the quitclaim deed executed by the Highway Commission on October 12, 1943, in favor of the Oregon-Washington Railroad & Navigation Company, the execution of which said deed was authorized by and in said resolution, be re-executed as of this date, and thereafter said re-executed deed and a certified copy of this amendatory resolution be delivered by the Commission's Counsel to the said railroad company.

The Attorney brought up for discussion the Moser controversy concerning the purchase of a quarry site near Grants Pass, in Josephine County. He stated that the property in question is under condemnation and that he had it in mind to ask the Commission for instructions relative thereto at this meeting; however, he is now in receipt of a letter from Mr. Neil Allen, Dr. Moser's attorney, who wants to discuss this matter with the Commission in person before the Commission takes action. In view of the report the Commission deferred its decision until Mr. Allen has had an opportunity to present his case.

The Engineer requested authority to sign in behalf of the Commission, an escrow agreement with Donelson and Koppisch, loggers, who are deeding to the state for park purposes certain logged-off land in the vicinity of Neahkahnie Mountain as partial consideration for the purchase of the timber on adjacent state-owned property. (See minutes of April 7, 1943, for details of the transaction.) He explained that the escrow agreement provides that the state will receive the deed for the property as soon as the company has completed its logging operations thereon and in any event the deed is to be delivered to the state not later than July 1, 1944. The Commission voted unanimously authorizing the Engineer to sign such escrow agreement.

The Attorney requested instructions whether or not to purchase right of way that is required for the new location of the Willamette Highway through property owned by Norman and Elmer Furuset south of Eugene. It appears that the property is occupied by a house and other buildings that will have to be moved before the highway can be constructed, which, very likely, will not be accomplished until the war is over. In the meantime the house is in need of repairs, which the owners hesitate to undertake until the moving of the building has been accomplished. Because of the housing situation in the Eugene vicinity, the owners have in mind to convert this nine-room house into apartments, but do not feel like doing so while the house is located in its present position, because of the damage that will occur when it is moved later on. For this reason, the owners are asking the Commission to move the house to a new location at this time. After considerable discussion the Commission instructed the Attorney to negotiate with the owners, from the standpoint of having the house repaired in its present location with the moving of the same to be accomplished when the property is needed for the highway improvement, and from the standpoint of moving the building now.

The Commission discussed an inquiry from the Union Oil Company whether or not it would be possible to secure the services of one of the highway department's maintenance crews to remove snow from the driveway that leads to their distribution plant adjacent to The Dalles-California Highway at Chemult. The Commission decided not to authorize such service, in view of its long-established policy with respect to such matters.

A letter was presented from the Portland Flying Service, Prineville, Oregon, requesting that a state highway crew be authorized to remove snow from the runways of the Prineville Airport. It appears that the Portland Flying Service is engaged in the training of army aviation students, under

contract with the Civil Aeronautics Administration, and that it is necessary to keep the runways clear of snow in order to maintain their daily flying schedule. They stated their willingness to reimburse the state for the cost of performing this work and advised that they are not asking for priority either over highway clearance or over snow removal of main army air bases. The Engineer suggested, if the Commission approves the rendering of such service, that the matter be covered by written agreement, and that the Portland Flying Service be required either to pay in advance the estimated cost of the undertaking or to furnish a bond guarantying such payment; further, that no work be done on the airport until all highways in the vicinity are cleared and the snow has been removed from all the army bases which the highway department is responsible for under agreement with the army authorities. After discussion the Commission approved the Engineer's suggestion by unanimous vote, and it was so ordered.

The Engineer reported the results of investigations conducted by Traffic Engineer F. B. Crandall, in regard to the movement over state highways of trains of vehicles, consisting of truck-tractor semi-trailer with a full trailer in tow. He advised that such combinations of vehicles are known as "double-header semi-combinations," and that the overall length of the train will not exceed 60 feet; further, that observation shows that such a combination of vehicles can be moved over any of the Group 1 highways listed in the Commission's emergency wartime transportation permits without causing any greater hazard to other traffic than a combination of vehicles consisting of truck and trailer. He recommended in view thereof that the Commission authorize the movement of such combinations of vehicles on the condition that the overall length shall not exceed sixty feet, that the vehicles shall conform to the axle weights and axle distribution fixed in the statute and that the loads conform to the weight limits fixed in the permit, provided that the granting of such permits meets with the approval of Governor Earl Snell, as is required by statute. The Commission approved the recommendation by unanimous vote, subject to the condition that the permits are revokable in form and in any event shall not be in effect for longer than the duration of the war. The following resolution with respect thereto was adopted by the Commission by unanimous vote, on motion of Commissioner Schaupp, which was seconded by Commissioner Chessman:

> WHEREAS, application has been made for a permit to move over certain state highways a combination of vehicles known as "double-header semi-combination", which combination of vehicles will have a gross weight of vehicles and load in excess of the statutory limit; and
>
> WHEREAS, Joseph B. Eastman, Director, Office of Defense Transportation, has advised the Commission that there is a shortage of motor transport equipment and therefore it is urged by said Director that every consideration consist nt with the best interests of the State be given to motor transport carriers using the public highways of the State; and
>
> WHEREAS, as a result of an inspection and study of highway pavements and highway structures by the State Highway Engineer

it has been determined that certain state highways which have been listed and designated as Group No. 1 Highways are adequate as to type and design of construction to accommodate a combination of vehicles such as the one known and designated as "double-header semi-combination"; and

WHEREAS, by the enactment of Chapter 266, Oregon Laws, 1943, the Commission "is authorized, with the approval of the Governor, to permit the movement over state highways of vehicles, or combination of vehicles, having a length and combined and gross weight in excess of all statutory limitations", and

WHEREAS, subject to conditions and limitations which will be incorporated in the permit, the Commission is of the opinion that in the interests of national defense the movement of the above designated type of vehicle should be permitted;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, all members being present and affirmatively voting, as follows:

1. That subject to certain rules, regulations and conditions heretofore approved by the Commission a revocable permit or permits may be issued for the movement of a combination of vehicles known as "double-header semi-combination" over the highways of the State which have been inspected, classified and designated as Group No. 1 Highways.

2. That any permit issued for the movement of such vehicle or combination of vehicles shall provide that the overall length shall not exceed sixty feet, and the vehicle shall conform to the axle weights and axle distribution fixed in the statute and shall conform to the weight limits fixed in the permit.

3. That a certified copy of this resolution be delivered to Mr. Charles P. Pray, Superintendent of State Police.

4. That this resolution be entered in the minutes and records of the Commission as of January 12, 1944.

The Commission considered briefly and ordered filed a report from the Engineer on the claim of the state highway department against the federal government for extraordinary damage that has been done to state highways by U. S. Army operations or by government contractors. (See report by E. A. Collier, Maintenance Engineer, dated January 10, 1944, in General Files.)

A letter was presented from the American Road Builders Association relative to the employment of Latin-American engineers on state highway work. The Engineer suggested that it might be satisfactory to employ a few young, promising engineers from the Latin-American countries as a friendly gesture,

it being his thought that they could be assigned to minor engineering positions at a rate of pay not exceeding $100.00 per month, with the understanding that some other agency would pay their transportation expenses to and from Oregon. The Attorney advised that there is no legal reason why the Commission can not enter into such an arrangement if the state receives requisite value from the services of the men. The Commission deferred a decision in the matter pending a full report from the Engineer as to the value and benefit that the state will receive by reason of the employment of Latin-American engineers, and as to the kind of work on which they would be employed.

Reconsideration was given by the Commission to a letter from School District No. 38, Wauna, Oregon, in which the Commission was requested to construct a small waiting room on the right of way of the Lower Columbia River Highway, one-half mile west of Taylorville, for the benefit of school children and working men who are obliged to take the bus at this point. The Secretary pointed out that the Commission at its meeting on December 23 denied this request, but the School District now wishes to know whether or not the Commission will permit the District to maintain its own waiting room on the highway property. It was the thought of the Commission that such encroachments on the highway are undesirable and should not be allowed. A motion was thereupon made by Commissioner Schaupp that the request be denied, and that the School District be required to construct and maintain its own waiting room entirely off the highway right of way; and that this action be considered as establishing a general policy to be followed hereafter in the disposition of such matters. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission.

The Commission considered and confirmed the action taken at its meeting on December 23, 1943, with respect to the removal of certain railroad crossing signs where the crossings are protected by automatic signal devices as well as by signs. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

> WHEREAS, the Commission on the twenty-third day of July, 1942, adopted a resolution which was entered in the minutes of the Commission, by which resolution the Commission approved and ordered the installation and maintenance of conventional railroad stop signs at certain crossings of railroad and highway at grade, all of which crossings were particularly named and identified in said resolution; and
>
> WHEREAS, some of said crossings were then and still are protected by automatic electric signal devices; and
>
> WHEREAS, based upon observation and inspection, it is the judgment of the Commission that crossings which are protected by both the automatic signal device and the conventional railroad stop sign are made more hazardous by reason of the employment of both types of crossing warnings for the reason that motorists fail to recognize the conventional stop sign unless the automatic signal device is signalling the approach or the presence of a train, and therefore the automatic signal device loses much of its warning value; and

WHEREAS, it is the judgment and opinion of the Commission that said resolution adopted July 23, 1942, should be amended;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, all members being present and affirmatively voting, as follows:

1. That the resolution adopted by this Commission and entered in its records and minutes as of July 23, 1942, be amended by eliminating therefrom the following crossings, to wit:

Railroad	Crossing No.	Highway	M.P.	Location
S.P.	C-635.49	Pacific	135.9	Oregon Ave., Creswell
S.P.	C-585.2	Pacific	187.3	S. W. of Sutherlin
S.P.	C-580.2	Pacific	192.3	Near Wilbur, Douglas
S.P.	C-678.1	Mount Hood	1.9	17th & Powell, Portland
S.P.	C-735.14	Hillsboro-Silverton	38.97	Young St., Woodburn
S.P.	C-743.16	Beaverton-Aurora	20.6	Main St., Aurora
S.P.	C-756.7	Cascade	13.3	North of Oregon City
S.P.	C-660.6	Junction City-Eugene	0.2	6th St., Junction City
S.P.	C-648.2	Junction City-Eugene	13.2	Van Buren St., Eugene
S.P.	CF-446.8	Klamath Agency-Modoc Point	12.87	Modoc Point, Klamath Co.
U.P.	2H-12.49	Oregon-Washington	11.67	Adams
U.P.	2A-342.71	Baker-Unity	45.55	Bewey Ave., Baker
G.N.	10A-28.3	The Dalles-California	168.6	N. Lapine, Deschutes Co.
G.N.	10B-0.3	Midland	2.00	Near Klamath Falls
O.T.	28T-134.6	Ochoco	0.25	E St., Redmond

2. That the stop signs at the following crossings, to wit:

S.P.		Sutherlin leg Elkton-Sutherlin	0.85	Sutherlin
U.P.	2A-215.23	Pendleton-John Day	1.06	Emigrant St., Pendleton
U.P.	2AC-189.7	Old Oregon Trail	197.6	Gladys St., Hermiston,

which crossings were not designated in said resolution adopted July 23, 1942, but which crossings are likewise served by automatic signal devices be likewise removed.

3. That the Engineer be and he hereby is directed to remove or cause to be removed all of the conventional railroad crossing stop signs which heretofore under the terms and instructions of said original resolution were erected at the above designated crossings.

4. That the Secretary be and he hereby is instructed to deliver by mail to Harold J. Turner, Secretary-Manager, Oregon Railroad Association, a certified copy of this resolution.

JULY 1944

5. That this resolution be entered in the minutes and records of this Commission as of the date of its adoption; namely, January 12, 1944.

The Commission discussed briefly matters pertaining to the Front Avenue Project, Portland. The question arose whether or not the City of Portland intends to adhere to the plans heretofore approved for this project or expects to discard this plan in favor of the "Moses Plan." The Engineer and the Attorney were instructed to consult with the city officials with regard thereto and ascertain definitely, if possible, which plan the city intends to follow.

The Engineer asked the Commission to confirm the following surveys which he has ordered since the last meeting of the Commission:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Plans	218-1467	Klamath	2.2 mi. SE of Klamath Falls to the Klamath Falls Airport, Klamath Falls-Lakeview Highway	1st-$1,000.00
Grade	4-1468	Clatsop	Franklin Ave. from 28th to 32nd St. (City of Astoria), Columbia River Highway	1st - $300.00

After due consideration the Commission, by unanimous vote, authorized and instructed the Engineer to make such surveys.

The Commission had under discussion the following requests for extensions of time within which to complete highway-construction projects:

E. C. Hall and J. C. Compton, Contract No. 2586, for grading the North Unit of the Monmouth-Benton County Line Section of the Pacific Highway West, in Polk County, requested an extension of time from October 15, 1942, to October 9, 1943, within which to complete this job. They attributed their failure to complete the project within the specified time limit to unfavorable weather conditions in the latter part of 1942. The Engineer advised that the reason given by the contractor for overrunning the time limit is correct. He recommended in view thereof that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Warren Northwest, Inc., Contract No. 2607, for grading and paving the Aurora Flight Strip on the West Portland-Hubbard Highway in Marion County, requested an extension of time from April 30, to November 17, 1943, within which to complete this job. They

alleged that the delay in awarding the contract and unusually severe weather conditions encountered during the winter and early summer months were responsible for their failure to complete the project within the specified time. The Engineer advised that weather and soil conditions were such that until the latter part of July it was impractical to do the grading work that was necessary to prepare the site and to obtain stable base for paving. In fact, because of the unsuitable condition of the ground the government engineers required considerable more base-rock material than was specified in the contract. He added that the contractor was also delayed in completing the construction of fences, because of his inability to secure fence material. He recommended in view of the circumstances that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Vernie Jarl, Contract No. 2623, for clearing the approach and side-clearance zones on the Aurora Flight Strip Section of the West Portland-Hubbard Highway, in Marion and Clackamas Counties, requested an extension of time from May 31 to November 16, 1943, within which to complete this job. He alleged that his failure to complete the project within the specified time limit was due to his inability to find some one to remove the fallen trees from the state's property. The Engineer advised that the essential part of the contract was completed early in the season, but some clean-up work and removal of timber and logs from the state's property was not finished until November 16. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contracts Nos. 2586, 2607, 2623, and 2657, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2586, with E. C. Hall Co. & J. C. Compton, for grading the North Unit, Monmouth-Benton County Line Section of the Pacific Highway West, in Polk County, completed October 9, 1943;

Contract No. 2607, with Warren Northwest, Inc., for grading and paving the Aurora Flight Strip Project, in Marion County, completed November 17, 1943;

Contract No. 2623, with Vernie Jarl, for clearing the approach and side clearance zones on the Aurora Flight Strip Project, in Marion and Clackamas Counties, completed November 16, 1943;

Contract No. 2657, with E. C. Hall Co., for furnishing crushed rock in stockpiles on the Wapinitia Section of the Wapinitia Highway, in Wasco County, completed December 29, 1943;

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission had under discussion the setting of a date for the next regular meeting for the receiving of bids and decided to hold such meeting on Monday, February 7, 1944, in Portland. (This meeting date was later changed to Wednesday afternoon, February 16, and Thursday, February 17.) In this connection the Commission discussed a place in which to hold this meeting, in view of reports to the effect that the auditorium in the Public Service Building soon will not be available for public use. The offer of Mr. Phil Metschan, owner of the Imperial Hotel, for the use of the "Stock Exchange Room" on the first floor of this hotel, was discussed and accepted. The Secretary was thereupon instructed to arrange for the use of this room for future meetings of the Commission.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Klamath County Court relative to the maintenance of the Altamont Drive County Road; (Federal Access Road.)

Agreement with Contractors Morrison-Knudsen, Inc., and Ford J. Twaits Company, covering rental of a highway department 10-ton Buffalo Springfield Roller, Dept. No. 41-670;

Agreement with M. C. Lininger & Son, covering rental of one highway department 82 HP Power Unit, Dept. No. 41-913;

Agreement with Chester M. Hines and wife, covering lease of property for road materials;

Agreement with Wm. Jesky and wife, covering the falling, damaging and injuring of trees on the Aurora Flight Strip Section;

Project agreement with the Public Roads Administration covering installation of traffic signals at Sheridan;

Copy of a resolution adopted December 23, 1943, designating a 25-mile-per-hour speed limit on the Oregon Coast Highway at Astoria;

Agreements with the U. S. Coast Guard, covering the maintenance of Coast Guard shelters on the Oregon Coast Highway at the following points: Ecola State Park, Short Sand Beach, Whale Cove, Boiler Bay, Humbug Mountain, Cape Sebastian, and Harris Beach;

"Statement of acceptance of award," in order to secure settlement of the state's claim against the U. S. War Department in the amount of $61.92;

Deed conveying unto the O. W. R. & N. Company certain parcels of land at Eugene, in accordance with prior agreement dated December 13, 1941;

Deed conveying unto Mary Palandri, for the sum of $750.00, Lot 6, of Block 1, Caruthers Addition to the City of Portland.

There being no further business to come before the Commission at this time, the meeting adjourned at 4:00 p. m.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

Salem, Oregon, January 18, 1944

Pursuant to the decision reached at its meeting held on January 12, 1944, the State Highway Commission met in the office of Honorable Earl Snell, Governor of Oregon, at 10:00 a. m., for a discussion of matters pertaining to the truck-hauling of logs over state highways, particularly the penalty to be imposed on operators who are observed with loads weighing

in excess of the statutory weight limits and tolerances authorized by the Highway Commission. Present at such meeting were the following:

Honorable Earl Snell, Governor of Oregon
T. H. Banfield, Chairman, State Highway Commission
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel, Highway Commission
H. B. Glaisyer, Secretary, Highway Commission
Chas. P. Pray, Superintendent, Dept. of State Police
George H. Flagg, Public Utilities Commissioner
Max Flannery, Assistant Commissioner, Public Utilities
F. H. Brundage, Western Log and Lumber Administrator, W. P. B.
F. D. McPherson, Asst. Western Log and Lbr. Administrator, W. P. B.
J. H. Hedrick, Tire Supervisor, O. P. A.
Floyd Cook, Executive Sec'y., Highway Traffic Advisory Committee

Commissioner A. W. Schaupp was excused from attending this meeting. Chairman Banfield presided.

At Chairman Banfield's request the State Highway Engineer presented statistics on log hauling, as prepared from weight reports rendered by state police officers and by highway department weighmasters. He also reviewed the concessions and special privileges that heretofore have been granted by the Highway Commission to log haulers in order to assist in the delivery of logs from the woods to the mills, for wartime use, and explained that the tolerances now allowed by the Commission are the maximum that can be permitted without unduly overstressing highway facilities.

Chairman Banfield advised that the present Highway Commission has given this matter serious consideration and is of the opinion that operators who violate the weight requirements should be severely penalized. It was his thought that this would not create an undue hardship on the industry as a whole because the records indicate that only about 15 per cent of the operators are persistent and chronic violators. He further stated that in the Commission's experience nominal fines, imposed by Justices of the Peace upon violators, are not a deterrent to the practice of overloading, since the profits from the overloads are more than enough to pay the fines and the costs assessed. He gave as the Commission's thought that the problem could be solved by requiring operators to adjust their loads at the scales if found with an overweight, either by shifting the load or by removing one or more of the logs, so that authorized weights will not be exceeded.

The matter was discussed at considerable length, during which Mr. Brundage expressed himself in favor of the penalty suggested by Chairman Banfield provided operators are given some leeway, and are not required to remove any portion of their loads if the overweight is only a few hundred pounds.

Superintendent Pray stated that this had been his practice for some time and expressed his willingness to enforce any ruling that the State Highway Commission may see fit to adopt with respect to such matters. This concluded the conference.

The meeting adjourned at 12:00 noon, following which the Commission reconvened at 1:30 p. m. in the office of the State Highway Engineer, Room 325, State Office Building, at which time the Commission gave the matter further consideration.

Present at the afternoon session were: Chairman T. H. Banfield, Commissioner M. R. Chessman, R. H. Baldock, State Highway Engineer, J. M. Devers, Attorney, and H. B. Glaisyer, Secretary.

As a result of further discussion the Commission decided, after consulting with Commissioner Schaupp over the telephone, that the penalty for overloading trucks, whether engaged in the transportation of logs or any other commodity, shall be either the adjustment of the load or the removal of a portion thereof, so that approved weights will not be exceeded. The following statement for release to the press on Friday, January 21, 1944, was thereupon prepared by the Commission.

STATEMENT
OF
OREGON STATE HIGHWAY COMMISSION

Following a conference held Tuesday, January 18, in Salem, with the State Police, the Public Utilities Commissioner, the Office of Defense Transportation and the Office of Price Administration, the State Highway Commission adopted a new policy for the control of overloading of logging and commercial trucks without subjecting the industry to undue penalties during the war period.

Hereafter, instead of recommending to the Public Utilities Commissioner the cancellation of permits of offending operators, the Commission will insist that overloaded trucks be stopped and be required to take off the overload and the State Police will, under its statutory authority, enforce this requirement.

The Commission has had numbers of conferences with operators of logging trucks and feels that at least 85 per cent of them are co-operating sincerely to preserve the highways from the damage from overloads. However, its records show that a minor percentage are persistent and chronic violators and are overloading consistently beyond the statutory limits and above the 7,000-pound tolerance which the Commission is allowing.

The Commission's experience is that the nominal fines which have been imposed by justices of the peace upon violators is no deterrent to the practice since the profit from the overload more than pays the fine and costs assessed. The suspension of permits has in numbers of cases imposed a very severe penalty since the permit is issued for the whole fleet of an operator rather than to individual trucks. This ties up the whole operation instead of just the offending driver and truck.

The Commission questions that it has authority to permit overloaded trucks to continue over highways and bridges after the weighmasters have determined the overload. Therefore, the police will require the overloaded trucks to pull off the highways and the overloads be removed.

Moreover, the Commission will hereafter send a record of violations to the OPA which is very much concerned over the effect of excessive speeds and weights upon tires and gasoline. The violators will, therefore, be subject to the additional penalty of having rationing boards refuse tires if, in the judgment of the OPA, the offense warrants such drastic action.

The public may not realize that the Highway Commission has been quite patient and cooperative with the logging industry and that in addition to the statute tolerance of 5,400 pounds given a logging truck in gross weight and 1,000 pounds on axle weight, the Highway Commission on its own motion and within its discretionary power, as granted by statute, has increased the tolerance granted on gross weight to 7,000 pounds. The Commission feels that the statute weight of 54,000 pounds, plus the tolerance of 7,000 pounds, giving 61,000 total gross load, is the maximum that the highway bridges and pavements will stand and that operators should be able to load so as not to exceed a tolerance of 3½ tons.

Pursuant to a statute enacted in the Forty-second Legislative Assembly, the Highway Commission has given special wartime emergency permits to commercial carriers permitting an increase in length of the vehicle to 60 feet and an increase in weight from 54,000 pounds to approximately 71,000 pounds, when the operators use equipment having an over-all length of 60 feet equipped with additional axles so as to reduce the load concentration. The Commission feels that in granting this additional privilege the commercial haulers must stay within the limits set forth and will likewise insist that overloaded commercial trucks be stopped and required to take off the overload and the State Police will, under its statutory authority, enforce this requirement.

The Commission feels that the overload problem must be solved if the state's highways are to last for the duration of the war and, after conferring with Washington authorities, knows that it is giving as much or more co-operation with the truck operators as its neighboring state is. The Commission wants to do all in its power, in this wartime emergency affecting transportation, to expedite the movement of goods and services but cannot be unmindful of its duty to the citizens of this state in protecting the public's large investment in highways.

The Engineer was instructed to inform Mr. Chas. P. Pray, Superintendent, Department of State Police, of the action taken, and to request his

assistance in the enforcement of the new rule. He was also instructed to prepare an outline of procedure for the Highway Department's weighmasters, including provision for the transmittal of information to the state police department when overweight loads are observed.

Matters of a general nature were then discussed by the Commission, which also considered and signed the following papers:

Agreement with Alvin Witzke, Cascadia, Oregon, covering the hauling of logs across a portion of Cascadia State Park.

Permit authorizing Walter L. and Ethel R. Shrock to construct and maintain a timber structure across Mill Creek, a portion of which structure will encroach upon the right of way of the West Portland-Hubbard Highway in Marion County, such structure to be used in connection with a private roadway approach to the highway in this location.

Letter directed to the General Petroleum Corporation of California, affecting the company's leasehold on the service station property at the intersection of Union and Denver Avenues, Portland.

Easement conveying unto Curry County, right of way across state-owned property in Curry County, in connection with the construction of the Curry County Airport Project.

There being no further business to come before the Commission at this time, the meeting adjourned at 3:00 p.m.

T. H. Banfield
Chairman

State Highway Engineer

Commissioner

Secretary

, 1944

Portland, Oregon, February 16, 1944

The State Highway Commission met in regular session at 2:00 p. m. in Room 615, Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner (Arrived at 4:15 p. m.)
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

A delegation from Pendleton, headed by Mayor Sprague H. Carter and including E. B. Aldrich, Publisher of the Pendleton East Oregonian; County Judge Carl W. Chambers of Umatilla County; Clyde Richey, President of the Pendleton Chamber of Commerce; and Mr. Sam Murray, Resident Engineer of the U. P. Railroad Company, Portland, came before the Commission and requested consideration of the following projects for postwar construction:

1. Construction of an underpass at the U. P. Railroad crossing on S. W. Emigrant Street (Pendleton-John Day Highway).

2. Construct a new highway about four blocks in length along the north side of the U. P. Railroad right of way from the intersection of S. W. 13th Street and S. W. Dorian Avenue northeasterly to a connection with S. W. Court Avenue (Old Oregon Trail) at its intersection with S. W. 16th Street extended. They suggested this improvement in order to eliminate traffic congestion along S. W. Court Avenue which could be effected, they said, by designating S. W. Court Avenue a one-way route for west bound highway travel and S. W. Dorian Avenue as a one-way route for east bound highway travel. In this connection they asked for the widening of S. W. Court Avenue at its westerly end.

3. Construction of an underpass at the U. P. Railroad crossing on S. W. 20th Street and the improvement of S. W. 20th Street as the route of U. S. Highway No. 395 from its junction with the Old Oregon Trail southerly to its junction with the Pendleton-John Day Highway.

4. Removal of the existing railroad tracks from S. W. Emigrant Avenue between S. W. 3rd Street and S. W. 6th Street. They advised that the railroad company is occupying this street without franchise from the city.

5. Authorize the State Highway Engineer to work in conjunction with the city in the making of investigations for the elimination of railroad grade crossings on S. W. Main Street.

A brief general discussion was had of each project during which Mr. Murray advised that he was present at the request of the Pendleton delegation, particularly, because the railroad company is very much interested in the

elimination of the railroad grade crossings. Chairman Banfield advised that the Commission is not in a position to make a definite decision with respect to these projects now but will authorize the Engineer to consult with the city with respect to engineering features in connection with the proposed elimination of grade crossings on S. W. Main Street. He added that the Commission would probably authorize the Engineer to make surveys of all the projects if the cost is not great but cares not to make a definite statement until Commissioner Chessman has been consulted. (The Engineer was authorized on the following day to make surveys of all of these projects. See ahead for minute entry.)

W. H. Lynch, Division Engineer, Public Roads Administration, was present and offered a federal contribution of $1,500,000 of National Defense Highway Act funds to assist in financing the modernization of three sections of the Pacific Highway, viz., Miller Creek-Albany Section in Marion and Linn Counties, 10.6 miles in length; Harrisburg-Halsey Section in Linn County, 9.4 miles in length; and Grave Creek-Smith Creek Section in Josephine County, 2.5 miles in length. These projects, he said, are on the strategic highway network and are important from the standpoint of the army and navy authorities who have already approved them for construction. He further explained that in order to secure the benefit from such funds the State of Oregon will have to contribute about $1,000,000 match money, otherwise the money will be re-allocated to some other state, but if the Commission accepts the offer construction can proceed at once. Chairman Banfield and Commissioner Schaupp both expressed themselves in favor of accepting this offer on the condition that Commissioner Chessman also approves. (Commissioner Chessman gave his approval on the following day, thus making the decision unanimous.)

State Parks Superintendent, S. H. Boardman, was present and reported on the following park matters:

Acquisition of two 40-acre tracts situate adjacent to the Crater Lake Highway:- The Parks Superintendent advised that these two tracts are owned by the federal government and are located adjacent to the Crater Lake Highway near McLeod; further, that they can be purchased at the rate of $15.00 per acre. If the Commission approves the purchase, he said, it will be necessary to increase the amount budgeted for park acquisition during 1944. The Commission decided not to purchase these tracts.

Release of O & C lands in Douglas County heretofore acquired by lease from the federal government:- The Parks Superintendent advised that Douglas County and the federal government have now completed the

arrangement for an exchange of properties in accordance with previous agreement and understanding, so the County is now in a position to deed to the state the land that the state has had under lease, provided the state will relinquish its prior lease rights. The Commission approved the transaction and thereupon signed the letter directed to the Chief Forester covering the matter.

Request of W. E. Johnson, Forest Grove, to lease certain state property adjacent to the Wilson River Highway near McNamer's:- The Parks Superintendent advised that Mr. Johnson wishes to lease certain land and some of the old WPA buildings standing thereon for filling station and cabin purposes. He recommended denial of the request. The Commission approved the recommendation unanimously.

Maintenance of a guard in Umpqua Lighthouse State Park, Douglas County:- The Parks Superintendent advised that heretofore he has had an arrangement with the State Forester with respect to the cleaning up of this park, including burning operations, and would like to renew this arrangement for 1944. He explained that in order to secure such extension it would be necessary to maintain a guard or watchman in the park during the fire season which would cost about $92.00 per month for three months each year. The purpose of watchman, he said, is to guard the reforested area against fire hazard. The Commission approved the request and thereupon signed an agreement with the State Forester covering the matter.

Sale of cedar posts in Humbug Mountain State Park:- The Parks Superintendent advised that in connection with his park operations he has salvaged some downed-timber by having it cut into fence posts and that he has had two offers to purchase the posts. He recommended acceptance of the best offer if the posts cannot be used by the state. The matter was referred to the Engineer to ascertain whether or not the posts are of value for highway use. In the event they are of no value for highway purposes then they are to be advertised for sale to the highest bidder.

The Engineer brought up for discussion at this time the park items in the 1944 budget, action on which was deferred at the previous meeting. He pointed out that the Commission approved a budget of $115,000 for acquisition of parks but requested additional information concerning the item of $46,000 for park operation and $5,000 for maintenance in parks by section crews. He explained these items in detail. After discussion the Commission approved the following amounts for park expenditures:

Acquisition of Parks. .	$115,000
Park operations	46,000
Park maintenance by Section crews. . . .	5,000

The Engineer also asked the Commission to approve amounts contained in the budget for guarding bridges and for operating drawbridges and ferries.

17 1. 1944

He explained that $60,000 was included in the tentative budget for the first of these items but since the Commission has approved removal of the guards the amount can be reduced to $17,000 and may be further reduced if the federal government and the State of Washington will offer no objections to the removal of guards from the Interstate Bridge. As to the $80,000 set up for drawbridge and ferry operation, the Engineer advised that this amount is somewhat larger than the amount budgeted in 1943 due to salary raises and to increased cost of operating the Enegren Ferry in Coos County but cannot be reduced. After discussion the Commission approved the budget of $17,000 for guarding bridge structures and $80,000 for drawbridge and ferry operations.

In this connection the Commission discussed briefly the question whether or not to renew its war risk insurance policies when the present policies expire on July 1, 1944. Action on this matter was deferred by the Commission until its May meeting.

The Commission had under consideration the matter of signing a joint letter with the Public Roads Administration and the U. S. Forest Service recommending an appropriation of $60,000 of forest highway funds to finance the preparation of plans for the post war forest highway "on the shelf" program. After discussion the Commission approved and signed the following letter relative thereto:

Chief, Forest Service,
Commissioner, Public Roads
Washington, D. C.

Gentlemen:

Additional funds in the sum of $60,000 are necessary to finance the P.S.& E. for the Post-War Forest Highway "On the Shelf" Program in the State of Oregon.

It has been mutually agreed to recommend that the above sum be allocated to Lump Fund Surveys from any Forest Highway funds that may be available.

Very truly yours,

W. H. LYNCH (signed)
District Engineer

JAMES FRANKLAND (signed)
Acting Regional Forester

OREGON STATE HIGHWAY COMMISSION

By T. H. BANFIELD
Chairman

A. W. SCHAUPP
Commissioner

M. R. CHESSMAN
Commissioner

Attest

H. B. GLAISYER
Secretary

1944

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with offers that he recommended in connection with each. After carful consideration of each item the Commission approved the request and thereupon by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

HEBO-NESKOWIN SECTION, OREGON COAST HIGHWAY

11004-	Cross, Homer M. Crushing plant site and quarry site	10 yr. lease of 2.34 acres.	$ 483.00	Witt

TILLAMOOK-HEBO SECTION, OREGON COAST HIGHWAY

11277-	Schau, K. R. Stock pile site	1.75 acres at $125.70 plus 30 rods fence to move and rebuild at $1.00 per rod	$220.00 30.00 $250.00	McChesney

CLATSOP COUNTY LINE-MOHLER SECTION, OREGON COAST HIGHWAY

800-A-	Hunt, Verna Tubbesing Stock pile site	5 yr. lease of 0.202 acres	$ 50.00	McChesney

FEB 16 1944

GARDINER SUMMIT-TAHKENITCH LAKE SECTION, OREGON COAST HIGHWAY

10991-Sparrow Realty Corporation Right of Way	53.61 acres of land	GRATIS	Parker

BOARDMAN-STANFIELD SECTION, BOARDMAN-STANFIELD HIGHWAY

8415- 8416- State Highway Commission 8417-	NOTE: U. S. Reclamation Bureau requires payment construction liens on lands in Morrow County owned by the State before lands are excluded from the West Extension Irrigation District.	$ 498.31	Schannep

KIMBERLY-DAYVILLE SECTION, JOHN DAY HIGHWAY

11186-Morrow, John A. Stock pile site	1.96 acres at $50.00	$ 98.00	Cozad
11183-Bales, Minnie & Mattie E. Stock pile site and gravel pit	7.50 acres at $25.00	$ 187.50	Cozad
11184-Foree, W. J. Stock pile site	2.05 acres at $25.00	$ 51.25	Cozad
11269-Mascall, L. E. Stock pile site	0.46 acre at $50.00 plus Plus fencing	$ 24.00	Cozad
11185-Kennedy, Thompson E. Stock pile site	0.55 acre plus fencing	$ 1.00	Cozad

MORGAN-HEPPNER SECTION, HEPPNER HIGHWAY

11215-Johnson, Richard & Richard Wells Stock pile site	1.82 acres at $20.00 plus fencing	$ 36.40	Cozad

BAKER-UNION COUNTY LINE SECTION, MEDICAL SPRINGS HIGHWAY

11181-Bennett, C. E. Stock pile site	1.55 acres at $20.00	$ 31.00	Cozad
11180-Kennedy, Lawrence M. Stock pile site	0.65 acre at $70.00	$ 45.50	Cozad
11182-Colton, J. J. Stock pile site	1.45 acres at $20.00	$ 29.00	Cozad

[illegible] 16 1944

BAKER-UNION COUNTY LINE SECTION, MEDICAL SPRINGS HIGHWAY (cont.)

11182- Colton, J.J. Lease	3 yr. lease-road materials-on yardage basis 3¢ per cubic yard - (7,000 cu. yds.)		Cozad

CITY OF UNION-BAKER COUNTY LINE SECTION, MEDICAL SPRINGS HIGHWAY

11178-Union County Stock pile site	0.78 acre (10 year lease)	GRATIS	Cozad
11179-A-U. S. Government Stock Pile site	0.84 acre (1 year lease)	GRATIS	Cozad
11179- Collins Pine Co. Stock pile site	2.27 acres at $20.00	$ 45.40	Cozad

RUCKLES CREEK-MIDDLE BRIDGE SECTION, BAKER-HOMESTEAD HIGHWAY

11187-Staggs, Ira D. Gravel pit	2.82 acres at $55.00 Fee Federal Land Bank	$ 155.10 7.50 $ 162.60	Cozad

SILETZ BAY-NEWPORT SECTION, OREGON COAST HIGHWAY

4066-Swanson, Theodore Right of Way	0.004 acre	$ 00.00	Collins
10865-Balsiger, Florence Lillian Right of Way	1,098 sq. ft. at 20¢	$ 219.60	Collins
4115- Austin, Graham Right of Way & Slope Easement	204 sq. ft. at 15¢ and 15-ft. slope easement	$ 30.60	Collins
4052- Sansbury, James A. Right of Way	2.0 acres at $500.00	$1,000.00	
	Allowance- moving pump-house, electric line, pipe line	150.00	
	Allowance- moving and rebuilding garage	100.00	
	Allowance- moving chicken houses fencing	50.00	
	Remodeling and cutting off house (cannot be moved)	1,200.00	
	General damages	400.00	
	Severance damages - 3.0 acres at $200.00 (40%)	600.00	
		$3,500.00	Collins

FRONT STREET PROJECT-CITY OF PORTLAND, PACIFIC HIGHWAY

11281-Hutton, Geo. W. et al & Lucelle Faust Right of Way	600 sq. ft. at $1.66	$1,000.00	McCallister
	Building	1,400.00	
		$2,400.00	
11013-Klamt, Alfred J. Right of Way	225 sq. ft. at 30¢ sq. ft.	67.50	
	Construction barracade top slope	57.50	
		$ 125.00	McCallister

JUDKINS POINT-GOSHEN SECTION, PACIFIC HIGHWAY

11191-Furuset, Elmer M. Right of Way	2.04 acres at $200.00	$ 408.00	
	Allowance for pressure pumping system	265.00	
	Moving buildings (estd.)	650.00	
		$1,323.00	Parker

In this connection the question whether or not to continue with the acquisition of right of way for the Front Avenue Project in Portland was discussed. The Attorney advised that, as instructed by the Commission, he has contacted the City of Portland officials as to whether or not it is their intention to adhere to the original plan for this project or to adopt the so-called "Moses Plan" and at the meeting he was informed that it is the city's plan to proceed with the original plan for this project regardless of the Moses Plan. In view of this report the Commission decided to continue the taking of options for the right of way up to the extent that the City of Portland can pay its proportionate share of the costs. In the event the federal government will contribute federal funds to assist in the purchase of such right of way then such funds shall be credited to the city and the state on the same percentage basis that right of way purchases are now being made, viz., 40%, state; 60%, city. The Commission also decided that it would approve the closing of options already taken for right of way for this project if it appears advantageous to do so, otherwise, the options are to be extended until such time as the postwar highway bill passes the Congress. The Commission ordered that the above arrangement be covered by written agreement between the city and the state.

The question of purchasing a maintenance headquarter site adjacent to the Salmon River Highway at Grande Ronde had the attention of the Commission. It appears that the Polk Operating Company owns three acres that have been selected for this site and that it has offered to sell this tract for the sum of $750.00. The discussion revealed that the site is located in close proximity to the Company's plant and may not be desirable from that standpoint; also, that it might be possible to secure a more satisfactory site for less money. Accordingly, the Commission referred the matter to the Engineer for further investigation.

The Assistant Attorney requested instructions regarding a settlement with E. R. Shipley of damages to his property occasioned by the construction of the Davies-Vadis Section of the Wolf Creek Highway in Washington County. He advised that the property in question is low-land across which the highway was constructed on an embankment. The highway grade, he said, acts as a dam backing up water on Mr. Shipley's property so that he cannot properly cultivate it. Mr. Shipley, he said, is demanding $1,000 damages, whereas, in his estimation, the state should not be required to pay more than $500 and under such a settlement the state should secure a deed for the 2.25 acres involved. He asked the Commission to authorize condemnation of the property in the event a satisfactory settlement cannot be negotiated and to approve an offer of $500 in such condemnation. As an alternate settlement, he suggested payment to Mr. Shipley of the sum of $300 as damages, he to retain possession of the land provided he will release the state from all damages past, present and future occuring by reason of the flooding of his land. After discussion the Commission authorized settlement with Mr. Shipley on the basis of the alternate proposition, viz., payment of $300 for complete release of damages, Mr. Shipley to retain title to the land. If he will not settle on such basis, then the Attorney was authorized to condemn the property and to offer the sum of $500 in connection therewith. The following resolution authorizing condemnation was thereupon adopted by the Commission by unanimous vote:

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the developement and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code,

and/or for flight strips, airfield, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tract or parcel of land hereinafter described is necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcel of real property hereinafter described is necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real property and the specific purposes for which the same is being acquired are described as follows, to wit:

Real property owned by E. R. Shipley, et ux., and identified in the records of the Highway Commission as file R 6278A, which property is being acquired for right of way and highway drainage purposes in connection with the Wolf Creek Highway and is described as follows:

A parcel of land lying in the southeast quarter ($SE\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 24, Township 2 North, Range 4 West, W. M., Washington County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to George W. White and Bertha A. White recorded in Book 144, Page 557, of Washington County Record of Deeds; the said parcel being described as follows:

Beginning at a point on the northerly right of way line of the Wolf Creek Highway; said point being 150 feet distant northerly from (when measured at right angles to) the located center line of the Wolf Creek Highway at Engineer's Station 2209+28.5, said point also being 571 feet north and 52 feet west of the southeast corner of said Section 24; thence North 62° 45' West along said right of way line parallel to and 150 feet distant from said center line a distance of 587.5 feet to the west line of the said property; thence North 0° 15' West along said west line a distance of 20 feet; thence North 84° 53' 30" East a distance of 576.4 feet to the east line of said Section 24; thence south a distance of 35 feet; thence west a distance of 25 feet; thence South 5° 00' West along the County Road right of way line a distance of 306.5 feet to the point of beginning.

The parcel of land to which this description applies contains 2.265 acres, of which 0.015 acre lies within the existing right of way, title to which hereby is acknowledged to be in the public, and 2.25 acres lie outside of the existing right of way.

2. That the Commission does hereby find and declare that said described parcel of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said property is being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of the said real property, which said description shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That George Neuner, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

In the discussion of this matter the Assistant Attorney reported that the former owner of this property, Mr. George W. White, has presented a claim for loss of a crop of turnips by reason of the flooding of this property. Mr. White, he said, valued the crop at $150 and demands settlement in such sum. He advised that there is no question but what the crop was lost as a result of the highway construction and recommended payment of the amount demanded by Mr. White. The Commission approved the recommendation subject to the condition that the money shall not be paid to Mr. White until settlement has been effected with the present owner, Mr. Shipley.

The Chief Counsel reported that the J. H. Gilbaugh Estate, which includes real property consisting of approximately 27 acres of land, more or less, situated in the Northeast quarter of the Southwest quarter of Section 30, Township 1 North, Range 5 East, W. M., in Multnomah County and which property the State needs and the Commission has found it necessary to acquire, has employed attorneys who refuse to negotiate until a formal resolution has been adopted by the Commission. The Chief Counsel offered for the consideration of the Commission a prepared resolution. Thereafter, upon due consideration, the Commission adopted by unanimous vote the following resolution:

RESOLUTION

WHEREAS, under and by virtue of the provisions of subsections 6 and 7 of Section 100-115, O. C. L. A., the Highway Commission is authorized to acquire by agreement, donation or the exercise of the power of eminent domain real property, or any right or interest therein, necessary or deemed necessary for the preservation of scenic places and other objects of attraction or scenic value adjacent to or along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and the Commission is also authorized to acquire land and ground necessary for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or other places of attraction and scenic value which in the judgment of the Commission are necessary for the convenience of the public and which will contribute to the general welfare and pleasure of the motoring public or road users; and

WHEREAS, in the opinion of the Highway Commission the real property hereinafter described is scenic in character, adjoins other real property owned by the State and possesses possibilities of development as a scenic and recreational area and likewise affords opportunity for roadside development; and

WHEREAS, it is the judgment and opinion of this Commission that the acquisition of said real property and the development of the same will contribute to the convenience of the general public and to the general welfare and pleasure of the motoring public or road user;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, by the State Highway Commission as follows:

1. That the Highway Commission does hereby find and declare that the real property hereinafter described is scenic in character and is suitable for development as a scenic area or viewpoint and for roadside development and recreation.

2. That this Commission does hereby find and declare that the acquisition of fee title to said real property, free and clear of all interests of every kind and character, is necessary in order to make possible the preservation and development of the

same for the convenience of the public and so that said area may be developed and maintained for its scenic value or public view qualities as well as for roadside development, all of which the Commission does find and declare to be for the general welfare and pleasure of the motoring public and road user.

3. That the real property, the acquisition, preservation and development of which the Commission now finds necessary for the purposes heretofore stated, is described as follows, to wit:

All of the Northeast quarter of the Southwest quarter (NE¼ SW¼) of Section 30, Township 1 North, Range 5 East, W. M., Multnomah County, Oregon, excepting the South 350 feet and excepting that portion of said property now owned by the State of Oregon and in the right of way of the Columbia River Highway, containing a net area of 27 acres, more or less.

4. That the survey of said area heretofore made by the State Highway Engineer and the description prepared hereby are approved by the Commission and the Commission does hereby order and direct that said description be used and employed in the preparation of necessary deeds of conveyance or in necessary court proceedings.

5. That George Neuner, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested, authorized and directed to attempt to agree with the owner or owners, or persons in possession, if there be any, with respect to the compensation to be paid for the acquisition of said property and damage to the remaining property if there be any remaining property, and in the event that the title to said property cannot be acquired by agreement, then it is hereby ordered that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

6. That this resolution be entered in the minutes and records of this Commission as of February 16th, 1944.

The Assistant Attorney requested authority to spend about $100 to repair a residence building in Eugene that was acquired from John W. Gray in connection with a right of way settlement. He said that the building is now being rented at the rate of $25.00 per month and that the agent who is handling the property for the state advises that repairs are absolutely needed. The Commission approved the expenditure.

The Attorney rendered a brief status report on the controversy with Dr. Moser involving a quarry site near Grants Pass. He advised that Mr. Neil Allen, Attorney for Dr. Moser, wants to discuss this matter personally with the Commission before a decision is reached but was unable to attend this meeting. The Commission decided to take no action until the matter has been discussed with Mr. Allen; however, instructed the Attorney to render a complete report and recommendation covering the subject at the next meeting.

The Commission had under discussion matters pertaining to the distribution of State Highway funds to cities and towns pursuant to the provisions of Chapter 371, Oregon Laws, 1943. In this connection the Engineer presented a tabulation certifying the amounts to be distributed according to the legal requirements which were thereupon explained by the Attorney. After careful consideration of the matter the Commission approved the proposed apportionment of funds as certified by the Engineer and thereupon by unanimous vote adopted the following resolution with regard thereto upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman:

R E S O L U T I O N

WHEREAS, it is provided by Chapter 371, Oregon Laws, 1943, that:

> "Beginning with the year 1943 and annually thereafter there shall be and hereby is appropriated out of the state highway fund such sums of money as will equal 5 per cent of all moneys credited to the state highway fund by the state treasurer between January 1 and December 31 of each year, and which have accrued from funds transferred to the state highway fund by the state treasurer under the provisions of section 115-135, O.C.L.A., and under the provisions of section 115-528, O.C.L.A., and under the provisions of section 110-1705, O.C.L.A., and from fines and penalties assessed and collected for violations of the motor vehicle and transportation laws, and which have been paid to the state treasurer, which appropriation shall be distributed among the several cities as provided in this act; but in no event shall payment under this act be made to cities for any year unless more than $11,000,000 is credited to such fund, and allocations hereunder shall be made to cities only from any excess over $11,000,000 credited to such fund in any year."

AND, WHEREAS, pursuant to the laws of the State of Oregon there was credited to the state highway funds by the State Treasurer for the calendar year 1943, the sum of $14,723,366.90; and

WHEREAS, by applying the factors of allocation provided for in said act the State Highway Commission has apportioned to the several cities of the State their respective shares in said state highway funds;

NOW, THEREFORE, the State Highway Commission does hereby certify to the Honorable Robert S. Farrell, Jr., Secretary of State of the State of Oregon, the following apportionment or appropriations out of said state highway fund for the calendar year 1943, to wit:

CITY	AMOUNT	CITY	AMOUNT
Albany	$ 7,765.40	Myrtle Point	$ 1,779.97
Ashland	6,515.58	Newberg	4,065.37
Astoria	14,268.62	Newport	2,772.97
Baker	12,830.64	North Bend	5,853.58
Bandon	1,378.93	Nyssa	2,547.72
Beaverton	1,444.86	Ontario	4,877.07
Bend	13,763.20	Oregon City	8,410.92
Burns	3,524.24	Oswego	2,370.55
Coquille	4,569.42	Pendleton	12,150.78
Corvallis	11,525.87	Portland	279,625.99
Cottage Grove	3,606.64	Prineville	3,238.56
Dallas	4,915.53	Rainier	1,624.77
Enterprise	2,347.20	Redmond	2,576.57
Eugene	28,619.65	Reedsport	1,951.65
Forest Grove	3,363.54	Roseburg	6,762.80
Gladstone	2,237.33	St. Helens	5,911.27
Grants Pass	8,279.07	Salem	42,450.15
Gresham	2,679.57	Seaside	3,985.71
Heppner	1,565.72	Sheridan	1,777.23
Hillsboro	5,146.26	Silverton	4,017.30
Hood River	4,504.87	Springfield	5,225.92
Independence	1,884.35	Stayton	1,490.18
Junction City	1,630.27	Sweet Home	1,497.04
Klamath Falls	22,657.56	The Dalles	8,605.95
La Grande	10,640.00	Tillamook	3,778.32
Lakeview	3,386.89	Toledo	3,142.42
Lebanon	3,748.11	Union	1,920.06
Marshfield	7,222.90	Vale	1,487.43
McMinnville	5,089.95	Vernonia	1,939.29
Medford	15,493.73	Warrenton	1,874.74
Milton	2,395.27	West Linn	2,973.49
Milwaukie	2,569.70	West Salem	2,046.42
Mount Angel	1,417.39	Woodburn	2,722.15

That in addition to the above enumberated cities, the following cities are incorporated cities of the State of Oregon having a population less than 1,000:

CITY	AMOUNT	CITY	AMOUNT
Adams	$ 232.11	Athena	$ 704.57
Amity	748.52	Aumsville	238.98
Antelope	123.61	Aurora	313.14
Arlington	836.42	Austin	134.60

AMOUNTS AUTHORIZED TO CITIES HAVING POPULATION LESS THAN 1,000 (Cont.):

CITY	AMOUNT	CITY	AMOUNT
Banks	$ 339.24	Gold Hill	$ 736.16

That before said last named cities may expend funds apportioned to them out of said state highway fund they must first qualify by submitting to the State Highway Commission for approval plans for the expenditure of such funds.

That a certified copy of this resolution and certificate be delivered to the said Secretary of State for his use and guidance in the administration of said law.

That this resolution be entered in the minutes and records of the Commission as of February 16, 1944.

The Secretary was instructed to forward a certified copy of the resolution and certificate to the Secretary of State for his use and guidance in the administration of the law.

The Assistant Attorney requested authority to employ the services of a cruiser to cruise the timber on land that the Commission is acquiring for recreational purposes along the Pendleton-John Day Highway near Camas Creek. He estimated that the cruise would cost about $500 and advised that it is necessary that the cruise be made in order to effect proper settlement with the owners. The State Parks Superintendent, who was present, advised that he is now arranging with the U. S. Forest Department for a joint cruise of the timber and if the arrangement materializes a satisfactory cruise can be made with but very little expense to the state. After discussion the Commission

authorized the employment of the cruiser, as requested by the Assistant Attorney, in the event the arrangement mentioned by the State Parks Superintendent does not materialize.

The Commission approved and signed a receipt acknowledging payment by the federal government of the sum of $61.92, being the cost of repairing a traffic pedestal in Medford which was damaged by an army truck, and releasing the United States of America from further responsibility with respect thereto.

The Commission also approved and signed a bargain and sale deed conveying unto Marion County a strip of land 60 feet wide bordering the Aurora Flight Strip which strip is to be used by the County for county road purposes in lieu of an existing county road that was destroyed by the flight strip construction.

The Attorney requested instructions whether or not to try to collect damages from Mr. Delayne H. Paulsen, log hauler, who damaged a bridge on the Kings Valley Secondary Highway in connection with his log hauling operations. He advised that a permit was issued to Mr. Paulsen to transport loads over this highway of a length in excess of the 50-foot legal length limit but Mr. Paulsen did not confine his loads to the length specified in the permit and in addition thereto, his load extended beyond the trailer axle a distance greater than the law allows, so that when he made a turn at the end of the bridge the load struck the bridge railing causing damage which cost $20.00 to repair. He was instructed by the Commission to bill Mr. Paulsen for the amount of the damage.

The Attorney also requested instructions with regard to accepting the check of the United Pacific Insurance Company in payment of the Commission's claim against the Oregon Motor Stages for damaginga guardrail on the Lower Columbia River Highway about 27 miles east of Astoria. The Stage Company alleges, he said, that the highway was frosty and because this was a condition over which it did not have control and because the surface of the highway had not been sanded by highway crew, it should not be held responsible for the claim which amounts to $13.40. On the other hand, the United Pacific Insurance Company which wrote the Stage Company's insurance has tendered its check in the amount of the claim. The Attorney questioned that the Commission could recover the amount of the claim if the matter were taken to court and advised that his reason for bringing the matter to the Commission's attention is because it involves a matter of policy. The Commission voted unanimously to accept the check and so ordered.

The Engineer reported briefly the substance of the report of the Interregional Highway Committee, appointed by the President, outlining and recommending a national system of interregional highways. (See Engineer's letter of February 4, 1944, directed to members of the Oregon State Highway Commission for details.) The Commission took no action in the matter.

The Engineer also reported on a request of the Knights of Columbus, Klamath Falls, to maintain "way stations" on state highway approaches to Klamath Falls for the benefit and convenience of men in the armed service.

He advised that the proposed way stations are not in the same category with those recently approved by the Commission at Camp White and at Florence and recommended that permission to maintain them on the highway right of way be denied because of the added burden their presence on the highway property would cause the highway maintenance crews. The Commission approved the recommendation and ordered that the Knights of Columbus be informed of the action taken and the reasons necessitating the same.

The Commission considered and denied an offer from Mr. William Pemberton, Roseburg, to purchase a triangular shaped parcel of land lying between the Pacific Highway and the S. P. Railroad in North Roseburg, it appearing to the Commission that the best public interests would be served if this property were retained in state ownership so as to insure against obstructions being erected thereon that would impair the sight distance along the highway.

In conformity with instructions from the Commission at the previous meeting the Engineer submitted a report on the employment of Latin American engineers. He advised that the plan is to employ two such engineers if the Commission approves, both of whom will be assigned to survey crews where they would be paid a salary not to exceed $100 per month, such arrangement to be effective for a period not longer than six months. The movement, he said, is being sponsored by the American Road Builders Association and other organizations of similar nature who would be responsible for the payment of transportation expense to and from Oregon. He further advised that the men who are to be thus employed are graduate engineers who have a speaking knowledge of the English language. He also said that he had discussed this matter with Governor Earl Snell who expressed his approval of the plan. After discussion the Commission authorized the Engineer to employ two such engineers for a limited period under condition that there are no objections on the part of the Governor.

Reconsideration was given by the Commission to the request of the City Cemetery Committee of Klamath Falls for the use of those portions of Lots 7, 8, 9 and 10, Block 2, Westover Terraces, Klamath Falls, which the state will not need in connection with the proposed revision of The Dalles-California Highway through this district. The Engineer advised that the survey for the permanent location of the highway was made several years ago but has not been formally approved by the Commission and until that is done he is not in a position to make a recommendation, although he would offer no objections to letting the city have the area outside of the standard width of the highway right of way if the Commission approves the proposed location. The Commission discussed this matter at some length but deferred its decision until the following day. (The Commission approved the survey on the following day. See ahead for details.)

A letter was presented from County Judge F. E. Gilkey, Lincoln County, advising that the County Court has contracted for the production of several thousand cubic yards of crushed rock from its quarry at Seal Rock and suggesting, if the Highway Commission wants some of this rock which is particularly good for oiling purposes, that the Commission allow the county's contractor to remove a ledge of rock on the west side of the highway that is not as suitable for such use but is good enough for county roads. He gave as

his understanding that the Commission needs a large quantity of oil maintenance rock for the Oregon Coast Highway so the above arrangement should be to the advantage of the state; moreover, the removal of the rock ledge would improve the scenic view from the highway and would provide a larger area than now exists for the parking of automobiles. The Engineer recommended approval of the request subject to the condition that the county will assume the responsibility for protecting highway travel during the time that the ledge is being removed and will level off the site suitable for the parking of automobiles when its quarrying operations are concluded. The State Parks Superintendent, who was present, expressed his approval of the request because it will improve the ocean view and will help out the parking situation. The Commission approved the recommendation and ordered that the matter be covered by written agreement between the county and the state. The Attorney and the Engineer were instructed to work out the details.

The Engineer reported that in conformity with authority granted him by the Commission, he awarded to Clifford A. Dunn, Klamath Falls, on January 14, 1944, the contract for construction of the Klamath Falls Air Station Access Road Project, bids for which were taken by the Commission at its meeting on December 23, 1943, Mr. Dunn's bid being the low one submitted. The Commission by unanimous vote approved the awarding of this contract as reported.

The Engineer requested authority to advertise for bids for the furnishing of maintenance rock for the Garibaldi-Pleasant Valley Rock Production Project in Tillamook County. He estimated that the project would cost about $17,325.00 and advised that the state would be reimbursed for the expense by the U. S. Navy Department in view of the fact that it was the activities of that department which necessitated the improvement. The Commission approved the request by unanimous vote.

The Commission had under discussion approval of a project agreement with the S. P. Company covering the construction of a drainage tunnel on the Oregon Coast Highway between Brighton and Wheeler in Tillamook County to correct a slide condition which is seriously affecting the highway and the railroad company's tracks. The Engineer advised that both railroad grade and highway grade have been seriously damaged by slides and that the condition has become so hazardous to the railroad and the highway that corrective measures must be taken at once. He further stated that an exhaustive study of the situation by railroad and highway engineers reveals that the condition can be corrected by a drainage tunnel which is estimated to cost $23,000 and will be paid for 50% by the state and 50% by the railroad company. The Commission approved the arrangement by unanimous vote and thereupon signed an agreement with the railroad company.

The Commission discussed a letter from W. H. Lynch with regard to the approval of the program and estimate for engineering and economic investigations in Oregon during the period July 13, 1943 to December 31, 1944 involving the expenditure of $37,324.00 of federal funds and $22,876.00 of state matching funds. The Commission approved the arrangement by unanimous vote and thereupon signed an agreement with the Public Roads Administration covering the matter.

The Engineer brought up for discussion the matter of completing the purchase of six heavy type trucks which were ordered by the Commission in the fall of 1943. He advised that quotations for furnishing the trucks were received by the state purchasing agent on October 5, 1943, one proposal being submitted by the Nelson Equipment Company which agreed to furnish "Walters" trucks at $8,280.00 each and the other being submitted by the Clyde Equipment Company which agreed to furnish "Oshkosh" trucks at $7,671.25 each. The order was placed with the Nelson Equipment Company, he said, notwithstanding its higher bid, because that company promised delivery by December 1, 1943, whereas the Clyde Equipment Company could not promise delivery at any particular time, the trucks being needed in connection with snow removal operations during the winter season. He further advised that the War Production Board at first refused to authorize the delivery of more than two of the trucks, but later released the remaining four which have not, however, been delivered and may not be delivered for some time. In view of the recent action of the War Production Board, he added, the Nelson Equipment Company wants to furnish the additional four trucks; however, there is a question in his mind whether the order should be placed with this company in view of the fact that the specified date of delivery has long since expired, and the additional fact that the state would save $600 on each truck if the order were placed with the Clyde Equipment Company. He particularly pointed out that the bid of the Nelson Equipment Company was accepted because delivery of the trucks was promised by December 1, 1943 so they could be used in snow removal operations during the past winter, and advised that such emergency has passed so there seems to be no particular reason why the state should pay the extra amount. In the discussion that followed it was revealed that the bid submitted by the Nelson Equipment Company is still effective if the Commission wishes to extend the time limit, whereas the bid of the Clyde Equipment Company is not effective due to the fact that it was rejected at the time that the order was placed with the Nelson Equipment Company. The Commission deferred a decision in the matter until the following day when a representative of the Nelson Equipment Company is to be present. The Attorney was instructed to review in the meantime the bids submitted by both companies and the specifications upon which the bids were submitted and to advise the Commission with respect to its authority to reject the four undelivered trucks from the Nelson Equipment Company. (See entry on following day for final decision.)

Commissioner Chessman arrived at this time and participated in all matters that were subsequently considered by the Commission at this meeting.

The Engineer brought up for discussion the matter of completing the purchase of two paving plants which were authorized by the former Commission on October 15, 1941, but which could not be completed because of the refusal of the War Production Board to permit delivery. He explained that the former Commission authorized the purchase of three of these plants and that the order was placed with the Dallas Machine and Locomotive Works of Dallas, Oregon, at $12,500 each; further, that one of the plants was delivered at such price but the company could not complete or deliver the other two because of the War Production Board's action. The Board, he said, has now changed its attitude and has approved the delivery of the two remaining plants. He asked the

Commission to authorize the purchase of these two plants, subject to negotiation of a new purchase price agreement with the Company to cover increased labor and material costs.

He advised that the plants are badly needed for the coming season's pavement repair work and that the one plant that already has been delivered more than paid for itself in one year's operation. The Commission deferred a definite decision on the matter until its next meeting. The Engineer was instructed to secure a new quotation from the Company in the meantime.

A letter was presented from R. J. Newell, Assistant Regional Director, Bureau of Reclamation, inquiring whether or not it would be possible to rent one of the Highway Department's paving plants to do a small amount of experimental paving work in irrigation canals near Ontario, Oregon, there being no local contractor available with such plant in this vicinity. He estimated that he would need the plant for about a week during the early part of April. The Engineer advised that the loan of this equipment would not seriously interfere with the Highway Department's maintenance operations and recommended approval of this request if the Bureau of Reclamation will pay all expense incident to the operation of the same including rental at the standard rate, and will employ the state's operators who are familiar with this type of equipment. The Commission approved the recommendation unanimously.

The Engineer requested authority to purchase the following equipment:

4 Loadometers. Estimated total cost $1,100.00
1 Used Case Boiler. Purchase price 500.00
1 60-ton Hydraulic Press for use at the Klamath Falls Shops Estimated cost $325.00

The Commission by unanimous vote approved the purchase of such equipment subject to the condition that the used boiler passes inspection by the state boiler inspector.

The Secretary requested instructions relative to the renewal of the State Highway Engineer's $200,000 bond which expires on March 1, 1944. The Commission by unanimous vote ordered that this bond be renewed with the same companies that wrote the previous bond. Similar action was taken by the Commission on the Engineer's $150,000 bond that expires on April 15, 1944.

The Engineer requested authority to increase salaries now paid highway department weighmasters in accordance with the following readjustment schedule:

PROPOSED PAYROLL CLASSIFICATION

Weighmaster, Grade 3	$173.00 per month	- 48-hour week
Weighmaster, Grade 2	168.00 per month	- 48-hour week
Weighmaster, Grade 1	158.00 per month	- 48-hour week
Weighmaster Apprentice	153.00 per month	- 48-hour week

MAR 1 1944

PROPOSED PAYROLL CLASSIFICATION (Cont.)

The application of the above rates to the existing peronnel of 23 men is as follows:

Weighmaster, Grade 1	10 men	No change
Weighmaster, Grade 2	11 men	Loadometer Officers
Weighmaster, Grade 3	2 men	District Supervisors

Additional Cost for 1944 - $1530

He explained that the weighmasters organization now consists of 23 operators who were selected from the maintenance department on account of their personal qualifications; also, that these men were previously employed as time keepers, section foreman helpers, etc., and if they were still employed in such capacities would be enjoying the benefits of increased rates of pay that men so employed now receive. The proposed increase, he added, is simply a readjustment in order to eliminate an unsatisfactory condition, and during the year 1944 will cost the state only $1,530.00 more than if the present salary rate were continued. The Commission by unanimous vote approved the salary adjustment as recommended by the Engineer, effective February 1, 1944.

In this connection the Engineer advised that because of increased cost of living it soon will be necessary for the Commission to consider a general increase of salaries paid to office employees in order to retain their services. The matter was discussed at some length but a decision relative thereto was deferred until the next meeting. The Engineer was instructed in the meantime to canvass other state departments as to the salaries paid by them and report his findings.

A letter was presented from F. W. Furst, Forest Supervisor, Siuslaw National Forest, inquiring as to the attitude of the Highway Commission with respect to the sale of old growth timber along the Little Nestucka River between Dolph, on the Three Rivers Highway, and Boyer, on the Salmon River Highway, which is the route of an unconstructed forest highway. It appears that the Forest Service has received inquiries concerning this timber but before making a definite sale desires to know the plans of the Commission to construct the road and its attitude with respect to the preservation of the timber along the route. The Engineer advised that this proposed road has been on the forest highway system for many years but no plans whatsoever have been made for its construction, moreover, the present outlook for construction is not promising. After discussion the Secretary was instructed to thank Mr. Furst for bringing this matter to the Commission's attention and to inform him that the Highway Commission does not intend to build the road in the near future and has no idea when the road will be built, in view of which, if the Forest Service has an opportunity to sell the timber the Commission will offer no objections thereto.

The Commission discussed a letter from Mr. Wm. P. Lord, Attorney, Portland, in behalf of some clients who want to know whether or not the logs that have been fallen on state property adjacent to the Wilson River Highway are for sale, and if so, under what terms they may be purchased. The Engineer

advised that there is some question as to the ownership of the logs and it may be that they are owned by the Consolidated Timber Company from whom the right of way was purchased. He also stated that many of the logs are located on steep hillside above the highway and the removal of the same might constitute a serious traffic hazard. The Commission deferred action in the matter pending additional information. The Attorney was instructed to ascertain definitely who owns the logs, and the Engineer was instructed to ascertain definitely whether or not the logs can be removed without endangering highway traffic, both reports to be rendered at the next meeting of the Commission.

The Secretary presented a resolution from the Umatilla County Court requesting that the Hermiston Secondary Highway No. 333 be extended from its present terminus at the intersection of Main Street and East Fourth Street in Hermiston, westerly three blocks to the intersection of Main Street and East First Street, which section was recently abandoned by the Highway Commission as the route of the Old Oregon Trail when this highway was reconstructed on revised alignment south of Main Street. The Engineer advised that it is a perfunctory matter and simply continues the Highway Commission's policy of maintaining state highway connections within cities and towns. He recommended approval of the request. The Commission approved the recomendation and thereupon by unanimous vote, upon motion of Commissioner Schaupp which was duly seconded by Commissioner Chessman, adopted the following resolution with respect thereto:

> WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and
>
> WHEREAS, the State Highway Commission, by mutual agreement with the Umatilla County Court of the State of Oregon, has selected the road, highway or street hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;
>
> NOW THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:
>
> 1. That the following described market road, county road, street, highway, route, or location of a highway in Umatilla County be and the said market road, county road, street, highway, location,

or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

A Section of the Hermiston Secondary Highway No. 333

Beginning at the intersection of Main Street and East 1st Street in the City of Hermiston; thence easterly to the intersection of Main Street and East 4th Street; a distance of approximately 0.25 mile.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

Consideration was given by the Commission to a request from the St. Helens Pulp and Paper Company for permission to use an old trestle which now spans the Lower Columbia River Highway near the town of Knappa, in connection with its logging operations. The Engineer recommended approval of this request as a temporary proposition subject to the condition that the company will properly protect highway travel and will remove the structure from within the limits of the highway when its operations are completed. The Commission approved the recommendation by unanimous vote upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman, and thereupon signed an agreement with the company covering the matter. (See agreement for further details.)

The Engineer requested authority to post the I.O.N. Highway for a 50% reduced load limit, if necessary, this spring when the frost is leaving the ground in order to maintain highway travel during this period, particularly in view of the heavy traffic that this road carries. The Commission approved the request and thereupon adopted the following resolution with regard thereto upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman.

ORDER REDUCING MAXIMUM LOAD LIMITS ON CERTAIN STATE HIGHWAYS

WHEREAS, the following roads or highways have been duly designated and declared to be and are state highways, and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as state highways, to-wit:

I.O.N. SECONDARY STATE HIGHWAY NO. 456
JORDAN VALLEY SECONDARY STATE HIGHWAY NO. 458

AND WHEREAS, the said above-named state highways are, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which is damaging and injuring the said

highways, and in order to protect said highways against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highways that the maximum weights permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission, that the maximum weights which shall be permitted upon the said roads shall be reduced and fixed as in this order provided.

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having as a result of due investigation found that the roads above mentioned and hereinafter designated are being damaged and injured on account of the kind and character of traffic now being hauled over and upon said roads, and by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said roads, and the Commission having found upon due investigation that it will be for the best interest of the said state highways that the maximum total weight of load and vehicle which shall be permitted upon said roads shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named roads shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highways, to-wit:

I.O.N. SECONDARY STATE HIGHWAY NO. 456 from the Idaho state line near Malloy Ranch, Oregon, to the Nevada state line near McDermit, Nevada, in Malheur County.

JORDAN VALLEY SECONDARY STATE HIGHWAY NO. 458 from its junction with the I.O.N. Secondary State Highway north of Jordan Valley to its junction with the I.O.N. Secondary State Highway west of Jordan Valley, in Malheur County.

shall be as follows: The combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not

exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Sec. 115-394 O.C.L.A., shall be in full force and effect from this date until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highways and at important cross-roads on said highways, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of Malheur County, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this 16th day of February, 1944.

In this connection the Engineer was instructed not to post the road for such reduced load limit until it is absolutely necessary. He was authorized to maintain signs along the highway in the meantime advising truck men that such reduced load limit may have to be enforced if the highway shows signs of failure.

Consideration was given by the Commission to the matter of extending the privileges authorized by its resolution adopted on January 11, 1944 with respect to the transportation of petroleum products over state highway in large tank equipment. The Engineer recalled that the Commission authorized such movements over the Pacific Highway and Crater Lake Highway from the California state line to Camp White and over The Dalles-California Highway from the Oregon-California line to Klamath Falls based on the formula W=800 (L+40). He recommended extension of the privilege over the Pacific Highway to Grants Pass, over The Dalles-California Highway to Madras, and over the Willamette Highway from its junction with The Dalles-California Highway to Trent in order to accommodate the Shell Oil Company which has been operating for some time past under permit from the Commission. He assured the Commission that the highways are capable of withstanding the extra weight. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Commission on the eleventh day of January, 1944, by resolution duly and regularly adopted, found and declared that the

highways or sections of highways named in section 1 of said resolution are suitable as to geometric design to permit the movement thereover of a vehicle or combination of vehicles having an overall length of not to exceed sixty feet; and

WHEREAS, based upon the report and recommendation of the State Highway Engineer, it now appears that the geometric design of the sections of highways hereinafter named is such as to permit the movement thereover of like vehicles or combinations of vehicles; and

WHEREAS, for the purpose of further cooperating in national defense, it is the opinion of this Commission that said resolution should be amended so as to include the highways or sections of highways hereinafter named;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That section 1 of said resolution be amended to read as follows:

"That for the duration a revocable permit shall be issued for the movement of certain motor-fuel-carrying vehicles over the following sections of state highways:

"The section of U. S. 97 between the Oregon-California line and Madras;

"The section of U. S. 99 between the Oregon-California line and Grants Pass;

"The section of Oregon 18 from its junction with The Dalles-California Highway to Trent; and

"The section of Oregon 62 between Medford and Camp White."

2. That except as herein and hereby amended said resolution shall remain in effect as written.

3. That this resolution be entered in the minutes and records of the Commission as of February 16, 1944, and a duly certified copy thereof delivered to Mr. Charles P. Pray, Superintendent of State Police.

The Commission discussed the advisability of penalizing log haulers for failure to tie their loads with three binder chains as is required by the provisions of their PUC permits, reports indicating that a great many of the operators use only one or two binders and some none at all. The Secretary

advised that in conformity with instructions from the Commission he has made inquiry why the operators do not comply with the regulations in this regard and the reason given therefor is that chains cannot be purchased. He further stated that inquiries have been made of a number of dealers in Portland whether or not they can supply chains and it appears from replies received that it is almost impossible for the dealers to get them even with an AA-1 priority. In view of this report the Commission decided not to take action at this time in the matter of penalizing the operators who violate this provision.

The Commission discussed a request from Mr. Arthur Lofts, Hood River, to maintain three guy wires over the Mt. Hood Highway near its junction with the Columbia River Highway at Hood River, the guy wires being needed to support a loading mast which is to be placed just off the highway right of way for use in connection with dredging operations in the river. The Engineer advised that it has been the established policy of the Highway Commission for many years not to allow guy wires over highways when they are under stress, it being considered that they constitute an undesirable traffic hazard. Mr. Lofts, he said, alleges that he cannot carry on his dredging operations in any other manner than that which involves the placement of the guy wires over the highway and unless the Highway Commission will approve such installation he cannot operate and will not be able to deliver gravel, much of which is for wartime use. The matter was discussed at considerable length and as a result thereof the Commission voted unanimously to permit Mr. Lofts to maintain the guy wires over the highway as a temporary proposition, provided they are installed to the satisfaction of the Engineer. The Attorney and the Engineer were instructed to prepare an appropriate agreement with Mr. Lofts covering the matter and to provide therein for the furnishing of public liability and property damage insurance. (Mr. Lofts appeared before the Commission on the following day and was informed orally of the Commission's action.)

The meeting adjourned at 5:00 p. m. to reconvene at 9:00 a. m. on the following morning in the Stock Exchange Room of the Imperial Hotel.

Portland, Oregon, February 17, 1944

The State Highway Commission reconvened at 9:00 a.m. in the Stock Exchange Room of the Imperial Hotel, all members being present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

Bids as follows for highway construction and the sale of two tracts of land adjacent to the Boardman-Stanfield Highway in Umatilla County were opened and read in conformance with previously published notices, following which Chairman Banfield announced that awards of contracts would be made at 3:00 p. m. in the same room.

*Bid of L. A. McClintock in amount of $3,100.00 irregular as it includes an additional parcel designated as Parcel "C", his bid being for the purchase of all three parcels.

[illegible] 17 1944

Mr. Arthur Lofts, Hood River, came before the Commission in regard to maintaining three guy wires over and across the right of way of the Mt. Hood Highway in connection with his dredging operations in Hood River. Chairman Banfield advised that the Commission had this matter under discussion on the previous day and decided to grant such permission under certain conditions, which he outlined. Mr. Lofts expressed his willingness to comply fully with the Commission's requirements, whereupon the Commission instructed the Engineer and the Attorney to prepare an appropriate form of agreement covering the matter at once. (See minute entry on previous day for further details.)

The Engineer brought up for discussion the proposed channelization scheme on the Oswego Highway in the town of West Linn. He advised that when the plan was first devised it was thought there would be no difficulty with right of way, but complications have arisen involving a small triangular parcel of land, containing 1150 sq. ft. owned by Mr. Franklin T. Griffith, Portland. This parcel, he said, has been used by the general public for roadway purposes for many years and is required for the proper installation of the channelization scheme, but Mr. Griffith will not sell it for less than $1,000.00 which the Right of Way Department considers is much more than it is worth. He further advised receipt of a letter from the West Linn City Council approving as a permanent proposition the plan of channelization as it is now temporarily laid out on the ground, and requested instructions whether or not to proceed with the installation in view of the right of way difficulty. In the discussion that followed it was brought out that a number of years ago the city of West Linn had a verbal understanding with Mr. Griffith concerning the use of this small parcel of land, and that the property has been used for road purposes for about twenty years, so there is a question as to Mr. Griffith's title. The Attorney was instructed to ascertain and report back to the Commission whether or not the public can claim the property because of such public use. The Engineer was authorized to proceed with the channelization project on a permanent basis as planned, without securing the additional right of way from Mr. Griffith if the Attorney's report is favorable. If, on the other hand, the report is unfavorable then the city of West Linn is to be advised of the facts and informed that unless the city secures title to the property the Commission cannot proceed with the installation and will have the temporary installation removed.

County Judge Nelson B. Higgs of Harney County came before the Commission and requested a continuation of the improvements the Commission has already started on the Frenchglen and Diamond Secondary State Highways in Harney County. He was informed that the Commission previously allowed $10,000 for such project, of which amount $6,400.00 had already been expended, leaving a balance of $3,600.00 which will be spent in 1944. The question arose whether or not the improvements that Judge Higgs desires can be accomplished with such balance. The Engineer was instructed to ascertain on the ground just what Judge Higgs has in mind and report back to the Commission when the matter will be reconsidered.

The County Court of Jefferson County, consisting of County Judge T. A. Power and Commissioners F. E. Stangland and Perry A. South, was present

and asked the Commission to designate as a state secondary highway the Culver-Grandview Market Road approximately 10 miles in length, which passes through The Cove State Park. They advised that the road is badly in need of repair, particularly the bridges thereon over Crooked River and Deschutes River and gave as their thought that the maintenance is a state obligation inasmuch as the road carries all of the travel to the state park. They particularly urged repairs to the two bridges advising that they are both in need of new decks and new springers at once and mentioned a previous oral agreement with the State Park Superintendent with respect to the maintenance of the road. Chairman Banfield advised that the Commission is not in a position now to make a statement relative to the road but will get a report from the Engineer and render a decision when such report has been studied.

The matter was further discussed by the Commission following the departure of the County Court at which time the Parks Superintendent advised that he has plans to improve the road within the park boundaries with CCC forces in connection with the proposed development of the park, which accounts for the statement made by the County Court, but he made no definite commitment or promise. The Attorney advised that the Commission has legal authority to maintain the road as a park roadway if it wishes to; moreover, the Commission has legal authority to expend state funds in the repair of the bridges regardless of the park status. After further discussion the Commission instructed the Engineer to ascertain the condition of the bridges and to report the cost to put them in a good state of repair, the thought being that the state would make the repairs at state expense if the cost is not excessive. The matter is to be covered by written agreement between the county and the state of one year's duration if the work is authorized.

Mr. E. R. Lantz of the Ford Lumber Company of Lebanon headed a delegation which appeared before the Commission in the interests of the Lacomb-Brewster County Road in Linn County. Others in the delegation were H.C.Patton, representing the Hammond Lumber Company; F. D. Macpherson, representing the War Production Board; County Judge E. G. Arnold, and Commissioners C. G. Smith and H. A. Renninger; and County Engineer W. W. Larson.

Mr. Lantz advised that the Lacomb-Brewster Road provides a direct outlet for the timber in the district east of Lacomb but the County Court has recently adopted an order prohibiting its use by log haulers because of damage that is being done to the oiled surface, and as a result the logs now have to be transported over another route which is several miles longer, involving much greater expense, wear and tear on tires and equipment, and greater consumption of gasoline. He asked the Commission to designate the Lacomb-Brewster Road a state secondary highway and to assume the responsibility for maintaining same. He declared that if the road is made available for log hauling traffic operators can deliver 25% more logs to market than by the other route which will be of great help in the country's war efforts. This appeared to him to be justification for the approval of their request.

Judge Arnold explained the attitude of the County Court by stating that the present road is satisfactory for county purposes and will serve for many years to come; further, the Court does not feel that it is the county's

obligation to reconstruct the road for special use entirely at county expense. He suggested that perhaps the federal government would be interested inasmuch as the logs are to be used in connection with war time efforts. Mr. Larson suggested that the loggers could use the private road of the Snow Peak Logging Company which closely parallels the other road. In reply thereto Mr. Lantz stated that the Snow Peak Company's road is strictly private and the company will not permit its use by others because it would interfere with its operations. Mr. Macpherson stated that the War Production Board is very much interested in the matter because of the savings in tires and equipment that would result by the use of the Lacomb-Brewster Road. He urged favorable consideration by the Commission from that standpoint and gave as his thought that revenue derived from the log hauling operations would be sufficient to justify the state's expense.

Chairman Banfield pointed out there is not much that the Highway Commission can do in the matter unless the road were designated a state secondary highway which the Commission is not inclined to do at the present time because it would place the Commission in a position of being obligated to similiarly designate other roads throughout the state. The result, he said, would be the assumption by the state of enormous expense which the Commission cannot stand at this time. He expressed appreciation for the seriousness of the situation, however, and advised that the Commission would instruct the Engineer to assist in working out a satisfactory solution for the problem. Commissioner Schaupp gave as his thought that the logging industry should contribute toward the costs involved and should be requested to state just what it is willing to do to that end.

Commissioner Chessman expressed himself as being in favor of the State Highway Engineer assisting in the solution of the problem; however, he added, the Commission must be careful not to take action that will adversely affect its state wide policy in such matters. He suggested that it would be advisable to ascertain just what service the road provides, not only from the logging standpoint but also from the standpoint of local residents. In the further discussion of this matter it was pointed out by the Commission that the state is not in position financially to assume the county's obligation with respect to this road now, notwithstanding that the Commission is friendly toward the project, but will have the Engineer inspect the road and will make its definite decision when the results thereof have been reported. The Engineer was thereupon instructed to make such investigation and to report his findings which shall include the following: estimated cost to reconstruct the road so that it will withstand log hauling traffic; statement as to the service the road renders; potential revenue to be derived from its use by logging trucks; and a statement as to the cooperation that can be expected from Linn County, the War Production Board and the logging industry. The Attorney was instructed to advise the Commission as to its legal authority to assist in this undertaking. Both reports are to be rendered at the next regular meeting of the Commission.

A delegation from Clackamas County consisting of V. C. Doppleb, Albert Eyman, Russel Murphy, D. W. Creig and Lester Burley, all of whom are farmers residing in the vicinity of Molalla, came before the Commission and

protested against the Commission's authorizing the Ostrander Railway and Timber Company to construct a private logging road at grade across two secondary state highways in the vicinity of Molalla. They alleged that the operation of logging trucks across these highways at grade would create a serious hazard to highway traffic and should not be allowed, and urged the Commission to require the Company to construct its road over these highways by means of overhead structures. Chairman Banfield thanked the delegation for its appearance and advised that their objections would be given due consideration in the future discussion of this matter.

Mr. Russell Hubbard, Reedsport, was present in regard to an exchange of properties at Reedsport in order to facilitate his lumbering operations at this place. He advised that he owns booming rights in the Umpqua River just above the town of Reedsport and in connection with his operations it would be to his advantage if he owned and had the use of the land which lies between the Umpqua Highway and the river, including several fractional lots within the city limits, which property is owned by the state. He offered to deed to the state in exchange for such property certain land that he controls a short distance east of Reedsport. He exhibited a map showing the tracts under discussion. The question arose whether or not the state needs the properties desired by Mr. Hubbard and whether or not it would be to the state's advantage to own the property that Mr. Hubbard desires to exchange therefor. In view thereof, the Commission deferred a definite decision until its next meeting. The Engineer was instructed to inspect the premises in the meantime and render a full report thereon. The Attorney was instructed to advise the Commission as to its legal authority to make such exchange of properties.

The Commission by unanimous vote approved the minutes of the meeting held on January 11 and 12, 1944.

The Commission had under discussion the purchase of the following described property situate adjacent to and on both sides of the Wolf Creek Highway near the Wolf Creek crossing, which property is needed partly for quarry purposes and partly for wayside protection.

> The S½ of the SE¼, SE¼ of the SW¼ and the S½ of the SW¼ of the SW¼ of Section 31, Township 4 N., Range 5 W., W. M., Columbia County.
>
> The E½ of the NW¼ and that portion of the W½ of the NW¼ of Section 6, Township 3 N., Range 5 W., W. M., Washington County, that is not already owned by the state.

The Engineer recommended purchase of all of the above described property that lies south of the highway because of its value as a source of rock for highway use. He explained that the state does not need all of this property for quarry purposes but thought it advisable to acquire the entire area because there is a question whether or not the Sunset Logging Company which owns the property, would be willing to dispose of only a portion thereof as is needed to enlarge the present quarry site in the W½ of the NW¼ of Section 6, it being

his understanding that the entire acreage could be purchased at very little more than the cost to acquire the quarry site alone. The State Parks Superintendent recommended purchase of all the above described property that lies north of the highway, for roadside purposes. In the discussion of this matter it was revealed that the entire acreage on both sides of the highway could be purchased at the rate of about $5.00 per acre or $1,875.00 for the full acreage involved. As a result of the discussion the Commission instructed the Attorney to consult with the Engineer and the State Parks Superintendent relative to the acreage that is required for highway purposes. He was authorized to negotiate options for such property, having in mind the best interests of the state.

The Engineer reported on the status on the proposed agreement between the Commission, Wasco County and J. O. Chastain, et al., with respect to the repair of an irrigation flume situate adjacent to The Dalles-California Highway near Tygh Valley. He recalled that the Commission at its meeting on November 8, 1943, agreed to pay one-third of the cost of repairing the flume, it being understood that such contribution would definitely complete the state's obligation with respect thereto, and it was left up to the County Court to make the final arrangements with the owners of the flume following which it was the intention to have the arrangement covered by written agreement among all parties. It now appears, he said, that the owners of the flume are not satisfied with such an arrangement and, as an alternate proposition, have elected to maintain the flume themselves, except for major repairs, if the state and the county will put the flume in good condition before April 1, 1944, when the irrigation season starts, and will keep the flume in a good state of repair for three years thereafter when a new arrangement for the maintenance of the flume will be negotiated. The Engineer estimated that immediate repairs would cost about $200.00 and that the annual maintenance cost would not exceed $50.00. He recommended that the Commission authorize an expenditure of $200.00 to repair the flume now subject to the understanding that the state assumes no obligation whatsoever with respect to future maintenance and that such action in no way fixes or admits any further liability on the part of the state. The Commission approved such recommendation by unanimous vote and instructed the Attorney to prepare an appropriate agreement on such basis for acceptance by all three parties.

The Engineer requested authority to submit to the Public Roads Administration for approval additional survey projects as follows, which are required in connection with the contemplated postwar program:

THIRD PARTIAL PROGRAM FOR SURVEYS, PLANS,
SPECIFICATIONS AND ESTIMATES FOR POSTWAR HIGHWAY IMPROVEMENTS

County	Location and Length	Contemplated Construction	Est.Cost
Baker	Baker-Union Section of Medical Springs Secondary No. 340 (43.0 mi.)	Widen to 26-ft. grade & resurface with 20-ft. O-11. Revise alignment around proposed Catherine Cr. reservoir, 150' high and 3 miles long.	$10,000

(Continued on next page)

THIRD PARTIAL PROGRAM FOR SURVEYS (Cont.)

County	Location and Length	Contemplated Construction	Est. Cost
Sherman	Sherman Co. Line-Grass Valley Section of Shearers Bridge Secondary No. 290 (20.0 mi.)	Widen to 26 feet and surface to 18 feet.	$ 7,000
Klamath	G.N.R.R.-Merrill Section of Klamath Falls-Malin Highway (10.0 mi.)	Widen and improve alignment 44-ft. roadbed, 22-ft. surface	5,000
Benton	Monroe Sec. of Pacific Highway West (1.0 mi.)	Realignment. 50-ft. grade. 22-ft. pavement.	2,000
Benton	Alsea-Deadwood Sec. of Alsea-Deadwood Second. No. 201 (6.0 mi.)	Widen, surface and oil. 26-ft. grade. 18-ft. surface	3,000
Benton	Independence-Albany County Road (3.0 mi.)	Widen, surface and oil. 30-ft. grade. 20-ft. oil.	1,500
Jackson	Ramsey Canyon-Crater Lake Hwy. Sec. of Sams Valley Secondary No. 271 (11.0 mi.)	Realign, surface and oil 30-ft. grade. 20-ft. oil.	7,000
Douglas	Tiller-Elk Creek Sec. of Tiller-Trail Second. Hwy. No. 230 (9.0 mi.)	Regrade, surface and oil. 30-ft. grade. 20-ft. oil	9,000
Morrow	Lexington-Umatilla Co. Line Sec. of Lexington-Echo Second. No. 320 (20.0 mi.)	Widen and oil. 26-ft. grade 20-ft. oil	4,000

After discussion the Commission approved the request by unanimous vote upon motion by Commissioner Schaupp which was seconded by Commissioner Chessman.

The Engineer reported that a number of surveys heretofore authorized by the Commission have been completed. He presented a list of such surveys together with maps and explained the details in connection with each survey. After careful study the Commission approved the respective surveys and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make surveys on certain sections or portions of the highways of the State of Oregon; and

Whereas, pursuant to said authorization the State Highway Engineer has made and completed the said surveys and has filed the maps and plans of the said surveys in the files of the State Highway Commission, in Salem, Oregon; and

WHEREAS, the maps and plans of the said surveys have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission;

NOW, THEREFORE, BE IT RESOLVED that the surveys hereinafter designated and described, together with their identifying location map-file numbers, shown in the map-filing records of the State Highway Commission in its Salem office, be and they are hereby adopted and approved as the location surveys of the various portions or sections of highways involved:

File No.	Prefix	County	Type of Survey	Section	Highway
6B8-1 & 2	10-1428	Douglas	Relocation	Glendale Junction-Wolf Creek	Pacific
6B10-20	12-1427	Grant	Reconstruction	Beech Creek	Pendleton-John Day

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is authorized to make such minor changes in the said locations as may improve the standards of alignment and grades not inconsistent with the general location of the section of highway involved.

With respect to the above approved surveys the Commission ordered the record to show clearly that such approval is limited to the adoption of the location and to the granting of authority to the Attorney to negotiate options for right of way as may be needed therefor, and that no commitment whatsoever is being made as to construction.

The Commission also discussed the Engineers report on a survey for the relocation of the Pelican City-Henley Section of the Klamath Falls-Malin Highway, being the Klamath Falls by-pass route. Careful study was given by the Commission to this matter but approval of the same was deferred pending a satisfactory arrangement with the City of Klamath Falls concerning beautification of the roadside. The Engineer was instructed to contact the Klamath Falls City Planning Commission relative thereto.

Reconsideration was given by the Commission to the matter of approving the survey for the permanent location of The Dalles-California Highway through the Westover Terrace District south of Klamath Falls and to the request of the Klamath Falls City Cemetery Committee for the use of some of the excessive property that the state will acquire in connection with the acquistion of right of way for such project. (See additional entry on previous day.) The Engineer exhibited a map showing the proposed relocation as surveyed, and explained the details in connection therewith. After careful study Commissioner Schaupp moved adoption of the survey and the following resolution relative thereto

The motion was seconded by Commissioner Chessman and was declared by Chairman Banfield to have received the unanimous vote of the Commission.

WHEREAS, the State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make surveys on certain sections or portions of the highways of the State of Oregon; and

WHEREAS, pursuant to said authorization the State Highway Engineer has made and completed the said surveys and has filed the maps and plans of the said surveys in the files of the State Highway Commission, in Salem, Oregon; and

WHEREAS, the maps and plans of the said surveys have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission;

NOW, THEREFORE, BE IT RESOLVED that the surveys hereinafter designated and described, together with their identifying location map-file numbers, as shown in the map-filing records of the State Highway Commission in its Salem office, be and they are hereby adopted and approved as the location surveys of the various portions or sections of highways involved:

File No.	Prefix	County	Type of Survey	Section	Highway
4B18-10	118-1406	Klamath	Location	Klamath Falls-Midland Jct.	The Dalles-California

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is authorized to make such minor changes in the said locations as may improve the standards of alignment and grades not inconsistent with the general location of the section of highway involved.

Consideration was then given by the Commission to the request of the City Cemetery Committee for the use of portions of Lots 7, 8, 9 and 10, Block 2, Westover Terraces, in connection with the development of a memorial park cemetery as mentioned in the letter from Mr. John H. Houston, Mayor of Klamath Falls, dated January 28, 1944. The Commission decided unanimously to cooperate with the city insofar as it is possible to do so and still protect the state's interests. (See Mayor Houston's letter for details.) The Engineer and the Attorney were instructed accordingly.

Reconsideration was given by the Commission to the matter of accepting the offer of the Public Roads Administration to contribute approximately $1,500,000 of National Defense Highway Act funds toward the cost of reconstructing three sections of the Pacific Highway, as presented by

Mr. W. H. Lynch, District Engineer, on the previous day.

The Engineer reviewed the offer for the benefit of Commissioner Chessman who was absent when the matter was first discussed. Commissioner Chessman gave as his thought that the offer is a good one and should be accepted. Chairman Banfield and Commissioner Schaupp similarly expressed themselves, whereupon Chairman Banfield declared the offer accepted by the unanimous vote of the Commission. The Commission thereupon instructed the Engineer to take steps as may be necessary in order to obtain the federal funds and to complete the plans of the several projects so they may be advertised for bids at the earliest possible time. The Attorney was instructed and authorized to proceed with the securing of options for right of way that may be needed for the three jobs.

In this connection the Engineer pointed out that a new bridge will have to be constructed over the Santiam River near Jefferson on the Steiwer Hill-Albany project and that before construction of the bridge is started approval of the structure must be obtained from the U. S. War Department. He requested authority from the Commission to prepare the plans for the structure and to present them to the U. S. War Department with an application for an early hearing with respect thereto. The Commission approved the request by unanimous vote.

The Attorney reported on his examination of the bids received by the Commission in October, 1943, for the furnishing of 6 heavy-duty trucks, as instructed by the Commission earlier in the session. He gave as his opinion that under the circumstances surounding this case, and in view of the developments, the Commission is without authority to refuse to accept delivery of the four remaining trucks from the Nelson Equipment Company and likewise is without authority to purchase these four trucks under the bid submitted by the Clyde Equipment Company, inasmuch as such bid, having been rejected, cannot now be revived. He gave as his further opinion that the most the Commission can do is to reject the delivery of the four remaining trucks and to readvertise for bids, but there is question as to the Commission's authority to do that in view of the fact that the obligation to clear the transaction through the War Production Board is an obligation of the purchaser and not of the bidder. It appears from the record, he said, that the Nelson Equipment Company failed to deliver the entire order of the trucks through no fault of its own, such fault being entirely that of the War Production Board. He also said that, in his opinion, the Commission cannot in law or in equity refuse to accept the four remaining trucks from the Nelson Equipment Company. The matter was discussed by the Commission at some length but action thereon was deferred pending a conference with Mr. Fred Kingston, Sales Manager of the Nelson Equipment Company, who was invited to be present at the afternoon session.

The Commission recessed at 12:00 noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

Mr. Fred Kingston, Sales Manager of the Nelson Equipment Company, appeared before the Commission with regard to the bid submitted by his company

for the furnishing of six heavy-duty trucks of the Walters type. He recited the history of this case, advising that the order for the six trucks was placed with the Nelson Equipment Company in October, 1943 with the understanding that the trucks were to be delivered by December 1, 1943. It was the responsibility of the State Highway Department, he said, to secure release of the trucks by the War Production Board, but because of difficulties encountered such release could be secured for only two of the trucks which were delivered in January, 1944. The Nelson Equipment Company, he said, is willing and anxious to complete delivery of the four remaining trucks and with that in mind sent him to Washington, D. C. to consult with the W. P. B. authorities, who, as a result thereof, have now consented to the release of the remaining trucks which can be delivered, two by March 10 and the remainder by April 1. He urged the Commission to complete the purchase, notwithstanding that the time limit for delivery has expired. He gave as his opinion that, if the order is turned down, the Commission will not be able to obtain trucks of any kind in time for use in snow removal operations this coming winter; moreover, if the Commission could obtain them the cost would be from 10% to 20% more than the price quoted by the Nelson Equipment Company. He also mentioned that the Walters truck is the only 4-wheel drive truck on the market today, and expressed doubt that the War Production Board would release any more trucks if the Commission did not take advantage of the present release.

The Engineer advised that his object in bringing the matter before the Commission at this meeting was simply to inform the Commission of the facts, and to particularly point out a possible saving of $600.00 per truck, being the difference between the bid of the Nelson Equipment Company and that of the Clyde Equipment Company, which was rejected because this company could not deliver the trucks within the specified time. If the Commission does not accept the trucks from the Nelson Equipment Company, he added, it will be necessary to readvertise for bids and to obtain a new release from the War Production Board, which he doubted would be possible. He recommended purchase of the trucks from the Nelson Equipment Company so as to make certain that they will be available for snow removal operations this coming winter. After discussion the Commission informed Mr. Kingston that the facts as presented will be carefully considered and that he will be advised later as to the action taken. Following Mr. Kingston's departure discussion of the matter was resumed and, as a result thereof, the Commission voted unanimously to complete the purchase of the remaining four trucks from the Nelson Equipment Company.

The Commission discussed the bids received at the morning session for construction projects and for the purchase of land near Hermiston, and decided to award contracts to the low bidders in each instance except as to the bid received for the Beaver Marsh-Fort Klamath Rock Production Project which was rejected. The Commission also rejected the bids received for the land near Hermiston and authorized the Attorney to negotiate the private sale of this property.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission, and asked the Commission to confirm them and the amounts allotted therefor. After due consideration the Commission by unanimous vote authorized and instructed the Engineer to make such surveys

on various sections of the highways in this state, which said sections of highways together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Plans	219-1432	Klamath	Lakeview Airport Access Road	1st - $500.00
Levels	6-1435	Coos	Coquille-Bear Creek Section, Oregon Coast Highway	1st - $200.00
R/W	20-1456	Lane	Leaburg-Alder Springs Section, McKenzie Highway	1st - $200.00
Plans	12-1433	Grant	Soda Mt.-Harney County Line Section, John Day Highway	2nd - $300.00 Total to date $800.00
Establish Grades	30-1449	Umatilla	Town of Milton, Oregon-Washington Highway	2nd - $600.00 Total to date $800.00

In this connection the Engineer requested authority to conduct surveys as may be necessary of all of the projects that were suggested by the Pendleton Delegation on the previous day. He estimated the cost would not exceed $3,000 of which amount $2,000 is the estimated cost to investigate the proposed railroad grade separation project on Main Street. The Commission approved the request by unanimous vote.

The Commission had under discussion the following requests for extensions of time within which to complete highway construction projects:

E. F. Altree, Contract No. 2609, for furnishing crushed rock for the Newport Rock Production Project on the Oregon Coast and Corvallis-Newport Highways in Lincoln County, requested an extension of time from June 30, to December 6, 1943, within which to complete this job. He gave no reason for failure to complete this project within the specified time limit. The Engineer advised that the delay in completing this contract caused no interference with maintenance operations and did not involve extra expense by the state for engineering supervision. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

O. C. Yocom, Contract No. 2611, for furnishing maintenance materials for the Nye Junction-Grant County Line Section of the Pendleton-John Day Highway in Umatilla County, requested an extension of time from August 31 to November 20, 1943, within which to complete this job. He attributed his failure to complete the contract

within the specified time limit to inability to secure labor. The Engineer advised that the contract was awarded on December 18, 1942, and was to be completed by August 31, 1943, however, the contractor did not start moving in equipment until the middle of July, 1943, because the equipment was being used on another project between Boswell Ranch and Follett Ranch in Union County, Contract No. 2483. The delay in starting the project, he said, accounts for the over-run time limit. Nevertheless, he recommended that the extension of time requested be granted without penalty because the work of the maintenance crews was not held up by the delay and the state did not incur any additional expense for engineering supervision. The Commission approved the recommendation by unanimous vote.

M. C. Lininger & Sons, Contract No. 2628, for furnishing crushed material in stock piles for the Trail Rock Production Project on the Tiller-Trail and Crater Lake Highways in Jackson County, requested an extension of time from August 31, 1943 to December 24, 1943, within which to complete this job. They attributed their failure to complete the project within the specified time limit to the delay in starting work, it being necessary for them to complete other highway contracts before they could release their equipment from those jobs. The Engineer advised that the contract was awarded on May 12, 1943, but the contractor did not start operations until August 9 due to the fact that he had other work under way that had to be completed first. The delay, he said, has not caused the state any inconvenience and has not increased the cost of engineering supervision. He recommended in view of the circumstances that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Lindstrom Brothers, Contract No. 2631, for the erection of the Battleship Oregon Foremast adjacent to Front Avenue in Portland, requested an extension of time from July 31, 1943, to January 20, 1944, within which to complete this job. They alleged that the over-run of time was occasioned by their inability to obtain material and labor. The Engineer advised that the work actually covered by the contract was completed within the contract time limit, but the contractor was required to do additional work as requested by the Battleship Oregon Commission in connection with which considerable difficulty was encountered in obtaining necessary material and specialized labor. He recommended in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the the recommendation.

Nels Jorgensen, Contract No. 2638, for grading and paving the Eighth Avenue-Broadway Section of Hilyard Street, Eugene, requested an extension of time from August 31, 1943, to January 3, 1944, within which to complete this job. Difficulty in securing labor was given by Mr. Jorgensen as the reason for failure to complete this project within the specified time limit. The Engineer advised that the cause of the delay, as stated by Mr. Jorgensen, is substantially correct. He added that the delay did not inconvenience traffic,

neither did it increase engineering supervision. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

R. O. Dail & Warren Bros., Inc., Contract No. 2651, for surfacing and furnishing maintenance rock for the Wren-Philomath Section of the Corvallis-Newport Highway in Benton County, requested an extension of time of twenty days, from December 31, 1943 to January 20, 1944, within which to complete this job. They attributed their failure to complete the project within the specified time limit to break-downs of equipment and difficulties in obtaining repair parts. The Engineer advised that in addition to the reasons given by the contractor completion of the work was delayed because of an increase in the quantity of oil rock that the contractor was required to produce under Price Agreements. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

The Engineer reported that contracts Nos. 2572, 2609, 2611, 2631, 2638, and 2651, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2572, with McNutt Bros., for surfacing and bituminous macadam construction on the Grave Creek-Jumpoff Joe Creek Section of the Pacific Highway, in Josephine County, completed on October 11, 1943.

Contract No. 2609, with E. F. Altree, for furnishing crushed rock in stockpiles for the Newport Section of the Oregon Coast and Corvallis-Newport Highways, in Lincoln County, completed on December 6, 1943.

Contract No. 2611, with O. C. Yocom, for furnishing crushed rock in stockpiles for the Nye Junction-Grant County Line Section of the Pendleton-John Day Highway, in Umatilla County, completed on November 20, 1943.

Contract No. 2631, with Lindstrom Bros., for the erection of the foremast of the Battleship Oregon in the City of Portland, in Multnomah County, completed on January 20, 1944.

Contract No. 2638, with Nels T. Jorgensen, for grading and paving the Eighth Avenue-Broadway Section of Hilyard Street (Eugene), in Lane County, completed on January 3, 1944.

Contract No. 2651, with R. O. Dail & Warren Bros., Inc. for surfacing and rock production on the Wren-Philomath Section of the Corvallis-Newport Highway, in Benton County, completed on January 20, 1944.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission discussed briefly and ordered filed the "Master Schedule of Recommendations" dated January 27, 1944, formulated by County Board of Supervisors of the Redwood Empire Counties and transmitted through the Redwood Empire Association. The following projects were mentioned, therein, for post war construction in Josephine County, Oregon:

(1) Replacement of the Apple Gate Bridge located about ten (10) miles west of Grants Pass on the Redwood Highway.

(2) Re-align and re-build the Hayes Hill Section of the Redwood Highway.

(3) Eliminate curves in the four (4) mile sectior of the Redwood Highway between O'Brien, Oregon and the California State Line.

(4) Modernize the Pacific Highway between Grants Pass and Eugene.

The Commission reconsidered the request of A. L. Harader for permission to remove three oak trees from the right-of-way of the Pacific Highway in front of his business establishment, known as "George's Place", in Woodburn. Chairman Banfield advised that he has inspected the trees and in his estimation they are of no value to the highway. After due consideration the Commission voted unanimously to allow Mr. Harader to remove the trees provided he will take precautionary measures to protect highway traffic, including the furnishing of public liability and property damage insurance, and will do the work at his own cost and expense. An agreement was thereupon signed with Mr. Harader covering the matter.

The Commission discussed the advisability of employing a Public Relations man to contact logging operators and commercial truckers and to

perform other duties that may be required by the Commission to acquaint the general public with highway activities. As a result of considerable discussion the Commission decided that it would be advisable to employ a competent person to perform such function. The Engineer was instructed to consult with the Attorney and the Weighmaster in the formulation of a program of activities for such an employee, and to bring to the attention of the individual members of the Commission, prior to the next meeting, an outline of a program so the Commission will be in position to discuss it on the next meeting date.

The Engineer presented a brief resume on the activities of the weigh-master department as reported by Chief Weighmaster Loran L. Spaulding. The report indicates that there were fewer violations committed by log-haulers during the month of January 1944, than during the month of December 1943, such decrease being from 3.26% to 2.51%. The Commission ordered the report filed.

At 3:00 p.m., Chairman Banfield announced the following awards of contracts, bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Medical Springs Rock Production Project on the Medical Springs Secondary Highway, in Baker and Union Counties. The Commission received three bids for this project, the low one being that of Northwest Development Co., La Grande, at $36,325.00. The next low bid was that submitted by Western Rock Co., Salem, at $40,275.00. The Commission has awarded this contract to the low bidder, Northwest Development Co, at its bid price of $36,325.00

"Kimberly-Dayville Rock Production Project on the John Day Highway, in Grant and Wheeler Counties. Western Rock Company, Salem, submitted the low bid for this project in the amount of $31,760.00. Chester T. Lackey, Ontario, submitted the next low bid in the amount of $31,800.00. There were eight higher bids. The Commission has awarded this contract to the low bidder, Western Rock Co., at its low bid of $31,760.00.

"Beaver Marsh-Fort Klamath Rock Production Project on The Dalles-California Highway, in Klamath County. The Commission received only one bid for this project, being that of Vernie Jarl, Vernonia, at $54,370.00. The Commission has rejected this bid.

"Rhea Creek-Rock Creek Section of the Heppner-Spray Secondary Highway, in Morrow County. Western Rock Co., Salem, submitted the low bid at $18,930.00. Fisher Bros., Oregon City, submitted the next low bid at $26,625.00. There were seven higher bids. The Commission has awarded this contract to the low bidder at its bid price of $18,930.00.

"Garibaldi-Tillamook Air Base Rock Production Project on the Oregon Coast Highway, in Tillamook County. Rogers Construction Company, Dayton, Washington, submitted the low bid for this project at $12,055.00. F. C. Feldschau & Son, Tillamook, submitted the next low bid at $17,010.00. A

third bid was received from A. T. Dolan, Tillamook, at $19,530.00. The Commission has awarded this contract to the low bidder at its bid price of $12,055.00.

"Sale of two tracts of land adjacent to the Boardman-Stanfield Highway, five miles west of Stanfield, in Umatilla County. The high bid for Tract "A" was submitted by Raley, Kilkenny and Raley, Pendleton, at $1,000.00 They did not submit a bid for Tract "B". The next high bid for Tract "A" was submitted by J. K. Thompson, Pendleton, at $801.00. He also did not submit a bid for Tract "B". L. A. McClintock, Pendleton, submitted a bid in the amount of $3,100.00 for both Tract "A" and Tract "B" together with an additional parcel designated as Parcel "C", which was not included in the Commission's advertisement calling for bids, hence Mr. McClintock's bid is irregular. The Commission considers that none of the bids received are satisfactory and has rejected all of them."

The Commission had under discussion the setting of a date for its next regular meeting to receive bids, and decided to hold such meeting in Portland on Tuesday, March 28, 1944. The Secretary was instructed to arrange to hold this meeting in the Imperial Hotel Stock Exchange Room.

The Commission considered and signed agreements, et cetera, as follows:

Permit authorizing U. S. Coast Guard to maintain a shelter house on state property situate north of Heceta Head Light Station, in Lane County.

Easement granting to Curry County right of way for a roadway leading westerly from the Oregon Coast Highway to the Curry County Airport.

Bargain and sale deeds (three deeds) conveying unto Harry Blodgett, Stanley McCoy and Edwin Fleischman, individually, property adjacent to the Pacific Highway West, south of Monmouth, being outside of the standard width right of way.

Agreement with Tru-Mix Concrete Company with respect to the disposal of overburden that is to be removed from the company's quarry site adjacent to the Klamath Lake Secondary Highway in Klamath County.

Agreement with Southern Pacific Company covering construction of a drainage tunnel on the Oregon Coast Highway between Brighton and Wheeler, in Tillamook County.

Agreement with Homer M. Cross and wife with respect to land in Tillamook County that is needed as a plant site for highway department use.

Agreement with O.W.R. & N. Company covering easement for Swan Island Access Road.

Modification of lease with W. J. Walker, re use of a gravel pit on Mr. Walker's property at Pistol River, in Curry County.

Agreement with St. Helens Pulp and Paper Company covering use of a trestle in connection with the transportation of logs over the Lower Columbia River Highway near Knappa.

Joint letter with the Public Roads Administration and the U. S. Forest Service providing for an allocation of Federal Forest Highway funds to finance preparation of an "On the Shelf" post war Forest Highway Construction Program.

Letter directed to Mr. W. H. Horning, Chief Forester, O. & C. Revested Lands Administration, Portland, approving exchange of lands between Douglas County and the Federal Government and cancellation of the lease-hold of the State of Oregon in such lands.

Agreement with the Federal Works Agency covering the financing of economic investigations during the period July 13, 1943 to December 31, 1944.

"Hazard Renewal Extension" covering burning operations in the state park located in Lots 1, 2, and 3, Section 24, Twp. 22 S., R. 13 W., W. M.

Agreement with A. L. Harader and wife providing for the removal of three oak trees growing on the right-of-way of the Pacific Highway East in front of Mr. Harader's business place in Woodburn.

"Receipt and Release" covering payment by the U. S. Government of the sum of $61.92 for damaging a traffic pedestal in Medford.

Bargain and sale deed conveying unto Marion County property needed as right of way for a county road abutting on the Aurora Flight Strip. This right of way is for a road to replace a county road which was destroyed by reason of the contruction of the Flight Strip.

There being no further business to come before the Commission at this time the meeting adjourned at 3:30 p. m.

T. H. Banfield
Chairman

State Highway Engineer

A. W. Schramm
Commissioner

H. B. Heaivilin
Secretary

M. D. Thomas
Commissioner

[illegible] 1944

Portland, Oregon, March 28, 1944

The State Highway Commission met in regular session at 9:00 a. m. in the Stock Exchange Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner (Arrived at 10:30 a.m.)
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction work were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the award of contracts would be made at 3:00 p.m. in the same room:

THE DALLES-CALIFORNIA AND CENTRAL OREGON HIGHWAYS
BEND-LAVA BUTTE ROCK PRODUCTION PROJECT

A. C. Suhre, Bend	$15,696.00

LAKEVIEW-BURNS HIGHWAY
JUNIPER RIDGE-ALKALI LAKE ROCK PRODUCTION PROJECT

T. W. Thomas, Portland	$18,750.00
A. H. Saxton & Son, Cloverdale	23,250.00
R. O. Dail, Portland	23,475.00

THE DALLES-CALIFORNIA HIGHWAY
BEAVER MARSH-FORT KLAMATH ROCK PRODUCTION PROJECT

Babler & Conley, Portland	$42,975.00
Tru-Mix Concrete Co., Medford	43,096.50
A. H. Saxton & Son, Cloverdale	44,850.00
T. W. Thomas, Portland	50,450.00

FREMONT AND LAKEVIEW-BURNS HIGHWAYS
VALLEY FALLS ROCK PRODUCTION PROJECT

T. W. Thomas, Portland	$23,960.00
A. H. Saxton & Son, Cloverdale	24,550.00
R. O. Dail, Portland	29,790.00
Babler & Conley, Portland	36,600.00

ALBANY-LYONS SECONDARY HIGHWAY
PAVING, CRABTREE CORNER-CRABTREE CREEK SECTION

Warren Northwest, Inc., Portland	$57,975.00
J. C. Compton, McMinnville	66,225.00
Newport Construction Co., Portland	80,951.50
Porter W. Yett, Portland	82,700.00
United Contracting Co., Portland	86,775.00

I. O. N. HIGHWAY
REOILING, OWYHEE RIVER-McDERMITT SECTION

Russell Olson, Hayward, California	$40,388.00
J. C. Compton Co., McMinnville	45,988.00

County Judge Nelson B. Higgs, Harney County, came before the Commission in regard to additional improvements to the Frenchglen and Diamond Secondary Highways. The Engineer advised that further improvement of these roads depends upon the location of suitable materials, the search for which is now underway, and that when the material is found estimates of cost will be prepared and presented to the Commission for consideration.

The Engineer reported on the cost to repair two bridges on the Culver-Grandview Market Road in Jefferson County concerning which the Jefferson County Court appeared before the Commission at the previous meeting. He advised that both bridges are within the boundaries of The Cove State Park, one being over the Crooked River and the other over the Deschutes River. Both structures, he said, are of the same type and investigation reveals that they are badly in need of repair. He estimated the cost of such repairs at approximately $5,050 and recommended that the Commission authorize him to proceed with the work at state expense and to maintain the structures until the present war emergency is over. The Commission approved the recommendation by unanimous vote subject to the condition that not to exceed $6,000 shall be expended for such purpose. The Commission also decided not to assume the maintenance of the road itself, but to leave that obligation with the county.

The Engineer reported receipt of information from the Public Roads Administration that an agreement has been reached with the Linn County Court with respect to the improvement and maintenance of the Lacomb-Brewster County Road to facilitate log hauling operations. By this arrangement, he said, the federal government will contribute $50,000 toward construction, and Linn County and the timber interests will contribute the sum of $37,000, making a total of $87,000 available for the improvement including oiling as may be necessary. In addition thereto, he said, the federal government will contribute $10,000 per year for maintenance, the work to be performed by Linn County. He gave as his thought in view of the circumstances, that the Commission is no longer concerned with the project. The Commission concurred and thereupon ordered the matter closed.

The Commission had under discussion the matter of improving the Little Nestucca Secondary Highway to accommodate log hauling operations as has been suggested by Mr. F. H. Brundage, Western Log and Lumber Administrator. The Engineer advised that the unimproved section of this road is about 2½ miles long and that the cost to construct a 26 foot roadbed and to rock the same as estimated in 1936, is about $214,000, exclusive of four bridges which are estimated to cost about $150,000. He explained that the road in its present condition is not suitable for log hauling; in fact, it will not even stand up under the stress of empty trucks so the Doernbecker Manufacturing Company, which is conducting logging operations in that vicinity, now is required to transport their logs over the Oregon Coast and Three Rivers Highways and the

empty trucks are required to use the same route in returning to the woods. The present road, he said, is now serving the farmers in the locality satisfactorily and if the Commission should decide to improve the road it would be for the benefit of the loggers only which he did not believe was sufficient justification for the project. Moreover, it would be deviating from the Commission's established policy which prohibits undertakings for private gain. The matter was discussed by the Commission but action thereon was deferred pending a conference with Mr. E. J. Runquist of the Doernbecker Manufacturing Company later in the session. (Following a discussion of the matter with Mr. Runquist the Commission instructed the Engineer to arrange a joint inspection of the road with Mr. Brundage and Mr. Runquist in view of the possibilities of securing federal logging access road monies to pay for the improvement. See ahead for details of the conference.)

The Engineer reported on the proposed sale of logs lying on state-owned property adjacent to the Wilson River Highway, concerning which inquiry has been made by Mr. William P. Lord, Attorney, Portland, in behalf of a client. He advised that investigation reveals that the logs lie on steep hillside and cannot be removed without causing considerable hazard to highway traffic; moreover, they could not be salvaged without causing considerable damage to the highway cut slopes. The Attorney advised that he has been unable to date to ascertain the ownership of the logs but believes that they belong to the Consolidated Timber Company from whom the property was acquired. In view of these reports, the Commission decided unanimously not to sell the logs and instructed the Secretary to so inform Mr. Lord.

The question whether or not to purchase from the Polk Operating Company three acres of land near Grand Ronde to be used as a maintenance site had the attention of the Commission, the matter being deferred from the previous meeting. The Engineer advised that as instructed by the Commission, search has been made for other sites in this locality but none were found that contained the conveniences, such as water, power and a railroad spur track, which are available at the site originally selected. He recommended purchase of this tract notwithstanding that the owners are asking $250.00 per acre for it. The Commission approved the recommendation by unanimous vote.

A letter was presented from Ace L. Irvine, Housing Manager of the Sutherlin Federal Housing Project, requesting the erection of signs along the highway that leads from the Town of Sutherlin to the housing project about ½-mile westerly thereof, cautioning motorists to drive with care in view of the many children and other pedestrians who are obliged to walk on this road. The Engineer advised that the road in question is a state secondary highway and that the pedestrian situation has been investigated by Acting Traffic Manager F. B. Crandall, who gives as his opinion that caution signs would not produce the desired results, and who suggests the construction of a footpath between the housing project and the town, a distance of about 6/10 of a mile. He estimated that such footpath would cost about $5,000 and suggested that it might be possible to secure federal housing funds to pay the expense. The Attorney advised that the Commission has the authority to spend state funds

to build the sidewalk if it so desires, on the premise that children walking on the highway are a hazard to motorists and the expenditure would be for the elimination of this hazard.

Chairman Banfield gave as his thought that the federal housing authorities should provide road and sidewalk facilities for the housing projects that it constructs. Commissioner Chessman suggested that the housing authorities be contacted to ascertain whether or not funds for construction of the sidewalk are available from that source. The suggestion was approved by the Commission and the Engineer was thereupon instructed to ascertain such information.

A group of log haulers from the Tillamook, Mollala and Vernonia districts, headed by Mr. Harvey R. Nelson, representing the Columbia River District Council, I.W.A., was present regarding the penalty imposed on log haulers for overloading. Others in the group were John W. Elder, Local No. 37, Vernonia; R. T. Gilman, Local No. 40, Mollala; Leonard J. Simmon, Carl Campbell, Robert W. Widmer, Ivan Curtis, Dick Russell, Howard Stickler, Jim Allen, Jack Shaffer, Floyd Brewer, and Virgil Cornelius, all of Local No. 238, Tillamook. Mr. Nelson declared that the present penalty of requiring operators to remove a portion of their loads in order to bring the gross weight within authorized limits in unsafe and a hazard to workmen because there are no suitable facilities at the scales to properly take off the logs. He predicted that eventually someone would be killed unless the penalty is revised or unless proper facilities are provided for removing the logs. He also said that the group is not asking the Commission to condone the overloading of logging equipment, but its purpose is simply to ask the Commission to modify its rulings so as to protect the lives of the workmen. He suggested that this might be done if the Highway Commission would approve the loading of trucks by log scale measure rather than by weight and advised that if something is not done to protect the lives of the workmen they probably will park their trucks along side the highway and leave them there until proper facilities are provided to remove the extra logs.

Chairman Banfield advised that the Highway Commission has tried out numerous methods to stop overloading and has even granted special tolerances so to eliminate guessing in the weight of logs but none of them have worked out satisfactorily and overloading continues, presumably because the operators are loading up to the limit of the tolerance rather than to the weight limit prescribed by law. As to the adoption of the log scale method of loading, he advised that due to the variance in the weight of logs it would be necessary to designate a very low scale measure in order to make certain that excessive weight loads were not moved over the highway surface and as a result many of the operators would be forced out of business. The Highway Commission, he added, wants to help the logging industry as much as it possibly can, as is evidenced by the extra tolerances allowed, but some of the operators don't seem to care and consistently overload their trucks which is the reason that the Commission has adopted the penalty requiring the removal of the excess weight. As to providing proper facilities that would permit the removal of the extra logs with safety he said that it is up to the operators to insist that the employers provide such facilities.

Commissioner Chessman advised that the Commission has the authority to cancel the permit of an offending operator but that would mean taking out of service all of the trucks that are being operated under such permit, which the Commission hesitates to do during these emergency times. He also said that the Commission could not very well approve an overload knowing that the highway would be damaged, because that would place the Commission in the position of being a party to the offense and jointly liable for the expense of repairing the damage. The Highway Commission, he added, would prefer not to penalize operators for overloading but it seems necessary in order to protect the highway facilities. He suggested that it might be advisable for operators who are found with overloads to drive their trucks off the highway and wait there until the owner of the logs provides the proper facilities for removing the extra weight. The conference was concluded after further discussion of a general nature in which a number of the operators joined.

Mr. John L. Waters of the Dallas Machine and Locomotive Works was present in regard to the completion and delivery of two paving plants that were ordered by the Commission in October, 1941, but which could not be delivered at that time because of federal priority regulations. He gave as his understanding that the government has finally released this equipment and advised that his company is ready and willing to complete delivery if the Commission will pay an extra amount to cover labor and material costs which have increased considerably since the company made its original quotation. He offered to furnish the two paving plants that remain undelivered at $15,750 each, an increase of $2,250 over the original price. In the discussion the question arose whether or not the contract between the state and the Dallas Machine and Locomotive Works is still effective in view of the time that has elapsed since the contract was made. The Attorney advised that the Commission has authority to purchase the plants at the increased price if it so desires, but under the present contract cannot require the company to deliver the plants at this late date, neither can the state be forced to accept them. He suggested that the transaction should be covered by an entirely new contract. The Engineer recommended acceptance of the company's offer in order to insure early delivery of the plants that are needed for this season's operations. After discussion motion was made by Commissioner Chessman that the original contract with the Dallas Machine and Locomotive Works be cancelled. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission. The Commission discussed the matter further after the departure of Mr. Waters and at that time authorized the Engineer to secure new quotations through the State Purchasing Agent.

Messrs. Frank Z. Howard and A. D. Collier and County Judge U. E. Reeder, Klamath County, constituted a delegation from Klamath Falls which came before the Commission in regard to the improvement of highway entrances into the City of Klamath Falls, particularly with respect to the development of waysides along the proposed new location of the Klamath Falls-Malin Highway between Pelican City and Henley. Mr. Howard presented a written brief on the subject including a map showing the extent of the proposed development. He explained that the proposed new highway follows along the right of way of the Southern Pacific Railroad south from Pelican City to the point where the railroad crosses the main canal of the Klamath Irrigation Project, then follows

along the north side of the canal to the easterly city limits of Klamath Falls, from which point it extends in a southeasterly direction, by-passing the South Sixth Street congested district, to a connection with the present highway at Henley and that they are proposing that the State Highway Commission in acquiring right of way purchase additional area for wayside development. He suggested that the planting of native trees and shrubs thereon and the maintenance of the area in its natural state would provide an attractive highway entrance into and through the city. Mr. Howard pointed out that the City of Klamath Falls and Klamath County own a considerable portion of the land that will be needed for such purpose and advised that city streets that are affected by the plan would be vacated so as to provide a "freeway" with right of access denied except at a few selected places. Mr. Collier spoke in behalf of the project as a member of the Klamath Falls Park Board. He gave as his thought that now is an opportune time for the state to acquire the land while the property can be purchased at small cost, advising that the city and the county property can be obtained at the rate of $1.00 per lot. He estimated the total cost of the right of way at $19,180.00 and the additional land at $34,515.00, a total of $53,695.00, of which amount $31,865.00 represents the value of the privately owned land. He suggested that the price of the privately owned land could be reduced by about $12,000 by the sale of buildings located thereon. He endorsed Mr Howard's remarks and added that what they have in mind is the establishment of a "wild park", the planting of native trees and shrubs therein and the maintenance of the same in its natural state. He pointed out however, that the improvement would involve the moving of a certain tennis court which obligation the state would be expected to assume. In reply to an inquiry from Chairman Banfield Mr. Collier advised that they would expect the state to maintain the park, after it is constructed, as is now being done in other parts of the state, such as at Albany.

Chairman Banfield pointed out that if the Highway Commission should assume the maintenance of the project it would establish a precedent which the Commission could not avoid in the disposition of similar projects throughout the state in the future. He expressed himself as being in favor of restoring the aesthetic features along the new highway when it is constructed but did not believe that the Highway Commission should go so far as to establish a new park which, in his estimation, is a local obligation. Mr. Collier then advised that their object in appearing before the Commission at this time is primarily to ask the Commission to purchase the extra land regardless of whether or not the Commission decides to improve the waysides, and to move the tennis court. Judge Reeder and Mr. Howard concurred. Commissioner Chessman indicated a favorable attitude toward the purchase of the additional land but gave as his thought that the Commission should give the matter more study before it makes a decision with respect to the development and maintenance of the waysides. This concluded the conference.

The matter was reconsidered by the Commission following the departure of the delegation, at which time Chairman Banfield and Commissioner Chessman both expressed themselves as having no objection to acquiring the extra land if satisfactory arrangements can be effected with the city and the county.

The Engineer was thereupon instructed to consult with the city and county officials and work up a three-way agreement covering the matter for consideration by the Commission at its next regular meeting. (See brief presented by Mr. Howard for further details with respect to the delegation's request.)

Messrs. Ralph E. Koozer, President, and Paul B. Rynning, Secretary-Treasurer, of the Oregon Pacific Highway Association, Inc., were present and conferred with the Highway Commission on highway matters in general, including the improvement of the Pacific Highway. They made no specific requests requiring action by the Commission.

A delegation representing the Depoe Bay Booster Club including Leon V. Mix, President, and Cottage owner; J. C. Pepper, Local Manager of the Columbia River Packers Association; and P. H. Archer, Real Estate, came before the Commission and urged the installation of public comfort facilities at Depoe Bay. Mr. Carl Johnson, President, Sunset Investment Company, Portland, was also present. Mr. Mix headed the group. He advised that at the present time there are no public comfort station facilities existing at this place, neither are there private facilities available for general public use which is a very unsatisfactory condition considering the crowds of people that throng to this place. He urged the Commission to provide such facilities because the local people are unable to do so.

There followed a general discussion of the subject during which the Secretary advised that the matter was passed on by the former Highway Commission which denied a similar request, and the State Parks Superintendent advised that if the Commission approved such installation at this place it would be a departure from a long established policy, there being no existing facilities of such nature any place on the state-highway system except in state parks. The State Highway Engineer advised that similar facilities were provided by the state under the Willamette River Bridge at Oregon City when this structure was built but after trial the place was closed to the public because it could not be kept clean without excessive expense.

Mr. Johnson advised that his company donated to the state the strip of land that lies between the highway and the ocean at Depoe Bay and that on one occasion after the transfer was made, the people of this place were promised by the late Governor Patterson that rest rooms would be provided; however, the plan never materialized because of the death of the Governor. The people of Depoe Bay, he said, feel that it is the state's obligation to provide such facilities which he suggested could be placed under the bridge. Mr. Mix suggested that if the state would build the rest room that local people might be able to maintain it and would organize a district for such purpose if that was necessary.

Chairman Banfield expressed appreciation of the need of facilities of this kind but questioned if it is the state's obligation to furnish them. Commissioner Chessman concurred, adding that approval of the project in this

instance would involve the establishment of a precedent which might prove unwise and costly later on. After further discussion Chairman Banfield concluded the conference by stating that the Commission would take the matter under advisement. The delegation filed a brief in support of their arguments.

Mr. E. J. Runquist, representing the Doernbecher Manufacturing Co., Portland, came before the Commission in the interests of the Little Nestucca Secondary Highway, in Tillamook County. He advised that his company is logging the timber adjacent to this highway and because of the fact that the Highway Commission has closed the road to logging trucks, both loaded and empty, it is necessary to transport the logs by a circuitous route via Hebo, whereas, if the Little Nestucca Highway were improved it would give them a direct connection some 15 miles shorter and would make it possible to conserve gasoline and tires for other purposes. He presented a copy of a letter from Mr. F. H. Brundage, Western Log and Lumber Administrator, to the State Highway Engineer supporting his request, which letter was read aloud by the Secretary.

The Engineer advised that the present road for the most part is not much more than a trail and that farmers residing along the road are very much against its use by logging trucks which undoubtedly would tear it to pieces making it impassable for local use. He advised further that to construct the 2½ miles of uncompleted road to proper standards is a very costly undertaking and there is a question whether or not the Commission would be able to undertake the project because of wartime restrictions, shortage of labor, et cetera. It would be costly also, he added, to provide a temporary improvement and to maintain the road in satisfactory condition for logging traffic.

Mr. Runquist advised that his company might arrange to maintain the present road in as good a condition as it now is, including provision for turnouts, but cannot finance the widening of the entire highway. He suggested if the Commission cannot see its way clear to improve the road so that it can be used by loaded trucks that it at least open the road for empty trucks. He assured the Commission that his company would cooperate in maintaining the road but to what extent he could not state definitely at this time.

After further discussion the Engineer suggested that it might be advisable to make a joint inspection of the road with Mr. Brundage and someone representing the Doernbecher Manufacturing Company. The suggestion was approved by Mr. Runquist as well as by the members of the Commission, whereupon the Engineer was instructed to make the necessary arrangements for such inspection.

The Commission adjourned at 12:15 p. m. and reconvened at 1:30 p. m. in the same room with the same persons present and participating.

The Commission by unanimous vote approved the minutes of the Commission meetings that were held on January 18 and on February 16 and 17, 1944.

MAR 13 1944

The State Parks Superintendent, S. H. Boardman, was present and presented the following matters to the Commission:

1. Proposal of the Manzanita Community House, Inc. and Pine Grove Progressive Club, Manzanita, for establishment of a wild game refuge on Neahkahnie Mountain:-

The Parks Superintendent advised that it will require action by the legislature to establish such a preserve and that he has already arranged a meeting with Mr. F. B. Wire, State Game Supervisor, for a discussion of the matter, but other than this he has nothing to report.

2. Protest from H. W. Fowler of Lake Tahkenitch Auto Resort to the state's acquiring Crown Willamette Paper Company's timber land along the Oregon Coast Highway between Tahkenitch Lake and Gardiner, in Douglas County:-

The State Parks Superintendent advised that Mr. Fowler is fearful that the state is going to buy timbered wayside strips from the Crown Willamette Paper Company, and that the company is going to claim credit for donating the property to the state, whereas, as a matter of fact he has no plans whatsoever to acquire such property. The Secretary was instructed to so inform Mr. Fowler.

3. Planting of trees for reforestation along the Wolf Creek Highway:-

The Parks Superintendent advised that through the generosity and public spiritedness of certain members of the West Coast Lumbermen's Association, and upon oral authority secured from the Highway Commission, about 80,000 seedling trees have been planted along the Wolf Creek Highway between the Tillamook-Washington County Line and the North Fork of Quartz Creek, the State Forester being the planting agency. 60,000 of these trees, he said, were obtained from the State Forestry Arboretum at Corvallis, the balance being furnished by the Crown Willamette Paper Company; also, that the trees were planted in rows ten feet apart on both sides of the highway there being six rows on each side. The Commission expressed its pleasure with the planting and instructed the Secretary to extend to the sponsers the Commission's sincere appreciation for this contribution. The Commission thereupon by unanimous vote, confirmed its oral action authorizing the planting of the trees on the highway right of way.

4. Exchange of O & C Lands now under lease in Jackson County:-

The Parks Superintendent advised that the Jackson County Court has effected an arrangement with the O & C. Administration for the exchange of certain county lands for government property

that the State Highway Commission has under lease and that the county is now ready and willing to deed this property to the state upon payment of the sum of $1,450.00 which is the value that the county places on the county lands that are involved in the exchange. He further advised that the tract contains 320 acres situate adjacent to the Crater Lake Highway and that the transaction is in conformity with the Commission's program of acquiring the O & C Lands that are under lease from the government. The Commission approved the purchase of this property.

5. Transfer of O & C Lands along the Siuslaw Highway, in Lane County:-

The Parks Superintendent advised that the Highway Commission has under lease from the federal government a considerable acreage of O & C Lands situate adjacent to the Siuslaw Highway between Cheshire and Triangle Lake and that under a recent federal ruling the O & C Administration is in a position to and will preserve this acreage if the Highway Commission will consent to cancellation of the lease and will allow the property to revert back to the O & C Administration. He recommended approval of such proposition, because it will insure the preservation of the property without further expense to the state. The Commission approved the recommendation unanimously.

6. Concession privilege at Bradley Park:-

The Commission considered the application of R. J. Bristow, Wauna, Oregon, for the privilege of operating a concession at Bradley Park adjacent to the Lower Columbia River Highway, in Clatsop County. The Parks Superintendent recommended against the granting of such privilege at this time. The Commission approved the recommendation unanimously upon the motion of Commissioner Schaupp which was seconded by Commissioner Chessman.

7. Reduction of rental charge for use of CCC Camp in the Silver Creek Falls State Park:-

The Parks Superintendent presented a request from Reverend J. Frank Cunningham, Pastor of the First Christian Church, Newburg, for a reduction from 15¢ to 10¢ per day per individual for the use of facilities at this park during the week when the Church conducts its state wide recreational outing at this place. He recommended denial of the request in order to avoid deviation from a long established policy and the setting of an undesirable precedent. The Commission approved the recommendation by unanimous vote.

8. Acquisition of O & C Lands adjacent to the McKenzie Highway in Lane County:-

The Parks Superintendent recalled that the Commission at its meeting on January 11, 1944, authorized him to

petition the U. S. Department of Interior to set aside for state park purposes certain federal lands adjacent to the McKenzie Highway and the McKenzie River. Subsequent investigation, he said, reveals that the land is not particularly desirable from the state's standpoint, in view of which it is his recommendation that the matter of acquiring it be dropped. The Commission approved his recommendation.

9. Proposal to establish a state park on the shores of the lake formed by the Dorena Dam near Cottage Grove:- The Parks Superintendent advised that suggestion has been made by Lt. Col. Ralph A. Tudor, U. S. Army Engineers, that the state establish a state park on the shores of this lake. He gave as his thought that the establishment of such a park would fit in nicely with the state park picture at some future time but not now, and recommended consideration of the matter when the war is over. The Commission approved the recommendation upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements. He submitted a list of such properties together with offers that he recommended in connection with each parcel. After careful consideration of each item the Commission approved the request and by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

*ARLINGTON SECTION, COLUMBIA RIVER HIGHWAY

11280	McClaskey, J. E. Maintenance headquarters.	0.87 acre at $1,149.40	$1,000.00	Cosad

ST. HELENS SECTION, COLUMBIA RIVER HIGHWAY

6727	Ross, Charles M. Stock Pile Site	1.61 acres - renewal stock pile lease. 5 yrs. at $20.00 per year.	$ 100.00	McChesney

*SOUTH BEACH-BEAVER CREEK SECTION, OREGON COAST HIGHWAY

11106-A	Ruppert, Clara H. & William Buhrer Wayside Strip	0.11 acre at $250.00 0.55 acre at $100.00	$ 27.50 55.00 $ 82.50	Benson
11105	Kirsch, Katie Wayside Strip	7.0 acres at $250.00	$1,750.00	Benson
11107	Lincoln County Wayside Strip	0.45 acre at $66.66	$ 30.00	Benson
11113	Hart, Charles Wayside strip	1.74 acres at $250.00 Compromise to settle	$ 435.00 40.00 $ 475.00	Benson

*NEWPORT-WALDPORT SECTION, OREGON COAST HIGHWAY

11109	Halsey, Lee Park Strip	0.90 acre at $222.23 Building	$ 200.00 400.00 $ 600.00	Benson
11106	Ruppert, Clara H. Park Strip	3.01 acres at $250.00	$ 752.50	Benson
11108	Buhrer, Wm. and Clara H. Ruppert Park Strip	15.72 acres at $250.00	$3,930.00	Benson
67-96A	Rice, Ruth L. Wayside Strip	3.2 acres at $250.00	$ 800.00	Benson

*WALDPORT-BIG CREEK SECTION, OREGON COAST HIGHWAY

11102	Plankinton, Jesse C. Park Strip	0.20 acre at $375.00	$ 75.00	Benson

*WALDPORT-BIG CREEK SECTION, OREGON COAST HIGHWAY (Cont.)

11103	Burtis, Ruth R. and Mary E. Gillespie Park Strip	5.4 acres at $300.00	$1,620.00	Benson
11104	McClaskey, Josephine Wayside Strip	11.3 acres at $250.00	$2,825.00	Benson

MUSSEL CREEK-EUCHRE CREEK SECTION, OREGON COAST HIGHWAY

11085	Chambers, Winston W. Right of Way	1.94 acres at $35.00	$ 67.90	Lytle

*SUNSET CAMP WEST SECTION, WOLF CREEK HIGHWAY

11114	Sunset Logging Company Park Wayside and right of way	374.93 acres at $5.00	$1,874.65	Parker

WHITESON SECTION, PACIFIC HIGHWAY WEST

10890	Southern Pacific Co. Asphalt Storage Site	1.5 acres at $600.00 185 lin. ft. siding track at $1.89	$ 900.00 350.00 $1,250.00	DeSouza

*GRAND RONDE SECTION, SALMON RIVER HIGHWAY

11214	Polk Operating Co. Maintenance hdqrs.	3.0 acres (approx) at $250.00	$ 750.00	Benson

WOODBURN-BROOKS SECTION, PACIFIC HIGHWAY

979	Harper, John S. Stock Pile site	0.50 acre at $400.00 per	$ 200.00	Collier

AGENCY-MODOC POINT SECTION, THE DALLES-CALIFORNIA HIGHWAY

1792	Hagelstein, John and Wm. Stock Pile Site Lease	5 yr. lease on 0.563 acre at $5.00 year	$ 25.00	McChesney

JORDAN VALLEY-JORDAN CREEK SECTION, JORDAN VALLEY HIGHWAY

10932	Fraser, William M. Stock Pile Site Hauling road	1.65 acres 1.75 acres at $3.00 3.40	$ 10.00	Parker

DEC 13 1944

UKIAH-FOREST BOUNDARY SECTION, PENDLETON-JOHN DAY HIGHWAY

11115	Mettie, Fayette Park	302.0 acres at $10.00 500M ft. pine timber at $3.00 M.	$3,020.00 1,500.00 $4,520.00	McChesney
10491-A	Spurlock, W. M. Park	152.5 acres at $10.00 House, garage, outbuildings	$1,525.00 305.00 $1,830.00	McChesney
11116	Davisson, Nettie M. Park (Waysides)	155.0 acres at $9.68	$1,500.00	McChesney
11117	Umatilla County Park (Waysides)	390.4 acres at $10.00	$3,904.00	McChesney
11119	Carnes, Geo. E. Park	386.0 acres at $10.00 3 cabins (1 log cabin)	$3,860.00 1,200.00 $5,060.00	McChesney
11120	Hilbert, Frank Park (Waysides)	285.0 acres at $10.00	$2,850.00	McChesney

*The following notes were recorded during the discussion of the properties listed in the above resolution:

File No. 11280, Purchase of Maintenance Site at Arlington: The Commission approved the acquisition of this maintenance headquarters site on recommendation of the Engineer who advised that the site is the best one obtainable in this vicinity and that it is not planned to construct the maintenance building thereon until the war is over.

Files Nos. 11106-A, 11105, 11107, 11113, 11109, 11106, 11108, 67-96-A, 11102, 11103, and 11104, Purchase of wayside strips along the Oregon Coast Highway in Lincoln County: The Commission approved the purchase of these properties and authorized the Attorney to condemn, if necessary, other properties that are needed to complete such wayside strip acquisitions in this locality, subject to approval by the Commission of the offers to be made in condemnation.

File No. 11114, Acquisition of quarry site and wayside strips along the Wolf Creek Highway: The Commission authorized the purchase of this property upon recommendation of the Engineer, notwithstanding that the area is larger than is actually needed, it appearing from the Right-of-Way Agents report that the entire acreage can be purchased at the same price as a fractional part and that the Sunset Logging Company will not sell a portion only.

File No. 11214, Maintenance Headquarters site at Grand Ronde: Approved by the Commission earlier in the session; see special notes.

File No. 11072, Right of Way purchase for Steiwer Hill-Albany Section of the Pacific Highway: Approval of this item was simply to confirm previous oral action taken by Chairman Banfield and Commissioner Chessman.

In addition to the projects listed in the above resolution authorizing acquisition of real property the Commission discussed the purchase of other properties as follows:

Files Nos. 11285 and 11286: Proposed acquisition of maintenance headquarters site on the Oregon Coast Highway between North Bend and Marshfield. The Commission deferred action on these purchases pending investigation by the Engineer who was also instructed to present to the Commission at its next meeting a complete report on all maintenance sites, including those now owned by the state, those under lease and those contemplated.

File No. 9444-A: Contemplated purchase of 0.297 acres from Eugene Power Company adjacent to the Judkins Point-Springfield Junction Section of the Pacific Highway. The Assistant Attorney advised that while this property is not actually needed as right of way, it has been thought best to acquire it in order to forestall the use of the property for filling station purposes. The Commission deferred its decision pending a report from the Engineer as to the desirability of purchasing the property.

File No. 1436-A: Addition to maintenance headquarters site at Roseburg. This property, which contains 4,000 square feet of land, is owned by Douglas County which is asking $114.00 for the same. The Commission deferred action as to its purchase pending examination of the property by the Engineer and his report thereon.

Items Nos. 11166, 11163, 11161, 11165 and 11167: Proposed acquisition of wayside strips along the Drews Valley-Lakeview Section of the Klamath Falls-Lakeview Highway. The Commission deferred action on the acquisition of these properties pending a report from the Engineer at the next meeting.

The Assistant Attorney requested authority to condemn certain parcels of real property that he has been unable to acquire by negotiation. He presented a list of such properties together with offers that he recommended be made in connection with each, as follows:

STEIWER HILL-MURDER CREEK SECTION, PACIFIC HIGHWAY EAST:

11071	Dewey E. Peterson, et ux.	$ 475.00
11074	A. H. Thompson, et ux.	$3000.00
11076-7	Tom Murray, et ux.	$ 500.00

After due consideration the Commission approved the request and by unanimous vote adopted the following resolution with respect thereto upon motion of Commissioner Chessman which was seconded by Commissioner Schaupp:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original

location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Dewey Peterson and Lillian Peterson, husband and wife, which property is located in the northeast quarter (NE¼) of the northeast quarter (NE¼) of Section 15, Township 9 South, Range 3 West, W. M., Marion County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 11071, which property is being acquired for right of way purposes in connection with the revised location of the Pacific Highway East; *

Real property owned by Ora Thompson and A. H. Thompson, wife and husband, which property is located in the Steiwer Fruit Farms No. 2 and situated in the southeast quarter (SE¼)

of Section 15, Township 9 South, Range 3 West, W. M., Marion County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 11074, which property is being acquired for right of way purposes in connection with the revised location of the Pacific Highway East; *

Real property owned by Tom Murray and Rose H. Murray, husband and wife, which property is located in the northeast quarter (NE¼) of the northwest quarter (NW¼) of Section 22, Township 9 South, Range 3 West, W. M., and in the northwest quarter (NW¼) of Section 22, Township 9 South, Range 3 West, W. M., Marion County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 3 and 4, and is further identified in the records of the Highway Commission as file R 11076, and which property is being acquired for right of way purposes in connection with the revised location of the Pacific Highway East. *

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That George Neuner, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

---

*(The detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 42, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

A committee representing the Pacific Northwest Loggers Association came before the Commission and requested the modification of the penalty that is now imposed upon log haulers for transporting overweight loads. Included in the committee were the following: George Gray, Gray Logging Company; L. A. Christensen and Owen Bentley, Crown Zellerbach Corp.; Jens Lerback, Lerback Logging Co.; A. F. Baker, The Clark & Wilson Lumber Co.; H. C. Patton, Hammond Lumber Co.; E. H. Crosby and Fred Packwood, Columbia Basin Loggers; A. A. Peterson, Western Pine Association; and Lloyd Crosby, Consolidated Timber Co. Mr. Gray headed the group.

He advised that the industry represented by the committee is not in sympathy with the consistent, flagrant violator of the weight requirements, but does not believe that the penalty now imposed on violators of the requirements consisting of the removal of a portion of the load, is the proper solution of the problem. He pointed out the difficulties with which the logging industry is confronted due to war-time conditions beyond its control, which he said, accounts for the fact that an overweight load sometimes is moved over the highway regardless of the precautions that are taken to prevent it, except in a few instances when overloading is deliberate. He suggested for the Commission's consideration the nullification of the present penalty and the substitution therefor, by Justices of the Peace, of the following sliding scale of fines which they believe is sound and practical.

1. Penalty for axle overloads - 1/8¢ per pound.
2. Penalty for overloads under 4,000 pounds - 1/8¢ per pound with a minimum fine of $5.00.
3. Penalty for overloads between 4,000 pounds and 6,000 pounds - 1/4¢ per pound.
4. Penalty for overloads in excess of 6,000 pounds - 1¢ per pound.
5. Penalty for overweight in transportation of one-log loads of less than 25 feet in length - nothing.

With respect to the one-log movements he advised that, under the Commission's present requirements, it is impossible to dispose of such logs without committing an overweight violation; so it is necessary for the operators either to let the logs lie in the woods or to take a chance on moving them without being weighed which is the method that is being followed by most loggers.

Mr. Gray further stated that they appreciate that the State Highway Commission is not in a position to ask the Justices of the Peace to adopt the above schedule of fines; so the Association, with the Commission's consent, will be pleased to do that. It was thought that the imposition of fines in accordance with this schedule will force the consistent violator out of business.

Commissioner Chessman advised that it is not within the province of the State Highway Commission to tell the Justices of the Peace what fines to impose but he, personally, would offer no objections to the loggers doing so. Mr. Gray said that they would do that if the Highway Commission would approve the proposed schedule of fines, to which Commissioner Chessman replied that the Highway Commission must avoid approving any schedule of fines.

In the general discussion that followed Chairman Banfield inquired how many single-log loads of gross weight in excess of 65,000 pounds have to be moved. He was informed by Mr. Gray that there are very few such loads. The Engineer was thereupon instructed by the Commission to investigate such movements and determine the maximum weight that can be allowed without causing damage to highway facilities.

Chairman Banfield also inquired if the operators would prefer as a penalty the taking up of their P. U. C. plates to the removal of a portion of their loads as is now required. Mr. Gray replied that they prefer not to have the plates taken up because that would take trucks out of service that are needed badly at the present time.

Commissioner Chessman asked Mr. Packwood whether or not he believes that the Highway Commission has authority to allow a truck to continue on the highway after being weighed if the weighmaster finds there is an overload. Mr. Packwood replied in the negative but gave as his opinion that the Highway Commission is authorized to use its discretion in the imposition of the penalty, although the actual penalizing of the offender belongs in the courts. Commissioner Chessman explained that the weighmasters are agents of the State Highway Commission; and when they observe overloaded trucks, they let the operators proceed with the overload unless there is a police officer present, which raises the question, who is liable for damage to the highway facilities in the event damage occurs by reason of the overloaded movement? Mr. Packwood was unable to answer this question but declared his intention to look into the legal features thereof. He then urged the Commission to let the loggers try to get the Justices of the Peace to adopt their proposed schedule of fines and suggested that if the plan did not function as they think it will, then that the Commission restore the old penalty of cancellation of P.U.C. permits. He declared that it is the duty of the State Highway Commission to prohibit the use of highways by the flagrant, consistent violator of the weight requirements, but said that he did not believe that the Commission should extend such a penalty to the infrequent offender although he should be cited to court and should be required to pay a fine. Mr. Crosby gave as his thought that the operator should not be penalized at all for overweight loads of only a few hundred pounds over and above the gross weight allowed by the tolerances, but suggested that the P.U.C. permits be cancelled if the overload is 20,000 pounds or more. He advised that in his case the driver of the truck is sole judge of the load

that he can carry; and, because of the difference in the weight of logs of the same size, it is difficult for them to keep their loads within the prescribed weight limits. He considered it unfair to require them to adjust their loads for only a few hundred pounds overweight on an axle. The conference was concluded by Chairman Banfield who advised that the Commission will give the matter further study and then make a decision.

The Commission discussed the bids received at the morning session for highway construction work and after careful consideration of all of the bids decided by unanimous vote to award the contract in each instance to the low bidder therefor. At 3:00 p. m. Chairman Banfield publicly announced the awards as follows:

"Bend-Lava Butte Rock Production Project on The Dalles-California and Central Oregon Highways in Deschutes County. The Commission received one bid for this project, being that of A. C. Suhre, Bend at $15,696.00. The Commission has awarded this contract to A. C. Suhre at his bid of $15,696.00.

"Juniper Ridge-Alkali Lake Rock Production Project on the Lakeview-Burns Highway in Harney and Lake Counties. The low bidder for this project was T. W. Thomas, Portland, at $18.750.00. Mr. Thomas agreed to a lump sum reduction of $2,000 if also awarded the contract for the Valley Falls Rock Production Project. The next low bidder was A. H. Saxton and Son, Cloverdale, at $23,250.00. This contractor offered to reduce his bid in the amount of $1,000 if also awarded the contract for the Valley Falls Rock Production Project. There was one higher bidder. Mr. Thomas' bid for the Valley Falls Rock Production Project at $23,960.00 was the low bid received by the Commission for such project. The next low bidder for this project was A. H. Saxton and Son, at $24,550.00. There were two higher bidders. The Commission has accepted Mr. Thomas' combination bid for both projects being the lowest bid received, and has awarded both contracts to him at his combination bid price, less $2,000.

"Beaver Marsh-Fort Klamath Rock Production Project on The Dalles-California Highway in Klamath County. Babler & Conley, Portland, submitted the low bid for this project in the amount of $42,975.00. Tru-Mix Concrete Co., Medford, submitted the next low bid at $43,096.50. There were two higher bidders. The Commission has awarded this contract to Babler & Conley at its bid price of $42,975.00.

"Crabtree Corner-Crabtree Creek Section of the Albany-Lyons Secondary Highway in Linn County. Warren Northwest, Inc., Portland, submitted the low bid for this project in the amount of $57,975.00. J. C. Compton, McMinnville, submitted the next low bid at $66,225.00. There were three higher bidders. The Commission has awarded this contract to Warren Northwest, Inc., at their bid price of $57,975.00.

"Owyhee River-McDermitt Section of the I.O.N. Highway in Malheur County. Russell Olson, Hayward, California, submitted the low bid for

this project in the amount of $40,388.00. J. C. Compton Co., McMinnville, submitted the second low and only other bid for this project in the amount of $45,988.00. The Commission has awarded this contract to Russell Olson at his bid price of $40,388.00."

The Attorney presented an offer from the General Casualty Co. of America to pay the sum of $3,602.70 for repairs to the Big Creek bridge on the Coos Bay-Roseburg Highway, which was damaged some time ago by a logging truck owned by Fairley Goodwin and R. A. Briggs of Myrtle Point. He advised that the amount offered does not represent the full cost of the repairs but equals the book value of the old structure as carried in the highway department records prior to the time the damage occurred, and in his estimation is a fair settlement. He recommended acceptance of the offer by the Commission. The Engineer concurred in the recommendation. The Commission approved the recommendation by unanimous vote.

The Commission discussed briefly and ordered filed a letter from the Murphy Timber Company stating its intention to remove from the highway right of way in the vicinity of Scio a number of logs that were unloaded in order to avoid violating the weight requirements.

In this connection the Attorney advised that he has interrogated the sheriffs of a number of counties in which extensive log hauling operations are being carried on, whether or not they would deputize highway department weighmasters in order to facilitate the penalizing of operators who are observed with overweight loads. Replies received, he said, are quite gratifying all but two of the sheriffs indicating that they would be pleased to cooperate with the Highway Commission in such matter. The Commission decided after due consideration that it would be inadvisable to have the weighmasters so deputized because of complications that would probably arise.

The Assistant Attorney brought up for discussion the matter of compensating Mr. J. O'Neil, Bly, Oregon, for constructing a fence along the Klamath Falls-Lakeview Highway through his property. He advised that the highway was constructed a number of years ago and it was thought at the time that the right of way had been acquired by Klamath County; however, the records do not so indicate and Mr. O'Neil, who is the present owner of the property, alleges that he still owns the right of way but is willing to deed it to the state if the state will reimburse him for constructing a fence. He estimated the cost of the fence at about $550.00 and recommended acceptance of Mr. O'Neil's offer. The Commission approved the recommendation by unanimous vote, subject to the condition that Mr. O'Neil will deed to the state a right of way equally as wide as the right of way on the adjoining sections.

The Assistant Attorney also brought up for discussion the matter of extending the lease of Mr. William G. Folsom for certain state-owned property adjacent to the Siuslaw Highway at Thompson Creek, in Lane County. He advised that Mr. Folsom has leased this property from the state for a number of years at an annual charge of $100 and is desirous of renewing the lease for another year at the same rate. He recommended approval of the extension. The Commission approved the recommendation.

The Commission had under discussion a report from Chief Weighmaster Loran L. Spaulding, who advises that on March 20, 1944, a loaded logging truck belonging to the Hammond Lumber Company was driven past the Highway Department scales near Lebanon without being weighed, notwithstanding that the driver was flagged to the scales by the weighmaster on duty. The Attorney advised that neither the Commission nor its agents have the authority to force an operator to have his load weighed as that is a police function; however, the Commission does have the authority to require the cancellation of an operator's permit if he refuses to submit to the weighing. After discussion the Commission instructed the Secretary to write the Hammond Lumber Company calling their attention to the violation and warning the company that the operator's PUC permit will be cancelled in the event the offense is repeated.

The Engineer reported on the proposed exchange of properties at Reedsport with Mr. Russell Hubbard, as instructed by the Commission at the previous meeting. He advised that investigation discloses that the larger portion of the area desired by Mr. Hubbard will be occupied by fill slopes if and when the highway is reconstructed at this place, and since it is impossible to determine the exact location of the fill slopes at this time, it is his recommendation that the Commission do not either sell or lease any of the area between the highway location and the Umpqua River. In support of his recommendation he pointed out that a former Highway Commission, of which Mr. Carl G. Washburne, Eugene, was a member, established a policy of acquiring the entire river frontage along this stream, wherever possible, so as to preserve the scenic view. The Engineer offered no objection to the sale to Mr. Hubbard of the portions of Blocks 1 and 2 lying on the northerly side of the highway provided Mr. Hubbard will pay the price set by the former Highway Commission which is 1¢ per square foot or a total of $165.34. The Assistant Attorney, who was present, exhibited a map showing the property desired by Mr. Hubbard all of which lies within the city limits of Reedsport, and the area adjoining the city limits that Mr. Hubbard alleges he controls and is willing to deed to the state in exchange for the state's property. He said that the area outside of the city limits consists mostly of steep hillside and is of no value from the State Highway standpoint, except the portion that is needed as right of way for the new highway, consisting of some 18.37 acres. Douglas County, he said, owns this property and will convey it to the state if the state wants it; so, as the matter now stands, Mr. Hubbard owns no land at this point in which the Commission would be interested. After discussion and in view of the reports, the Commission voted unanimously not to exchange properties with Mr. Hubbard, however, authorized the sale of the fractional lots described by the Engineer if Mr. Hubbard wants that property and will pay 1¢ per square foot for the same. The Assistant Attorney was instructed to convey such information to Mr. Hubbard and to secure a deed from Douglas County Court for the county property that is needed as right of way east of the Reedsport city limits.

The Secretary presented a letter from the City of Waldport endorsing a petition from the Waldport Chamber of Commerce requesting the improvement of the Alsea Highway by construction of a hard surface pavement thereon. The Commission took no action on this request.

The Commission discussed a letter from Mr. F. H. Brundage, Western Log and Lumber Administrator, suggesting the widening of the Santiam Highway at certain points to facilitate log hauling operations. The Commission referred the matter to the Engineer to discuss with Mr. Brundage and ascertain whether or not government funds are available with which to finance the work. He was authorized to inform Mr. Brundage that the Commission will contract the work if the government will furnish the money to pay the costs involved.

The Commission discussed briefly a letter from Mr. Jos. H. Harland, President of the Oregon Seed Growers League, offering objections to the construction of a proposed highway between Rickreall and Salt Creek, in Polk County, connecting the Salem-Dallas Highway and the Dallas Coast Secondary Highway, and suggesting the improvement of present highway facilities between these points. The Engineer was instructed by the Commission to render a report on the proposed road at the next meeting.

A letter from J. F. Watson, Parma, Idaho, requesting the oiling of the Oregon portion of the secondary highway which extends from Adrian, Oregon to Homedale, Idaho had the attention of the Commission. The Secretary was instructed to inform Mr. Watson that the Commission is unable to undertake such project at the present time due to war time restrictions, labor shortages, et cetera, but will consider the project along with others for postwar performance, although no definite commitment or promise can be made with respect thereto at the present time.

The Engineer requested authority to join with the Union Pacific Railroad Company in the repair of temporary underpasses at Corbet and Oneonta. He explained that in August, 1939, the former Highway Commission joined with the railroad company in the construction of both underpasses which were required to facilitate the hauling of riprap and other materials beneath the railroad tracks for construction of the new Columbia River Highway. These structures, he said, were built of untreated timber and it was agreed that the railroad company would maintain them at the expense of the state for a period of five years, following which the state would fill in the openings at state expense and restore the railroad roadbed, ballast, et cetera. A recent inspection of the structures, he said, shows decay and need for repair work which is estimated to cost about $4,740.00. He recommended that the agreement covering the original construction be extended to cover the repair work and that the Commission authorize the railroad company to make the necessary repairs at state expense. The Commission approved the recommendation by unanimous vote.

A petition was presented from residents of Washington County requesting the reconstruction of the Tualatin Valley Highway for 4-lanes of traffic between West Slope and Hillsboro. The Secretary was instructed to inform the petitioners that the Commission cannot undertake this project at the present time but is giving it consideration in the formulation of its postwar construction program.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission, and asked the Commission to confirm them and the amounts allotted therefor. After due consideration the Commission by

unanimous vote upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman, authorized and instructed the Engineer to make such surveys on various sections of the highways in this state, which said sections of highways together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Relocation	118-1468	Klamath	So. Sixth Street to Great Northern Grade Crossing in Klamath Falls, Midland Second. Hwy.	1st-$1,000.00
Park Boundaries	21-1468	Lincoln	Newport-Yachats Section, Oregon Coast Highway	1st- $400.00
Plans	36-1433	Yamhill	Sheridan-Deer Creek Section, Salmon River Highway	1st-$1,200.00

The Commission had under consideration the following requests for extensions of time within which to complete highway contracts:

Tom Lillebo, Contract No. 2568, for reconstructing the approaches to the bridge over the Willamette River on the Pacific Highway at Harrisburg, in Lane County, requested an extension of time from September 30, 1942 to January 17, 1944 within which to complete this job. He gave the following reasons for failure to complete the project within the specified time limit: (1) difficulties encountered in securing delivery of treated lumber due to the fact that army and navy jobs are given a higher preference rating; (2) delays occasioned in cleaning up the premises in order to accommodate farmers who wished to salvage the old material, there being a shortage of lumber of any kind for farm use; and (3) performance of work over and above that called for in the specifications, including repairs to the revetment along the river and the construction of riprap at the south bridge abutment.

The Engineer advised that all of the work contemplated in the original contract was actually completed on December 3, 1943; however, the contractor was required to repair and renew the revetment along the river bank upstream from the bridge as extra work. Moreover, he was handicapped in the delivery of material by restrictions of the War Production Board, and he was delayed in cleaning up the site in order to accommodate the nearby farmers as stated in his letter. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

M. C. Lininger and Sons, Contract No. 2618, for furnishing maintenance materials in stock piles for the Ochoco Summit Section

of the Ochoco Highway in Crook and Wheeler Counties, requested an extension of time from July 31, 1943 to January 10, 1944 within which to complete this job. They attributed their failure to complete the project within the specified time limit to machinery trouble, adverse weather conditions and difficulties in securing experienced labor to operate two shifts. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are substantially correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Oscar E. Joelson, Contract No. 2624, for the furnishing of maintenance material for the Drinkwater Pass-Juntura Rock Production Project on the Central Oregon Highway in Harney and Malheur Counties, requested an extension of time from August 31, 1943 to December 21, 1943 within which to complete this job. He gave the following reasons for failure to complete the project within the specified time limit: (1) delay in starting the work because of another going contract with the State Highway Commission which he had to complete before he could release his equipment; (2) difficulties in securing necessary labor and repair parts for his equipment. The Engineer advised that the reasons given by the contractor for failure to complete the project during the specified time are substantially correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Tom Lillebo, Contract No. 2633, for reconstructing the pier fenders of the Umpqua River Bridge on the Oregon Coast Highway at Reedsport, requested an extension of time from September 15, 1943 to January 7, 1944 within which to complete this job. He advised that the overrun of time limit was caused by inability to secure certain fixtures and materials for warning lights which are classed as critical material and are difficult to obtain under present war time conditions. The Engineer advised that the work included in the original contract was substantially completed on October 20, 1943, but there was considerable delay in securing necessary conduits and fixtures for the replacement of the navigation lights, an item that was not contemplated in the original contract. It was his thought that the contractor should not be penalized for the delay and recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contracts Nos. 2624, 2628, 2633 and 2648, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state

highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2624, with Oscar E. Joelson, for furnishing crushed materials in stockpiles on the Drinkwater Pass-Juntura Section of the Central Oregon Highway in Harney and Malheur Counties, completed on December 21, 1943.

Contract No. 2628, with M. C. Lininger and Sons, for furnishing crushed materials in stockpiles on the Trail Section of the Tiller-Trail and Crater Lake Highways in Jackson County, completed on December 24, 1943.

Contract No. 2633, with Tom Lillebo, for repair of fenders on the Umpqua River Bridge on the Oregon Coast Highway at Reedsport, completed on January 7, 1944.

Contract No. 2648, with Rogers Construction Co., for surfacing and rock production on the Cannon Beach Junction Section of the Oregon Coast, Wolf Creek and Necanicum Highways in Clatsop and Tillamook Counties, completed on February 13, 1944.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission discussed briefly and by unanimous vote confirmed the action taken by Chairman Banfield subsequent to the last meeting, authorizing the Engineer to present to the U. S. War Department for approval plans for the proposed Santiam River Bridge on the new location of the Pacific Highway East near the Town of Jefferson. (See minutes of February for minute entry on this subject.)

The Engineer requested authority to sell an old centrifugal petroleum pump which was acquired by the Commission in connection with the acquisition of right of way at the junction of Union and Denver Avenues in North Portland. He advised that the pump is of no value to the State Highway Department and suggested that it be sold to the highest bidder therefor. The Commission approved the sale of the pump; however, ordered that the sale be advertised.

The Commission had under discussion the advisability of taking membership in the National Association of Travel Officials as an aid in the promotion of tourist travel in the State of Oregon when the war is over. The

Engineer advised that the annual dues in this Association are $50.00 and that the Association comes highly recommended by Mr. Harold B. Say, former Director of the Oregon Travel and Information Department. The Commission deferred a decision in the matter pending a recommendation from the Advisory Committee on Travel and Information Matters.

The Secretary presented letters from the Cities of Gold Hill, John Day, Heppner and Echo inquiring whether or not it would be possible to secure the services of Highway Department crews to construct certain city street improvements which they plan to finance with state highway funds which have been appropriated to them by the Legislature for city street work (Chapter 371, Oregon Laws, 1943). The Engineer suggested that it would be advisable to help the cities in every way possible, especially those cities and towns that are not equipped to do the work themselves. The Commission concurred and thereupon authorized the Engineer to assign state forces to do this work insofar as men and equipment are available and can be spared without handicapping regular work on state highways. Agreements are to be entered into between the state and the municipalities covering the matter, including provision for payment for the service rendered. In this connection the Engineer suggested that the cities could either deposit with the Commission in advance a certified check in the amount of the estimated cost of the work or could make an order on the Secretary of State to transfer to the State Highway Commission such amount from the city's share of the State Highway Fund. The Commission approved the suggestion.

The Engineer brought up for discussion the matter of cooperating with the federal government in the construction of an access road from Astoria to the Naval Hospital, a distance of about 3.7 miles. He estimated the cost of such project at $282,000 for construction and $50,000 for right of way, and advised that the government probably will not approve the work unless some other agency will contribute toward the expense. He declared the project to be a desirable one from the state's standpoint and suggested that the Commission pay the right of way costs. The Commission approved the suggestion by unanimous vote and instructed the Engineer to work up an agreement with the federal authorities covering the matter, if possible, on such basis. The Commission also approved an additional expenditure of $5,000 for a survey of the project.

The Commission discussed the setting of a date for its next meeting but deferred a decision with respect thereto until the War Production Board passes on the three Pacific Highway projects that are scheduled for immediate construction. The Commission did decide, however, to hold its next meeting in the Stock Exchange Room of the Imperial Hotel, Portland, starting at 2:00 p. m. on the first day and continuing as long as is necessary on the second day. The Secretary was instructed to make the usual arrangements for the use of this room.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Ralph Cake covering the lease of certain state-owned lands in Deschutes County.

Agreement with Emmet Shipley and wife releasing the state from damages to their property in Washington County.

Agreement with George W. White disposing of his claim for loss of crop by flooding which resulted from construction of the Wolf Creek Highway through his property.

Agreement with Warm Springs Irrigation District covering construction of a drainage ditch on the John Day Highway in Malheur County.

Agreement with Wallace B. Mack disposing of a claim concerning his property in Lincoln County.

Modification of project agreement with the Public Roads Administration covering the Rhea Creek-Jumpoff Joe Creek Section of the Pacific Highway.

Easement deed conveying unto the United States of America certain property in Ecola State Park, in Clatsop County.

Correction deed conveying to Flora A. Smith certain property in Portland.

There being no further business to come before the Commission at this time, the meeting adjourned at 5:20 p. m.

HEADQUARTERS AND GENERAL OFFICE OF DEPARTMENT
LOCATED AT SALEM, OREGON

TABLE OF CONTENTS

Page	Date 1944	Subject
11985	May 9	Informal discussion at noon recess of March 28, 1944, meeting, of the following matters:
		Crook County. Crooked River Hwy. relocation to accommodate proposed dam.
11986		Wasco County. Controversy with J. O. Chastain concerning repairs to irrigation flume near Tygh Valley.
		Douglas County. Oiling of county road near Gardiner requested by Gardiner Lumber Company.
11987		Salary increases for Highway Department employees.
		Action taken re: matters discussed at noon recess on March 28: Relocation of Crooked River Hwy. Engineer's recommendation approved.
		Wasco County. J. O. Chastain controversy. Flume to be repaired.
		Douglas County. Gardiner Lbr. Co. request denied.
		Salary increases authorized for Highway Dept. employees.
11988		Parks. Cancellation of Recreational leases Nos. 020198, 019601, 020508 approved.
		Parks. Letter of Alfred A. Loeb, Chairman, Recreational Resources Committee, Portland C. of C., discussed and filed.
		Parks. Development of wayside picnic spots.
		Letter of Portland C. of C. discussed and filed. (See also P. 12032)
11989		Right of way for postwar projects. Purchase deferred pending acting of Congress.
		Real property. Resolution authorizing acquisition adopted.
11991		Right of way, right of access. Pacific Highway East relocation.
11992		Acquisition approved. Resolution adopted.
11994		Umatilla County. Pendleton. OWR&N and UP Co's petition for additional RR tracks at grade crossings conditionally approved. Resolution adopted.
11997		Multnomah County. Portland. Sale of land at SW Ankeny St. and SE Union Ave. to be advertised.
11998		Yamhill County. Dayton-Amity Second. Hwy. Land adjacent to hwy. to be advertised for sale.
		Umatilla County. Boardman-Stanfield Hwy. Duck Lake property adjacent to highway not to be sold.
		Umatilla County. Pendleton-John Day timbered wayside. Restrictions in deed from Pilot Rock Lbr. Co. approved. (See also P. 12026)
11999		Curry County. Oregon Coast Hwy. Exchange of properties adj. to highway with Brookings Land & Townsite Co. deferred.
		U.S. Maritime Commission. Request to lease property in Portland. Action deferred. (See Page 12031)
		Umatilla County. Westland Irrigation District. Petition for exclusion of certain lands from district signed.
		Josephine County. R/W of old Pacific Hwy. over Sexton Mtn.
12000		Disposal approved. Resolution adopted.

Page	Date 1944	Subject
12002	May 9	Klamath County. Klamath Falls. Resolution designating new highway entrance adopted. Extra land for roadside development to be acquired. Agreement with City and County approved.
12005		Lane County. Cottage Grove. Traffic signs along new highway confusing to citizens. Request for busses to turn on 8th St. denied.
		Douglas County. Reedsport. Parking on highway at Love's Garage. Guard rail to be constructed.
12006		Maintenance Hdqtrs. Plans for 3-year building program. Action deferred. Engineer to ascertain procedure followed in adjoining states.
		Clatsop County. Engineer's report on St. Helens Pulp & Paper Co's. logging railroad overcrossing of Lower Columbia River Hwy. at MP.89.51 approved.
		Deschutes County. McKenzie Hwy. near Sisters. Logging RR grade crossing by Brooks-Scanlon Lumber Co. opposed.
		Log hauling. Report of Engineer re transportation of single-
12007		log loads. Permits to be granted. Rules and regulations adopted.
		Log hauling. Use of county roads as private logging roads.
12008		Attorney General ruling to be secured re county authority.
		Log hauling. Douglas Co. Letter from Judge Busenbork re misuse of overlength permits by operators. Action deferred pending conference with Judge Busenbork. (See Page 12027)
		Lincoln County. Little Nestucca Second. Hwy. Improvement as timber access road. Engineer to discuss with Doernbecher Mfg. Co.
		Linn County. Santiam Hwy. Improvement as timber access road.
12009		State to pay 25% of construction.
		Upper Columbia River Hwy. Oneonta. Removal of slide material from gravel pit approved. Project to be contracted.
		Multnomah County. Postwar projects recommended by Board of County Commissioners. No action taken.
		Baker-Grant Counties. Cut-off highways between Unity and
12010		Prairie City; also, from Prairie City to Baker via Granite and Sumpter requested for postwar program. Requests denied.
		Malheur-Harney Counties. Petition for improvement of county roads in Juntura-Drewsey district denied.
		Lane County. Eugene. Proposed highway connection along South High St. Engineer to confer with city and school officials. Survey denied.
		Tillamook County. Wilson River Hwy. Bridge repairs authorized. Bids to be received.
12011		Josephine County. Redwood Hwy. Sidewalk construction between Cave Junction and Kerby denied.
		Josephine County. Grants Pass. Filling in of borrow pits and drainage ditches along Pacific Hwy. south of city denied.

Page	Date 1944	Subject
12011	May 9	State Tax Street Fund. Resolution approving certain city improvement programs adopted.
12014		Survey. The Dalles-California Hwy. from Main St., Klamath Falls, to junction with Green Springs Hwy. Retracement authorized.
		Surveys. Douglas County. Canyonville-Josephine Co. line Sec. Relocation approved.
12014/12016		Union County. Elgin-Boswell Ranch Sec. Relocation approved. Resolutions adopted.
12018		Extensions of time granted as follows: Henry L. Horn, Denver Ave. Junction Project J. F. Johnston, Monmouth-Pedee Road, Polk County A. H. Saxton & Son, Hebo Rock Production Project
12019		Hord & Stuart, Oakridge Section. Revetment. Willamette Hwy., Lane County.
		Contracts completed and accepted as follows: Denver Ave. Junction Sec., Henry L. Horn Monmouth-Pedee Bridge Project, J. F. Johnston Hebo Rock Production Project, A. H. Saxton & Son Oakridge Sec. Revetment. Willamette Hwy., Hord & Stuart
12020		Redmond-Marks Creek Rock Production Project, E. C. Hall Co. Milwaukie Pedestrian Overcrossing, Birkemeier & Saremal. Garibaldi-Tillamook Air Base Rock Production Project. Rogers Constr. Co.
		Umatilla County. Elgin-Tollgate (Weston-Elgin) Second. Hwy. Snow removal authorized.
		Linn County. Albany. Traffic signs at intersection of Corvallis-East Side Second. Hwy. with Elm St. ordered changed. Resolution adopted.
12022		Equipment. Sale of old tractor to State Penitentiary approved.
		Equipment. Purchase of two portable paving plants from Dallas Machine & Locomotive Works, approved.
		Equipment. Purchase of automobile for use of Engineer and Assistant Engineer confirmed.
		Equipment. Purchase of one single-drum hoist for Bridge Department truck approved.
		W. W. Stiffler, Assistant Maintenance Engineer. Authority to attend logging conference March 30, 1944, confirmed.
		Plans and proposal forms. $2.00 charge to be made hereafter.
		Lumber hauling. Request of haulers of green lumber for same tolerances as granted log haulers denied. Attorney to furnish opinion.
		Equipment rental. Hauser-Malcom-Tiedau relieved of payment of balance due.
12023		Claim against Lowell Hallock for damage to Riverside Canyon Br. at Oswego dropped.

Page	Date 1944	Subject
12023	May 9	Claim against U. S. Army for damage to Canyon Creek Br. on Pacific Hwy. Resolution authorizing Attorney to sign necessary papers in presentation of claim adopted.
		Insurance. War Damage Insurance. Period of coverage extended for 1 year.
12024	May 10	Bids received on the following projects, sale of buildings, obsolete equipment and accumulation of logs:
		Lakeview Airfield Access Road Project
		Lakeview Rock Production Project
		Meacham-La Grande Rock Production Project
		Tract of land south of Salem
12025		Residence building at Forfar
		Petroleum Pump Unit at Portland
		Logs on McTimmonds Valley Road
		Malheur County. Nyssa. Delegation requesting state assistance in improvement of certain streets to be used as truck route. Engineer to investigate.
12026		Main Street improvement. Records to be checked for alleged previous obligation.
		Oiling work on proposed truck detour. Engineer to prepare estimate of cost to perform work.
		County road between Nyssa Adrian Second. Hwy. and Overstreet Siding on Union Pacific RR. Request for improvement denied.
		Umatilla County. Pendleton-John Day Hwy. Recreational area. Deed to be accepted with restrictions.
12027		Lake County. Lakeview Airport Access Road. Right of way acquisition. Decision deferred. (See P. 12034)
		Douglas County. Delegation. County Court complains loggers using Highway Dept. permits to haul overlength loads on county roads. Permits hereafter to state clearly that authority is for state highways only.
		North Umpqua County Road. County Court requests improvement of connections with Pacific Hwy. Authorized conditionally.
12028		Multnomah County. Portland. Foster Road development. Engineer reports. No action taken.
12029		Oregon Coast Hwy. Newport to Florence. U.S. Coast Guard requests permit to construct telephone pole line. Joint inspection to be made.
		Multnomah County. Portland. Pedestrian underpass at Vanport. Permit approved. Federal Housing Authority to pay costs.
		R. H. Baldock authorized to attend meeting of Board of Directors of A.A.S.H.O. in Chicago June 22.
		Marion County. North Santiam Hwy. Delegation requests com-
12030		pletion between Niagara and Detroit. Action deferred.
		Bridge over Willamette River at Salem. Survey requested. Denied
12031		Multnomah County. Portland. U.S. Maritime Commission's request for use of Front Street property referred to Chairman Banfield.
		Multnomah County. Portland. Revenues from sale or lease of state-city-owned property. Attorney to prepare form of agreement.

Page	Date 1944	Subject
12031	May 10	Signs. Removal of unnecessary stop signs at RR crossings. Action deferred pending Public Utilities Commissioner's report.
		Survey. Lane County. Access road to clay deposit for Aluminum Mfg. Plant in Salem. Engineer authorized to make location survey.
		John Day Fossil Park. Conference with Dr. John C. Merriam and
12032		Chancellor F. M. Hunter. Parks Supt. to make survey
		Portland C of C Recreational Committee. Development of wayside picnic spots along Oregon highways urged. Denied.
12033		Awards. Chairman announces award of contracts, sale of land and buildings south of Salem, rejection of bids for building at Forfar and petroleum pump.
12034		Condemnation. Attorney authorized to condemn R/W needed for Lakeview Airfield Access Road Project. Resolution adopted.
12036		Klamath County. Klamath Falls. Agreement signed for development of roadsides adjacent to new highway through Klamath Falls.
		Meeting dates. June 13 and 14, 1944, set for next meeting dates.
		Agreements, et cetera., signed as follows:
		Wm. G. Folsom, rental of state property near Mapleton.
		City of Klamath Falls and Klamath County, development of waysides.
		Southern Pacific Co. Quitclaim deed of land in Eugene.
		Letter to W. H. Horning cancelling leases in Lane County.
		Letter to W. H. Horning cancelling leases in Jackson County.
		Conditional approval of petition filed with OWR&N Co. and UP Co. for additional tracks in Pendleton.
		Petition to Western Irrigation Dist. for exclusion of state land from District.
		Resolution designating Corvallis-East Side Second. Hwy. a through hwy.
		Ground lease covering acquisition of stockpile site from Charles M. Ross, St. Helens.
		Ground lease for quarry site from Leonard Caverhill.
		Lease for road materials for gravel pit, Mary B. Knight.
12037		Lease for road materials covering gravel pit acquired from Mary B. Knight.
	June 13	Park matters:
12038		John Day Highway. Fossil area. Valade Ranch and Turtle Cove. Attorney to make preliminary investigation.
		Silver Creek Falls State Park. Addition at North Falls. Attorney to investigate cost.
		Offer of Seneca Fouts to deed to state 160 acre tract near Columbia River Hwy. at Mitchell Point. Accepted conditionally.
12039		Klamath Falls-Lakeview Hwy. Purchase of 80 acre wayside strip now under lease from government. Deferred pending exchange agreement with State Land Board.

Page	Date 1944	Subject
12039	June 13	Parks Department financial report.
12040		Wages. AGC and Oregon labor organizations request increase of minimum wages paid on State Hwy. contracts. Deferred.
		State employees paid from Federal funds cautioned to refrain from political activity. Notices to be posted.
12041		Technical Bulletin No. 16. Report on Trans-Columbia River Interstate Bridge Studies, to be released.
12042		Road Bill (H.R.4915) re postwar highway construction. Press release.
12044		Road Bill. Passage urged by telegram to Oregon Congressmen.
		Real property. Resolution authorizing acquisition adopted.
12055		Condemnation. Halsey-Harrisburg Section. Offers approved. Resolution adopted.
12058		Yamhill County. Dayton-Amity Second. Hwy. Offer of O.D. Kieffer to purchase small tract of land accepted.
		Baker County. Gravel pit near Haines. Offers to buy or lease rejected.
		Lincoln County. Forfar. Offer of Lee Halsey to purchase building accepted.
		Josephine County. U.S. Weather Bureau requests use of property formerly leased to Civil Aeronautics Authority. Approved.
12059		Claim of Jesse G. Helmick for injuries. Attorney to contact Accident Commission to take matter to court if necessary to secure satisfactory settlement.
		Claim of Capt. Herman Larsen, Portland, for injuries. Action deferred.
		Tillamook County. Little Nestucca Second. Hwy. Doernbecher Mfg. Co. unwilling to pay 50% of cost to improve. Project dropped.
		Dallas-Coast Second. Hwy. Rickreall and Dolph Corner. Alternate routes discussed. No action taken.
12060		Malheur County. Homedale Spur. Improvement requested. To be considered in postwar program.
		Clackamas County. Oregon City. Pacific Hwy. East. Parking of cars prohibited west of Main St. Engineer to place signs. Resolution adopted.
12061		Douglas County. U.S. Hwy. 101 near Tahkenitch River. Parking of cars prohibited near bridge. Resolution adopted.
12062		Yamhill County. McMinnville. Request for additional traffic signals denied.
		Oregon Coast Hwy. Newport-Florence. U.S. Coast Guard pole line construction authorized.
		Stockpile sites. Engineer's report filed.
12063		Linn County. Richardson's Gap County Road. Temporary maintenance discussed. Engineer to consult with Linn County Court.
		Santiam Hwy. Proposed improvement as Timber Access Road discussed. Construction authorized if state cooperation does not exceed 38%.

Page	Date 1944	Subject
12064	June 13	Tillamook County. Survey of tract for training "Seeing Eye" dogs denied.
		Umatilla County. Pendleton. Reconnaissance survey proposed secondary hwy. from SE First St. to Mission South Market Rd. authorized.
		Curry-Josephine Counties. Proposed highway, Brookings to Selma. Request for postwar construction denied.
		Awards. Engineer's award of contracts authorized May 10, 1944 confirmed as follows: Lakeview Airfield Access Road Project, Babler & Conley Lakeview Rock Production Project, M. C. Lininger & Sons.
		Malheur County. Nyssa. Improvement of Main Street. Previous commitment acknowledged. Work to be done when funds available.
12065		Extensions of time granted as follows: F. C. Feldschau & Son, No. 2606. Mills Bridge-McNamars Camp Section. M. C. Lininger & Son, No. 2615. Richland-Halfway Sec. Birkemeier & Saremal, No. 2662 Pedestrian overcrossing at Milwaukie.
12066		Contracts accepted as follows: No. 2568, approach to Willamette River Br. at Harrisburg. No. 2606, Mills Br-McNamars Camp Rock Production. No. 2615, Richland-Halfway Sec. Rock Production. No. 2618, Ochoco Summit Section Rock Production. No. 2632, Alsea Mountain Section Rock Production Project. No. 2653, Lapine Section of Dalles-California and Fremont Hwys. No. 2658, Umatilla Oil Depot Access Road.
12067		Claim, Damage to property of B. C. Davenport, Junction City by Contractor Tom Lillebo. Final payment to contractor to be held pending settlement.
		Claim. Umatilla County. Compromise settlement with OWR&N and UP Railroad Companies for damage to Pendleton-Stanfield Hwy. approved.
		Linn County. Santiam River Br. on County Road near Cascadia. Bids to be received in behalf of county.
		Claims. Engineer authorized to pass on small claims not exceeding $50.00. Monthly report to be submitted.
12068		Lane County. Monroe. U.S. Army Engineers authorized to conduct improvements to Long Tom River Channel. (Agreement)
		R. H. Baldock authorized to attend meeting of Congressional Committee in Washington, D. C., May 24-27.
		G. S. Paxson and W. W. Stiffler authorized to make trip into Washington State approved.
		Josephine County. County resolution re abandonment of old Pacific Hwy. over Sexton Mtn. approved.
		Lane County. Cottage Grove. Communication from City Council re rerouting of Pacific Hwy. approved.
		Equipment. Obsolete equipment to be advertised for sale.

Page	Date 1944	Subject
12068	June 13	Meeting dates. July 11 and 12, 1944, set for next meeting dates.
12069		Linn & Josephine Counties. Pacific Hwy. Steiwer Hill-Albany and Wolf Creek-Grave Creek Sections. Applications to construct denied by W. P. B.
		Coos County. Acquisition of R/W across Indian owned land. Compromise settlement of action pending in U.S. District Court approved. Resolution adopted.
12070		Umatilla and Lane Counties. Pendleton and Eugene. Repair of houses acquired thru R/W purchases authorized.
	June 14	Bids. Bids received on the following projects: Halsey-Harrisburg Section, grading & paving Halsey-Harrisburg Section, four bridges Oneonta Section, disposal of rock detritus Garibaldi-Tillamook Air Base Section, oiling Deck Truss over Wilson River Street oiling project, City of Sheridan Sale of tract of land in Southeast Portland
12072		Josephine County. Condemnation of quarry site. Report of Commissioner Schaupp on inspection of site. Mr. Allen to be invited to discuss matter with Commission.
		Logs. T. P. Risteigen, dumping on highways to avoid overweight loads to be permitted with certain restrictions.
12073		Tillamook County. T. P. Risteigen. Request to build logging road approach to Wilson River Hwy. over state's property. Plans to be submitted for investigation.
		Claim. Damage to scale house at Springfield. Attorney's recommendation to drop matter approved.
		Multnomah County. Portland. Landscaping around Battleship, Oregon, monument in "Marine Park" authorized. Plans for fall landscaping to be prepared.
12074		City streets. State Tax Street Fund. Resolution adopted approving plans for Canyonville, Drain, Rogue River, Joseph, Gervais, Dundee, Hubbard, Lakeview, Fairview, Eastside.
12076		Lincoln County. Oregon Coast Hwy. Ocean Lake-Taft. Survey to establish sidewalk grades authorized.
		Clatsop County. Cannon Beach. Request for sidewalk construction denied.
		Financial statement presented. Supplementary sheet to show detail of changes to be submitted with future reports.
		Yamhill County. Sheridan. Bids received for oiling city street project discussed. Contract to be awarded to
12077		low bidder if city concurs. Sheridan delegation concurs in award and submits two checks.
		Lincoln County. Delegation from No. Lincoln C of C requests survey for sidewalk grades. Petition of property owners to be submitted.
12078		Inspection trip. Itinerary to be prepared for approval.
		Contract awards discussed. Low bids acceptable. Bids for Garibaldi Tillamook Air Base Project referred to Engineer. Portland property. Offer of Gertrude Quenville accepted.

Page	Date 1944	Subject
12078	June 14	Awards. Announced publicly by Chairman Banfield.
12079		Agreements et cetera signed as follows: U.S. Weather Bureau, lease of property in Josephine County. Receipt for payment of claim against OWR&N for damages. City of Sheridan for oiling of city streets. Jefferson County for maintenance of bridges in The Cove State Park.
12080		Josephine County for maintenance of Wolf Creek-Sexton Mtn. Sec. of Pacific Hwy. Application to maintain hauling road across Indian land in Klamath County. Agreement with Arthur Walker for sheep grazing in Cape Sebastian State Park. Agreement with Robert Fromm for sheep grazing in Humbug Mtn. State Park. Contract with Axman & Miller for rental of one roller. Contract with Crook County Court for rental of roller.
12081	July 11	J. W. DeSouza appointed Acting Secretary during absence of Commission's Secretary. Resolution adopted. Minutes approved for June 13 and 14, 1944. Changes in May 9 and 10 minutes approved.
12082		Park matters. Parks Supt. reported on following: Seneca Fouts State Park. Additional land needed for construction of trail, etc. Acquisition discussed. Deferred. Silver Creek Falls State Park. Enlargement discussed. No action taken. Washburn State Park. Benton-Lane Counties. Request of Daniel G. Clark to acquire denied.
12083		Coos County. Sale of old ferry slip at North Bend. Action deferred. John Day Fossil Area. Removal from tax rolls. Grazing rights. Parks Supt. and Ass't Attorney to report.
12084 12085		Postwar projects. Acquisition of right of way. Engineer to submit selected list of projects and present to Govt. when approved. Real property. Resolution authorizing acquisition.
12092		Multnomah Co. Portland. Front Ave. Project. Options presented, deferred. Condemnation. Recommended offers. Resolution adopted.
12095		Coos Co. Coos Bay-Roseburg Hwy. Coquille Myrtle Point Section. Preservation of myrtle trees. Multnomah County. Pacific Hwy. West. Sen. Lew Wallace re steps at Mrs. Charles Redmond's restaurant. Engineer to report. Lane County. Eugene. Ass't Attorney authorized to negotiate with Arthur A. Harriman for property in Lot 1, Patterson's Addn. Multnomah County. Corbett and Oneonta. Extensions of undercrossing leases with OWR&N and UP approved.

		Meeting adjourned at 8:00 p.m. concluding the inspection trip.

Portland, Oregon, May 9, 1944

The State Highway Commission met in regular session at 2:00 p. m. in the Stock Exchange Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

The Commission by unanimous vote approved the minutes of the meeting of the Commission that was held on March 28, 1944.

The Commission had under consideration the approving of action taken on certain matters that were discussed informally with the Engineer during the noon recess of the meeting held on March 28, 1944 but concerning which no official record was made. Upon motion by Commissioner Schaupp which was duly seconded by Commissioner Chessman and carried by unanimous vote, the Commission approved the following as its official record of the subjects discussed at that time and instructed the Secretary to enter the same in the minutes of this meeting, nunc pro tunc:

During the noon recess of the meeting held on the twenty-eighth day of March, 1944, the following matters were discussed informally by the Commission and the State Highway Engineer, but no official record was made of the action taken thereon:

1. Relocation of Crooked River Highway to accommodate proposed dam in Crooked River below the mouth of Bear Creek, south of Prineville:

The Engineer reported that the U. S. Bureau of Reclamation has inquired as to the state's minimum requirements with respect to the reconstruction of the roads that will be affected by the dam construction, presumably as a basis for an appropriation of funds with which to finance the work. He advised that investigation reveals that a portion of the Crooked River Highway will be submerged by backwater from the dam and that to replace it will cost about $410,000. In addition thereto, he said, a section of the Crooked River-Paulina Secondary Highway will have to be rebuilt in order to serve the people in the upper Crooked River District who trade in Prineville. He suggested that these people could be best accommodated by improvement of an existing county road across Combs Flat, about 16 miles long, which could be accomplished for about $350,000. He also pointed out that it would be necessary to build about one mile of county road south of the damsite which he estimated would cost about $60,000, or a total of about $820,000 for the three changes based on pre-war conditions.

The Engineer exhibited a map showing the site of the dam and the proposed highway changes, and stated that the Bureau of Reclamation has requested that the Highway Commission advise the Bureau of its minimum requirements in the relocation of such roads. The Engineer recommended the following requirements:

a. That the total angle of curvature of the new line not exceed that of the present road.

b. That, in building around the dam, the Bureau of Reclamation be required to build a 30-foot grade because an equivalent road to the present 24-foot standard would not be comparable for the reason that, while the widening of the present grade is quite inexpensive, the widening of the higher road around the dam through the rock work would be materially expensive.

c. That four inches of compacted surfacing be placed, which is considered the equivalent of the present stabilized surface of the old road.

d. That, other than the section specifically mentioned, the cost of additional width over and above the 24-foot width on the old road be paid for by the Oregon State Highway Commission.

2. Controversy with J. O. Chastain, et al., concerning repairs to an irrigation flume near Tygh Valley:

The Engineer submitted a supplemental report on the status of the proposed agreement between the State, Wasco County and J. O. Chastain, et al., with respect to the repair of an irrigation flume situate adjacent to The Dalles-California Highway near Tygh Valley. He recalled that the Commission at the previous meeting authorized the expenditure of $200.00 to repair the flume, subject to the understanding that the state assumed no obligation whatsoever with respect to future maintenance and that the expenditure in no way fixed or admitted any further liability on the part of the state. Such offer, he said, was presented to the County Judge of Wasco County who now advises that Mr. Chastain considers that the sliding highway embankment is the sole cause of the damage to the flume and that it is the state's obligation to repair the damage. The County Judge, he said, feels the same way about the matter, in view of which it appears impossible to reach a satisfactory agreement. He suggested, in view of the circumstances, that the Commission authorize immediate repair of the present damage which is estimated to cost about $200.00 without prejudice, and that the matter be reopened for discussion after the war is over.

3. Request of Gardiner Lumber Company for state assistance in oiling a short section of county road near Gardiner:

The Commission discussed a letter from the Gardiner Lumber Company requesting state assistance in the oiling of the county road which extends from Smith River Channel Bridge to East Gardiner, which road is to be used by the Company in connection with the operation of its loading platform at East Gardiner. The Company advises that it will provide the necessary oil, rock and patrol grader, but will need the State's distributor, roller and spreader boxes and the service of a State crew to perform the oiling operations; also, that the Company will pay all of the costs involved. The Engineer advised that it is contrary to the long established policy of the Highway Commission to perform services such as this for private parties, and recommended that the request be denied in order to avoid the establishment of an undesirable precedent.

4. Salary increases for the Highway Department Employees:

The Engineer brought to the attention of the Commission the matter of a general increase in salaries and wage rates, which matter had been discussed briefly at the Commission's meeting held February 16, 1944, but at which time no action was taken.

The Commission now being in regular session and the foregoing matters having been brought up for final action and official record the following action was taken:

1. Commissioner Schaupp moved and Commissioner Chessman seconded the motion that the changes in the location of the Crooked River Highway as outlined by the Engineer and the method of financing the work as suggested by the Engineer be approved and that the Engineer be authorized to present such proposed change to the Bureau of Reclamation. The motion was declared by the Chairman unanimously carried.

2. Commissioner Chessman moved and Commissioner Schaupp seconded the motion that the controversy with J. O. Chastain, et al., concerning repairs to an irrigation flume near Tygh Valley be temporarily disposed of by a repair of the flume by the State at an estimated cost of $200, and that such work be done without prejudice to further discussion of the subject. The motion was declared by the Chairman unanimously adopted. The Commission then directed its Chief Counsel to notify the interested parties of the action taken by the Commission.

3. Commissioner Chessman moved and Commissioner Schaupp seconded the motion that the request of the Gardiner Lumber Company for State assistance in oiling a short section of county road near Gardiner be denied on recommendation of the Engineer. The motion was declared unanimously adopted by the Chairman.

4. Commissioner Schaupp moved and Commissioner Chessman seconded the motion that the Commission authorize a general increase of $10.00 per month to all monthly-rate employees receiving salaries below $400 per month, and a general increase of three cents per hour to all hourly-rate employees, said increases to be effective as of April 1, 1944.

Said motion was declared by the Chairman unanimously adopted with the understanding that the Engineer was authorized to make a limited number of minor variations either above or below the rates approved, so as to eliminate existing inequalities.

The Commission approved and signed letters directed to W. H. Horning, Chief Forester, O. & C. Revested Lands Administration requesting the cancellation and termination of the following recreational area leases:

1. Lease No. 020198 covering the south half of the southeast quarter ($SE\frac{1}{4}$) and the southeast quarter ($SE\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 19, Township 16 South, Range 7 West, W. M., Lane County, containing 120 acres in Lane County.

2. Lease No. 019601, covering the west half of the northwest quarter ($NW\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$), northeast quarter ($NW\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) and the northwest quarter ($NW\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$), all in Section 7, Township 16 South, Range 6 West, W. M., containing 206.49 acres; also, the southeast quarter ($SE\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 1, Township 16 South, Range 7 West, W. M., containing 40 acres, all of which property is situate in Lane County.

3. Lease No. 020508, covering the northwest quarter ($NW\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) and the north half of the southeast quarter ($SE\frac{1}{4}$) of Section 27, Township 33 South, Range 1 East, W. M., and the northwest quarter ($NW\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 11, the southeast quarter ($SE\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$), the north half of the southeast quarter ($SE\frac{1}{4}$) and the southeast quarter ($SE\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 17, Township 33 South, Range 2 East, W. M. containing 320 acres in Jackson County.

The Commission discussed briefly and ordered filed a letter from Alfred A. Loeb, Chairman, Recreational Resources Committee, Portland Chamber of Commerce, complimenting the Commission on its program of park and roadside acquisition.

The Commission also discussed briefly and ordered filed a letter from David B. Simpson, President, Portland Chamber of Commerce, urging the development of wayside picnic spots at frequent intervals along Oregon's most used state highways for the benefit and convenience of the touring public.

(A delegation representing the Recreational Committee of the Portland Chamber of Commerce appeared before the Commission on the following day with respect to this matter. See ahead for details.)

The Commission had under discussion the advisability of completing the purchase of right of way that is needed for post-war highway projects and for which options have already been secured. It was the Commission's decision that such purchases should be deferred until Congress acts on the post-war highway bill that is now pending and it is known definitely how much federal money Oregon is to receive thereunder. The Attorney was instructed to continue the taking of options for land that is needed for such purposes but to defer presenting them to the Commission until further advised, unless circumstances are such that immediate action by the Commission is required.

The Assistant Attorney presented a list of properties for which options have been obtained, together with offers that he recommended therefor, and requested instructions from the Commission whether or not to complete the purchase of these properties at this time. After discussion and careful consideration of each parcel and the recommended offers, the Commission approved the offers and authorized the Assistant Attorney to complete the purchase of the several tracts. The following resolution with respect thereto was adopted by the Commission by unanimous vote upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

SEASIDE-HUG POINT SECTION, OREGON COAST HIGHWAY

10820-	Yoder, Frances C. Scott Right of Way	0.19 acre at $200.00	$ 38.00	Witt

PELICAN CITY-SOUTH 6TH STREET SECTION, KLAMATH FALLS-MALIN HIGHWAY

11355-	Fischer, Alma Right of Way	13,000 sq.ft. at $0.0885	$ 1,150.00	
		1 4-roomed house	1,500.00	
		1 2-roomed house	350.00	
		1 garage	150.00	
		1 garage and woodshed	100.00	
			$ 3,250.00	Witt

LAKE CREEK SECTION, LITTLE BUTTE HIGHWAY

11325-	State Land Board (Quarry)	40.23 acres at $5.00	$ 201.15	DeSouza

SMITH POINT-YOUNG'S BAY BRIDGE SECTION, OREGON COAST HIGHWAY

11319-	Astoria City of (R/W)	365 sq.ft.	$ 00.00	McChesney

FRONT STREET PROJECT-CITY OF PORTLAND, PACIFIC HIGHWAY WEST

10978-	Hoyt, Pearl M. (R/W)	4,750 sq.ft. at 21¢	$1,000.00	McAllister
11132-	Savoff, Ranco Right of Way	1,500 sq.ft. at 15¢ Building	$ 225.00 625.00 $ 850.00	"
10124-	Olson, Fred L. Right of Way	5,000 sq.ft. at 20¢ Buildings	$1,000.00 3,750.00 $4,750.00	"
11015-	Olson, Fred L. Right of Way	5,000 sq.ft. at 50¢ Building	$2,500.00 7,000.00 $9,500.00	"
10979-A	Shaver Heirs Right of Way	44,888 sq.ft. at 30¢ less Buildings	$12,350.00 4,050.00 $16,400.00	"
10979	Shaver Heirs (R/W)	16,125 sq.ft. at 20¢	$3,250.00	"
8917-	Fracasso, Joseph	13,653 sq.ft. at 11¢ less	$1,500.00	"
11016-	Marlitt, Mabel M. Right of Way	3,000 sq.ft. at $1.25 Building	$3,750.00 3,750.00 $7,500.00	"

JORDAN CREEK-JORDAN VALLEY SECTION, JORDAN VALLEY HIGHWAY

10932-	Fraser, Wm. M. Haul Road Easement (Correction)	1.75 acres	$ 00.00	Parker
10897-	Fraser, Wm. M. Stock Pile Site	1.65 acres	$ 10.00	Parker

NEWPORT-WALDPORT SECTION, OREGON COAST HIGHWAY

11113-	Hart, Chas. Park Strip	1.57 acres at $250.00 Compromise to settle	$ 392.50 82.50 $ 475.00	Benson

WALDPORT-BIG CREEK SECTION, OREGON COAST HIGHWAY

11102-	Plankinton, Jess C. and Edyth L. Wayside Strip	0.20 at $375.00 State to deed o.4 acre at $187.50 per in exchange	$ 75.00 75.00- 00.00	Benson

(Approved by Commission subject to inspection by Engineer. Exchange approved by Engineer following this meeting.)

MAY 9 1944

BEND SECTION, THE DALLES-CALIFORNIA HIGHWAY

11324-	Deschutes County Stock Pile Site	54,000 sq.ft.	$ 00.00	Chandler

METOLIUS-REDMOND SECTION, THE DALLES-CALIFORNIA HIGHWAY

11321-	U.S. Department of Agriculture Stock Pile Site Rock Quarry	5.45 acres (stock pile) 26.67 acres (quarry)	$ 00.00 00.00	McChesney

MITCHELL EAST SECTION, OCHOCO HIGHWAY

11284-	Keyes, Custer Stock Pile	2.10 acres at $35.72	$ 75.00	Cooper

HALSEY-HARRISBURG SECTION, PACIFIC HIGHWAY

10271-A	McPherson, S. W. Right of Way	0.33 acre at LUMP SUM	$3,500.00	Collins Landon

UNITY JUNCTION-MILL GULCH SECTION, BAKER-UNITY HIGHWAY

11276-	Rouse, Maude Stock Pile	2.58 acres at $5.00	$ 12.90	Cozad
11274-	Lofton, S. A. Stock Pile	1.38 acres at $10.00 Fencing	$ 13.80	"
11271-	Rouse Brothers Stock Pile	0.94 acre at $100.00 Fencing	$ 94.00	"
11272-	Hardman, John Stock Pile	1.0 acre at $15.00	$ 15.00	"
11273-	Murray, Hardy B. Quarry	5.9 acres at $10.00 50 rods fence at $1.00	$ 59.00 50.00 $ 109.00	"

The Attorney brought up for discussion the matter of acquiring right-of-way and right of access thereto along the proposed new location of the Pacific Highway East between Salem and Albany and between Albany and Junction City. He advised that the state law requires that the Highway Commission declare the need for the highway improvement and for the acquisition of the right-of-way and the right of access. He asked the Commission to take formal action at this time to that end and to authorize him by the same action to acquire the right-of-way either by negotiation or by condemnation as may be necessary.

After due consideration of this matter, the Commission approved the Attorney's request and by unanimous vote adopted the following resolution with regard thereto upon motion by Commissioner Schaupp which was seconded by Commissioner Chessman:

WHEREAS, the transportation of persons and property over public highways by private and for hire motor vehicles has developed to a point where such means of transportation has become an integral and essential part of the transportation systems and agencies of the State and of the nation; and

WHEREAS, the volume and type of motor vehicles now using the public highways of the State and the nation has become such that highway standards of yesterday and highway designs are inadequate with respect to factors of safety, time element, weight of load, dimensions of vehicle and all other factors entering into the problem of transportation over public highways; and

WHEREAS, highway construction, maintenance and improvement are now and have been for some time financed in large measure by taxes and other charges imposed upon and paid by the road user, and therefore the convenience, safety and economy of time and cost of operation are of prime significance to the road user; and

WHEREAS, highways which in design possess a minimum curvature, easy grade, two or more same-direction-lanes, freedom from access or intersecting roads, streets or lanes and into, to which or from which abutting property owners have no, or at least a limited, right of access, constitute and are thoroughfares which, in the opinion of the Commission, afford and offer to the highway user economy of time, cost and safety of operation to public officials charged with upkeep, economy of maintenance costs, and for all interested parties a reduction in the toll of life and health and a reduction in property damage; and

WHEREAS, for the purpose of making possible the construction of a more adequate and safe thoroughfare, the Commission has relocated the section of the Pacific Highway East between Salem and Albany, and for like purpose the Commission has declared the necessity for widening, straightening and otherwise improving the alignment and design of the section of said highway from Albany to Junction City; and

WHEREAS, to the end that public safety, convenience and public economy may be best served, it is deemed by the Highway Commission advisable and necessary that in connection with the acquisition of real properties for rights of way for said highway there shall be acquired all right or easement of access to said highway from real properties abutting thereon, and all right or easement of access from said highway to real properties abutting thereon, except at such places as may be designated and approved by the Highway

Commission;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, that:

1. The Highway Commission does hereby find and declare that the relocation of the Pacific Highway East between Salem and Albany and the construction of a highway over said new location, and widening and straightening of the Albany to Junction City Section of said highway are necessary and essential for the convenience, safety and accommodation of the motoring public so that there may be made possible the construction, improvement and maintenance of a highway between said termini adequate in all particulars for existing and potential volume, type and character of traffic now using or which for long will use said highway.

2. That the said proposed highway projects, consisting of new highway construction, highway location, widening and straightening between said termini are each and all planned and located in a manner which in the judgment of the Commission will be most compatible with the greatest public good and will do a minimum of damage to private property.

3. That for the purpose of providing convenience, safety, economy of time, operation and cost, and for the purpose of providing and making possible the movement of the maximum volume of traffic over said highway and otherwise protecting and bringing greater returns to public investment in said highway, it is deemed and declared to be necessary that, in addition to the acquisition of real properties for rights of way, there shall be acquired from the owners of all real property abutting upon said highway or highway right of way all right or easement of access from abutting lands to, over and into said highway and all right or easement of access from said highway to said abutting real property.

4. Based on the foregoing findings and declarations and upon existing law, it hereby is ordered that:

(a) J. M. Devers, as Chief Counsel of the Oregon State Highway Commission, be and he hereby is authorized and directed personally, or through a member or members of the Legal or Right of Way staffs, to attempt to agree with the owner or owners of properties described on the attached sheets with respect to the compensation to be paid for said property or properties, together with the damage, if there be damage, to the remainder of the said properties as a result of the taking of properties to be appropriated for said projects, and is authorized and directed to attempt to agree with such owner or owners with respect to the compensation and damage, if there be damage, to be paid for a waiver, sale and transfer of all right or easement of access from the abutting property or properties to, into or over

said highway and all right and easement of access from said highway to said abutting property or properties, except at such places as may be specifically designated in the instruments of conveyance or in the complaint for condemnation; (See note below)*

(b) In the event that said property or properties, or any of the same, or the right or easement of access with respect to any ownership cannot be acquired by agreement, then said J. M. Devers, as Chief Counsel, is hereby authorized to institute and prosecute to final determination any necessary or appropriate suit or action for the State in the name of the State, by and through its State Highway Commission, for the condemnation of such interest or interests as such owner or owners may have in said real property or properties, including any and all right of access, and for determining the compensation to be paid not only for such real properties needed for right of way purposes and the damage, if any there be, but for the compensation to be paid for such right or easement of access and the damage if any there be; and

(c) In the event said properties or any of them, or such right of easement or access, are acquired through condemnation proceedings, then said J. M. Devers, as Chief Counsel, hereby is authorized in the conduct and prosecution of said proceeding or proceedings to make such offer or offers, commitment or commitments as in his opinion will best serve the interests of the State of Oregon, this Commission, the general public, as well as the interests and welfare of the owner or owners who may be defendants in any particular proceeding.

There was presented to the Commission for consideration a petition from the O. W. R. & N. Company and the U. P. Company for authority to construct additional railroad tracks at grade across certain streets in Pendleton. It was explained by the Engineer and the Attorney that the railroad company has already completed the construction of the extra tracks notwithstanding that authority to do so has not as yet been granted by the Public Utilities Commissioner, also that one of the crossings is on Emigrant Street which is the route of the Pendleton-John Day State Highway. The Engineer advised that all of the matters and allegations set forth in the petition are not entirely true, so he cannot recommend that the Commission endorse the petition except under certain conditions which will be contained in the answer that the Attorney has prepared for filing with the Public Utilities Commissioner. He explained the conditions for the Commission's information. (For details see answer). The Commission expressed a desire to cooperate with the railroad company insofar as possible and accordingly, after careful consideration of all the facts, decided to approve the petition subject to the conditions mentioned by the Engineer. The following resolution with respect thereto was adopted by the Commission by unanimous vote upon motion by Commissioner Schaupp which was seconded by Commissioner Chessman.

*(The detailed descriptions are filed with the resolution in the office of the State Highway Commission, Salem, being Resolution No. 1, under the heading "Resolutions Declaring Need for Highway Improvements" and are made a part of this minute entry to the same extent as if copied in full herein.) MAY 9 1944

WHEREAS, the Oregon-Washington Railroad & Navigation Company and the Union Pacific Railroad Company have submitted to this Commission for approval a petition addressed to the Public Utilities Commissioner, the which peititon the petitioners request an order permitting the construction of crossings at grade over certain streets in the City of Pendleton, one of which streets is S. W. Emigrant Avenue, over which said street the Highway Commission is directing state highway traffic as a part of the Pendleton-John Day Highway; and

WHEREAS, this Commission desires to cooperate with the petitioners, in so far as may be consistent with public interests and in line with the Commission's duties and responsibilities, but this Commission cannot accept as true all of the matters and allegations set forth in said petition, nor can this Commission share all of the conclusions drawn from and based upon said alleged facts; and

WHEREAS, this Commission's position with respect to the allegations and matters set forth in said petition with respect to the crossing of Emigrant Avenue is disclosed in its answer to the petition, which answer the Commission has directed its Chief Counsel to file with the Public Utilities Commissioner; and

WHEREAS, this Commission is advised that because of an existing emergency all of the said crossings, including the crossing of S. W. Emigrant Avenue have been constructed and therefore the making of an order at this time will not alter the physical facts;

THEREFORE, BE IT AND IT HEREBY IS RESOLVED that the Oregon State Highway Commission consents to the making and issuance of an order by the Public Utilities Commissioner as prayed for in said petition, but this consent is subject to and conditioned on the matters and things alleged in the Commission's answer, a copy of which answer is hereto attached.

BE IT FURTHER RESOLVED that the formal consent made a part of said petition be executed by the members of this Commission, subject to the matters set forth in said answer.

BE IT FURTHER RESOLVED that a copy of this resolution be attached to said petition.

BEFORE THE PUBLIC UTILITIES COMMISSIONER OF OREGON

In the matter of the application of Oregon-Washington Railroad & Navigation Company and Union Pacific Railroad Company for authority to construct additional tracks at grade across S. W. 6th Street, S. W. 7th Street, S. W. Emigrant Avenue, S. W. 13th Street and S. W. Court Place in the City of Pendleton, Oregon	ANSWER

MAY 9 1944

Comes now the State of Oregon, by and through its State Highway Commission, and for its answer to the petition of petitioners herein admits, denies, and alleges as follows:

I.

Admits paragraph 1.

II.

Admits paragraph 2.

III.

Admits that it is not now practicable to construct a crossing above or below grade of the public highway at S. W. Emigrant Avenue by reason of the existing scarcity of necessary materials and other emergency factors, but denies that it is not practicable to construct a crossing above or below grade at said point because of topography, track, and highway elevations.

IV.

Admits paragraph 4.

V.

Admits paragraph 5.

VI.

Admits paragraph 6.

VII.

Admits paragraph 7.

VIII.

Admits paragraph 8.

IX.

Denies paragraph 9 with respect to consent of the State Highway Commission except as alleged and set out in the further and separate answer herein.

X.

Admits paragraph 10.

MAY 9 1944

11937

For a further and separate answer, this answering party alleges as follows:

I.

That it has no jurisdiction over or interest in the proposed crossing of S. W. 6th Street, S. W. 7th Street, S. W. 13th Street, and S. W. Court Place.

II.

If the Public Utilities Commissioner should find that the proposed crossing of S. W. Emigrant Avenue will not create an unduly hazardous condition, then this answering party gives its consent to the construction and maintenance of an additional crossing at grade at said point for the duration of the present emergency. This consent is given without prejudice as to any future action which may appear desirable in regard to a separation of grades at said point at such future time as it may appear that a separation of grades should be made in the interests of public safety, convenience, and necessity.

WHEREFORE, this answering party prays that any order which may be entered in the above entitled matter, particularly with reference to the crossing of S. W. Emigrant Avenue, be in accordance with the allegations herein made.

Dated at Salem, Oregon, this 9th day of May, 1944.

STATE OF OREGON, by and through its State Highway Commission

J. M. DEVERS

J. W. DeSOUZA

R. W. DeARMOND

Attorneys for Oregon State Highway Commission
State Office Building,
Salem, Oregon

The Engineer brought up for discussion the sale of certain state-owned property situate at the southwest corner of the intersection of southeast Ankeny Street and southeast Union Avenue, Portland, concerning which inquiry has been made by Boquist and Clark Company, Portland. He suggested the sale of this property if a satisfactory offer is secured and provided that the deed of conveyance contains provisions for the following:

1. That vehicular traffic moving along the trafficway fronting the property be restricted to one-way traffic movement from west to south.

2. That the parking of vehicles along the property frontage be prohibited at all times.

3. That entrance to the property be limited to a driveway from Ankeny Street, and that exit therefrom be limited to a driveway leading to Union Avenue.

He recommended advertising the property for sale to the highest bidder therefor with such restrictions. The Commission approved the recommendation with unanimous vote upon motion by Commissioner Schaupp which was seconded by Commissioner Chessman.

The Assistant Attorney reported an inquiry from a Mr. O. D. Kieffer relative to the purchase of a small tract of land situate adjacent to the Dayton-Amity Secondary Highway in Yamhill County. He advised that the tract contains 5.92 acres and that it was acquired by the state at a rate of $100 per acre. Mr. Kieffer, he said, has offered to pay $500 for this land and to relinquish the right of access to the highway therefrom. He also advised that the property is not needed for state highway purposes. After discussion the Commission authorized the advertising of this property for sale to the highest bidder subject to the condition that the deed shall contain provision prohibiting access to the highway from the tract.

The Assistant Attorney reported the results of further negotiations with respect to the sale of the property acquired from Gordon Smith adjacent to the Boardman-Stanfield Highway, Umatilla County, on which is located a small lake which certain parties in Pendleton desire to use for duck hunting purposes. He advised that he contacted the interested parties who now offer to pay $1,200 for this property, and pointed out that such sum is $1,700 less than the appraised value of the property. He requested instructions. After discussion, the Commission decided unanimously not to sell the property, such action being taken upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman.

The Assistant Attorney also brought up for discussion the matter of restrictions in the form of deed covering property being acquired from the Pilot Rock Lumber Company for timber preservation purposes along the Pendleton-John Day Highway in Umatilla County. He advised that when negotiations were being carried on with respect to this purchase, the company agreed to sell the property to the state at the agreed price provided the state would permit the company to maintain a logging camp within the area and to construct and maintain logging roads and trails thereon for a period of 20 years. However, subsequently, the company has changed its attitude and now desires these privileges for a period of 30 years. He requested instructions whether or not to accept the deed on such basis. The matter was discussed at some length, but action thereon was deferred until the following day when a map of the location and further details are to be supplied by the Assistant Attorney.

(The change was approved by the Commission on the following day. See ahead for details.)

The Engineer presented an offer from Mr. Elmer Bankus, Brookings, Oregon, for an exchange of properties adjacent to the Oregon Coast Highway in Curry County. He advised that Mr. Bankus is interested in the state-owned lands in behalf of the Brookings Land and Townsite Company which would like to secure about 140 acres from the state. As consideration, the company will deed to the state 93.4 acres but, in addition thereto, wants the state to pay the company $3,000 in cash. It would be to the state's advantage to make this exchange of property, he said, if the deal were consummated on an even exchange basis, and on that basis the company would benefit to the extent of $240 considering the price that was paid for the land. The matter was discussed briefly by the Commission, but action thereon was deferred until the following day when it was expected that Mr. Bankus would be present. (The matter was not reconsidered because Mr. Bankus did not make an appearance).

The Attorney reported receipt of a request from the U. S. Maritime Commission for permission to use certain property in Portland that is owned by the state and the city jointly and which is under lease to the Maritime Commission for ferry purposes. He advised that the Maritime Commission now wishes to use the property in connection with the repair of ships; further, that the matter had been before the Portland City Council, which has evidenced its approval of such change in use on the condition that the Maritime Commission will pay $50 per day for the use of the area and will not place anything thereon that will impose upon the surface of the ground within a certain distance from the seawall, a weight in excess of 400 pounds per square foot, such restriction being necessary in order to protect the city's sea wall from damage. He read aloud a copy of the city's ordinance covering the matter. During the discussion, the Commission indicated that it cared not to enter into any such arrangement, however definite action on the matter was deferred until later in the session. (See ahead for decision).

The Commission had under discussion the matter of petitioning the Westland Irrigation District, Umatilla County, for the exclusion of certain state-owned lands, particularly highway rights of way, from the irrigation district. The Attorney recommended approval of the petition so as to avoid the payment of taxes and other expenses involving the district. The Commission approved the recommendation unanimously and thereupon signed the petition, such action being taken upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman.

The Commission had under discussion the disposal of the right of way of the old Pacific Highway over Sexton Mt. in Josephine County which has been rendered valueless for right of way purposes in view of the fact that the highway has been reconstructed on revised alignment. The Engineer recommended that a portion of the old right of way be retained for highway purposes; that a portion be abandoned in favor of the county for future maintenance as a county road, and that a portion be relinquished and allowed to revert to the owners of the abutting property. He exhibited a map showing the old highway and its relation to the new highway, also showing the sections to be disposed of.

After careful consideration of the matter, the Commission approved the Engineer's recommendation and by unanimous vote adopted the following resolution with regard thereto upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman.

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Pacific Highway known as the Sexton Mountain Section in Josephine County, the southerly terminus of which is at highway engineer's station 812+00 of the reconstructed line and opposite to highway engineer's station 474+02 of the old highway, or mile post 268.40, and the northerly terminus of which is at highway engineer's station 432+10 of the reconstructed line and opposite to highway engineer's station 873+94.5 of the old highway, which is mile post 260.83; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway as formerly located have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway or other public purposes, while other portions or sections are needed and must be retained for public use; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. The area of land within the limits of the old right of way which lies between engineer's station 835+28.6 and engineer's station 873+94.5 of the old highway (engineer's station 432+10 of the reconstructed line), and which area is shown colored in brown on the map attached hereto, which map is marked "Exhibit A" and by this reference is made a part of this resolution, is no longer needed for highway or other public purposes and therefore all of said area colored in brown is eliminated from the right of way of said highway, and such title, interest or right which the State has or may have had in said real property is hereby permitted to revert to the owners of the real properties abutting directly upon the said area colored in brown. *

2. That the portions of the old right of way which by reason of the relocation of the said highway are no longer within the boundaries of the new right of way and which portions are confined within the highway engineer's station 570+85 and highway engineer's station 594+10, also within highway engineer's station 749+75 and highway engineer's station 774+10.4, and also within highway engineer's station 791+52.8 and highway engineer's station 806+84.0, and which areas are identified and shown colored in yellow on said map attached

*(Map filed in "Right of Way Abandonment and Retention" File-No. 119.)

hereto, are to be retained by the State and possession thereof and title thereto shall continue to remain in the State of Oregon, by and through it's State Highway Commission, for use in connection with the construction, maintenance and operation of said highway and for such other public uses as said areas may serve.

3. That the section or area of the old right of way which lies between highway engineer's station 474+02, opposite station 812+00 of the reconstructed highway, and highway engineer's station 554+50, and is otherwise shown and identified colored in red on said Exhibit A, is hereby abandoned as any part of the right of way of the said state highway, but all of said abandoned section of the right of way of said highway is to remain and be maintained as a public highway, but the Commission hereby surrenders all jurisdiction thereover and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Josephine County and said road shall thereafter be maintained by the County for public use.*

4. The area shown colored in green on said Exhibit A includes right of way acquired for the relocation and reconstruction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all of the said area colored in green it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said Exhibit A shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners.

5. The Engineer is hereby directed to erect and maintain at all places where there is a roadway approach or connection between sections of the old highway route located within said area colored in green and the new highway location effective barriers or gates adequate to bar the public from the use of or contact with all sections of the old highway located within said area colored in green. All such closed parts of the old highway shall be and are abandoned as parts of the public highway.

6. The boundaries of all real properties acquired for rights of way and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments and such boundary monuments shall thereafter be maintained in place.

7. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Josephine County a duly certified copy thereof

*(Map filed in "Right of Way Abandonment and Retention" File- No. 119

and shall file with the Clerk of Josephine County a like certified copy; and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned section of the said old right of way shown colored in red on the map attached hereto and marked Exhibit A, and shall assume jurisdiction thereover as a county road and shall maintain the same for public purposes. * (See not on preceeding page.)

The Commission had under discussion the adoption of a route to serve the state highway traffic entering Klamath Falls from The Dalles-California Highway on the north and from the Klamath Falls-Lakeview and Klamath Falls-Malin Highways on the southeast, including the question of developing the roadside adjacent thereto as has been proposed by the Klamath Falls City Planning Commission and the Klamath County Court. The Engineer submitted a map showing the proposed alignment and recommended adoption of the same as the permanent location of this highway. The matter was given very careful consideration by the Commission and, as a result thereof, the Commission decided to designate as a state highway route the location recommended by the Engineer and as disclosed on the map. The Commission also decided to acquire extra land along such route for future roadside development purposes. The following resolution with regard thereto was adopted by the Commission by unanimous vote upon motion of Commissioner Chessman which was seconded by Commissioner Schaupp.

WHEREAS, the route over which state highway traffic enters Klamath Falls from The Dalles-California Highway on the north and from the Klamath Falls-Lakeview and Klamath Falls-Malin Highways at the easterly boundary of said City is attended and surrounded by conditions which make difficult and costly the construction thereover of a modern highway adequate for the needs of existing and potential traffic by motor vehicle; and

WHEREAS, the Commission, as a result of careful study of traffic needs, factors of safety, convenience of operation, cost of construction and maintenance, conditions which contribute to traffic movement and other factors which enter into the problems of transportation by motor vehicle, has found it necessary and desirable to select and adopt as the route over which to construct a new highway for the accommodation of traffic entering, passing through and leaving said City over said highways the alignment, location and course hereinafter defined; and

WHEREAS, it is the opinion and finding of this Commission that the adoption of a highway route along the alignment and course hereinafter defined will make possible the construction of a modern highway adequate for the service and convenience of motor traffic having occasion to travel said state highways with respect to both local and through traffic;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and affirmatively voting, as follows:

1. A route and location beginning at an intersection with The Dalles-California Highway near and northerly of the overcrossing of the Southern Pacific railroad at the northerly entrance to the City of Klamath Falls; thence in a southeasterly direction on the easterly side of and adjacent to the railroad and U. S. R. S. Canal to Shasta Way; thence crossing the said canal and continuing in a southeasterly direction on the westerly side of the said canal to a connection with South Sixth Street in the vicinity of the Altamont School south of the south city limits of Klamath Falls, said South Sixth Street being the route of the Klamath Falls-Lakeview Highway. Said route and location are more definitely fixed as shown on the map marked Exhibit A, and attached hereto and by this reference made a part hereof, and hereby is designated and adopted as the route and location of and for the state highway between said termini. (See note below)*

2. The survey, field notes, map and other engineering data with respect to said new route and location between said termini hereby are, in their entirety, approved and adopted as the survey, field notes, maps and engineering data supporting and disclosing the route of the highway between said termini, and the Engineer hereby is directed to file all of said data, field notes and information in the office of the State Highway Commission at Salem, Oregon, where they shall be preserved in the records and files of the Commission.

3. This Commission does hereby find and declare that public necessity and public convenience require a relocation and rerouting of the highway along the said route and alignment and does further find and declare that public interest and public necessity require the construction of a highway over said new route and new alignment.

4. The Commission does further find and declare that such route, location and alignment is located and planned in a manner which will be most compatible with the greatest public good and will do the least private injury or damage to the properties affected thereby.

5. The Commission does further find and declare that in its opinion the proper construction, improvement and maintenance of a highway along said adopted route and alignment necessitates and requires the acquisition of real properties and any and all interest therein affected by or incorporated in the said route alignment and survey.

6. The Commission does further find and declare that in connection with the acquisition of real properties needed and required for the construction and maintenance of a highway over said route and alignment the interests, welfare and convenience of the public necessitate and require the acquisition of all right and easement of access from real properties abutting upon said highway and from said highway

*(Map filed with resolution under "Resolutions Adopting Surveys" File-No. 1)

to said abutting properties; in other words, require and necessitate the acquisition of an abutting property owner's right and easement of ingress, egress and regress to, from, over and or across said highway.

7. The Commission further finds and hereby declares that for the purpose of making possible roadside development along said route, and for the further purpose of making possible the reinstatement and reconstruction of park areas and recreational facilities heretofore constructed and maintained by the City, but which will be impaired and disturbed in connection with the said proposed project, it is necessary that additional real properties along and adjoining said route be acquired; all of which properties are to be surveyed and the boundaries thereof determined by the State Highway Engineer or his representatives.

8. The State Highway Engineer is hereby directed to make or cause to be made all necessary surveys and perform all other engineering work needed or required for the proper marking on the ground of the route and location of said highway and for the proper determination of areas of real property to be acquired.

9. The said Engineer is further directed and instructed to prepare all necessary descriptions of real properties needed for said project as contemplated in this resolution and deliver said descriptions to the Commission's Chief Counsel for use in connection with the preparation of special forms, deeds and other instruments required in the acquisition of said real properties or interests therein.

10. The Commission does hereby order and direct its Chief Counsel, when supplied with necessary descriptions and other information and maps, to proceed at once to negotiate, and attempt to agree with the owners of all real property needed for said project and where agreement can be reached, take options on the real properties required, and deliver said options to this Commission for acceptance or rejection.

11. That there has been submitted to this Commission by the State Highway Engineer a map on which is disclosed and reflected the route and location of said highway and on which there is colored in blue properties to be made available by the City for said project, and there is likewise disclosed, colored in yellow, real properties which are to be made available by Klamath County for said project, and there is likewise disclosed and reflected on said map, colored in red, real properties which must be acquired by the State for said project, which map for identification purposes bears the date of May 8, 1944, and the signature of R. H. Baldock, State Highway Engineer, and which said map hereby is adopted as the official map of said location and route of said highway; and it is hereby ordered and directed that said map shall be filed and preserved in the permanent records and files of this Commission at Salem, Oregon. *

*(Map filed with resolution under "Resolutions Adopting Surveys" File-No.1)

MAY 9 1944

12. The State Highway Engineer hereby is instructed and directed to physically locate and mark with proper monuments and markers on the ground the said route and location between said termini, and likewise locate and mark with proper monuments or markers all of the real properties which are to be acquired, provided or made available for said project.

13. Said State Highway Engineer is further instructed to prepare said section of said highway for proper and adequate improvement.

14. That this resolution be entered in the minutes and records of the State Highway Commission as of this date and duly certified copies thereof mailed to the following: The Mayor of the City of Klamath Falls, the County Judge of Klamath County, and W. H. Lynch, District Engineer, Pulic Roads Administration.

In this connection the Attorney presented a form of agreement with the City of Klamath Falls and Klamath County covering acquisition and development of the extra land that is needed for roadside beautification. The provisions of this proposed agreement were discussed and approved by the Commission by unanimous vote. (The agreement was signed by the Commission on the following day.)

The Engineer brought up for discussion a complaint from the Cottage Grove Chamber of Commerce regarding traffic signs maintained on the new highway through Cottage Grove, particularly those prohibiting left-hand turns at certain intersections. It appears that some confusion prevails among the local citizenry with regard to the meaning and application of such signs. The Engineer advised that the matter has been investigated by Acting Traffic Engineer, Mr. F. B. Crandall, who advises that, while there exists some confusion with regard to the signs, which he has explained to the local people, the main thing that they have in mind is to secure authority for north-bound traffic to make a left-hand turn off the highway onto Eighth Street, which is now prohibited. According to the report, the present bus station is located on Eighth Street, and north-bound buses are now obliged to turn off the highway at Sixth Street and to make two right angle turns enroute to the station, whereas the turns could be avoided if buses were allowed to leave the highway at Eighth Street. The Engineer recommended that the request be denied because of the traffic hazard that would be created if traffic were allowed to cross the highway at this point. The Commission approved the recommendation by unanimous vote upon motion by Commissioner Schaupp which was seconded by Commissioner Chessman.

The Engineer brought to the Commission's attention a hazardous parking condition that exists on the Oregon Coast Highway in Reedsport, near the junction with the Umpqua Highway. It appears that autoists desiring service at a place called "Love's Garage" park their cars at right angles to the highway, the back end of their cars being so close to the traveled portion of the highway that a hazardous condition is created for highway traffic,

inviting serious accidents. The Engineer suggested that, to eliminate this condition, there be constructed a guard rail in front of this place. He requested instructions from the Commission relative thereto. After discussion, the Commission authorized the construction of such guard fence if the owner of the garage will not stop the parking of automobiles in this manner. The owner of the garage is to be notified of the Commission's action and is to be given a reasonable length of time within which to comply therewith before the guard fence is erected.

The Engineer presented a report on maintenance headquarters locations now owned by the State Highway Department together with a suggested program for the construction of maintenance buildings on such sites over a period from 8 to 10 years. He requested authority to prepare plans for a 3-year building program for such projects immediately following the war. The matter was discussed by the Commission at some length, but action thereon was deferred to a future meeting. The Engineer was instructed to ascertain in the meantime the procedure that is followed by the State Highway Departments in the adjoining states so that comparisons may be made.

The Commission discussed and by unanimous vote approved the Engineer's report dated April 12, 1944 with reference to the reconstruction of the St. Helens Pulp & Paper Company's logging railroad overcrossing of the Lower Columbia River Highway at Mile Post 89.51 in Clatsop County. The Commission ordered that a copy of this report be forwarded to the Company for its information.

A letter was presented from the Brooks-Scanlon Lumber Company requesting approval of its plan to construct a logging railroad crossing of the McKenzie Highway at grade just west of the town of Sisters, Deschutes County. The Engineer recommended that the Commission refuse to approve such construction inasmuch as it would create a serious hazard for the users of this important highway. Moreover, it is contrary to the Commission's established policy with respect to such matters. The Attorney advised that the Commission has authority to prohibit such construction if it so desires, and it is within the province of the Commission to so recommend to the Public Utilities Commissioner when the public hearing is held on the matter. After discussion, the Commission decided not to permit the crossing if it can be avoided. Motion to that effect was made by Commissioner Chessman, seconded by Commissioner Schaupp and carried by unanimous vote. The secretary was instructed to inform the Brooks-Scanlon Lumber Company of the action taken and to advise the company that the Commission would oppose the grade crossing if the matter should come up for hearing before the Public Utilities Commissioner.

The Engineer reported the results of his investigations with respect to permitting the transportation over state highways of loads consisting of one large log, and involving weights and dimensions in excess of those now allowed by tolerance. He advised that the case of immediate concern is that of Mr. George Gray, Seaside, who wants authority to conduct such movements over the Necanicum, Wolf Creek and Oregon Coast Highways from the bridge over the North Fork of the Nehalem River to a point just south of the

Lewis and Clark River bridge near Astoria. He recommended the granting of permits for such movements over such route under the following conditions:

"Movement of a single-log load transported on the specific vehicles and subject to the axle weights and axle spacing as hereinafter mentioned will be permited from a point on ORE53 just north of the bridge spanning the North Fork of the Nehalem River, thence along ORE53 to the junction with ORE2, thence along ORE2 to a junction with US101, thence along US101 to a point just south of the Lewis and Clark bridge.

"Subject to all the conditions, terms and agreements printed, typed or written below and on the reverse side hereof and not otherwise, the above-mentioned permittee is hereby authorized to transport on tandem-axle truck and tandem-axle trailer loads consisting of one log, the maximum size of which will be 20 feet in length with average diameter of 8 feet, or 25 feet in length with an average diameter of 7 feet, with the further provisions that the distance between the center of one set of tandem axles and the center of the other set of tandem axles be not less than 16 feet, provided, however, that a single log of greater dimensions may be transported if the gross weight does not exceed 70,000 pounds, the maximum load on either set of tandems not to exceed 32,000 pounds. No tolerances are allowed in connection with such movements.

" Likewise, movement will be permitted of a single-log load placed on a single-axle truck and tandem-axle trailer provided the distance between the driving axle and the center of the tandem axles is not less than 15 feet and further provided that the gross weight does not exceed 18,000 pounds on the driving axle and 36,000 pounds on the tandem axle and the total load does not exceed 63,000 pounds. Tolerance of 1,000 pounds per axle will be permitted but no tolerance on the total gross weight will be permitted.

"The above permit is issued for the transportation of a single-log load over the specific section of highway given herein and not otherwise. "

The attorney advised that the Commission has authority to grant such permits under the provisions of the Emergency Law enacted by the 1943 Legislature. The Commission thereupon by unanimous vote approved the granting of permits to Mr. Gray and others who operate over the same route, as recommended by the Engineer.

The Engineer brought to the attention of the Commission a procedure that is being followed by some of the counties of the state with respect to the transportation of logs over county roads. It appears that in certain instances the county courts have entered into agreements with logging companies for the use of county roads as private logging roads provided the companies will maintain the roads in good condition and will not close them for public use. The Engineer advised that by such an arrangement logging

trucks could operate over the roads without payment of gasoline tax or license fees and with weights far in excess of those permitted under present statutes, thereby reducing highway department revenues, which might become serious in the event the county courts made such arrangements generally throughout the state. The Attorney advised that the county courts have no authority to waive the payment of fees or taxes or to increase weights over present statute limits; however, if the state intervened, it probably would result in undesirable controversy. He suggested that it would be advisable to obtain a ruling from the Attorney General to ascertain whether or not the counties had the authority to enter into such agreements. As a result of discussion, motion was made by Commissioner Chessman that the Attorney secure such a ruling from the Attorney General. The motion was seconded by Commissioner Schaupp and carried by unanimous vote.

A letter was presented from County Judge D. N. Busenbark, Douglas County, with regard to the issuance of overlength permits covering log hauling over public roads in Douglas County. Judge Busenbark alleges that permits issued by the State Highway Commission covering such movements over state highways are used by the operators as authority for hauling the same length loads over county roads which cannot accommodate movements of such length. He suggests that the county should be considered when permits for overlength loads are issued by the state and that the over-all length of a load of logs should be limited to 65 feet. The Engineer advised that he discussed this matter with Judge Busenbark on the occasion of his visit to Roseburg recently and that he believes the county court would be satisfied if the Highway Department's permits contained a clause to the effect that the permit is limited to operation on state highways only and if a copy of each permit were sent to the county court for its information. The Commission deferred action on the matter pending a conference with Judge Busenbark on the following day. (Judge Busenbark signified his approval of such arrangement at this conference. The Commission also approved it and ordered it put into effect immediately. See ahead for details of the conference.)

The Engineer reported on the cost to improve the Little Nestucca Secondary Highway in Lincoln County as a timber access road project to facilitate the movement of logging trucks. He estimated that it would cost about $30,000 to put the road in suitable condition to serve large scale operations of this kind, and advised that he discussed with Mr. Brundage, Western Log and Lumber Administrator, and with Mr. E. J. Runquist of the Doernbecher Manufacturing Company, Portland, which operates over the road, the possibilities of financing the project jointly, 1/3 with timber access road funds, 1/3 with funds provided by the Doernbecher Manufacturing Company and the balance with State Highway funds. The Doernbecher Manufacturing Company, he said, agreed to pay its 1/3-share, but Mr. Brundage refused to approve the expenditure of timber access funds, so the project cannot go forward unless additional funds are provided from some other source. He suggested that the Commission might pay one-half of the expense if the Doernbecher Manufacturing Company will contribute a like amount. The Commission approved such arrangement by unanimous vote and instructed the Engineer to discuss the matter with Mr. Runquist on such basis.

The Engineer also brought up for discussion the proposed improvement of the Santiam Highway in Linn County as a timber access road to

facilitate the transportation of logs thereover, particularly the section which extends from a point about .8 mile east of the town of Foster to a point 2.5 miles east of Cascadia, 11.8 miles in length. He estimated that the improvement, which consists principally of strengthening and recoiling of the existing surface but includes some widening of roadbed, would cost about $125,000 and than an additional $1,000 would be required to pay for surveys and plans. In this connection he presented a letter from the Public Roads Administration advising that, in their estimation, this project is primarily an "extraordinary maintenance project" and, such being the case, the Public Roads Administration could not approve the project on the basis of its being financed wholly with timber access funds, but would assume the payment of 75% of the cost if some other agency, either the state or the county, would assume the balance. The Engineer recommended acceptance of the offer. After discussion, the Commission approved the recommendation on the basis that the state will pay 25% of the actual final cost of construction. The Engineer was thereupon authorized to make the necessary surveys and to advertise the project for bids as soon as plans and specifications can be prepared. It was understood that the state would advance funds to pay for construction and that the federal government would reimburse the state for its share of the expense.

The Engineer reported that, due to the fact that it has been impossible to complete certain contemplated work along the Upper Columbia River Highway in the vicinity of Multnomah Falls and Oneonta, a condition exists at the large borrow pit at Oneonta which will become dangerous next winter unless precautionary measures are taken in the meantime. He advised that the excavation slope in the borrow pit is sliding and if not controlled, will eventually cover the highway and the railroad which is located nearby. He recommended the awarding of a contract to remove about 39,000 cubic yards of the material from the pit which, he said, would remedy the situation and would provide material that could be used to good advantage for widening on the Oneonta-Dodson Section. He estimated that the job would cost about $30,000. The recommendation was approved by the Commission by unanimous vote.

The Secretary presented a letter from the Board of County Commissioners of Multnomah County recommending the following projects for consideration by the Commission in the formulation of its postwar construction program.

1. Complete Highway No. 30 (State, #2) - Columbia River Highway, as in accordance with your proposed improvements.

2. Pacific Highway (State #1) - widen Union Avenue approach to the Interstate Bridge, with grade separation at Vancouver Avenue intersection.

3. Extend Cascade Highway #160 to Marine Drive, with grade separation as far as possible at all main road and railroad crossings.

The Commission took no action on the matter.

The Secretary presented communications from J. O. Hardman, Unity, Oregon, and from the Vale Chamber of Commerce requesting the construction of

a cut-off highway between Unity and Prairie City, by-passing the John Day Highway between these points, as a postwar project and also requesting an immediate survey of the same. The Engineer described the location of the proposed cut-off and called attention to a previous request for the construction of the new highway extending from Prairie City to Baker via Granite and Sumpter. He gave as his thought that neither of these projects is eligible for the postwar program and should not be given serious consideration for a long time in the future. For such reason and because the projects are very costly, he recommended that the request for both projects be denied and that the request for the survey be deferred until such time as the Commission is ready to consider the projects for construction. The Commission approved the recommendation unanimously.

A petition was presented from residents of Juntura and Drewsey requesting the improvement of certain county roads in their district. The Commission denied the request because the roads are not state highways, and it appeared to the Commission that they are not eligible for prospective postwar funds. Moreover, it was the feeling of the Commission that the improvement of roads now on the state highway system should be much further advanced before new road obligations are assumed.

A letter was presented from the Eugene City Planning Commission requesting a study by Highway Department Engineers of a proposed highway connection along South High Street between the present highway on Broadway, in Eugene, and the proposed route of the Pacific Highway which by-passes Eugene. A letter was also presented from Mr. J. F. Cramer, Superintendent of the Eugene Public Schools, opposing such routing of this connecting road because it bisects school property and will interfere with the development of the same and will also create a hazard for school children. The Commission considered that the information furnished is not sufficient to justify the expense of a survey but authorized the Engineer to confer with both parties on the basis of data now available.

The Engineer reported that the bridge over the second crossing of the Wilson River on the Wilson River Highway is badly in need of repairs that are estimated to cost about $7,500. He advised that the bridge was constructed several years ago on detour alignment and if repaired, will be suitable for the handling of traffic until a new bridge can be built on permanent alignment, which he judged would be some time in the future on account of war-time conditions. He requested authority to advertise the repair work

for bids to be received at the next meeting. The Commission approved the request by unanimous vote.

The Commission considered and denied a request from the Illinois Valley Chamber of Commerce, Cave Junction, Oregon, for sidewalk construction along the right of way of the Redwood Highway between the towns of Cave Junction and Kerby, a distance of 1.9 miles, which work the Engineer estimated would cost about $4,000. The Commission considered that the expense is not justified at the present time because of the falling off in highway travel.

A petition was presented from property owners residing adjacent to the Pacific Highway south of Grants Pass requesting the filling in of the highway borrow pits and drainage ditches along this highway between Hamilton Lane and Fruitdale Grange Hall in order to improve the sightliness of the roadsides and to eliminate unsanitary conditions. The Engineer advised that the request has been investigated by Division Engineer K. D. Lytle, who estimates that the work involved will cost about $14,300. He recommended that the request be denied. The Commission approved the recommendation by unanimous vote.

The Commission had under consideration the approval of plans submitted by a number of cities and towns for city street construction and improvement with State Tax Street Funds apportioned to them under the provisions of Chapter 371, Oregon Laws, 1943. In this connection, the Secretary presented resolutions from such cities and towns outlining their plans for such improvement. After careful consideration, the Commission approved the plans as outlined therein and thereupon by unanimous vote adopted the following resolution with regard thereto on motion of Commissioner Chessman which was seconded by Commissioner Schaupp.

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calender year 1944 for street purposes as provided in said law the several sums or amounts set opposite the name of the respective city or town:

Cove	$ 440.87	Monroe	$ 427.14
Maupin	366.71	Lafayette	561.74
Stanfield	331.00	Silver Lake	133.22
Oakridge	714.19	Lostine	280.18
Hines	929.82	Summerville	109.87
Aurora	313.14	Falls City	982.01
Salem	42,450.15	Adams	232.11
Jefferson	657.93	Harrisburg	854.28
Sandy	649.64	Estacada	722.43
Echo	384.56	Condon	1,175.66
Monmouth	1,325.37	Halfway	571.35

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument certified copies of which have been filed with the Commission, conformed

to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction and improvement with the funds above specified the following streets in the following named cities:

City of Cove - Main Street, Conklin Lane, Ash Street, Poplar Street, Caddie Street, Foster Street, Brogan Street, Church Street, High Valley Road, French Street, Hill Street, Second Street, Hibbler Street, First Street, Water Street and Orchard Street.

City of Maupin - Grant Avenue, 5th Street and 6th Street.

City of Stanfield - Coe Avenue

City of Oakridge - Crestview Avenue and the intersection of Crestview Avenue and First Street.

City of Hines - Hanley Boulevard, Roanoke Avenue, Barnes Avenue, Quincy Avenue and Ogden Avenue.

City of Aurora - 2nd Street, 3rd Street, Liberty Street, Bobs Avenue and Main Street.

City of Salem - South River Road and various city streets and bridges as required.

City of Jefferson - 3rd Street.

City of Echo - Dupont Street and Bridge Street.

City of Sandy - Center Street.

City of Monmouth - College Street, Clay Street, South Broad Street, Bently Street, Cattron Street, North East Street, East Jackson Street, South Craven Street, South Street, Gwinn Street, West Street, Powell Street and South Monmouth Street.

City of Monroe - Commercial Street, Main Street, Railroad Street, Walnut Street, Chestnut Street, Wilson Street and Howard Street.

City of Silver Lake - Center Street, South Street, 1st Street, 2nd Street, 3rd Street, 4th Street, 5th Street and 6th Street.

City of Lafayette - Second Street, Fourth Street and Fifth Street.

City of Lostine - Resort Street, Elizabeth Street, College Street, Cole Street, Roswell Street and Wallowa Street.

City of Summerville - Main Street, Patten Street, Jefferson Street, First Street, Second Street, Third Street and Fourth Street.

City of Falls City - 5th Street, Prospect Road, Boundary Street, Fairoakes Street, Alder Street, Bryant Street, Wood Street, East Avenue, Lombard Street, Bridge Street, Parry Road and Parry Street.

City of Adams - Preston Street and Main Street.

City of Harrisburg - Sixth Street, LaSalle Street, Kesling Street, Moore Street and Macey Street.

City of Estacada - Zobrist Street, Perce Street and turn around at City reservoir.

City of Condon - First Street, Second Street, Wells Street, Walnut Street, Gilliam Street, Summit Street, Court Street, Bayard St., Pennoyer Street, Potter Street, Lincoln Street, Church Street, Oregon Street, Ward Street and East Street.

City of Halfway - Bell Street, Dawson Street, Church Street and Center Street.

2. That the type, plan and character of improvement proposed in the resolutions filed with this commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the same.

5. This resolution shall be entered in the minutes and records of this Commission as of the 9th day of May, 1944.

The Engineer requested authority to make a relocation survey of The Dalles-California Highway from Main Street in Klamath Falls to a junction with the Green Springs Highway, a distance of about 2 miles. He explained that such survey will consist simply of retracing the alignment, making property ties, and preparing right of way descriptions, and is estimated to cost about $1,250. The Commission approved the request by unanimous vote.

The Commission had under consideration the adoption of relocation surveys completed by the Engineer for the following highways: Canyonville-Josephine County Line Section of the Pacific Highway in Douglas County; Elgin-Boswell Ranch Section of the Wallowa Lake Highway in Union County. The Engineer exhibited maps of both surveys and explained details in connection with each. After discussion Commissioner Chessman moved the adoption of both surveys as reported by the Engineer. The motion was seconded by Commissioner Schaupp and was declared by Chairman Banfield carried by unanimous vote. The following resolutions relative thereto received the unanimous vote of the Commission:

WHEREAS, the Pacific Highway between Canyonville and Wolf Creek is, with respect to curvature, grade, and width of roadbed, altogether inadequate for the needs and requirements of modern transportation by motor vehicle; and

WHEREAS, the transportation of persons and property over public highways by private and for hire motor vehicles has developed to a point where such means of transportation has become an integral and essential part of the transportation systems and agencies of the State and the Nation; and

WHEREAS, the volume and type of motor vehicles now using the public highways of the State and the Nation have become such that highway standards and highway designs of yesterday, and locations formerly accepted, are now inadequate to meet and comply with factors of safety, time element, weight of load, dimensions of vehicle and all other factors entering into the problem of transportation by motor vehicle over public highways; and

WHEREAS, highway construction, maintenance and improvement are now and for some time have been financed in large measure by taxes and other charges imposed upon and paid by road users, and therefore, the convenience, safety and economy of time and cost of operation are of prime significance in connection with the transportation of persons and/or property by motor vehicle; and

WHEREAS, highways which in design possess a minimum curvature, easy grade, two or more same-direction lanes, freedom from access or intersecting roads, street or lanes, and into, to which, or from which abutting property owners have no, or at least a limited, right of access, constitute and are thoroughfares which in the opinion of the Commission afford and offer to the highway user economy of time, to public officials charged with upkeep economy of maintenance

costs, and to the public generally a reduction in the toll of life and health and a reduction in property damage; and

WHEREAS, for the purpose of making possible the construction of a more adequate and safe thoroughfare between Canyonville and Wolf Creek the Commission has relocated said section of the Pacific Highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Highway Commission does hereby find and declare that the relocation of the Pacific Highway between Canyonville and Wolf Creek is necessary and essential for the convenience, safety and accommodation of the motoring public, to the end that there may be made possible the construction, improvement and maintenance of a highway between said termini adequate in all particulars for existing and potential volume, type and character of traffic now using and which for long will use the said highway.

2. That the survey of the relocated line between said termini, which survey was heretofore made by the State Highway Engineer pursuant to instructions from this Commission and which survey has been completed and is now offered by the Engineer for approval and adoption, be and said survey and relocated line hereby is approved and adopted

3. That the route and location of said highway between said termini is more particularly described as follows:

> Beginning at Canyonville in Douglas County and thence southeasterly and southerly following closely the present highway to the county road to Anchor; thence southwesterly, in general being parallel to and easterly of the present highway and on the easterly side of Cow Creek, to a connection with the present highway in the North one-half of Section 35, Township 32 South, Range 6 West, W. M.; thence southerly following closely the route of the present highway to the town of Wolf Creek in Josephine County.

4. That said survey and all of the field notes, maps and other engineering data prepared by said Engineer or under his supervision be and the same hereby are accepted and adopted as the survey, field notes and engineering data of and for said relocated line, and are ordered placed in the permanent files of the State Highway Commission at Salem, Oregon.

5. The said State Highway Engineer is hereby instructed to make or cause to be made proper, appropriate and complete descriptions of all real properties needed for right of way or for other public purposes in connection with the construction of a highway over said route, and deliver said descriptions, together with the names of the owners of real properties involved, to the Commission's Chief

Counsel for use in the acquisition of necessary real properties at such time as the acquisition of real property may be ordered by the Commission.

6. That nothing in this resolution with respect to the adoption of said relocated line, survey, field notes and other engineering data shall be deemed at this time to in any way affect or cause the abandonment of any part of the right of way of the original and existing location of said highway between said termini, but said existing highway between said termini shall be and remain the route and location of the Pacific Highway between said points until such time as this Commission may take official action abandoning said existing route, and direction traffic over said new route.

7. The map attached hereto, marked Exhibit A and by this reference made a part hereof, for identification purposes bears the signature of R. H. Baldock, State Highway Engineer, and the date of May 9, 1944, and hereby is adopted as the official map of said relocated line between said termini. Said map for further identification bears the number 6B11-15. (See note below).*

WHEREAS, the Elgin-Boswell Ranch Section of the Wallowa Lake Highway in Union County in the opinion of the Commission is not adequate for the needs of modern motor vehicle traffic; and

WHEREAS, for the purpose of making possible the construction and maintenance of a highway adequate as to curvature, grade and other engineering features the Commission heretofore ordered and directed the State Highway Engineer to make or cause to be made a new survey for the purpose of finding a location and route better adapted to traffic needs; and

WHEREAS, such survey has been made and the maps, field notes and other engineering data have been submitted to the Commission by the Engineer with a recommendation that the same be adopted; and

WHEREAS, in the opinion and judgment of the Commission a highway constructed along said proposed route and survey will better serve the needs of the motoring public and will contribute to the convenience and economy of transportation of persons and/or property by motor vehicle over the public highways of the State;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and affirmatively voting, as follows:

1. That the Commission does hereby find and declare that the relocation of the Elgin-Boswell Ranch Section of the Wallowa

*(Map filed with resolution under "Resolutions Adopting Survey" File No. 2)

Lake Highway in Union County is necessary and essential for the convenience, safety and accommodation of the motoring public to the end that there may be made possible the construction, improvement and maintenance of a highway over said relocated route adequate in all particulars for the existing and potential volume, type and character of traffic now using and which for long will use the said highway.

2. That the survey of said relocated section of said highway, which survey was heretofore made by the State Highway Engineer pursuant to instructions from this Commission and which survey has been completed and is now offered by the Engineer for approval and adoption, be and said survey and relocated line hereby is approved and adopted.

3. That the route and location of the Elgin-Boswell Ranch Section of the Wallowa Lake Highway in Union County is more particularly described as follows:

> Beginning in the Southwest quarter of the Northwest quarter of Section 14, Township 1 North, Range 39 East, W. M. near the easterly city limits of the City of Elgin; thence in a northeasterly and easterly direction following the general direction of the present Wallowa Lake Highway to a connection with the westerly end of the reconstructed section of said highway in the Northeast quarter of the Southwest quarter of Section 2, Township 1 North, Range 40 East, W. M., Union County, Oregon.

4. That said survey and all of the field notes, maps and other engineering data prepared by said Engineer or under his supervision be and the same hereby are accepted and adopted as the survey, field notes and engineering data of and for said relocated line, and are ordered placed in the permanent files of the State Highway Commission at Salem, Oregon.

5. The said State Highway Engineer is hereby instructed to make or cause to be made proper, appropriate and complete descriptions of all real properties needed for right of way or for other public purposes in connection with the construction of a highway over said route, and deliver said descriptions, together with the names of the owners of real properties involved, to the Commission's Chief Counsel for use in the acquisition of necessary real properties at such time as the acquisition of real property may be ordered by the Commission.

6. The map attached hereto, marked Exhibit A and by this reference made a part hereof, which map for identification purposes bears the signature of R. H. Baldock, State Highway Engineer, and the date of May 9, 1944, hereby is adopted as the official map of said relocated line between said termini. (See note below).*

---

*(Map filed with resolution under "Resolutions Adopting Survey" File-No. 3)

The Commission had under consideration the following requests for extensions of time within which to complete highway construction contracts:

Henry L. Horn, Contract No. 2627, for the construction of the Denver Avenue Junction Project on the Pacific Highway East, Multnomah County, consisting of grading, bridges and paving, requested an extension of time from October 15, 1943 to March 23, 1944 within which to complete this job. He gave the following reasons for failure to complete the project within the specified time limit: change in the design of the footing for Structure No. 4; adverse weather conditions; and extra work ordered by the Engineer. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are substantially correct; but, in addition thereto, there were other things that contributed to the delay, namely, difficulties encountered in securing necessary materials, including plywood for which the priority rating furnished was too low to obtain quick delivery. He gave as his thought that Mr. Horn could have completed this project earlier if he had become properly organized to handle the work. Nevertheless, he recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

J. F. Johnston, Contract No. 2643, for the construction of bridges on the Monmouth-Pedee Road in Polk County, requested an extension of time from November 30, 1943 to April 26, 1944 within which to complete this job. He attributed his failure to complete the contract within the specified time limit to delay in obtaining certain materials. The Engineer advised that the reason given by the contractor for overrunning the time limit is correct, he having encountered considerable difficulties in obtaining lumber for the structures, particularly the Port Orford Cedar surfacing for the bridge decks. He recommended in view thereof that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

A. H. Saxton & Son, Contract No. 2645, for furnishing crushed rock in stockpiles for the Hebo Rock Production Project on the Oregon Coast and Three Rivers Highways in Tillamook County, requested an extension of time from November 30, 1943 to April 4, 1944 within which to complete this job. They alleged that the exploration and development of a new quarry which was an uncertain factor, delayed the commencement of the work and was the principal reason that the project was not completed within the specified time. The Engineer advised that when this contract was awarded the contractor had another project under way in the vicinity of Cannon Beach which he was allowed to complete before commencing the new work. Such delay in starting the project, he said, was the main reason for the contractor's overrunning the specified time limit. He recommended that the extension of time requested be granted without penalty inasmuch as the state has not been to extra expense by reason of the delay. The Commission approved the recommendation unanimously.

Hord & Stuart, Contract No. 2650, for the construction of a rock and gravel revetment on the Oakridge Section on the Willamette Highway in Lane County, requested an extension of time from November 30, 1943 to January 31, 1944 within which to complete this job. The following reasons were given by the contractor for failure to complete the project within the specified time limit: delay in the award of contract by the State Highway Commission; delay in securing a burning permit from the United States Forestry Service; high water occasioned by a flood which occurred during the month of October; and difficulties encountered in securing repair parts for their equipment. The Engineer advised that the reasons given by the contractor for failure to complete the work within the specified time limit are substantially correct; however, in addition thereto, it might be stated that some delay was caused by reason of the fact that the quantities of materials actually handled were considerably larger than were contemplated under the original contract. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contracts Nos. 2627, 2643, 2645, 2650, 2652, 2662, and 2676, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2627, with Henry L. Horn, for grading, bridges and paving on the Denver Avenue Junction Section of the Pacific Highway East, in Multnomah County, completed on March 23, 1944.

Contract No. 2643, with J. F. Johnston, for bridge construction on Monmouth-Pedee Bridge Project on the Bridgeport-Monmouth County Road and the Dallas-Kings Valley Secondary Highway, Polk County, completed April 26, 1944.

Contract No. 2645, with A. H. Saxton & Son, for furnishing crushed rock in stockpiles on the Hebo Section of the Oregon Coast and Three Rivers Highways, in Tillamook County, completed on April 4, 1944.

Contract No. 2650, with Hord & Stuart, for rock and gravel revetment on the Oakridge Section of the Willamette Highway, in Lane County, completed on January 31, 1944.

Contract No. 2652, with E. C. Hall Co., for furnishing crushed materials in stockpiles on the Redmond-Marks Creek Section of the Ochoco Highway, in Crook and Deschutes Counties, completed on April 1, 1944.

Contract No. 2662, with Birkemeier & Saremal, for construction of the Milwaukie Pedestrian Overcrossing on the Pacific Highway East, in Clackamas County, completed May 6, 1944.

Contract No. 2676, with Rogers Construction Co., for furnishing crushed materials in stockpiles on the Garibaldi-Tillamook Air Base Section of the Oregon Coast Highway in Tillamook County, completed on April 25, 1944.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

A letter was presented from the Board of Directors of the Umatilla County Farm Bureau requesting the immediate opening of the Elgin-Tollgate (Weston-Elgin) Secondary Highway which is now closed by snow conditions. The Engineer advised that when this communication was first received, he had conditions investigated by Division Engineer Paul Van Scoy, who estimated that it would cost about $500 to open the road by May 15, the snow at that time being some 3 or 4 feet deep for a distance of about 10 miles. However, since then conditions have changed from natural causes and today's estimate to open the road is only about $50. In view of the report, the Commission instructed the Engineer to open the road immediately.

The Engineer brought up for discussion the desirability of changing the traffic signs at the intersection of the Corvallis-East Side Secondary Highway with Elm Street in the City of Albany. He pointed out that Elm Street is the old route of the Pacific Highway but was abandoned as such when the highway was reconstructed through Albany so that it no longer carries the volume of traffic that it did heretofore. The existing signs at the intersection, he said, require traffic along the Corvallis-East Side Highway to come to a stop before entering the Elm Street intersection. He recommended the designation of the Corvallis-East Side Secondary Highway a through highway and the reversal of the signs so as to require Elm Street traffic to stop before entering the same. The Commission concurred in the viewpoint of the Engineer and thereupon, by unanimous vote, adopted the following resolution with respect thereto:

WHEREAS, pursuant to resolution duly and regularly adopted by the Highway Commission and entered in the minutes and records of

the Commission as of the twenty-seventh day of April, 1943, the Highway Commission declared certain highways to be "through highways" under the provisions of Section 115-351, O. C. L. A., and directed the State Highway Engineer to erect and maintain along the said enumerated highways or sections of highways at all points where streets or roads intersect or enter said highway or sections of highway, except at such points as are specifically noted in said resolution, signs or markers notifying drivers of vehicles to stop before entering or crossing the designated through highways; and

WHEREAS, pursuant to said resolution Elm Street in the City of Albany where said street intersects the Corvallis-East Side Highway, sometimes known as Fifteenth Street, was made a through highway and traffic entering the intersection at Elm Street over the Corvallis-East Side Highway was required to come to a stop; and

WHEREAS, subsequent study and investigation has disclosed that because of the greater volume of traffic now using the Corvallis-East Side Highway said resolution should be amended so as to make the Corvallis-East Side Highway the through highway, and that Elm Street no longer be designated as a through highway.

NOW, THEREFORE, BE IT AND IT HEREBY IS ORDERED that the resolution adopted by the Commission under date of April 27, 1943, under the authority and provisions of Section 115-351, O. C. L. A., be and the same hereby is amended as follows:

1. The Corvallis-East Side Highway hereby is declared to be a through highway, and Elm Street where said street intersects the Corvallis-East Side Highway is hereby reclassified from a through highway to a secondary highway so far as volume of traffic is concerned.

2. The State Highway Engineer hereby is instructed to remove the stop signs heretofore erected on the Corvallis-East Side Highway where the same intersects Elm Street in the City of Albany, and install and thereafter maintain said signs on Elm Street where Elm Street is intersected by the Corvallis-East Side Highway.

3. The purpose of this resolution is to make the Corvallis-East Side Highway a through highway and require all traffic entering said highway over Elm Street or Elm Street extended to come to a stop before entering the intersection of the Corvallis-East Side Highway and Elm Street.

4. That this resolution be entered in the minutes and records of the Commission as of the 9th day of May, 1944.

The Commission confirmed the sale of an old tractor to the State Penitentiary for the sum of $350.00, authority for such sale having previously been given to the Engineer over the telephone.

The Commission by unanimous vote also confirmed the purchase of two portable paving plants from the Dallas Machine and Locomotive Works, Inc., at $16,500.00 each, being the amount of their bid submitted to the Board of Control following the March 28 meeting of the Highway Commission.

The Commission likewise confirmed the oral authority previously given the Engineer to purchase an automobile costing about $1,700.00 for use by himself and the Assistant Highway Engineer.

The Engineer requested authority to purchase one single-drum hoist for a truck assigned to the Bridge Department. He estimated the cost at $300 and advised that the hoist is to replace one worn out in service. The Commission approved the request unanimously.

The Engineer asked the Commission to confirm the oral authority heretofore granted Assistant Maintenance Engineer, W. W. Stiffler, to attend a logging conference in Montana on March 30, 1944, at state expense. He advised that it is customary to record such authorizations in the minute book which is the reason for bringing it up at this time. The Commission approved such expense by unanimous vote. The Engineer was instructed to furnish each member of the Commission a copy of Mr. Stiffler's report on the conference.

The Commission had under discussion the adoption of a policy with respect to the furnishing of plans and proposal forms to prospective bidders and to others, for highway construction projects. The matter was discussed at some length and, as a result, the Commission decided to make a definite charge of $2.00 for each set of plans except that no charge will be made for plans and specifications furnished the Associated General Contractors Association. The Commission ordered that a record of the costs be kept for a year or so in order to determine whether or not a $2.00 charge is proper, it being the idea of the Commission that the charge would be either increased or decreased according to the findings.

A letter was presented from Mr. R. T. Moore, President of the Moore Mill and Lumber Company, Bandon, urging the Commission to grant the same tolerances to parties engaged in the truck hauling of green lumber that are granted parties engaged in the transportation of logs, which consideration, he alleges, will greatly facilitate the movement of lumber needed for wartime purposes. The Commission denied the request as a matter of policy, however, instructed the Attorney to furnish a written opinion on the Commission's authority in such matter.

The Engineer requested instructions whether or not to start suit to collect rental from Contractors Hauser- Malcom- Tieslau for the use of certain state-owned equipment which they obtained under rental agreement. He advised that the contractors rented the equipment in August, 1942 and, under the provisions of the agreement, should have paid $770.00 for the use of same.

However, payment of only $245.00 has been made, the contractor alleging that some of the equipment was in such condition that he could not use it so should not be required to pay rental for it. He further advised that the bond furnished by the contractor as a guarantee of the payment of the rental charge has been released, so, in order to collect the balance due, it would be necessary to institute a lawsuit. He recommended in view of the circumstances, that the contractor be relieved from payment of the balance due. The Commission approved the recommendation.

The Attorney requested instructions whether to press the State's claim against a Mr. Lowell Hallock for damaging the Riverside Canyon Bridge at Oswego. He advised that the damage occurred when Mr. Hallock drove his car into a bridge railing; but Mr. Hallock alleges that he is not responsible because he was ill, fainted, and lost control of his car; and his insurance company is using that as one of the arguments in refuting the claim. He further advised that he is in receipt of a letter from the doctor who attended Mr. Hallock immediately following the accident in which the doctor states that there is no question but what Mr. Hallock was ill at the time because his temperature was tested and found to be 104 degrees, which is very good evidence that Mr. Hallock's statements are true. After discussion, the Commission decided that it would be useless to attempt to collect the claim and accordingly instructed the Attorney to do nothing further with it.

The Attorney also brought up for discussion the Commission's claim against the U. S. Army for damaging the Canyon Creek Bridge on the Pacific Highway at mile post 236.53. He advised that the amount of the claim is small and that indications are that the government will pay it if the Commission will comply with certain governmental requirements which include the signing of releases and other papers in connection with the settlement. He requested authority to sign these papers in behalf of the Commission. The Commission approved the request and thereupon by unanimous vote adopted the following resolution with regard thereto:

> RESOLVED, that J. M. Devers, as Chief Counsel of the Oregon State Highway Commission, be and he hereby is authorized and empowered to present to the United States of America, the United States Army or the proper governmental agency, the claim of the State of Oregon, by and through its State Highway Commission, for reimbursement for damage done to the bridge across Canyon Creek on the Pacific Highway at mile post 236.53 on April 24, 1943, and the said Chief Counsel is further authorized to sign for this Commission all necessary papers in the presentation of said claim, and likewise sign all necessary releases or other papers necessary or required in connection with the presentation and settlement of said claim.

The Secretary presented printed announcement from the Secretary of Commerce acting on behalf of the War Damage Corporation that all War Damage Corporation Insurance in force on March 31, 1944 will be considered by the War Damage Corporation as having been automatically extended for an additional

term of 12 months, beginning with noon of the expiration date shown on the respective policies, without payment of premium or other charge whatsoever. He also presented a statement showing the amount of War Damage Insurance owned by the State Highway Commission which comes within this category, totaling $19,405,964.28. The Commission took no action on the matter.

The meeting adjourned at 5:00 p. m. until 9:00 a. m. on the following morning.

Portland, Oregon, May 10, 1944

The State Highway Commission reconvened in regular session at 9:00 a. m. in the Stock Exchange Room of the Imperial Hotel. All members of the Commission, the Engineer, the Attorney, and the Secretary were present. Bids as follows for construction projects, sale of buildings, obsolete equipment and an accumulation of logs were opened and read in conformity with previously published notices following which Chairman Banfield announced that the awards would be made at 3:00 p. m. in the same room.

LAKEVIEW AIRFIELD ACCESS ROAD PROJECT

Babler and Conley, Portland	$37,816.00
Leonard & Slate, Portland	42,265.00
Western Rock Company, Salem	43,981.00
T. W. Thomas, Portland	54,090.00
Natt McDougal Company, Portland	55,276.00

KLAMATH FALLS-LAKEVIEW AND FREMONT HIGHWAYS
LAKEVIEW ROCK PRODUCTION PROJECT

M. C. Linninger & Sons, Medford	$36,750.00
T. W. Thomas, Portland	39,750.00
Western Rock Company, Salem	43,350.00
Babler & Conley, Portland	51,750.00

OLD OREGON TRAIL HIGHWAY
MEACHAM-LA GRANDE ROCK PRODUCTION PROJECT

Western Rock Company, Salem	$21,983.00
Northwest Development Company, La Grande	24,543.60
R. O. Dail, Portland	29,398.00

TRACT OF LAND SOUTH OF SALEM

	Proposal No. 1 (Cash Price)	Proposal No. 2 (Terms)
Geo. F. Walgamot, Jefferson		$ 2,250.00
Hawkins & Roberts, Salem	$ 1,500.00	
Donald & Audrey Watson, Salem	550.00

RESIDENCE BUILDING AT FORFAR

Lee Halsey, Newport $ 25.00

PETROLEUM PUMP UNIT AT PORTLAND

H. C. Witham, Medford $ 15.00

LOGS ON MCTIMMONDS VALLEY ROAD

No bids received.

The Engineer explained for the benefit of the Commission the several matters concerning which delegations are to appear at this meeting. The Commission deferred its decision with respect thereto pending the conferences thereon.

A delegation from Nyssa consisting of Mr. Frank T. Morgan, Secretary of the Chamber of Commerce; Herschel J. Thompson, Mayor of Nyssa; Bernard T. Frost, Councilman, and Dale Garrison, Director of the Road District and Master of the Oregon Trail Grange, was present and requested state assistance in the improvement of certain city streets over which they propose to route truck traffic in order to eliminate a dangerous condition that exists at the junction of the Old Oregon Trail and the Jordan Valley Secondary Highway in front of their high school. Mr. Morgan headed the group.

He advised that the Old Oregon Trail and the Jordan Valley Secondary Highway come together at the west end of Main Street, directly in front of their high school building, causing a dangerous situation for school children which they believe can be eliminated to a very large extent by the rerouting of truck traffic on certain city streets. Moreover, it would eliminate the traffic congestion through their business district caused by trucks hauling sugar beets to the sugar factory on East Main Street, across the U. P. railroad tracks. They suggested that trucks entering the town from the Old Oregon Trail should be routed along Park Avenue to First Street, thence along First Street to Main Street, at the western end of the railroad undercrossing, and that trucks entering from the Jordan Valley Secondary Highway should be routed along King Avenue to First Street, thence along First Street to Main Street. They asked the Commission to designate and improve such streets as state secondary highways.

The Commission explained that it could not approve the request without establishing a very undesirable precedent that would eventually involve the Commission in heavy expenditures for similar improvements in every town throughout the state, and that available funds would not permit a program of that kind without seriously affecting improvements on state highways. Chairman Banfield pointed out that the Commission feels that its responsibility ceases with the construction and maintenance of state highway routes and that the improvement of city streets is a local problem. He suggested that the Commission might have its Engineer make certain investigations of the project that they have in mind but made it clear that if that were done, it would not commit the Commission in any way whatsoever as to construction.

Mr. Morgan inquired as to the plans of the Commission for the improvement of Main Street. He recalled that the former Highway Commission promised to oil this street and to install sewers therein. He was informed by Chairman Banfield that the present Commission has no knowledge of this obligation but will have the records checked. The Secretary was thereupon instructed to make such check of the records and furnish each member of the Commission with a copy thereof.

Mr. Garrison inquired whether or not it would be possible to obtain state equipment to do the oiling work on the proposed truck detour and if the City could accumulate for a couple of years the monies that it receives under the State Tax Street Fund Law so as to have enough money on hand to pay for the work. He said that the City would do the work if it could obtain the necessary equipment. He was informed by the Commission's Attorney that the City could hold such funds indefinitely if it filed with the Highway Commission a formal request as required by law. He was instructed by the Commission to see that the City is supplied with the proper forms. The Engineer advised that, so far as performance of the work is concerned, the Commission previously authorized him to assist the cities insofar as is possible with the equipment and crews that are available and that he will be pleased to see what can be done in Nyssa.

After further discussion of this matter, the Commission instructed the Engineer to investigate the City's problem and to prepare an estimate of the cost of performing the work.

Mr. Garrison then asked the Commission to improve the county road which extends from the Nyssa-Adrian Secondary Highway to Overstreet Siding on the Union Pacific Railroad, about 3 miles north of the Town of Adrian. He said that this is a county road, but the county does not have the funds to finance the improvement, which is about ½ mile in length; and the improvement is badly needed in order to facilitate the movement of trucks hauling beets from the highway to the unloading point. He was informed by Chairman Banfield that it is contrary to the policy of the Highway Commission to perform such work on county roads and that due to the limited amount of funds that the Commission has at its disposal, it has adopted the policy that will not permit the placing of additional roads on the state highway system. The Commission must adhere to this policy, he said, otherwise serious consequences will result. Commissioner Schaupp suggested that the county court could finance the improvement using some of the gasoline tax money that it receives from the state. The delegation agreed to look into that feature. This concluded the conference.

Reconsideration was given by the Commission to the restrictions contained in the deed from the Pilot Rock Lumber Company conveying to the state a recreational area adjacent to the Pendleton-John Day Highway in Umatilla County. The Assistant Attorney exhibited a map of the area as instructed by the Commission on the previous day and presented additional facts as requested at that time. After discussion during which the Commission indicated a reluctance to accept a deed with restrictions of any kind, it was decided to complete the purchase on the basis of granting the company special privileges for 30 years rather than for 20 years as was approved by the former Commission.

Motion to that effect was made by Commissioner Schaupp, seconded by Commissioner Chessman and carried by the unanimous vote of the Commission.

The Attorney requested instructions with regard to acquiring right of way for the proposed construction of the Lakeview Airport Access Road, bids for which were received by the Commission at this meeting. He advised that the Lake County Court is obligated to the federal government to acquire the right of way, but it appears that it has encountered difficulties and has asked the state for assistance. He inquired whether or not he should help the County, indications being that the case will have to be tried out in court as a condemnation proceeding. He explained, however, that the cost of the right of way would be paid by the government, which would reimburse the state for any advances made therefor. The Commission deferred a decision of the matter pending receipt of the tabulation of the bids received on this project. (The Commission later in the session authorized the Attorney to help the County and to condemn the property in the name of the State if necessary. See ahead for details.)

A delegation from Douglas County consisting of County Judge D. N. Busenbark; Percy Croft, Roseburg City Councilman; H. C. Wells, Vice President of the Pacific Highway Association and Harold Hickerson, Secretary of the Roseburg Chamber of Commerce, was present in regard to log hauling and the improvement of the North Umpqua County Road connection with the Pacific Highway in Roseburg, to facilitate such operations. Judge Busenbark headed the group.

He advised that the Highway Commission has issued numerous permits for transportation of overlength loads over state highways in Douglas County most of which loads originate in timbered districts adjacent to county roads and have to be transported over county roads in order to reach the state highway. The operators, he said, are using the Highway Commission's permits as their authority to transport the loads over county roads, which not only causes the County Court considerable trouble but creates an undesirable hazard to other county road traffic because the county roads are not built to the same standard as the state highways and the movements cannot be accomplished without taking up most of the roadway at curves. He particularly referred to loads that come into the state highway at Sutherlin involving over-all lengths of 85 feet. He advised that the County Court has set a limit of 60 feet for log movements over county roads and suggested that the Commission set a limit not to exceed 65 feet over-all length for logs that are transported over state highways in Douglas County; also, that the County Court be consulted before even such permits are granted.

It was explained to Judge Busenbark that the Highway Commission's permits are limited to operations over state highways and that the Commission has no desire or intention to control such operations over county roads regardless of the contention of the log haulers. Moreover, each permit contains a description of the section of state highway over which the movement is authorized. The Commission's Attorney advised that the law as written does not authorize the Highway Commission to do what Judge Busenbark asks. During the discussion it was suggested that desired results might be obtained if the permits issued by the State Highway Department were to contain a clause stating

clearly that the privileges granted therein are for movements over state highways only, and that where the movements are over county roads an additional permit must be obtained from the county court which has jurisdiction, also if a copy of each permit were furnished the county court of the county in which the operations of the permittee are being carried on. Judge Busenbark stated his approval of the suggestionwas did also the members of the Highway Commission by unanimous vote. The Secretary was instructed to hereafter prepare and handle all log hauling permits in conformity therewith.

Mr. Croft brought up the matter of improving the connection between the North Umpqua Road and the Pacific Highway, in Roseburg. He advised that extensive logging operations are being carried on in the upper reaches of the North Umpqua River and that the logs are truck-hauled into Roseburg over the North Umpqua Road, which has a very poor connection with the Pacific Highway involving several right-angle turns where on several occasions logs have fallen from the loads endangering pedestrian and other highway traffic. He suggested that this could be eliminated by extending the North Umpqua Road from its intersection with North Jackson Street directly west to a connection with the Pacific Highway, a distance of about one block, which would make it possible for the logs to be hauled directly to the mill south of Roseburg without passing through the city's business district. The State Highway Engineer exhibited maps showing the connection proposed by Mr. Croft and another proposed connection near the north city limits utilizing North Winchester Street, which is planned to serve traffic destined from the North Umpqua Road to points north of Roseburg. He explained details in connection with both projects, including a plan of traffic channelization. He estimated that the state's share of the cost of both jobs would be between $20,000 and $30,000. He pointed out that while the North Umpqua Road is a county road under the jurisdiction of the Douglas County Court, it very likely will be designated as a state highway at some future date, in view of which he believes that the State Highway Commission is concerned with its connection with the Pacific Highway to such an extent that it could cooperate with the City and the County in accomplishing this improvement. He recommended approval of both projects on the basis of the state's performing and paying for the work required on the state highway right of way and the City and the County being responsible for the work beyond such limit.

As a result of discussion, the Commission by unanimous vote authorized the Engineer to proceed with the construction of the North Winchester Street connection immediately and to do what is required on the state highway right of way in connection with the other project if Douglas County and the City of Roseburg construct the portion off the state highway right of way.

The Engineer presented information concerning the proposed Foster Road Development, Portland, which recently has been revived by certain Portland interests. He read aloud his report dated October 5, 1935 to the former Highway Commission on this subject, and pointed out his recommendation at that time which was that the present highway be improved before the Foster Road Extension is undertaken notwithstanding that the report shows that there is some justification for the Foster Road Project. He advised that he is of the same opinion today as he was at that time. The Commission took no action on this report.

Lieutenant G. A. Gentry and Warrant Officer L. Wiemer, representing the United States Coast Guard, came before the Commission in regard to the construction of a telephone pole line along the right of way of the Oregon Coast Highway between Newport and Florence. Lieutenant Gentry advised that the Coast Guard has entered into an agreement with the Waldport Telephone Company, which has a permit from the Highway Commission to maintain its poles along this section of the highway, for a joint use of poles; but it so happens that for a short distance both north and south of the Town of Yachats the Waldport Telephone Company occupies the poles jointly with the West Coast Power Company, so along this section the Coast Guard will have to obtain another location for its poles in order to eliminate inductive interference. He requested authority for the Coast Guard to maintain its pole line along the westerly side of the highway at this location. The Engineer recalled the policy adopted by the former Highway Commission which prohibits pole line construction on the ocean side of the highway in this locality because of interference with the scenic view. He gave as his thought that the Commission should not deviate from this policy but reserved a definite recommendation until he has had an opportunity to personally inspect the premises. In view of the Engineer's statements, the Commission deferred a decision on the matter pending receipt of the Engineer's report. The Engineer was instructed to make such inspection jointly with Lieutenant Gentry at a convenient date in the future. This arrangement was agreeable with Lieutenant Gentry.

The Engineer brought up for discussion a request from the Federal Public Housing Authority for the construction of a pedestrian underpass across Denver Avenue, Portland, (Pacific Highway West) for the convenience and safety of school children and other pedestrians who are obliged to cross this highway between Vanport City and East Vanport. It was alleged that from 200 to 300 children cross this highway at least twice a day and in addition thereto there is a considerable volume of pedestrian traffic that originates from bus travel; and unless protective measures are taken, serious accidents will result. The Engineer submitted a plan of the proposed undercrossing which he estimated would cost between $7,000 and $8,500, according to whether treated or untreated lumber were used, and advised that the Housing Authority wants the State to contribute toward the cost of construction because it does not have available sufficient funds to pay the entire expense. He gave as his thought that this is a Federal obligation and that the State should not be required to pay any of the costs. He recommended that the Housing Authority be given permission to construct the underpass on the highway right of way if it wants to, subject to his supervision, and will assume all costs in connection therewith. The Commission approved the recommendation unanimously.

The Engineer requested authority to attend at state expense a meeting of the Board of Directors of the American Association of State Highway Officials of which he is a member in Chicago on June 22, 1944 when matters of importance to the State of Oregon are to be discussed. He estimated that his expenses would not exceed $300.00. The Commission approved the request by unanimous vote, subject to approval by the Governor of the out-of-state travel expense.

A delegation from Salem consisting of County Judge Grant Murphy, Paul Wallace and Ernest Miller, members of the Salem Chamber of Commerce, was

present regarding the completion of the North Santiam Highway between Niagara and Detroit, and the construction of a new bridge over the Willamette River at Salem. Judge Murphy headed the group.

He spoke in behalf of the North Santiam Highway improvement and presented petitions from the following cities: Salem, Dallas, Hillsboro, Independence, Mt. Angel, Oregon City, Rainier, Silverton, Taft and Tillamook urging the Commission to adopt and designate as a state secondary highway the section of this road between Niagara and Detroit which is still under the jurisdiction of Marion County. He recalled the agreement between the County Court and the State Highway Commission for the maintenance of this section and advised that the Court is satisfied to continue under the arrangement and is simply bringing the matter to the attention of the Commission at this time because of the petitions of the other localities. Judge Murphy also advised that Army Engineers are now making soundings at the site of the proposed dam across the North Santiam River with the view in mind that the dam will be constructed immediately following the war. He gave as his thought that now would be a good time for the State Highway Commission to acquire the right of way and offered in connection therewith the right of way of the existing county road for exchange purposes. The Engineer advised that arrangements have already been made among the State, Public Roads Administration, U. S. Forest Service and the Army Engineers for the construction of the new highway when the war is over. Chairman Banfield remarked that the matter appears to be very well taken care of for the time being, so, in his estimation, no good would be accomplished by doing anything more at the present time.

Mr. Wallace then brought up for discussion the matter of constructing a new bridge over the Willamette River at Salem. He presented a letter from the Salem Chamber of Commerce urgently requesting such a new structure on a site to be selected by the Highway Commission, and that the existing bridge be dismantled and re-established at Independence as a part of the proposed short-cut highway between Salem and Independence, the work on this latter project to be financed as a cooperative venture among the State and Marion and Polk Counties. Mr. Wallace advised that their principal reason for bringing the matter to the attention of the Commission at this time was to ask the Commission to authorize a survey of the project without obligation whatsoever as to construction. The Engineer estimated that it would cost about $7,500 to make the survey. Chairman Banfield advised that the Commission is not in position now to make a definite decision but will take the matter under advisement and will let the delegation know later of the action taken. This concluded the conference. The matter was discussed further after the delegation's departure at which time the Commission decided unanimously not to authorize a survey at this time because of the many commitments that it now has to similar survey projects. The Commission indicated, however, that it might reconsider the matter when it is known just how much money Oregon is to receive under the Postwar Construction Bill that is now pending in Congress.

The Commission resumed discussion of the request of the U. S. Maritime Commission for permission to use certain state- city-owned property adjacent to Front Street, Portland, in connection with the repair of ships. As a result thereof, Commissioner Schaupp moved that the matter be referred to Chairman Banfield with full power to act in behalf of the Commission. The motion was seconded by Commissioner Chessman and carried unanimously.

In this connection the question arose how to credit the revenues derived from the property in the event it is leased for a consideration. The Commission decided unanimously to credit such revenue 60% to the City of Portland and 40% to the State. The City's share,however, is to be turned over to the State until such time as the City's entire obligation with respect to the Front Avenue Project has been satisfied. Such procedure is to be followed in connection with revenues received in connection with the sale or lease of other state- city-owned property acquired in connection with the Front Avenue improvement. The Attorney was instructed to prepare an appropriate form of agreement with the city covering the matter.

Commissioner Chessman brought up for discussion matters pertaining to highway stop signs at railroad crossings, particularly the removal of such signs as are considered unnecessary. The Engineer advised that the Public Utilities Commissioner is making a detailed investigation of all such signs throughout the state and gave as his thought that it would be advisable for the Commission to defer taking action until a copy of the Public Utilities Commissioner's report has been received. He was instructed to keep the Commission informed of the progress of this matter.

The Engineer requested authority to make a location survey for an access road to a clay deposit in Lane County which is a proposed source of materials to be used in connection with the Aluminum Manufacturing Plant in Salem. He said that the cost involved would not be great and that the federal government would reimburse the State for advances made in connection therewith. The Commission approved the request.

The Commission recessed for lunch at 12:00 noon and reconvened at 2:00 p.m., the same persons being present and participating.

Dr. John C. Merriam, former President of Carnegie Institute and now a member of the faculty of the University of Oregon, and Chancellor F. M. Hunter, of the Board of Higher Education, came before the Commission at this time in regard to the proposed park in the fossil area of the John Day Valley, and the University's program with respect to such area and other similar projects. Dr. Merriam gave a very enlightening talk on the subject, outlining in considerable detail just what already has been done and what is planned for the future, including the appointment of an advisory group consisting of some of the best authorities in the country on this subject. The proposed John Day

Fossil Park, he said, is not only of interest to the people of the State of Oregon but is a laboratory for the people of the entire world who will flock to this place to carry on research work. He further stated that the University is now preparing a manuscript which will be published in simple language later on for general public use. The Board of Education, he said, has gone as far as it can with the project until the State Highway Commission determines just what property it intends to acquire. He advised that he is in full accord with the State Parks Superintendent, Mr. S. H. Boardman, concerning such properties. Chancellor Hunter advised that the State Board of Education has approved Dr. Merriam's plan and will support him in every way.

Chairman Banfield pointed out that the Highway Commission inspected the John Day Fossil Area on its trip through Eastern Oregon last summer and was very much impressed with the program outlined by the Parks Superintendent for the preservation of the fossil beds. As a result of this trip, he advised, the Commission has authorized the Parks Superintendent to make a survey of the district to ascertain and report the outstanding tracts that should be purchased by the Commission with its limited means. The Commission has gone as far as it can, he added, until this report has been rendered. He suggested that Dr. Meriam follow up the matter with the Parks Superintendent. He expressed appreciation for Dr. Merriam's interest in the matter and for his efforts to date in behalf of this project. This concluded the conference.

Messrs. Alfred A. Loeb, Thornton Munger and Arthur Moulton, representing the Recreational Committee of the Portland Chamber of Commerce, came before the Commission at this time in support of the Committee's previous request for the development of wayside picnic spots along Oregon highways for the benefit of tourists. Mr. Loeb headed the group.

They urged the Commission to arrange a program for the developement of such areas at 20 mile intervals, particularly along the main traveled highways.

Chairman Banfield pointed out that there are some 7,000 miles of highways on the state highway system and if the Highway Commission should embark on a program of constructing a picnic spot every 20 miles, the cost of development would run into a very large figure, moreover, the maintenance expense would be enormous and much more than the Highway Commission could stand. He did not believe that the expense is justified. It was his thought that the Commission must give its greatest concern to the people who are traveling to a destination without regard to stopping places and that the development of picnic sites is a matter for public education and approval before expenditures are made for such purposes. Commissioner Chessman stated that the Highway Commission is in agreement with a movement of this kind but cannot do anything about it at this time because of lack of funds with which to finance the program. He expressed appreciation for the interest that the civic organizations have taken in the matter. Messrs. Munger and Moulton also spoke in behalf of the project.

The Commission discussed with the Engineer the bids received at the morning session and decided to award the contract for the Meacham-La Grande

Rock Production Project on the Old Oregon Trail to the Western Rock Company which submitted the low bid therefor. The bids received for the construction of the Lakeview Airport Access Road Project and for the Lakeview Rock Production Project were referred by the Commission to the Engineer with authority to award the contract to the low bidder in each instance when certain conditions have been satisfied. The Commission accepted the offer of Geo. F. Walgamot, Jefferson, for the purchase of a tract of land and buildings located thereon south of Salem. The Commission rejected the bids received for the residence building at Forfar, south of Newport, and for the petroleum pump at Portland.

At 3:00 p. m. Chairman Banfield made the following public announcement of the awards:

"Lakeview Airport Access Road Project in Lake County. The Commission received five bids for the construction of this project, the low one being that of Babler and Conley, Portland, at $37,816.00. The second low bid was that of Leonard & Slate, Portland, at $42,265.00. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Lakeview Rock Production Project on the Klamath Falls-Lakeview and Fremont Highways in Lake County. The low bid for this work was submitted by M. C. Lininger & Sons, Medford, at $36,750.00. The next low bid was that submitted by T. W. Thomas, Portland, at $39,750.00. There were two higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Meacham-La Grande Rock Production Project on the Old Oregon Trail in Umatilla and Union Counties. Western Rock Company, Salem, submitted the low bid for this job at $21,983.00. Northwest Development Company, La Grande, was the next low bidder at $24,543.60. Third low and only other bidder was R. O. Dail, Portland, at $29,398.00. The Commission has awarded the contract to the low bidder, Western Rock Company at its low bid of $21,983.00.

"Sale of the tract of land and buildings adjacent to the Pacific Highway south of Salem. The high bid was submitted by Geo. F. Walgamot, Jefferson, in the amount of $2,250.00 under Proposal No. 2, with terms. Hawkins and Roberts, Salem submitted the next high bid in the amount of $1,500.00, under Proposal No. 1. Donald and Audrey Watson, Salem, submitted a cash offer of $550.00. The Commission has accepted the offer of Geo. F. Walgamot at $2,250.00, with terms.

"Sale of a residence building at Forfar, south of Newport. The only bid received for the purchase of this building was that of Lee Halsey, Newport, at $25.00. The Commission has rejected this bid.

"Sale of a petroleum pump unit at Portland. H. C. Witham, Medford, submitted an offer of $15.00 for this equipment. This was the only offer received and has been rejected by the Commission.

"Sale of logs on McTimmonds Valley Road, Polk County. The Commission received no bids for this material and has authorized the Engineer to negotiate the private sale of the logs."

Reconsideration was given by the Commission to the matter of authorizing the Attorney to condemn certain right of way needed for the Lakeview Airfield Access Road Project. Due to the fact that a satisfactory bid was received at this meeting for the construction work involved, the Commission considered it advisable for the Attorney to assist the Lake County Court in the condemnation proceedings. The following resolution with regard thereto was adopted by the Commission by unanimous vote upon motion by Commissioner Schaupp which was seconded by Commissioner Chessman:

WHEREAS, the United States of America has selected, designated, and established in Lake County, Oregon, for development and use in connection with national defense an area or project to be and which is known as the Lakeview Airport Station; and

WHEREAS, for the purpose of providing access to said Airport Station from the Klamath Falls-Lakeview Highway, as well as from an existing county road, the United States of America has designated a route over which to construct an access road to be used in connection with the use and employment of said Station; and

WHEREAS, the Public Roads Administration, for and on behalf of the United States of America, has requested the Oregon State Highway Commission to procure by purchase, agreement, or by the exercise of the power of eminent domain real properties needed in connection with the construction of said access road; and

WHEREAS, under and pursuant to the provisions of Chapter 198, Oregon Laws, 1943, the Oregon State Highway Commission is authorized to cooperate with the United States of America and/or with any of its agencies or representatives in the making of surveys, plans, specifications, and estimates and in the construction, reconstruction, and the maintenance of roads and bridges necessary to provide access to military and naval reservations and other defense activities, and by said law the Commission is authorized to procure necessary real properties needed in connection with the development, construction, and maintenance of airfields and access roads; and

WHEREAS, the Highway Commission after due consideration has found and determined that the real property hereinafter described is necessary and the acquisition of the same will be of advantage to the State of Oregon and to the United States of America in connection with the construction and maintenance of said access road;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Oregon State Highway Commission, all members being present and affirmatively voting:

1. That this Commission does hereby find and declare that the real property hereinafter described is necessary for the construction, maintenance, and use of an access road connecting the Klamath Falls-Lakeview Highway with the Lakeview Airport Station for the service of defense agencies which will have occasion to and which will use the said Airport Station.

2. That the real property required and hereby found and declared to be necessary for and in connection with the construction of said access road is described as follows, to wit:

A parcel of land lying in the west half ($W\frac{1}{2}$) of Section 17, Township 39 South, Range 20 East, W. M., Lake County, Oregon; the said parcel being described as follows:

Beginning at the southwest corner of Section 17, Township 39 South, Range 20 East, W. M., in Lake County, Oregon; said corner being 7.5 feet east of the center line of the Lakeview Airport Access Road at Engineer's Station 53+89.8; thence north, along the section line between Sections 17 and 18, Township 39 South, Range 20 East, W. M., a distance of 5321.7 feet to a point on the south right of way line of the Klamath Falls-Lakeview Highway, which point is 1.0 foot west of the center line of the said access road at Engineer's Station 0+68; thence east, along said highway right of way line, a distance of 42.5 feet; thence south, parallel to the west line of said Section 17, a distance of 5321.7 feet to the south line of said Section 17; thence west, along the said south line of said section, a distance of 42.5 feet to the point of beginning; containing 5.19 acres.

3. That George Neuner, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, hereby are authorized and requested to negotiate with the owner or owners of said real property for the purpose of acquiring the same by agreement, and if said real property cannot be acquired by agreement then the said George Neuner and J. M. Devers hereby are instructed to institute and prosecute to final determination a condemnation action for the purpose of acquiring title to said property and for the further purpose of having the compensation to be paid therefor determined by a jury.

4. That this resolution be entered in full in the minutes and records of this Commission as of the tenth day of May, 1944.

MAY 10 1944

Reconsideration was also given by the Commission to the signing of a joint agreement with the City of Klamath Falls and the County Court of Klamath County concerning the development of the roadsides adjacent to the new highway location through Klamath Falls. After discussion, the Commission by unanimous vote decided to join with the City and the County in this undertaking and thereupon signed the agreement covering the matter.

The Commission had under discussion the setting of a date for its next meeting for the receiving of bids and decided to hold such meeting in Portland on Tuesday and Wednesday, June 13 and 14, 1944, the June 13 session to be in the afternoon only, starting at 1:30 p. m. The Secretary was instructed to make the usual arrangements to hold the meeting in the Stock Exchange Room of the Imperial Hotel.

The Commission considered and signed agreements, etc, as follows:

Agreement with William G. Folsom covering rental of state property near Mapleton.

Agreement with the City of Klamath Falls and Klamath County with respect to the development of waysides along the newly adopted highway location through Klamath Falls.

Quitclaim deed conveying unto the Southern Pacific Company 675 sq. ft. of land in Eugene as per agreement of October 17, 1941.

Letter directed to W. H. Horning cancelling certain recreational leases in Lane County.

Letter directed to W. H. Horning cancelling a recreational lease in Jackson County.

Conditional approval of the petition filed with the Public Utilities Commissioner by the O. W. R. & N. Company and the U. P. Company to construct additional tracks at grade across certain streets in Pendleton.

Petition directed to Western Irrigation District, Umatilla County, for exclusion of certain state land from the District.

Resolution designating the Corvallis-East Side Secondary Highway a through highway.

Ground lease covering acquisition of a stock pile site from Charles M. Ross at St. Helens.

Ground lease covering the acquisition of stock pile site from John Hagelstein in Klamath County.

Ground lease covering acquisition of a quarry site from Leonard Caverhill in Grant County.

12037

Lease for road materials covering gravel pit acquired from Mary B. Knight.

There being no further business to come before the Commission at this time, the meeting adjourned at 3:15 p. m.

T. H. Banfield
Chairman

State Highway Engineer

A. W. Schaupp
Commissioner

Secretary

M. R. Chessman
Commissioner

Portland, Oregon, June 13, 1944.

The State Highway Commission met in regular session at 1:30 p. m. in Room 615 Imperial Hotel with the following present and participating:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

The Commission by unanimous vote approved the minutes of the meeting held on May 9 and 10, 1944, subject to two changes requested by Chairman Banfield.

The Engineer presented the following park matters in behalf of the State Parks Superintendent, who was unable to be present on account of illness:

Acquisition of land proposed for a state park in the John Day fossil area:- The Engineer submitted a map showing the area adjacent to the John Day Highway between Valade Ranch and Turtle Cove which the Parks Superintendent recommends be acquired for this park. The

area is described as Sections 31 and 32, Township 11 South, Range 26 East, W. M., and Sections 5, 6, 7, 8, 17, 18, 19 and 20 of Township 12 South, Range 26 East, W. M., consisting of some 5,000 acres exclusive of farm land. Of this area, approximately 2,000 acres is government land and 3,000 acres is privately owned. Mr. Boardman's plan, he said, is to acquire all of the government-owned land and the private land that is not being used for farming purposes and to reserve to the present owners by lease or otherwise, if necessary, the grazing privileges that they now enjoy on the privately-owned land. In this connection, the Engineer presented a letter from Dr. John C. Merriam concurring in the Parks Superintendent's selection of the tracts to be included in this proposed park. The Engineer stated his concurrence in the Parks Superintendent's recommendation that the Attorney be authorized to negotiate the acquisition of these lands with the view of completing the purchases under the new budget set-up in 1945. As a result of discussion, Commissioner Chessman suggested that the Attorney be authorized to make a preliminary investigation to determine approximately how much the property will cost. The suggestion was approved by Chairman Banfield and Commissioner Schaupp, and it was so ordered subject to the condition, however, that the investigation is to be made without obligation on the part of the Commission to complete the purchase of the property, and that no options are to be obtained now.

Proposed 80-acre addition to Silver Creek Falls State Park:- The Engineer advised that when the present park was acquired, due to circumstances beyond the former Commission's control, the 80-acre tract which includes the Upper North Falls was not purchased although it really should have been acquired to fill out the park. He further advised that the Parks Superintendent has received information to the effect that the timber on this area is now being cut, and in order to preserve it the Parks Superintendent wants authority to secure an option to purchase the tract. He quoted the Parks Superintendent as saying that it is essential that this area be acquired in order to protect and round out the present park, and that the 80 acres could possibly be bought for about $5,000. In order to finance the acquisition of this tract and other unforeseen projects, he added, the Parks Superintendent has suggested the utilization of the $20,000 tentatively included in the 1944 budget for acquisition of the John Day fossil area. After discussion, the Commission authorized the Attorney to ascertain how much the Silver Creek Falls tract will cost. The Commission also decided unanimously not to make any changes in the 1944 budget at this time.

Offer of Seneca Fouts, Portland, to deed to the state as a gift 160-acre tract near the Columbia River Highway at Mitchell Point:- The Engineer advised that in 1930 Mr. Fouts wanted the state to purchase this property for $12,500, but the offer was declined, and again in 1943 Mr. Fouts offered to sell it for $5,000, but the Commission also declined this offer. Mr. Fouts, he said, now offers to deed the property to the state without charge if the

state will develop it as a state park and will name it Seneca Fouts Memorial State Park. In this connection, he pointed out that the tract lies about 1/4 mile from the highway and suggested, if the gift is accepted, that it would be desirable to acquire also the intervening property consisting of two additional 40-acre tracts. He recommended acceptance of Mr. Fouts's offer and the purchase of the intervening property. After discussion, motion was made by Commissioner Schaupp that the Commission accept Mr. Fouts's offer on the condition that the Commission is not obligated to develop the property, and that the park be named in honor of Mr. Fouts as requested. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission. The Commission referred to the Attorney the matter of acquiring the other 40-acre tracts with instructions to ascertain how much they will cost. (The Seneca Fouts gift is described as follows: The south half of the southeast quarter (SE¼) and the northwest quarter (NW¼) of the southeast quarter (SE¼) and the northeast quarter (NE¼) of the southwest quarter (SW¼) of Section 31, Township 3 North, Range 10 East, W. M. The other two 40-acre tracts are described as follows: The southeast quarter (SE¼) of the northwest quarter (NW¼) and the southwest quarter (SW¼) of the northeast quarter (NE¼) of Section 31, Township 3 North, Range 10 East, W. M.)

Acquisition of 80-acre wayside strip adjacent to Klamath Falls-Lakeview Highway now under lease from Federal Government:- The Engineer advised that this tract is 23 miles east of Klamath Falls and has been under lease from the Federal Government since 1932, at an annual rental of $10.00. The State Parks Superintendent, he said, recommends the purchase of this property, but in order to do that, it will be necessary to secure the cooperation of the State Land Board which has signified its willingness to exchange other state lands for this property if the Highway Commission will pay the State Land Board an agreed sum per acre which he thought would not exceed $5.00, making a total of approximately $400.00 for the entire acreage. The Commission indicated approval of the transaction, but deferred a definite decision pending consultation with the State Land Board to ascertain how much the property is going to cost. Motion was made by Commissioner Schaupp that the matter be referred to the Attorney to discuss with the State Land Board. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission.

Parks Superintendent's monthly financial report:- The Engineer submitted on behalf of the Parks Superintendent the following report on expenditures by the State Parks Department during the period from January 1 to June 9, 1944:

Acquisition Funds Expended to
June 9, 1944

George Geisendorfer - Cascadia

6 monthly payments of $50				$300.00
Ocean Waysides - Lincoln County:				
Halsey	0.9	Ac.	$ 600.00	
Ruth Rice	3.2	"	800.00	
Katie Kirsch	7.00	"	1,750.00	
McClaskey	11.3	"	2,825.00	
				5,975.00
Lincoln Co.	.45	"		30.00
Wolf Creek Highway - Washington Co.				624.65
Camas Creek Wayside Timber - Umatilla Co:				
Oscar Hilbert	117.6	Ac.	1,176.00	
Nettie M. Davisson	155.	"	1,500.00	
Fayette Mettie			4,520.00	
				7,196.00
Theo. Sorensen - mineral rights				5.00
				$ 14,130.65

The Commission took no action on this report.

The Engineer brought up for discussion a request from the Associated General Contractors of America and labor organizations in Oregon for an increase in minimum rates paid labor in connection with State Highway contracts, so as to establish uniformity between the minimum wages specified by the Highway Commission and those specified by the U. S. Engineering Department and other Federal agencies. (See Engineer's letter to members of the State Highway Commission dated June 8, 1944, in general files for details.) As a result of discussion, it appeared to the Commission that there is no need for action on this matter now. Motion was thereupon made by Commissioner Chessman that action be deferred. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

The Engineer brought to the attention of the Commission the fact that Budget Chairman, Mr. George Aiken, had informed him that the United States Civil Service Commission has requested the posting of signs or posters warning State employees who receive salaries or wages from departments supported wholly or in part from Federal funds or loans, to refrain from political activity.

JUN 13 1944

After due consideration by the Commission, Commissioner Schaupp moved and Commissioner Chessman seconded the motion that the Engineer be instructed to cause the said poster or notices to be posted on bulletin boards in the several shops or offices maintained by the State Highway Commission, and be instructed further to add to said notices information to the effect that employees of the State Highway Department are subject to the provisions of the Congressional Act known as the "Hatch Act". The motion received the unanimous vote of the Commission and was by Chairman Banfield declared carried.

The Engineer requested instructions whether or not to release to the public Technical Bulletin No. 16, being a report on the Trans-Columbia River Interstate Bridge Studies, which is just off the press. The Commission by unanimous vote approved the release of the bulletin subject to the condition that the public is advised that it is an engineering report, and that the Highway Commission has as yet taken no action with respect to the recommendations contained therein. The following press release with respect thereto was approved by the Commission:

ENGINEERING REPORT ON TRANS-COLUMBIA RIVER
INTERSTATE BRIDGE STUDIES

Burwell Bantz, Director of Highways of Washington, and R. H. Baldock, State Highway Engineer of Oregon, have submitted a report of an economic analysis of the warrant or need of proposed bridges across the Columbia River connecting the Oregon and Washington highway networks and a study of the valuation of existing bridges spanning that stream.

The studies embrace in detail the actual and potential traffic between the states of Oregon and Washington at each of the sites studied, reconnaissance surveys to determine the cost of improvements, and studies of the valuation of the present toll bridges spanning the Columbia River. In each case, the benefits accruing to the public by reason of either the building of a new bridge or the purchase of the present toll bridge were evaluated. Likewise, the revenue accruing to the departments, through gasoline taxes, motor vehicle fees and other fees and taxes from traffic that would use the bridges, was determined in order to arrive at the relationship between the yearly revenue and the yearly amortization, maintenance and operation charges.

In other words, studies were made of the economic warrant and of the solvency of the improvements. The engineers report that there appears to be no economic warrant justifying the purchase of present toll bridges by the public. They further advise that the proposed crossings of the lower Columbia River appear to have no economic justification.

On the contrary, the proposed bridge at Seufert, immediately above The Dalles, according to the engineers' examination, has a high benefit cost ratio and appears to have considerable economic

justification. With respect to the proposed crossing near Biggs, the engineers advise that the benefits are not as large as can be obtained at the Seufert crossing, but it appears to have considerable economic warrant. The Paterson crossing would have to be subsidized almost entirely from other traffic. The crossing at Umatilla would appear feasible provided it be made a part of the proposed Umatilla dam.

The Highway Commission is giving study to the engineering recommendations but is taking no action on the report at this time.

The Commission had under discussion the revised bill (H.R.4915), that is now before Congress relating to postwar highway construction. The Engineer presented a copy of the bill which, he said, has been approved by the House Roads Committee. He pointed out that the bill reduces the amount of the appropriation 50% insofar as regular Federal funds are concerned but contains an amendment that provides Federal funds for Forest Highway construction which will help Oregon considerably. He gave as his thought that it would be advisable to bring this change to the attention of the public through the press, in view of the fact that so much publicity has been given this subject, and people throughout the State generally are anticipating more money in the postwar highway program than presently appears to be forthcoming. The Commission concurred in the Engineer's viewpoint, and thereupon by unanimous vote authorized the following press release relative thereto:

OREGON STATE HIGHWAY COMMISSION EXPLAINS LATEST DEVELOPMENT IN ROAD BILL

During the spring and summer of 1943, the State Highway Commission announced today, the newly appointed State Highway Commission made a trip around the state. The trip was made in order to confer with members of the county courts, with the administrative officials of the cities, with the chambers of commerce, and with other interested citizens, in an attempt to determine the will of the people with reference to the expenditure of the postwar highway funds.

Since no appropriations of federal funds were to be made for the duration of the war and the highways were subject to the strain and deterioration of wartime traffic, the Commission then believed that the Congress would make available a material sum of money to reconstruct the roads and to better the road transportation system of the nation which will be vitally needed in order to transport the goods and services in our postwar economy.

Before the trip was made, on April 7, 1943, the House Roads Committee of the Seventy-eighth Congress submitted a road bill

JUN 13 1944

known as H. R. 2426 which proposed the apportionment of one billion dollars per year for each of the three postwar years among the several states of the Union and called for the states' matching the federal funds on a ratio of 75% federal funds and 25% state funds. This would make a national road program of four billion dollars. Oregon's share, under this bill as then proposed, would have been approximately 15 million dollars per year. With Oregon match money this would amount to approximately 19 million dollars per year or a total of 57 million dollars for the three-year postwar period.

The hearings on the road bill were delayed for approximately one year. In order to give expression to the will of the people, the county courts, as representatives of the local people, were asked to submit a list of road projects on both the primary and secondary systems which, in their opinions, would accomplish the most good for their respective communities. In many cases, the counties asked for the same improvement, indicating the realization of the people of the state-wide need of certain improvements. The Commission gave very careful consideration to these recommendations and has carried on surveys and purchased considerable right of way to the end that this state would be ready to contract road projects immediately when the war ends in order to build the needed road facilities which have deteriorated under the stress of war traffic and to give employment to returned soldiers and displaced war workers.

It has been impossible, of course, for the Commission to formulate a program in complete detail until the bill is passed by the Congress and the amount of money and the terms and conditions under which it is to be expended are definitely known.

The hearings were finally held during March and April of the current year, after which the Roads Committee went into executive session and finally came out with a road bill which would reduce the authorization from one billion dollars per year to one-half billion dollars for each of the three postwar years. In addition, the new bill increases the states' matching share to approximately 50%. In consequence, if the bill passes in its revised form, the state highway program will be substantially half of the amount originally contemplated. There is, however, no assurance yet that the bill will pass at this session of Congress, and failure to pass a road bill at this time may seriously impair the ability of the states to be ready with road contracts when the war ends.

The revised bill carries an appropriation for forest highways, which money can be used on certain Oregon primary and secondary roads, but, insofar as most roads in most sections of the state are concerned, the road program will be cut in half of the amount as originally discussed.

The State Highway Commission stated that it fully realizes the interest of the people of Oregon in roads and the desires of the several communities to have certain roads completed and certain

JUN 13 1944

roads improved, but, unless the Congress sees fit to provide the amount of funds originally discussed, the State Highway Commission cannot contract such an extended program with current highway revenues. The Highway Commission believes that it should at this time inform the public that, unless the Congress provides funds as originally contemplated and as discussed by the Commission on its trip throughout the state, the postwar highway program will have to be cut in proportion.

In this connection, the Engineer pointed out the probability that Congress will adjourn soon for the summer. He declared it imperative that the road program be decided before that time in order to avoid delays in the program of construction when the war is over. He suggested that the Commission direct a telegram to the Oregon Congressmen urging their efforts to secure the passage of the road bill before adjournment. The Commission approved the suggestion and thereupon ordered that the following telegram be sent to the Oregon Representatives:

HIGHWAY COMMISSION IN SESSION TODAY EXPRESSED ITS KEEN INTEREST IN ROAD BILL WHICH WILL SOON BE BEFORE HOUSE AND WILL APPRECIATE YOUR EFFORT TO PASS ROAD BILL BEFORE RECESS OR ADJOURNMENT AND TO OBTAIN AS LARGE AN AUTHORIZATION AS POSSIBLE. HIGHWAY COMMISSION CANNOT PROCEED WITH DEFINITE POSTWAR PLANS UNTIL BILL PASSES AND FAILURE TO PASS BILL MAY DELAY POSTWAR PROGRAM WHEN WAR ENDS.

OREGON STATE HIGHWAY COMMISSION

The Assistant Attorney requested authority to purchase certain parcels of real property that are needed for various highway improvements throughout the State. He submitted a list of such properties together with offers that he recommended be made in connection therewith. After careful consideration of each item, the Commission approved the request. The following resolution with respect thereto was thereupon adopted by the Commission by unanimous vote upon motion of Commissioner Chessman which was seconded by Commissioner Schaupp:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

FRONT STREET PROJECT, CITY OF PORTLAND, PACIFIC HIGHWAY WEST

*In the discussion of item No. 10278, the Attorney advised that the owner is not insistent that the Commission complete the purchase of the property at this time, but wants definite assurance that the state will do so when the property is needed in connection with the proposed improvement of the highway at this point. The Engineer advised that the highway improvement is tentatively scheduled for

construction in the postwar program and assured the Commission that the property definitely will be needed when the work is done. He recommended approval of the owner's request. The Commission approved the recommendation and instructed the Attorney to prepare an appropriate form of agreement covering the matter.

The Assistant Attorney also asked the Commission to authorize the condemnation of certain properties that are needed as right of way in connection with the reconstruction of the Halsey-Harrisburg Section of the Pacific Highway East, particularly because of difficulties encountered in securing waiver of access from the property owners. He submitted a list of such properties together with offers that he recommended in condemnation, as follows:

9717A	John P. Headings	$650.00
10272A	Michael Balcovic	200.00
11332	Currin S. Miller	425.00

After careful consideration, the Commission approved the request and thereupon by unanimous vote adopted the following resolution relative thereto upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman:

WHEREAS, the transportation of persons and property over public highways by private and for-hire motor vehicles has developed to a point where such means of transportation has become an integral and essential part of the transportation systems and agencies of the State and of the nation; and

WHEREAS, the volume and type of motor vehicles now using the public highways of the State and the nation have become such that highway standards of yesterday and highway designs are inadequate with respect to factors of safety, time element, weight of load, dimensions of vehicle and all other factors entering into the problem of transportation over public highways; and

WHEREAS, highway construction, maintenance and improvement are now and have been for some time financed in large measure by taxes and other charges imposed upon and paid by the road user, and therefore the convenience, safety and economy of time and cost of operation are of prime significance to the road user; and

WHEREAS, highways which in design possess a minimum curvature, easy grade, two or more same-direction lanes, freedom from access or intersecting roads, streets or lanes, and into, to or from which abutting property owners have no, or at least a limited, right of access, constitute and are thoroughfares which, in the opinion of the Commission, afford and offer to the highway user economy of time, cost and safety of operation to public officials charged with upkeep, economy of maintenance costs, and for all interested parties a reduction in the toll of life and health and a reduction in property damage; and

WHEREAS, for the purpose of making possible the construction of a more adequate and safe thoroughfare, the Commission has relocated the section of the Pacific Highway East between Salem and Albany, and for like purpose the Commission has declared the necessity for widening, straightening and otherwise improving the alignment and design of the section of said highway from Albany to Junction City; and

WHEREAS, to the end that public safety, convenience and public economy may be best served, it is deemed by the Highway Commission advisable and necessary that in connection with the acquisition of real properties for rights of way for said highway there shall be acquired all right or easement of access to said highway from real properties abutting thereon, and all right or easement of access from said highway to real properties abutting thereon, except at such places as may be designated and approved by the Highway Commission;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, that:

1. The Highway Commission does hereby find and declare that the relocation of the Pacific Highway East between Salem and Albany and the construction of a highway over said new location, and widening and straightening of the Albany to Junction City Section of said highway are necessary and essential for the convenience, safety and accommodation of the motoring public so that there may be made possible the construction, improvement and maintenance of a highway between said termini adequate in all particulars for existing and potential volume, type and character of traffic now using or which for long will use said highway;

2. That the said proposed highway projects, consisting of new highway construction, highway location, widening and straightening between said termini are each and all planned and located in a manner which in the judgment of the Commission will be most compatible with the greatest public good and will do a minimum of damage to private property;

3. That for the purpose of providing convenience, safety, economy of time, operation and cost, and for the purpose of providing and making possible the movement of the maximum volume of traffic over said highway and otherwise protecting and bringing greater returns to public investment in said highway, it is deemed and declared to be necessary that, in addition to the acquisition of real properties for rights of way, there shall be acquired from the owners of all real property abutting upon said highway or highway right of way all right or easement of access from abutting lands to, over and into said highway and all right or easement

of access from said highway to said abutting real property, except at specific places to be designated in the deeds or other evidences of title;

4. Based on the foregoing findings and declarations and upon existing law, it hereby is ordered that:

(a) J. M. Devers, as Chief Counsel of the Oregon State Highway Commission, be and he hereby is authorized and directed personally, or through a member or members of the Legal or Right of Way staffs, to attempt to agree with the owner or owners of properties described on the attached sheets with respect to the compensation to be paid for said property or properties, together with the damage, if there be damage, to the remainder of the said properties as a result of the taking of properties to be appropriated for said projects, and is authorized and directed to attempt to agree with such owner or owners with respect to the compensation and damage, if there be damage, to be paid for a waiver, sale and transfer of all right or easement of access from the abutting property or properties to, into or over said highway and all right and easement of access from said highway to said abutting property or properties, except at places specified as a part of the respective descriptions;*

(b) In the event that said property or properties, or any of the same, or the right or easement of access with respect to any ownership cannot be acquired by agreement, then said J. M. Devers, as Chief Counsel, is hereby authorized to institute and prosecute to final determination any necessary or appropriate suit or action for the State in the name of the State, by and through its State Highway Commission, for the condemnation of such interest or interests as such owner or owners may have in said real property or properties, including any and all right of access except at places specified as a part of the respective descriptions, and for determining the compensation to be paid not only for such real properties needed for right of way purposes and the damage, if any there be, but the compensation to be paid for such right or easement of access and the damage if any there be; and

(c) In the event said properties or any of them, or such right of easement or access, are acquired through condemnation proceedings, then said J. M. Devers, as Chief Counsel, hereby is authorized in the conduct and prosecution of said proceeding or proceedings to make such offer or offers, commitment or commitments as in his opinion will best serve the interests of the State of Oregon, this Commission and the general public, as well as the interests and welfare of the owner or owners who may be defendants in any particular proceeding;

5. That this resolution be entered in full in the minutes and records of this Commission.

JUN 13 1944

*(The detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 44, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Assistant Attorney brought up for discussion the offer presented at the last meeting of Mr. O. D. Kieffer to purchase a small tract of land adjacent to the Dayton-Amity Secondary Highway, in Yamhill County. He advised that Mr. Kieffer's offer is $500.00 for the 5.92 acres involved, and that he has also consented to relinquish right of access to the highway therefrom. He recommended acceptance of this offer rather than advertising the property for sale. The Commission approved the recommendation unanimously upon motion of Commissioner Chessman which was seconded by Commissioner Schaupp.

A letter was presented from Mr. R. F. Pullen, Haines, Oregon, inquiring whether or not the State Highway Commission will consider the sale or the lease of an old gravel pit adjacent to the Old Oregon Trail about three-quarters of a mile north of Haines. Mr. Pullen advises that this pit contains about twenty-five feet of water the year round and he would like to stock it with fish for private enterprise. The Engineer advised that a small stream flows through this gravel pit, and that local residents have been using the pit as a fishing place for many years, it being one of the few such places in that vicinity. He further advised that it costs the State nothing to maintain the pit and gave as his thought that it would be inadvisable to deprive local people of the fishing privileges that they have enjoyed heretofore. The Commission decided unanimously to retain the property. The Secretary was instructed to convey such information to Mr. Pullen and to Mr. Armond W. Perkins, Haines, Oregon, who has requested the same privilege on behalf of Mr. George Leonnig of that place.

The Assistant Attorney reported the private sale of the building located at Forfar which was advertised for bids at the May meeting of the Commission. He recalled that the Commission did not receive a satisfactory bid at that time and authorized him to negotiate the sale privately, the result being that he has received an offer of $75.00 from Mr. Lee Halsey. He recommended acceptance of this offer. The Commission approved the recommendation.

The Attorney brought up for discussion a letter from the U. S. Weather Bureau requesting that the rights and privileges heretofore granted by the Commission to the Civil Aeronautics Authority concerning the use of certain state-owned property in Josephine County, be transferred to the U. S. Weather Bureau, which transfer, it is said,

is endorsed by the Aeronautics Authority. The Attorney recommended approval of the request. The Commission approved the recommendation unanimously. (The transfer agreement covering this subject was signed by the Commission on the following day.)

The Attorney requested instructions whether or not to intercede with the State Industrial Accident Commission in the case of Jesse G. Helmick, a State Highway Department employee who was injured in the discharge of his duties. He advised that Mr. Helmick is employed on a maintenance crew, and while assisting in the loading of asphalt onto a state truck, injured his shoulder, requiring medical attention. Mr. Helmick's expense claim, he said, was rejected by the Accident Commission on the ground that the injury did not result from an accident within the meaning of the State Industrial Accident Commission laws, such decision being based on the court case of Gottfried -vs- State Industrial Accident Commission, 168, Oregon 65. The Attorney advised that he is not in accord with the decision of the Accident Commission and recommended that action be taken against the State Industrial Accident Commission, if necessary, in order to secure some satisfaction for Mr. Helmick. After discussion, Commissioner Schaupp moved that the Attorney be authorized to contact the members of the Accident Commission in an effort to secure a reversal of its position with respect to this claim, and that he be authorized to take the matter to court, if necessary, to secure satisfaction. The motion was seconded by Commissioner Chessman and received the unanimous vote of the Commission.

The Attorney also reported briefly on the claim of Capt. Herman Larsen, Portland, for reimbursement for injuries received by him on the Interstate Bridge between Portland and Vancouver, but action in the matter was deferred by the Commission until the claimant's attorney, Mr. Milton R. Klepper, Portland, has filed a statement on behalf of his client.

The Engineer reported on the question of financing the Little Nestucca Secondary Highway as instructed by the Commission at a previous meeting. He advised that the Doernbecher Manufacturing Company, which is interested in the improvement of this road, is not willing to contribute 50% of the expense involved, in view of which the improvement cannot go forward unless the Commission is willing to pay the entire cost. The Commission decided unanimously to do nothing further with this project.

The Engineer also reported on the proposed revision of the Dallas-Coast Secondary Highway between Rickreall and Dolph Corner. He submitted a map showing the alternate routes that have been suggested, and explained the details of engineering, etc., in connection with each route. (For details, see Engineer's letter of June 7, 1944, directed to the members of the Oregon State Highway Commission, in General Files.) He recommended the adoption of the Rickreall-Dolph Corner route and the improvement of the present highway between Rickreall and Dallas, together with the construction of a connecting road to Dallas at such time as the Commission is ready to decide a definite route for this road. Due to the uncertainty that exists with respect to postwar funds, the Commission

considered it inadvisable to establish a definite route at this time. The Secretary was instructed to so inform Messrs. A. R. Cadle and Jos. H. Harland, who have offered objections to the route recommended by the Engineer.

A report was submitted by the Engineer on the condition of the secondary state highway which extends from Adrian, Oregon, to the Idaho state line near Homedale, Idaho, the improvement of which has been requested on several occasions by local users of the road. He advised that the road is surfaced with pit-run gravel which is difficult to maintain in good condition, but which is kept in the best possible condition under existing circumstances. There is sufficient rock on the road, he said, to apply an oil treatment, which is really what the people want, and recommended consideration of such project when materials and funds are available to do the work. The Secretary was instructed to inform the petitioners that the Highway Commission appreciates the fact that the road needs to be oiled, and will give it consideration for post war construction program when it is possible to secure needed materials and there is money available to finance the work. In the meantime, the road will be maintained in the best possible condition.

The Commission discussed a report from the Engineer on parking conditions along the east side of U. S. 99E in Oregon City, particularly in front of the Shell Oil Station about 160 feet west of Main Street. The Engineer advised that there are two entrances to the Shell Service Station about 50 feet apart, and that the parking of automobiles along the curb line in this short section creates a hazard to other highway traffic. He recommended that the Commission adopt an order prohibiting the parking of cars at this location. The recommendation was approved by the Commission, and the following resolution relative thereto was adopted by the Commission, by unanimous vote:

WHEREAS, in the opinion of the Commission the parking of motor vehicles within the area hereinafter defined creates, because of the curvature and sight distance of the highway involved, a hazardous condition and one which may cause or contribute to serious accident; and

WHEREAS, because of the facts and the potential hazard as above stated, it is the opinion of the Commission that the parking of cars in the area hereinafter defined should be prohibited;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the parking of motor vehicles shall be and is prohibited in the area defined as:

Beginning at a point on the easterly side of the Pacific Highway East (Fifth Street) in Oregon City, 160 feet westerly or northerly from the west curb line of Main Street, which

point is the northerly edge of the entrance driveway to the Shell Service Station, and extending northerly therefrom a distance of 46 feet.

2. That the Engineer be and he hereby is directed to place and maintain at places within said area or on the margin thereof appropriate warning signs advising the public that the parking of cars is prohibited within said area.

The Commission also discussed a report from the Engineer on a hazardous condition that is caused by the parking of automobiles on U. S. Highway 101, near Tahkenitch River, in Douglas County. The Engineer recommended in order to alleviate this condition that the Commission adopt an order prohibiting the parking of automobiles on either side of the highway for a distance of about 600 feet south of the Tahkenitch River bridge. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution relative thereto:

WHEREAS, it has been brought to the attention of the Commission that it has become the practice among operators of motor vehicles to park the same within the right of way limits of the area hereinafter described; and

WHEREAS, the area hereinafter described is a segment of the Oregon Coast Highway, which is a part of the state highway system and is a highway which carries a substantial volume of traffic; and

WHEREAS, in the opinion of the Commission the parking of cars within the said area creates a hazard which may contribute to or cause serious accident, and therefore, in the opinion of the Commission, the parking of motor vehicles within said area should be prohibited;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the parking of motor vehicles within any part of the right of way of the Oregon Coast Highway beginning at Engineer's Station 1012+97.5 (mile post 216.01) at the south end of the Tahkenitch River bridge on said highway, and ending at Engineer's Station 1007+00 (mile post 216.12), the distance between said termini being approximately 600 feet, be and hereby is prohibited;

2. That the Engineer be and he hereby is directed to place or cause to be placed at the termini of said area and at such other places between said termini as in his opinion may be necessary appropriate signs warning the motoring public of the prohibition against parking within said area.

JUN 13 1944

The Commission discussed a request from the City of McMinnville for the installation of additional traffic signals at two street intersections, one of which is at the intersection of Baker Street (U.S. 99W) with Second Avenue, and the other being at the intersection of 3rd Street and Johnson (McMinnville Secondary Highway). The Engineer explained that the city's fire department is located on Second Street, and in answering calls, fire trucks are obliged to use the Baker Street route. Certain city officials, he said, are fearful that serious accidents will occur at this intersection and have suggested, in order to avoid accidents and to safeguard the public, the installation of a traffic signal equipped with siren controlled at the fire station. He gave as his thought that such type of installation is not required and recommended denial of the request. The Commission approved the recommendation.

With respect to the proposed signal at 3rd and Johnson Streets, he advised that there is more or less hazard at this point because of the use of the abutting property at the northwest corner of the intersection by logging trucks. He gave as his thought that a traffic signal is not necessary, and that the matter could satisfactorily be taken care of by signs, and adoption by the city of an ordinance prohibiting the parking of motor vehicles within a certain distance of the intersection. The Commission approved such solution of the problem and ordered that the City of McMinnville be advised accordingly.

The Engineer reported the results of his inspection of the Oregon Coast Highway between Newport and Florence in company with Commissioner Chessman and Lt. G. A. Gentry of the U. S. Coast Guard relative to the construction of the Coast Guard's telephone pole line along this highway. He advised that for the most part a satisfactory location was found on the east side of the highway where the pole line would not interfere with the scenic ocean view; however, between Big Creek crossing and Yachats, it was found necessary to approve a location on the westerly side of the highway in order to avoid conductive interference of power wires that occupy the east side of the highway. The U. S. Coast Guard, he said, has agreed, if permitted to establish its pole line on the west side of the highway, to remove the poles and place its wires underground within two years after the war is over. He further advised that north of Big Creek crossing, the pole line would occupy a location on the old Spruce Production Railroad right of way for a considerable distance where this right of way closely parallels the highway. He recommended approval of the location as did also Commissioner Chessman. The Commission approved the recommendation unanimously. The Secretary was instructed to prepare a form of permit in conformity therewith and to submit the same to the Walport Telephone Company for its approval, in view of the fact that this company now has telephone pole line privileges on the east side of the highway which it anticipates sharing with the U. S. Coast Guard.

The Engineer submitted a report on sites that have been either purchased or leased for the stock-piling of broken stone or gravel for highway maintenance purposes. The Commission approved the

report and ordered it filed. (See letter dated June 5, 1944, directed to the members of the State Highway Commission, in General Files, for details.)

The Commission discussed the question whether or not to continue maintaining the Richardson's Gap County Road in Linn County which has been under State maintenance since July, 1942. (See Miscellaneous Agreement No. 696 with Linn County for details.) The Engineer explained that the former Highway Commission assumed the maintenance of this road as a temporary proposition in order to facilitate the truck hauling of logs by the Roaring River Logging Company, which agreed to and did contribute the sum of $3,000 to apply on the cost; further, that the arrangement expires on June 30, 1944, and the company has stated an unwillingness to contribute further because other logging concerns who are using the road have refused to share in the expense. He particularly mentioned the Murphy Timber Company as being in this category, and advised that he explained the situation to this company by letter on May 16, 1944, advising them that unless additional cash cooperation is secured, the Highway Commission probably will wish to return the road to Linn County, in which event it will be necessary for the Company to discuss with the Linn County Court the question of continued log hauling over the road. The Murphy Timber Company, he added, has not expressed its attitude with respect thereto. He pointed out that, if the Commission discontinues the maintenance work and returns the road to Linn County, it will be necessary for the State to place the road in at least as good condition as it was before the agreement was signed. The Attorney advised that the Commission would not be safe in continuing the maintenance of the road after July 1st unless the agreement with Linn County is renewed. He was instructed by the Commission to write the Linn County Court to that effect, unless the Court will indicate its willingness to take over the road at the expiration of the present agreement, after the Engineer has had an opportunity to consult with the County Court with regard to the project.

A letter was presented from Mr. W. H. Lynch, District Engineer, Public Roads Administration, with reference to the proposed improvement of the Santiam Highway as a Timber Access Road. Mr. Lynch advises that the Western Log and Lumber Administration endorses the necessity for the improvement, but is unwilling to approve the project on the basis that the State will pay only 25% of the construction cost, but is agreeable to the proposition on a 50-50 basis, Federal and State, on a project costing $149,000, provided the Highway Commission will authorize the elimination of flagmen in connection with logging operations and will assume future maintenance costs. The Engineer suggested that the State might pay 38% of the cost, which is the percentage the State now pays in connection with Federal Aid projects. The Attorney advised that if the road is left in a dangerous condition, then the individual members of the Commission can be held personally liable in the event of accidents occurring. After considerable discussion of this matter, the Commission instructed the Engineer to negotiate further with the Federal agencies as to the least amount of cooperation that they will accept from the State. He was also authorized to advertise the project for bids if the State is not required to contribute more than 38% of the construction costs.

The Engineer reported a request from Col. S. P. Arnold, retired, Tillamook, for state aid in connection with the survey of a small tract of land north of Tillamook, on which Col. Arnold plans to establish and conduct a training establis. ent for "Seeing-Eye" dogs. He estimated the cost of such survey at about $250.00, but questioned that the Commission could legally spend the State's money for this purpose in view of the fact that this is a private enterprise. The Attorney advised that the Commission has no legal authority to spend State money for this purpose. The Commission denied the request.

The Secretary presented a letter from the County Court of Umatilla County requesting a survey of a proposed secondary state highway extending from Southeast First Street, Pendleton, to a connection with Mission South Market Road. The Commission authorized the Engineer to make a reconnaissance survey of this proposed road in order to secure substantial information on which to base a decision.

A resolution was presented from the Curry County Pomona Grange in which the Commission is requested to consider in its postwar highway construction program a road extending from the Oregon Coast Highway at Brookings to a connection with the Redwood Highway at a place known as Selma, with a branch leading to Gold Beach, in order to provide a short cut highway up the Chetco River for the benefit of the people of Curry County who are now obliged to travel many miles over a circuitous route between these points. The Commission decided that the time is not propitious to start a project of this kind, and that it would be much better to spend the State's money for improvement of the present Oregon Coast Highway. The request was thereupon denied, and the Secretary was instructed to so inform the Grange.

The Engineer reported that on June 1, 1944, he awarded the following contracts as authorized by the Commission on May 10, 1944, when bids were received for these projects, the conditions of the awards having been satisfied:

"Lakeview Airfield Access Road Project awarded to Babler & Conley, the low bidders, at their bid price of $37,816.

"Lakeview Rock Production project awarded to M. C. Lininger & Sons, the low bidders, at their bid price of $36,750."

The Commission approved the awards by unanimous vote.

The Secretary presented excerpts from the minutes of meetings of the former Highway Commission concerning the improvement of Main Street in the town of Nyssa, as instructed at the previous meeting. It appeared to the Commission from a study of the record that the former Commission was committed to the paving of this street and the installation of storm sewers to take care of highway drainage. The Commission acknowledged this commitment and instructed the Secretary to inform the Nyssa Chamber of Commerce that the work will be done at the proper time when necessary funds and material are available.

The Commission had under consideration the following requests for extensions of time within which to complete highway contracts:

F. C. Feldschau & Son, Contract No. 2606, for furnishing crushed material in stock-piles for the Mills Bridge-McNamars Camp Section of the Wilson River Highway in Tillamook County, requested an extension of time from July 31, 1943, to April 27, 1944, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulties in securing labor, and repair parts for their equipment due to wartime conditions. The Engineer advised that the over-run in time limit is considerable; however, the contractor furnished a sufficient supply of materials so that the Highway Department was not inconvenienced in performance of needed work during the summer of 1943; also that the State did not suffer any loss by reason of the delay, neither did the traveling public experience any inconvenience thereby. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

M. C. Lininger & Son, Contract No. 2615, for furnishing maintenance material in stock-piles for the Richland-Halfway Section of the Baker-Homestead and Halfway Highways in Baker County, requested an extension of time from July 15, 1943, to May 1, 1944, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions, breakdown of equipment, and the need to complete another highway contract in Division No. 4 that was considered urgent, before starting the Richland-Halfway contract. The Engineer advised that the over-run in time limit was due primarily to the contractor's delay in starting the job. This contract, he said, was awarded by the Commission on January 14, 1943, but the contractor did not start to set up his plant until March 20 of that year; however, made very good progress subsequent thereto. He further advised that the contractor's statement as to the urgency of constructing his other contract in Division No. 4 is correct, and that he was allowed to proceed with such contract prior to completing the Richland-Halfway job because the rock was not required at Richland until 1944. The State, he said, has not been inconvenienced by the delay, neither has it incurred any extra expense for engineering supervision. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Birkemeier & Saremal, Contract No. 2662, for construction of a pedestrian overcrossing at the south city limits of Milwaukie, in Clackamas County, requested an extension of time from March 31, 1944, to May 6, 1944, with which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions which would not permit application of the final coat of paint. The Engineer advised that the reason given by the contractor for failure to complete the project within the

specified time limit is correct, and recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contracts Nos. 2568, 2606, 2615, 2618, 2632, 2653 and 2658 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance;

Contract No. 2568, with Tom Lillebo for reconstructing the approach to the bridge over the Willamette River on the Pacific Highway East at Harrisburg, Lane County. Completed January 17, 1944.

Contract No. 2606, with F. C. Feldschau & Son, for furnishing crushed material in stock-piles on the Mills Bridge-McNamars Camp Section of the Wilson River Highway in Tillamook County. Completed on April 27, 1944.

Contract No. 2615, with M. C. Lininger & Sons, for furnishing crushed rock in stock-piles on the Richland-Halfway Section of the Baker-Homestead and Halfway Highways in Baker County. Completed on May 1, 1944.

Contract No. 2618, with M. C. Lininger & Sons, for furnishing crushed rock in stock-piles on the Ochoco Summit Section of the Ochoco Highway in Crook and Wheeler Counties. Completed on January 10, 1944.

Contract No. 2632, with P. B. Doherty for furnishing crushed rock in stock-piles on the Alsea Mountain Section of the Alsea Highway in Benton County. Completed on November 24, 1943.

Contract No. 2653, with E. C. Hall Co. for furnishing crushed rock in stock-piles on the Lapine Section of The Dalles-California and Fremont Highways in Deschutes and Klamath Counties. Completed on June 2, 1944.

Contract No. 2658, with Western Rock Company, for grading, surfacing and oiling the Umatilla Oil Depot Access Road in Umatilla County. Completed on May 15, 1944.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway projects be declared completed according to the

terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each, except as to Contract No. 2568 with Tom Lillebo, is hereby authorized.

Special consideration was given by the Commission to the payment of the final estimate in connection with the Tom Lillebo Contract No. 2568, for the reconstruction of the Harrisburg bridge approach. The Attorney advised that Mr. B. C. Davenport of Junction City has filed a claim against this contract in the amount of $2,000, representing losses which he alleges he sustained by reason of Mr. Lillebo's operations. It is claimed by Mr. Davenport, he said, that the contractor maintained a stock-pile of lumber on his land, and that during the period of high water eddies were created which damaged his land to such an extent that he lost a sale of his property at $8,000 and is now able to secure an offer of only $6,000. Mr. Davenport, he said, wants the contractor to reimburse him for the amount of his loss. After discussion, the Commission ordered that final payment to Mr. Lillebo be withheld pending satisfactory settlement of this claim.

The Commission had under discussion a compromise settlement with the O.W.R. & N. Company and the Union Pacific Railroad Company covering damage which occurred to the Pendleton-Stanfield Highway in Umatilla County by reason of construction work performed by the railroad company's contractor on the railroad right of way where it closely parallels the highway. It appears that because of the railroad company's construction work, it was necessary to repair and partially relocate the highway, and it has been agreed among the engineers that payment by the railroad company in the sum of $1,102.74 will satisfy the state's claim. The Engineer recommended settlement on such basis. The Commission approved the recommendation by unanimous vote. (A release and receipt covering this matter was signed by the Commission on the following day.)

The Engineer reported receipt of a request from the Linn County Court that the State Highway Commission include in its next advertisement for bids for highway construction a call for the construction of a bridge over the Santiam River on a county road near Cascadia. He recommended approval of the request as a matter of courtesy, it being understood the cost of the construction work is to be paid entirely with county funds. The Commission approved the recommendation.

The Commission had under discussion the matter of authorizing the State Highway Engineer to pass upon small damage claims when the amount involved does not exceed $50.00. It was explained that the Commission now has authority under the law to approve payment of damage claims up to $500.00 in amount. The thought was expressed that if the Commission would authorize the Engineer to pass on the small claims, it would relieve the Commission of this detail, and payment of the claims could be expedited. After discussion, the Commission, by unanimous

vote, authorized the Engineer to pass on small claims that do not exceed $50.00 each and to pay them in the event they are cleared as to legality by the Attorney. The Engineer was instructed to submit a monthly report on claims paid under this authority.

Consideration was given by the Commission to a request from the U. S. Army Engineers for permission to conduct improvements to the Long Tom River Channel at the highway bridge crossing on U. S. 99W in the town of Monroe. The Commission approved the request by unanimous vote on recommendation of the Engineer. (An agreement covering the matter was signed by the Commission on the following day.)

The Commission confirmed the oral authority previously granted the Engineer to attend, at state expense, a Congressional Committee hearing in Washington, D.C. on May 24 - 27, 1944, in the interest of postwar highway legislation.

The Engineer requested authority for Bridge Engineer, G. S. Paxson, to make a trip into the State of Washington, at state expense, during the period of June 27 to July 1, 1944, to investigate the causes of concrete disintegration which is affecting concrete pavements and structures in the northwest. He explained that the investigation is to be made in conjunction with a representative of the Public Roads Administration, Division of Tests and Research. He also requested authority for Assistant Maintenance Engineer, W. W. Stiffler, to accompany Mr. Paxson on this trip for an inspection of maintenance buildings in the State of Washington. He estimated that the total expense involved would not exceed $70.00. The Commission approved the request by unanimous vote, subject to further approval by Governor Snell.

The Secretary presented a resolution from the Josephine County Court with respect to the abandonment of the right of way of the old Pacific Highway over Sexton Mountain, Josephine County, which is no longer of value for state purposes in view of the construction of the highway on revised alignment. The Commission approved the resolution and ordered it filed.

The Commission also approved by unanimous vote a communication from the City Council of Cottage Grove approving the rerouting of the Pacific Highway through this town.

The Engineer reported an accumulation of junk and scrap materials consisting of copper wire, steel, old batteries, tires and obsolete equipment which is of no value to the state. He requested authority to advertise this material for bids. The request was approved by the Commission by unanimous vote.

The Commission had under discussion the setting of a date for its next regular meeting and decided to hold such a meeting on Tuesday afternoon and Wednesday, July 11 and 12, 1944. The Secretary was instructed to make the usual arrangements to hold this meeting in the Imperial Hotel, Portland.

JUN 13 1944

The Engineer reported receipt of a letter from the War Production Board denying the Commission's application for Federal funds to finance the reconstruction of the Steiwer Hill-Albany and Wolf Creek-Grave Creek Sections of the Pacific Highway. The Commission took no action in this matter.

The Attorney brought up for discussion an action that is now pending in the United States District Court concerning the acquisition of right of way across certain Indian-owned land in Coos County. He advised that the United States of America is plaintiff in the case, and that the State of Oregon, the State Highway Commission, Coos County and others are defendants; also, that the Government is seeking to recover damages in the amount of $19,350 on behalf of the Indian owner who is a Government ward. He advised that a compromise settlement of this controversy has been reached whereby the Government will accept the sum of $1,500 as payment in full, one-half of which is to be paid by Coos County and the balance by the State. He recommended approval of such settlement in order to dispose of the case. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, it appears that there is pending in the United States District Court for the District of Oregon an action wherein the United States of America is plaintiff and the State of Oregon, the State Highway Commission, Coos County and others are defendants, by which action the Government seeks to recover damages in the sum of $19,350 against all of the defendants; and

WHEREAS, it appears that said action involves the appropriation and use for right of way purposes of land owned by an Indian who is a ward of the United States Government, which land was appropriated it appears, by Coos County and is now under the jurisdiction of the State because of the fact that the road constructed over the said land is a state highway; and

WHEREAS, it appears that said controversy can be compromised by the payment of $1500, half of which is to be paid by Coos County and half by the State of Oregon; and

WHEREAS, J. M. Devers, as Chief Counsel for the Highway Commission, has recommended that said case be settled on said basis;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED that the State Highway Engineer be and he hereby is instructed to draw a check against the State Highway Revolving Fund in favor of the United States Government in the sum of $750.00, and deliver the same to J. M. Devers, as Chief Counsel to the Oregon State Highway Commission.

BE IT FURTHER RESOLVED that the Chief Counsel be and he hereby is instructed to deliver said check to Honorable Carl Donaugh, as United States Attorney for the District of Oregon, in such manner

and supported by such written instrument as will completely protect the State's interest and accomplish the settlement of said controversy and the dismissal of said case.

BE IT FURTHER RESOLVED that this resolution be entered in the minutes and records of the Commission as of June 13, 1944.

The Assistant Attorney requested instructions relative to the repair of houses in Pendleton and in Eugene that had been acquired by the Commission in connection with right of way purchases. He estimated the cost to repair the houses in Pendleton at approximately $405.00 and advised in connection therewith that receipts to date from the rental of these houses aggregates in excess of $4,000, so, in his estimation, the expense of the repairs is fully justified. He estimated the cost to repair the houses in Eugene at about $60.00 and gave as his thought that this expense also is justified in view of the rentals that the Commission is receiving therefrom. It was the thought of the Commission that the buildings should be kept in good state of repair. The Assistant Attorney was thereupon authorized to have the work done.

The Commission adjourned at 4:30 p.m. to reconvene on the following day at 9:00 a.m.

Portland, Oregon, June 14, 1944.

The State Highway Commission reconvened in regular session at 9:00 a.m. in the Stock Exchange Room of the Imperial Hotel with all Commissioners, the State Highway Engineer, the Attorney and the Secretary present.

Bids, as follows, for highway construction work and for the sale of a tract of land in Portland were opened and read in conformity with previously published notices, following which Chairman Banfield announced that the awards would be made at 3:00 p.m. in the same room.

PACIFIC HIGHWAY EAST

Quarterly Payments		142.50
(Specified rate of Interest)		05% per annum

Commissioner Schaupp brought up for discussion the Dr. Moser controversy at Grants Pass concerning the condemnation of a quarry site in Josephine County. He advised that he contacted Mr. Niel R. Allen, Dr. Moser's attorney, and with him inspected the site involved in the controversy, and also discussed the matter thoroughly with him. He recited the results of the discussion, particularly pointing out certain features that are objectionable from the standpoint of Mr. Allen and his client. The matter was discussed at some length, and as a result thereof, the Commission instructed the Attorney to inform Mr. Allen that Commissioner Schaupp has reported to the Commission on this subject and that the Commission will be glad to discuss the matter with him if he so desires at any time that it is convenient for him to attend one of the Commission meetings.

Mr. T. P. Risteigen, President of the Coast Range Timber Company, came before the Commission with regard to the dumping of logs on State Highway rights of way when necessary to avoid overweight loads. Mr. Risteigen particularly referred to logs dumped by his operators on

the Wilson River Highway near the Highway Department's scales, east of Tillamook. He advised that on a number of occasions the operators have dumped logs on the right of way because of no other place to put them, and they were not allowed to proceed to the unloading point. He gave as his understanding that this is contrary to the Highway Commission's requirements, and asked the Commission to modify the ruling so as to permit the dumping of logs on the right of way when there is no suitable place to dump them on private property. He was informed by Commissioner Banfield that the Commission wants to be reasonable in the matter and will render a decision relative thereto after consulting with the Engineer. (This matter was discussed by the Commission at further length following Mr. Risteigen's departure, at which time the feeling was expressed that if the Commission requires the unloading of logs off the highway right of way, then it must furnish a place on which they can be piled. As a result of discussion, the Commission decided by unanimous vote to let the operators dump the excess-weight logs on the highway right of way, if they are placed so as not to present a hazard to other highway traffic, and provided the operator will remove them within ten days, it being intended that such ten-day period shall include two week ends.

Mr. Risteigen also brought up for discussion the matter of constructing a logging road approach to the Wilson River Highway about fourteen miles east of Tillamook. He advised that the present approach is not very good, and they want to build a new one which will involve the construction of a bridge over the Wilson River and a crossing of state-owned land that was acquired as a wayside strip. He asked the Commission to approve the construction across the state's property. He was advised by Chairman Banfield to submit his plans to the Commission, which will then have the Engineer investigate. Mr. Risteigen agreed to do this.

The Attorney requested instructions whether or not to take action against a certain log hauler at Springfield whose operations resulted in damage to a scale house at this place. It appears that the operator's truck was equipped with dual wheels, one of which became loosened and, as the truck was approaching the scale house, rolled into the side of the building, damaging it. The Attorney advised that he has investigated the circumstances and is unable to find enough evidence on which to base a claim for negligence. He doubted that the Commission could collect on its claim if the matter were taken to court, and recommended that the matter be dropped. The Commission approved the recommendation.

Chairman Banfield brought up for discussion the matter of performing a small amount of landscape work around the old Battleship Oregon Mast that has been erected as a monument in "Marine Park" adjacent to Front Street, Portland. He advised that the Battleship Oregon Commission plans to dedicate the monument on July 2nd, and has asked the State to do a certain amount of landscaping work so that the area will make a presentable appearance at that time. He suggested that the

Commission might have the work done if the city will agree to maintain the premises thereafter. The Engineer advised that tentative plans have been made to landscape this park after the war is over, but it might be well to do a part of the work now in view of the dedication. He suggested that it would be advisable to enter into a working arrangement with the city covering the maintenance of the park. After discussion, the Commission by unanimous vote authorized the Engineer to proceed with the preliminary work requested by the Battleship Oregon Commission. The Engineer was also authorized to prepare plans for landscaping the area this fall. The Attorney was instructed to prepare a form of agreement with the city covering the maintenance of the park and other parking areas in Portland that are in the same category.

The Commission had under consideration approval of the plans submitted by the following cities: Canyonville, Drain, Rogue River, Joseph, Gervais, Dundee, Hubbard, Lakeview, Fairview and Eastside for city street improvements which they propose to finance with State Tax Street Funds. The Engineer advised that the programs meet the state requirements, and the city proceedings with respect thereto are in conformity with the provisions of law. He recommended approval by the Commission. The Commission approved the recommendation by unanimous vote and adopted the following resolution with regard thereto, upon the motion of Commissioner Chessman which was seconded by Commissioner Schaupp:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1944 for street purposes as provided in said law the several sums or amounts set opposite the name of the respective city or town:

Canyonville	$ 350.23
Drain	819.94
Rogue River	526.03
Joseph	814.45
Gervais	455.98
Dundee	287.05
Hubbard	531.52
Lakeview	3,386.89
Fairview	418.90
Eastside	876.25

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction and improvement with the funds above specified the following

streets in the following named cities:

City of Canyonville - Wall Street, Canyon Street, Pine Street, 1st Street, 2nd Street, 3rd Street and 4th Street

City of Drain - Division Street and Payton Street

City of Rogue River - Oak Street, Broadway, Cedar Street, Main Street, First Street, Second Street, Riverside Avenue, Gilmore Avenue, Park Street and Arbor Avenue

City of Joseph - Lake Street, Pine Street and College Street

City of Gervais - "E" Street, "F" Street and 4th Street

City of Dundee - 10th Street

City of Hubbard - "E" Street, 7th Street, 5th Street, 4th Street, "A" Street, "C" Street, "G" Street, 2nd Street, and other streets and intersections as required

City of Lakeview - "E" Street, South Street, Fourth Street, Third Street, "H" Street, First Street and Second Street

City of Fairview - 1st Street, 2nd Street, 3rd Street, 4th Street, 5th Street, 6th Street, 7th Street, Division Street, Fairview Avenue, Depot Street, Main Street, Cedar Street, Harrison Street, Lincoln Street, and Barr Road

City of Eastside - First Avenue and Eleventh Avenue

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to

the proper officer in each of said cities and towns a duly certified copy of the same.

5. This resolution shall be entered in the minutes and records of this Commission as of the 14th day of June, 1944.

The Engineer brought up for discussion a request from the North Lincoln County Chamber of Commerce for a survey to establish sidewalk grades on the Oregon Coast Highway between Ocean Lake and Taft. He advised that the survey will cost about $250.00, and that a delegation representing this organization is to appear before the Commission at this meeting with regard thereto. He recommended approval of the expenditure so as to encourage the local improvement and that the sidewalks can be constructed properly. The Commission approved the recommendation. See delegation on next page.

The Engineer also brought up the matter of constructing sidewalks on the Oregon Coast Highway through the town of Cannon Beach. He said that the people of this place have offered to pay for the grading work involved but want the State to build concrete sidewalks. The question arose whether or not it is the State's obligation to construct the sidewalks. The Attorney advised that the Commission can use its own discretion in the matter as there is no law which places the obligation on the Commission, so, if the Commission considers that the building of the walks is in the best public interest it can build them if it wants to; however, if the Commission should build them, then the State is responsible for future maintenance and the Commission would be liable for damages in case of accidents occurring. The Commission denied the request as a matter of policy.

The Engineer presented and explained the customary monthly financial statement. It was the thought of the Commission that the statement would be more understandable if a supplementary sheet were attached thereto to show the detail of changes in any of the items, should there be any such changes. The Engineer was instructed to hereafter submit statements in such a manner.

The Commission recessed at 11:30 a.m. for luncheon and reconvened at 2:00 p.m. in the same room with all members present and participating. Also present were the State Highway Engineer, the Attorney and the Secretary.

The Engineer discussed with the Commission the bids received at the morning session for the oiling of the city streets in the town of Sheridan. He advised that the low bid submitted by Western Rock Company, based on the use of tar, and in the amount of $20,574, is satisfactory. He recommended that the contract be awarded to this company if the City of Sheridan will concur in the award and will

deposit with the Commission, in advance, city funds in the amount of the bid plus ten per cent to cover engineering and contingency expense. The Commission indicated its approval of the recommendation, but deferred a definite decision with respect thereto, pending a conference with representatives of the Sheridan City Council.

Messrs. E. J. Bayliss and R. B. Cuttropp, Mayor and Councilman, respectively, of the City of Sheridan, were present and discussed with the Commission bids received for the oiling of certain city streets in Sheridan. Mayor Bayliss stated that they are authorized to represent the City Council at this meeting. Chairman Banfield explained that the low bid submitted for this work was that of the Western Rock Company, Salem, at $20,574, based on the use of tar, to which there will be added the sum of $2,057.40, ten per cent of the amount of the bid, to cover the expense of engineering and contingencies, making a total of $22,631.40 as the city's obligation. He inquired if the low bid is satisfactory to the city, and what provision the city has made to pay for the work, whereupon Mayor Bayliss, with the approval of Councilman Cuttropp, stated that they were present to represent the City of Sheridan and that the bid was satisfactory, and that the city concurs in the award of the contract to the Western Rock Company in the amount of the bid submitted. Mayor Bayliss stated further that they are prepared to deliver to the State Highway Commission checks drawn on the funds of the City Treasury, one in the sum of $20,574, being the amount of the low bid, and the other in the sum of $1,926 to cover a portion of the engineering and contingency expense, and will pay to the Commission shortly after the first of July the balance of such expense, amounting to $131.40. Thereupon, the Mayor delivered to the Secretary of the Commission two checks complete except as to the respective amounts, which amounts the Secretary, upon request of Mayor Bayliss, and in the presence of the representatives of the City, filled in the amounts. The checks were then delivered by Mayor Bayliss to the Secretary for further handling. The balance of the engineering cost, to wit, the sum of $131.40, the city representatives said, would be paid to the Commission shortly after the first of July, 1944. The Commission thereupon by unanimous vote awarded this contract to the Western Rock Company, the low bidder, at its bid price of $20,574, based on the use of tar.

A delegation from Ocean Lake representing the North Lincoln County Chamber of Commerce and consisting of Messrs. E. L. Gray, J. W. Lundin and Paul Stege came before the Commission regarding sidewalk construction on the Oregon Coast Highway between Ocean Lake and Taft. Mr. Gray headed the group. He asked the Highway Commission to authorize the Engineer to make a survey of this section for the establishment of sidewalk grades and right of way line so they can build sidewalks properly and do certain landscaping work that they have in mind. He also asked the Commission to construct concrete curbs along this section and assured the Commission that if it would approve such a project, the people of the district would build the sidewalks. In view of the presentation, the Commission instructed the Engineer and the Attorney to check into the matter. The Commission indicated that it would authorize the survey and

build the curbs if the people will guarantee construction of the sidewalks. Mr. Gray assured the Commission that this would be done and, as evidence of good faith, agreed to file with the Commission at its next meeting a petition to that effect signed by the property owners affected.

The Commission discussed making an inspection trip throughout the state, lasting about one week. The Engineer was instructed to prepare an itinerary for such a trip for approval of the Commission at the next meeting.

The Commission discussed with the Engineer the bids received at the morning session and decided by unanimous vote to award contracts to the low bidder for construction work in each instance, except that in the case of the Garibaldi-Tillamook Air Base Project the bids were referred to the Engineer with authority to award the contract to the low bidder if and when sufficient Federal funds are made available to finance the work.

As to the sale of the Portland property, the Commission accepted the offer of Gertrude Quenville on the basis of cash payment of $3,550.

At 3:00 p.m., Chairman Banfield announced the awards as follows:

"Halsey-Harrisburg Section of the Pacific Highway East in Linn County. 8.80 miles of grading and paving. The Commission received nine bids for this project, the low one being that submitted by Porter W. Yett, Portland, at $376,687.24, based on the use of asphalt. Mr. Yett did not submit a bid based on the use of tar. The second low bid was that submitted by Warren Northwest, Inc., Portland, at $413,854.00 based on the use of asphalt and a like amount based on the use of tar. The Commission has awarded this contract to the low bidder, Porter W. Yett, at his bid price of $376,687.24.

"Construction of four bridges on the Halsey-Harrisburg Section of the Pacific Highway East in Linn County. Frank Watt Construction Co., Portland, submitted the low bid for this project at $59,150. The second low bid was submitted by J. F. Johnston, Newberg, at $59,225.00. There were seven higher bidders. The Commission has awarded this contract to the low bidder, Frank Watt Construction Co. at its bid price of $59,150.

"Oneonta Section of the Columbia River Highway in Multnomah County. Removal and disposal of rock detritus encroachment. The low bid for this project was submitted by Babler & Conley, Portland, at $25,900. The second low bidder was Logan & Taylor, Portland, at $26,270. There were seven higher bidders. The Commission has awarded this contract to Babler & Conley, the low bidder, at its bid price of $25,900.

"Garibaldi-Tillamook Air Base Section of the Oregon Coast Highway in Tillamook County. 11.49 miles of oiling. The low bidder for this work was Babler & Conley, Portland, at $10,611. The next low bidder was Western Rock Company, Salem, at $10,776.15. There were three higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Babler & Conley, when certain conditions have been satisfied.

"Remove and replace Deck Truss over Wilson River on Wilson River Highway about 11.5 miles east of Tillamook, in Tillamook County. J. F. Johnston, Newberg, submitted the low bid for this project at $6,185. Frank Watt Construction Company submitted the second low bid at $8,650.00. There were two higher bidders. The Commission has awarded this contract to the low bidder, J. F. Johnston, at his bid price of $6,185.

"Sheridan City Street Oiling Project in the town of Sheridan, Yamhill County. 4.86 miles of oiling. Western Rock Company, Salem, submitted the low bid for this project at $20,574, based on the use of tar, and $20,782 based on the use of asphalt. J. C. Compton Company, McMinnville, submitted the next low bid at $21,898 based on the use of tar, and $22,298 based on the use of asphalt. There were three higher bidders. The Commission has awarded the contract to the Western Rock Company, Salem, at its bid price of $20,574, based on the use of tar."

Sale of a tract of land in southeast Portland, being a portion of Lots 7 and 8 in Block 78, East Portland, situate at Southwest corner of Southeast Ankeny Street and Southeast Union Avenue. The only bid received by the Commission for the purchase of this property was submitted by Gertrude O. Quenville of Portland at $3,550, based on payment of cash, and $3,800 with terms. The Commission considers the cash offer the better of the two from the State's standpoint, and accordingly has sold the property to Miss Quenville for the sum of $3,550 cash.

The Commission considered and signed agreements, etc., as follows:

Consent to transfer to the U. S. Weather Bureau the lease of property in Josephine County heretofore given the Civil Aeronautics Authority.

Receipt acknowledging payment of claim against O.W.R. & N. Company, for damage caused the Pendleton-Stanfield Highway by the railroad company's contractor.

Agreement with the City of Sheridan covering oiling of certain city streets, contract for which was awarded at this meeting.

Agreement with Jefferson County covering maintenance of bridges on the Culver-Grandview Market Road within the borders of The Cove State Park.

Agreement with Josephine County with respect to the maintenance of the present Wolf Creek-Sexton Mountain Section of the Pacific Highway, following reconstruction of the highway on revised alignment.

Application to maintain a hauling road across certain Indian land in Klamath County being .300 mile in length and extending from the Klamath Falls-Lakeview Highway to a quarry in the S½ of the SW¼ of the SW¼ of Sec. 17, T 36 S, R 13 E, W.M.

Agreement with Arthur Walker covering the grazing of sheep in Cape Sebastian State Park for a period of one year from June 14, 1944.

Agreement with Robert Fromm covering the grazing of sheep in Humbug Mountain State Park for a period of one year from June 14, 1944.

Contract with Axman & Miller covering the rental of one Buffalo-Springfield six ton roller, Dept. No. 40-678.

Contract with Crook County Court covering the rental of one Buffalo-Springfield 10-ton 3-wheel roller, Dept. No. 31-671.

There being no further business to come before the Commission at this time, the meeting adjourned at 3:15 p.m.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

JUN 14 1944

12081

Portland, Oregon, July 11, 1944

The State Highway Commission met in regular session at 1:30 p.m. in Room 615, Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
J. W. DeSouza, Acting Secretary

The Commission considered and unanimously adopted the following resolution:

WHEREAS, H. B. Glaisyer, the duly appointed Secretary to the Commission, was unable to be present at this meeting because of illness in his family,

THEREFORE, BE IT RESOLVED that J. W. DeSouza be and hereby is appointed to serve as Secretary to the Commission during the absence of the regular Secretary.

BE IT FURTHER RESOLVED that this resolution be entered in the minutes and records of this meeting.

The minutes of the meeting of June 13 and 14, 1944, were unanimously approved by the Commission. The Commission also approved by unanimous vote the following changes in the minutes of the meeting held May 9 and 10, 1944, as proposed by the regular Secretary, and ordered them inserted in the minutes of said meeting:

"A letter was presented from the Eugene City Planning Commission requesting a study by Highway Department Engineers of a proposed highway connection along South High Street between the present highway on Broadway, in Eugene, and the proposed route of the Pacific Highway which by-passes Eugene. A letter was also presented from Mr. J. F. Cramer, Superintendent of the Eugene Public Schools, opposing such routing of this connecting road because it bisects school property and will interfere with the development of the same and will also create a hazard for school children. The Commission considered that the information furnished is not sufficient to justify the expense of a survey but authorized the Engineer to confer with both parties on the basis of data now available."

JUL 11 1944

"The Commission resumed discussion of the request of the U. S. Maritime Commission for permission to use certain state-city-owned property adjacent to Front Street, Portland, in connection with the repair of ships. As a result thereof, Commissioner Schaupp moved that the matter be referred to Chairman Banfield with full power to act in behalf of the Commission. The motion was seconded by Commissioner Chessman and carried unanimously."

The State Parks Superintendent who was present, reported on proposed minor improvements on the Seneca Fouts State Park property, involving the construction of trails and other small items, which he estimated would cost about $400.00. The Commission approved the expenditure of such sum, with the understanding that the work would be undertaken only as a postwar project. With this understanding, the Commission accepted the Seneca Fouts property.

In connection with the acceptance of the Seneca Fouts park property, consideration was given to the acquisition of Government Lot 4 in Section 31, Township 3 North, Range 10 East, W. M., in Hood River County, for the purpose of providing access to this park. It appears that this acquisition in itself would not provide access to the park, but in addition there would be necessary the purchase or securing of an easement over other property lying to the south. The Assistant Attorney advised that Government Lot 4, together with the west one-half of the southwest quarter of Section 31 and the southeast quarter of the southwest quarter of Section 31, is owned by the Sonny Land Company. This company, he said, was an Oregon corporation which was dissolved on April 30, 1941, and the company desires to sell only its entire holdings at a suggested price of $12,000.00. After consideration, the Commission decided to defer any further activities with regard to the acquiring of Lot 4 until the revised location of the Columbia River Highway has been definitely established across the subdivision, it being the intention at that time to acquire such land south of the railroad as may be necessary, together with an access connection probably 100 feet wide to the Seneca Fouts park property.

The State Parks Superintendent advised that negotiations still were being carried on relative to the acquisition of the south half of the southwest quarter of Section 7, Township 8 South, Range 2 East, W. M., Marion County, desired as an addition to the Silver Creek Falls State Park. No action was taken on the matter.

Consideration was given to the request of Daniel G. Clark, Harrisburg, Oregon, to purchase the Washburn State Park adjacent to the Pacific Highway West at the Benton-Lane County line. In view of the fact that the Commission is continuing to acquire properties for park purposes in other parts of the State and that this property is desirable and valuable as a part of the state parks system, it was considered inadvisable to sell the property and the request of Mr. Clark was denied.

Consideration was given to the sale of property acquired but no longer used for ferry slip purposes at North Bend. Action on this matter was deferred pending appearance before the Commission of representatives of Weyerhaeuser Timber Company, scheduled for July 12.

The Assistant Attorney advised that investigations still were being made of the probable cost of the John Day Fossil Area on the John Day Highway. In this connection, he inquired if it is the desire of the Commission to make the purchases on the basis of the grazing rights being retained by the owners of the property, or whether the land should be purchased outright, including all rights therein. Chairman Banfield expressed the opinion that it would be highly undesirable to acquire the lands outright, thereby removing the same from the tax rolls. It was his thought that the owners should be allowed to retain perpetual full grazing rights, which grazing rights represent practically the entire value of most of the properties involved. This view was concurred in by Commissioners Schaupp and Chessman. The suggestion was then made that it might be possible to work out agreements with the property owners whereby they would retain title to the lands which would remain on the tax rolls, but would let the public have right of access to the fossil beds. The Assistant Attorney advised that it was not possible at this time to give a comprehensive estimate of the total cost which might be involved, as studies of the area have not yet been completed. The State Parks Superintendent and the Assistant Attorney were instructed to make further investigation and work out a detailed plan as to which properties, if any, should be purchased outright, which should be eliminated from acquisition as being too expensive, and which areas might advantageously be covered by agreement with the property owners as suggested by Chairman Banfield, and to report back with a comprehensive plan, including estimates of cost.

The Engineer requested authority to proceed at this time with the acquisition of right of way for postwar projects, and called attention to the fact that, unless a reasonable amount of right of way were acquired before the emergency developes, it would be difficult to contract the work with the requisite speed that the emergency would demand. He submitted the following list of projects showing the estimated cost to complete the right of way purchases:

LIST NO. 1 OF POSTWAR PROJECTS FOR WHICH RIGHT OF WAY ACQUISITION IS TO BE COMMENCED

UNDER PROVISIONS OF GENERAL ADMINISTRATIVE MEMORANDUMS NOS. 240, 256 AND 260

Federal Aid Project No. or Item No.	Project	Length (Miles)	Kind of Work	Estimated Construction Cost	Estimated Cost of Right of Way
Projects in Approved Advance Engineering Program:					
186-G	Davies Overcrossing-Tualatin Valley Hwy. Junction	22.00	Grad. & Pav.	$ 2,046,000	$124,000

				$11,924,000	$316,000

JUL 1 1944

12084

In support of this request, he advised that at this time there is an unobligated balance of approximately $180,000 Federal funds allotted to Oregon which, with the $120,000 of State funds required to match this balance, will amount to a total of $300,000. The Federal funds, he said, are available due to the refusal of the War Production Board to approve the two projects on the Pacific Highway, namely, between Steiwer Hill and Albany and between Grave Creek and Wolf Creek. The Engineer stated that there was a possibility that the Federal Government might later approve these projects, in which case the Commission would be obligated to undertake them and to supply additional funds as may be required, but further delay in acquisition of right of way might seriously affect the program. He recommended that these funds be obligated now for the purchase of right of way. He further reported that, under Memorandums 240 and 256 from the Public Roads Administration, that by the submission of proper request for Federal participation in right of way, Federal funds would be available to repay the State for the Federal share of the right of way after the project had been placed under construction.

Mr. W. H. Lynch, District Engineer of the Public Roads Administration, questioned the amount of unobligated Federal funds, stating that, in his opinion, the amount quoted was more than the actual amount remaining; however, if the Steiwer Hill-Albany funds were released, that much money would be available. After consideration, the Engineer was instructed to review the amount of Federal funds available. The Engineer and Chief Counsel were authorized to take options on right of way projects from the above list to the extent of available Federal funds plus the required State match funds, which would result in the final cooperative share of 60 per cent Federal funds and 40 per cent State funds. The Engineer was instructed to make a selection from the list submitted and to report back to the Commission, and then to submit the approved projects to the Federal Government. Furthermore, the Engineer and the Attorney were required to refrain from taking options on projects until the projects had been programmed by the Public Roads Administration and become eligible for ultimate cooperation in right of way costs.

The Assistant Attorney presented a list of properties for which options have been obtained, with recommendation that the prices in each instance were fair and reasonable, and requested instructions from the Commission as to whether or not to complete the purchase of these properties at this time. After discussion and consideration, the Commission approved the various options and authorized completion of the purchase of the several tracts. The following resolution with respect thereto was adopted by the Commission by unanimous vote:

> WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

---

The Assistant Attorney also presented options on the Front Avenue project in Portland. The Commission unanimously decided to take no action on these settlements until execution of the pending agreement with the City of Portland covering the entire Front Avenue project.

The Assistant Attorney requested authority to condemn certain parcels of real property that he has been unable to acquire by negotiation. He presented a list of such properties, together with the offers he recommended be made in connection with each, as follows:

Astoria-Naval Hospital Section of the Nehalem Highway

File 11451	Fred Winchester, et al.	$273.00
File 11452	Alex Christensen	85.00

Pelican City-South 6th Street (Klamath Falls)

File 11366	C. L. Lowe, et ux.	$2,500.00

After due consideration, the Commission approved the request by unanimous vote and adopted the following resolution with respect thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing

already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Fred Winchester, Jr., which property is located in Lots 31 and 32, Block 30, Case's Addition to Astoria, in Section 17, Township 8 North, Range 9 West, W. M., Clatsop County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the reco ds of the Highway Commission as file R 11451, which property is being acquired for right of way purposes for an access road to serve the Astoria Naval Hospital from the Nehalem Highway, which road is being constructed in response to the request of the United States Government, through its Public Roads Administration;*

Real property owned by C. L. Lowe and V. Lowe, which property is located in Lot 17, Block 29, Hot Springs Addition to Klamath

Falls, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 11366, which property is being acquired for right of way purposes in connection with the Klamath Falls-Malin Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and that the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That George Neuner, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 45, under the heading "Real Property

Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Chief Counsel reported on the meeting held by the Chambers of Commerce of Coquille and Myrtle Point and nine representatives of the Portland Chamber of Commerce held at Myrtle Point June 30, 1944, with reference to the preservation of myrtle trees along the Coos Bay-Roseburg Highway between Coquille and Myrtle Point. It appears that there are about nine miles of highway involved with considerable growth of scenic myrtle trees, lying principally on the upland or easterly side of the highway. A plan had been proposed whereby the owners would give to the State a one-half interest in the myrtle trees, with the understanding that no destruction of the trees would be permitted, but that if it became necessary to remove any of the trees for any reason, the owners of the land would take title thereto for such commercial value as they might recover. It would be the obligation of the State to clear up the underbrush and maintain the areas in a sightly condition. It is probable that the width on which the view trees would be cared for would extend from fifty to one thousand feet from the highway. Before taking any action in the matter, the Commission ordered that a report be made covering the estimated cost of the original clearing up of the area and the annual maintenance cost thereafter.

At this point Senator Lew Wallace appeared before the Commission on behalf of Mrs. Charles Redmond, who owns a suburban steak and chicken dinner establishment at 9589 S. W. Pacific Highway. He requested that the State Highway Commission build a flight of steps leading from Mrs. Redmond's establishment to the highway; otherwise, that Mrs. Redmond be given permission to construct such flight of steps on the state highway right of way at her own expense. After consideration the Engineer was instructed to make an investigation of the situation and report back at the next meeting.

At the request of the Assistant Attorney, authority was given to negotiate with Arthur A. Harriman for property in Lot 1, Patterson's Addition to Eugene. This authority was given upon the basis of the land being purchased and paid for at the present time, with a supplemental agreement to the effect that bids will be called for and the owners of the property be allowed the amount of the low bid for moving the buildings when it becomes necessary to clear the right of way for construction purposes.

Approval was given to extensions of leases with Oregon-Washington Railroad & Navigation Company and Union Pacific Railroad Company covering undercrossings of the railroad at Corbett and near Oneonta.

The Engineer reported upon the matter of future maintenance of the Richardson Gap Road in Linn County, advising that at this time it would

cost approximately $4,000 to re-oil the road and place it in a condition equivalent to that existing at the tim the maintenance thereof was taken over by the State. He stated that he had made an inspection of the section with the County Court and the County Engineer of Linn County and that he was advised that the County desired to place considerable additional rock on the road so as to bring it to a higher standard of construction. The County desired to accept the sum of $4,000 from the Commission in full release of all obligations of the Commission and to use this sum as a portion of the greater expenditure desired to be made by the County. This arrangement was considered satisfactory and was approved by the Commission. The Chief Counsel was instructed to prepare an appropriate agreement covering the matter and forward it to the County Court of Linn County for execution.

Consideration was given to the request of the City of Pendleton that the State pay the cost of repaving the portion of Emigrant Street affected by the removal of the tracks of Northern Pacific Railroad Company. This section of Emigrant Street is the route of the Pendleton-John Day Highway and is at the west end of the business district. The Chief Counsel stated that in his opinion the Commission has no authority to make this expenditure, notwithstanding the fact that it is on a portion of the state highway route. He explained that although the statutes give the State Highway Commission jurisdiction from curb to curb, the granting of franchises in the street remains in the City, and the Highway Commission has no jurisdiction thereover. After consideration, the request of the City of Pendleton was denied, and the Chief Counsel was instructed to advise the City of such action.

The Engineer brought up for consideration the question of channelizing the intersection of the Oregon Coast Highway and the Nehalem Highway in connection with the improvement of the Astoria-Naval Hospital Section. He stated that the probable cost would be between $40,000 and $50,000. No action was taken by the Commission pending the receipt of bids on the Astoria-Naval Hospital Section of the Nehalem Highway the following day. The proposed improvement is included as a separate item in the bids being called for on that project.

The Engineer requested authority to expend approximately $3,500 in connection with the construction of a proposed bridge to be built on the Ochoco Highway by the United States Bureau of Reclamation. He explained that under its existing plan, the Bureau of Reclamation will build the bridge to a low grade line, but advised that the grade line at that point is unsatisfactory from the highway standpoint and should be raised. The additional expense involved in the raising of the grade line or construction of a higher structure will be approximately $3,500. He recommended that the higher grade line be adopted and the additional expenditure made. After discussion the Commission approved the revised grade line and authorized payment of the additional expense in the approximate amount of $3,500 to the Bureau of Reclamation as the State's cooperation in the additional cost. Preparation and execution of an agreement with the Reclamation Service covering the matter was ordered by the Commission.

Consideration was given by the Commission to the request of the Klamath Falls Planning Commission that in the improvement of South Sixth Street in Klamath Falls, provision be made in the Highway Commission's plans for:

(a) The installation of an adequate lighting system;
(b) Provision for the removal of utility service poles; and
(c) Construction of concrete curbs along each side of North 9th Street between Pine and Prospect Streets.

With respect to item (a), the Engineer advised that with the exception of some work on Interstate Avenue in Portland, which was purely experimental in its nature, the former highway commissions as a matter of policy have always refused to bear the expense of the installation of lighting systems within municipalities. Commissioner Schaupp suggested that although the present Highway Commission should not depart from this policy, it might easily be possible to make provisions during the construction of the highway for facilities for the placing of conduits and the installation of lighting poles. This suggestion was unanimously approved by the Commission, and the Engineer was instructed to so prepare the plans and specifications for the project.

With respect to item (b), it was the opinion of the Commission that the State has no obligation to make provision for removal and re-establishment on some other street of the utility poles, and the Chief Counsel for the Commission was instructed to so advise the City.

With respect to item (c), the request was referred to Commissioner Schaupp and to the Engineer to make further investigation and give further consideration to the request and to report later to the Commission.

Consideration was given to a letter from Mr. William Ganong, Attorney at Law, Klamath Falls, Oregon, with respect to future relocation of the highway extending south and east from Klamath Falls. The Secretary was instructed to advise Mr. Ganong that no location has been adopted at this time, nor does the Commission plan any immediate action to that end.

Award by the Engineer of contract to Babler & Conley for the oiling of the Garibaldi-Tillamook Air Base Section of the Oregon Coast Highway, on which bids were taken June 14, 1944, was confirmed and approved by the Commission upon advice from the Engineer that the conditions of the award have been satisfied.

The Commission has under consideration the following requests for extensions of time within which to complete highway contracts:

Tru-Mix Concrete Company, Contract No. 2614, for grading and surfacing the Evans Creek-Sams Valley Access Road in Jackson County, requested an extension of time of six months from June 30, 1943, to December 31, 1943, within which to complete this job. The company attributed its failure to complete the project within the

specified time limit to bad weather conditions and labor shortages. The Engineer advised that this contract was awarded on January 4, 1943, and that the Tru-Mix Concrete Company commenced operations on January 16; further, that contractor carried on the work as best he could, considering shortage of help. The traveling public, he said, was not greatly inconvenienced by the delay. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

D. C. and A. L. Williams, Contract No. 2634, for the Madras Rock Production Project on the Warm Springs and The Dalles-California Highways in Jefferson and Wasco Counties, requested an extension of time from September 30, 1943, to April 28, 1944, within which to complete this job. They alleged that difficulties in securing labor was the primary cause for exceeding the time limit specified in the contract. The Engineer advised that the contractor carried on his work as expeditiously as was possible in view of existing wartime conditions, also that the State has not been inconvenienced in any way by reason of the delay. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2614, 2634, 2659 and 2660, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2614, with Tru-Mix Concrete Company, for grading and paving the Evans Creek-Sams Valley Access Road project in Jackson County, completed December 31, 1943.

Contract No. 2634, with D. C. and A. L. Williams, for furnishing crushed rock in stock piles, in connection with the Madras Rock Production project on the Warm Springs and The Dalles-California Highways in Jefferson and Wasco Counties, completed April 23, 1944.

Contract No. 2659, with Western Rock Company for furnishing crushed materials in stock piles on the Baker-Weiser Junction Section of the Old Oregon Trail Highway in Baker and Malheur Counties, completed June 15, 1944.

Contract No. 2660, with J. P. Johnston, for repairing the Crooked River Bridges on the Crooked River and Crooked River-Paulina Secondary Highways in Crook County, completed June 30, 1944.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission confirmed the sale of cordwood along the McTimmons Valley Secondary Highway to George Sullivan for a consideration of $75.00, payment of which previously has been made.

The Commission authorized the Engineer to purchase four gasoline electric generators, four "Skilsaws", and four power controls for use by highway department bridge crews at a total estimated cost of $2,350.

The Commission also authorized the purchase of 10,000 gallons of traffic line paint at a cost of $1.80 per gallon to apply on 1945 requirements for this item.

Approval was given to the proposed agreement with the town of Rockaway covering the financing of certain proposed city street improvements.

Consideration was given to the request of the Curry County Pomona Grange and Office of Defense Transportation for the modification of existing regulations in order to permit the operation of oversize vehicles on the Oregon Coast Highway between Coquille and the California state line. The Engineer explained that highways have been classified in three categories, which are:

(a) Sections on which the design of the roadbed and grades and curvature are adequate to provide for overweight loads and lengths of sixty feet;

(b) Sections on which the design of the roadbed is adequate to provide for overweight loads, but the grades and curvature are not adequate for lengths in excess of fifty feet; and

(c) Sections on which the design of the roadbed is not adequate for overweight loads, and the grades and curvature are not adequate for lengths in excess of fifty feet.

He stated that the Oregon Coast Highway could be classified as class (a) from Coquille to Port Orford, but is class (b) from Port Orford to the California line; also, that the Coos Bay-Roseburg Highway from Coquille to the connection with the Pacific Highway comes under the designation of class (a). He gave it as his thought that it might be possible to establish an assembly station at Coquille, to which the loads to be transported could be brought by smaller trucks, and the loads there transferred to larger trucks which would traverse the Coos Bay-Roseburg Highway to a junction with the Pacific Highway and thence south over the Pacific Highway on sections which are all designated under class (a).

Before taking any final action on the request, the Commission authorized a demonstration run from the California line at least to Port Orford, with adequate motion pictures being taken of the trial run. It was the thought of the Commission that such pictures would not only tend to solve the present question but could be used as a reference in making decisions upon any future requests which may develop. The taking of pictures is to be restricted to essential and necessary points and is not to be a continuous record of the entire demonstration run.

Consideration was given to the suggestion of Mr. L. A. McArthur, Secretary, Oregon Geographic Board, with respect to the correct designation of what appears on the Commission's maps as "Oregon Slough". Mr. McArthur has advised that the correct designation adopted by the United States Board on Geographical Names is "North Portland Harbor". After consideration the Commission ordered that on future maps and records made by the Commission, the correct designation of "North Portland Harbor" be used in lieu of the designation "Oregon Slough".

Consideration was given by the Commission to a resolution passed by the City of The Dalles accepting jurisdiction over the old right of way of the Columbia River Highway within the city of The Dalles, which section has heretofore been abandoned by the State. The Chief Counsel gave it as his opinion that it was not necessary that the City Council pass or that the Commission accept any such resolution, but in view of the fact that action already has been taken by the City, the resolution was approved and ordered filed.

The State Highway Commission briefly discussed:

(a) The receiving of bids on behalf of the Linn County Court for construction of county bridge near Cascadia;

(b) The request of Paul Mumpower regarding continued renting of ground on which are located buildings east of the Sandy River Bridge at Troutdale;

(c) Request of Weyerhaeuser Timber Company regarding the acquisition of land previously used for ferry landing purposes at North Bend;

(d) Request of North Lincoln County Chamber of Commerce regarding construction of sidewalks and curbs along the Oregon Coast Highway at Ocean Lake, Delake and Taft; and

(e) The appearance of Recreational Resources Committee of Portland Chamber of Commerce regarding the establishment of a state park at the intersection of Willamette Meridian and Base Line, just west of Portland, and the appearance of Mr. A. D. Merrill, Engineer, Portland Dock Commission, with reference to settlement on Dock Commission property on the Front Avenue project.

In view of the fact that all of the interested parties concerned were scheduled to appear before the Commission on July 12, no definite action was taken on any of the matters involved.

The Chief Counsel was authorized by the Commission to apply to the Secretary of the Interior for the granting of appropriate rights for the maintenance of a flight strip on property in Sections 3 and 10, Township 29 South, Range 23 East, W. M., and in Sections 34 and 35, Township 28 South, Range 23 East, W. M., in Lake County. It was explained to the Commission that at the time of the construction of the flight strip the Secretary of the Interior had given certain rights to the War Department and the Highway Commission was authorized by written permission of Army officials, to award a contract and proceed with the construction of the flight strip. It is now felt, however, that the authority over the land granted by the Secretary of the Interior to the War Department is not complete enough to fully authorize the granting of authority to the State Highway Commission for the construction of a flight strip, and that the matter should be clarified by proper application to the Secretary of the Interior.

The Engineer requested authority to acquire for construction purposes a parcel of land containing approximately 27.11 acres, now owned by the United States Government, at Hood River, which is located in Section 25, Township 2 North, Range 10 East, and in Section 30, Township 2 North, Range 11 East. He explained that although construction is not probable for several years to come, the site will be necessary for the revised location of the Columbia River Highway and a major portion of the tract then will be required for right of way purposes. The Assistant Attorney advised that the War Department has placed an appraisal of $2,000 on the tract, being slightly in excess of $75.00 per acre, and is withholding sale of the property pending a decision by the Commission as to whether or not it is desired by the State. He gave as his opinion that the purchase price is very advantageous, and that if the property

is allowed to get into private hands it may cost a great deal more to acquire it at a later date. The Chief Counsel advised that the property has been withheld from sale as a gesture of cooperation on the part of the War Department, with whom our relations and dealings have been very cordial. After consideration the Commission gave authority to make the purchase at this time.

The Chief Counsel advised that considerable vandalism had been perpetrated at the Ontario Underpass, consisting of the breaking and damaging of the lighting fixtures. He said that this was perpetrated by two boys, fifteen and sixteen years of age, who had confessed to the vandalism. He also stated that in his opinion it would not be possible by civil suit to collect the amount of the damage, which is estimated to total $200.30, either from the boys or their parents, and that the only other procedure which might be followed would be to file a criminal charge against the boys who, in all probability, would then be brought before the juvenile authorities and placed under probation. It was also brought out that the younger boy is desirous of joining the Navy when he becomes of sufficient age. The Chief Counsel advised further that he had reported the matter to the District Attorney, but that no reply to his communication has been received and, so far as he knows, no action has been taken in the matter. After consideration, the Commission decided to refer the matter to the Chief Counsel for such further action or proceedings or for the entire dropping of the matter, as might appear desirable to him.

The Chief Counsel brought up for consideration the matter of acceptance from the Glens Falls Indemnity Company of the sum of $200.00 for damage done to the Salmon River Highway wayside strip by Anderson Bros., logging operators, to whom a permit had been granted for the construction and use of a logging road across state park property in Township 6 South, Range 9 West, W. M., in Lincoln County. He explained that, after the permit was given, Anderson Bros. ceased operations and log hauling was thereafter carried on by other parties who stopped hauling as soon as the condition was discovered. It appears that the total damage amounted to more than $200.00, but it is impossible to segregate what portion thereof might have been caused by Anderson Bros. and what portion might have been caused by the subsequent haulers. In other words, it would be impossible to prove and enforce a greater claim for damage against Anderson Bros. The Chief Counsel recommended that the settlement be accepted. It was moved by Chairman Banfield, seconded, and unanimously voted that the settlement of $200.00 be accepted.

The Commission authorized the Engineer to advertise for bids for repairs to the Nehalem Bridge on the Fishhawk Falls Secondary Highway No. 103, which work is estimated to cost approximately $16,500.

The Commission adopted and passed the following resolution approving city street improvement programs in the towns of Molalla, Dayton, Sodaville, Philomath and Malin:

12103

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws, 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1944 for street purposes as provided in said law the several sums or amounts set opposite the name of the respective city or town:

Molalla	$ 1,245.71
Dayton	694.96
Sodaville	135.97
Philomath	1,175.66
Malin	734.79

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction and improvement with the funds above specified the following streets in the following named cities:

City of Molalla - Shirley Street, Ridings Avenue, Cole Street and Lola Avenue

City of Dayton- Church Street, Alder Street and Ash Street

City of Sodaville - Spring Street

City of Philomath - "F" Street, "G" Street, "I" Street and College Street

City of Malin - 6th Street, Rosicky Avenue and Railroad Avenue

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

JUL 11 1944

4. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the same.

5. This resolution shall be entered in the minutes and records of this Commission as of the 11th day of July, 1944.

The Engineer submitted tabulations showing changes which have been made in the various department budgets. These tabulations were approved and ordered filed.

The meeting adjourned at 4:50 p.m. to reconvene at 9:00 a.m. on the following morning.

Portland, Oregon, July 12, 1944.

The State Highway Commission reconvened at 9:00 a.m. in the Stock Exchange Room of the Imperial Hotel. The following were present at such meeting:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction work and for the purchase of obsolete equipment and scrap materials were opened and read in conformity with previously published notices following which Chairman Banfield announced that the awards of contracts would be made at 2:00 p.m. in the same room. He also announced that the Commission has referred to the Engineer all of the bids received for the purchase of obsolete equipment and scrap materials with authority to sell the several items to the high bidder in each instance, if the offers are reasonable.

NEHALEM SECONDARY HIGHWAY
GRADING AND PAVING, ASTORIA-NAVAL HOSPITAL SECTION

	Items 1 to 32	Items 1 to 74
J. A. Terteling & Sons, Boise, Ida.	$241,059.00	$297,728.40

M. E. Van Horn Construction Co., Portland	21,478.60
John G. Lundstrom, Portland	23,996.00
Clarence A. Gilmer, Portland	27,153.50

Mr. Paul Mumpower, Portland, came before the Commission in regard to the continued operation of a restaurant and beer parlor on state property adjacent to the Columbia River Highway just east of the bridge over Sandy River at Troutdale, being an establishment known as "Tad's Place". He advised that he purchased this business from a man named Smith earlier in the year, paying the sum of $3,000 for same, it being his understanding at the time that Mr. Smith had an agreement with the State Highway Commission for the continued use of the State's property until the Highway Commission needs it, and then he would be given 30 days notice in which to move; however, when the new lease was presented to him for execution, he found that it contained certain provisions with which he could not comply without ruining his business. He particularly referred to an alleged traffic hazard. He asked the Commission to let him continue his business for

one year which would give him the benefit of the smelt run in the Sandy River next spring from which he anticipated receiving sufficient profit to reimburse him for his capital outlay. The matter was discussed by the Commission privately during which the members of the Commission expressed themselves as being opposed to being responsible for the closing up of Mr. Mumpower's business, and upon recommendation of the Engineer, voted unanimously to grant Mr. Mumpower a one year lease on the property from July 1, 1944, to July 1, 1945, provided he will do what is necessary to properly protect the general public. The action of the Commission was conveyed to Mr. Mumpower by Chairman Banfield. Mr. Mumpower agreed to accept the lease on such basis, whereupon the Attorney was instructed to prepare a proper form of agreement covering the matter.

Messrs. Minot Davis, Manager, Timber Department, Weyerhaeuser Timber Company, Tacoma, Wahsington, and R. P. Conklin, Engineer for this company, came before the Commission in regard to the purchase of the old Coos Bay ferry landing at North Bend. Mr. Davis advised that the Weyerhaeuser Timber Company owns the property on both sides of the ferry landing, and that it is the plan of the company to develop this property for an eventual annual output of between 150,000,000 and 250,000,000 feet of lumber. He advised that the company's plant will be located on the property to the west of the ferry landing, and that they plan to construct docks on the property to the east of the ferry landing, making it essential that the company own the two and two-tenths acres that are contained in the old ferry landing area. He read aloud and presented to the Commission a letter in support of his request attached to which were original letters addressed to the Commission from the following parties, all of whom expressed their approval of the transfer of the property to the Weyerhaeuser Timber Company:

Port of Coos Bay, by Franck G. Shaw, President
City of North Bend, by C. B. Sundbaum, Mayor
and Edward Sandine, Recorder
Empire Development Company, by L. J. Simpson

In reply to an inquiry from the State Highway Engineer as to what plans have been made to provide access to the company's plant site below the ferry landing, Mr. Conklin stated that tentative plans are to construct a roadway on the east side of the highway right of way for one-way traffic to the plant and a similar roadway on the west side of the highway right of way for traffic leaving the plant, at the expense of the company; however, nothing definite as yet has been decided relative thereto. After considerable discussion, Chairman Banfield advised that the Commission was not in position today to pass on the matter but will make a decision after personal inspection of the premises within the next two or three weeks.

Messrs. E. L. Gray, Fred Robinson and Paul Stege, representing the North Lincoln County Chamber of Commerce, were present with regard to the construdtion of sidewalks along the Oregon Coast Highway through several communities between Delake and Taft. Mr. Gray headed the group. He reported that in accordance with the understanding had

at the previous meeting of the Commission, property owners who are affected at Delake, Ocean Lake, Taft and Nelscott have been contacted relative to this matter, and about 90 per cent of them have signed a petition guaranteeing to construct sidewalks in front of their premises as soon as the Highway Commission constructs curbs and provides necessary highway drainage facilities. The Engineer reported the results of a survey for such an improvement through the Delake, Ocean Lake and Taft communities, which indicates that it would cost about $11,000 to construct curbs along the highway at these points; however, the estimate does not include such improvement through the Nelscott district inasmuch as he did not consider that he had authority to extend the survey through this locality. He pointed out the probabilities that some of the buildings along the highway would have to be moved in order to provide uniform sidewalk construction, and suggested in order to avoid any misunderstandings that further investigation should be made covering such particulars so that all concerned will have full and complete knowledge of the requirements. Chairman Banfield advised that the Commission wants to cooperate to the fullest extent possible in this matter and will proceed with the construction of the curbs if the matter of financing the sidewalk construction can be worked out satisfactorily. The Engineer was thereupon instructed to make further investigation to determine whether or not any of the buildings will have to be moved in order to accommodate the sidewalks at the three locations heretofore considered. He was also authorized and instructed to make a similar survey and investigation through the Nelscott community. The Attorney was instructed to pass on the legal features involved and to advise the delegation as to this feature. It was understood that the Engineer would make his investigations sometime during the following week, and that reports by the Engineer and the Attorney would be presented to the Commission at its next regular meeting, at which time the delegation is to reappear before the Commission for a final decision. Chairman Banfield concluded the conference by reiterating that the Commission is ready to proceed with the construction of the curbs if the War Production Board will approve the necessary expenditure, and if the people will agree to build the sidewalks when the curbs are installed.

The Engineer requested authority to make a reconnaissance survey to determine the most feasible route for a revision in the Klamath Lake Secondary State Highway along a ten-mile section between Wocus Marsh and Fremont Monument at the south end of Howard Bay. He estimated that such survey would cost about $1,000. The Commission approved the request by unanimous vote.

The Attorney brought up for discussion the following matters which he suggested should be presented to the 1945 legislative assembly and requested instructions relative thereto:

1. Freeway matter which limits access to main state highways to points selected by the State Highway Commission.

2. Power line control to eliminate static in radios installed in automobiles.

3. Legislation relative to maintenance of advertising signs on private property adjacent to state highways.

4. Legislation to provide consolidation of condemnation proceedings in connection with acquisition of right of way.

The Commission deferred discussion of these matters pending the submission of a written report by the Attorney on each subject, explaining the need for the legislation.

The Commission recessed for luncheon at 11:30 a.m. and reconvened in the same room at 2:00 p.m. with the same persons present and participating.

The Commission discussed with the Engineer the bids received at the morning session for highway construction work and decided unanimously to award the contract for the painting of the Coos Bay Bridge to A. H. Barbour & Son, Portland, who submitted the low bid therefor, and to award to J. A. Terteling & Sons, Boise, Idaho, the contract for the construction of the Astoria-Naval Hospital Section of the Nehalem Secondary Highway on the basis of the alternate bid which includes 74 items. The Commission referred to the Engineer the bids received for the construction of the Foster-Canyon Creek Section of the Santiam Highway and authorized him to award the contract to E. C. Hall Co., Eugene, the low bidder, if and when additional Federal funds are authorized for the project. It was decided by the Commission to refer to the Linn County Court all bids received for the construction of a bridge over the Santiam River on a county road near Cascadia, inasmuch as this is a county project and was advertised for the County Court simply as a matter of courtesy. The Linn County Court, represented by County Judge E. G. Arnold, County Commissioners H. A. Renninger and Claude G. Smith, and County Engineer, Walter W. Larsen, was present and consulted with the Commission with regard to this project. In reply to an inquiry from Chairman Banfield, the Court advised that it would announce its decision relative to the award of this contract at 10:00 a.m. on the following day in the County Court House at Albany. Chairman Banfield thereupon made the following public announcement of the award of contracts:

"Astoria-Naval Hospital Section of the Nehalem Secondary Highway in Clatsop County. The low bid for this project was submitted by J. A. Terteling & Sons of Boise, Idaho, at $241,059.00 based on items 1 to 32, and $297,728.40 based on items 1 to 74. Warren Northwest, Inc., Portland, submitted the next low bid at $249,908.35 based on items 1 to 32 and $300,864.60 based on items 1 to 74. There were three higher bidders. The Commission has awarded this contract to J. A. Terteling & Sons, the low bidder, on the basis of all 74 items in the amount of $297,728.40.

"Painting Coos Bay Bridge on the Oregon Coast Highway at North Bend, Coos County. A. H. Barbour & Son, Portland, submitted the low bid for this project at $38,500.00. George C. Clark submitted the next low bid at $39,585.00. The only other bid was that submitted by Jud Beardsley, Salem, at $59,127.60. The Commission has awarded this contract to the low bidder, A. H. Barbour & Son at their bid price of $38,500.00.

"Foster-Canyon Creek Section of the Santiam Highway, Linn County. The Commission received four bids for this project, the low one being that of E. C. Hall Company, Eugene, at $178,019.00. The next low bid was that of the Rogers Construction Company, Dayton, Washington, at $185,851.00. The Commission has referred the bids for this job to the Engineer with authority to award the contract to E. C. Hall Company, the low bidder, when certain conditions have been satisfied.

"Construction of a timber truss bridge over the Santiam River on a county road near Cascadia, Linn County. The Commission received bids on this project in behalf of the County Court of Linn County to whom the bids are being referred. The County Court advises that it will announce its decision with respect to the award of the contract in the Linn County Court House, Albany, at 10:00 a.m. tomorrow, July 13, 1944."

A delegation representing the Recreational Resources Committee of the Portland Chamber of Commerce consisting of Messrs. Alfred Loeb, Chairman, Thornton Munger, and H. A. Waterbury came before the Commission in regard to the establishment of a small state park at the intersection of Willamette Meridian and Base Line just west of the City of Portland. Mr. Loeb advised that the monument at this location was established by the Federal Government in June, 93 years ago, as a starting point for all land surveys in the States of Oregon and Washington, and that its perpetuation as an historical monument has been approved as a desirable project by the Portland Chamber of Commerce. He referred to a letter directed to Chairman Banfield by Mr. David B. Simpson, President of the Portland Chamber of Commerce, on this subject and advised that the land required for the park will be donated by the two property owners involved if the State will take over the area and maintain it. He pointed out that the area lies between the Skyline Boulevard and Barnes Road, and in order to make it accessible to the public, a trail would have to be constructed from the park to Skyline Boulevard, a distance of about 500 feet. The owners of the property, he said, are a Mr. Frank X. Miller, who has agreed to donate a small area on the west side of the monument, and the Catholic Church, owner of Mt. Calvary Cemetery, which has offered to donate an area 250 feet wide by 600 feet long extending from the Skyline Boulevard to the monument. In reply to an inquiry from Chairman Banfield, Mr. Loeb advised that so far as the Committee has been able to determine, the State is the only public body that can handle the situation, which is their reason for asking the Commission to accept the deed to the property and to maintain the area.

The Commission's Chief Counsel advised that there are no legal restrictions to prevent affirmative action by the Commission. After discussion, the Commission referred the matter to the Engineer and Attorney for investigation and report on the desirability of making this a state park and the responsibility that the Highway Commission would assume by doing so. They were instructed to consult with the Committee in their deliberations.

Messrs. A. D. Merrill, Engineer, and George LaRoach, Attorney for the Portland Dock Commission, came before the Commission in regard to the Dock Commission's claim in the amount of $5,000 arising out of the removal of the municipal boat landing at the foot of N. W. Stark Street in connection with the construction of the Front Avenue Project. Mr. Merrill was spokesman. He argued that the State Highway Commission is liable for the payment of the $5,000 on this account and in support thereof submitted copies of evidence as follows:

1. Excerpt from the Highway Commission's minutes of September 4, 1941.

2. Extract from the minutes of the Commission of Public Docks of September 11, 1941.

3. Letter from R. H. Baldock, Chief Engineer, State Highway Commission, directed to the Commission of Public Docks dated September 12, 1941.

4. Letter from A. D. Merrill, Engineer, to R. H. Baldock dated September 15, 1941, outlining his understanding of the extent of the State's obligation in connection with the moving of the dock.

5. Letter from R. H. Baldock to A. D. Merrill dated September 17, 1941, approving such arrangement.

6. Extract from the minutes of the Commission of Public Docks dated September 25, 1941, acknowledging Mr. Baldock's letter of September 17.

7. Extract from the minutes of the Commission of Public Docks' meeting held on August 13, 1942, adopting the resolution authorizing the execution and delivery to the State Highway Commission of a release of all rights and interests in the office building of the Commission of Public Docks upon payment by the State in the sum of $10,000.

(See copies of evidence in general files.)

Mr. Merrill advised that the basis of the $5,000 claim of the Commission of Public Docks is Mr. Baldock's letter of September 12, 1941, in which he advised that the State would pay the cost of moving the

existing dock to a location near the Hawthorne Bridge and would also pay the cost of constructing suitable ramps or other means of access to the dock, and in addition thereto, ten per cent of the construction cost to cover engineering and supervision expense incurred by the Commission of Public Docks. Mr. Merrill further advised that about the time that the moving of the dock was contemplated, discussion was under way concerning the moving out of the Battleship Oregon; and in view thereof, the construction of the new boat landing was held up. Later, after the Battleship Oregon was moved, plans were revised and a more elaborate dock was constructed involving considerable more expense. In fact, it was decided to spend more money for this purpose than was originally contemplated because of the anticipated State cooperation.

The Commission's Chief Counsel stated that as a result of his review of the records covering this matter, he is forced to the conclusion that the $25,000 heretofore paid to the Dock Commission for right of way for this improvement, of which $10,000 was State money and $15,000 City money, included damages for moving the boat landing as well as for the office building. So, in his estimation, the Highway Commission does not have the legal authority to pay the extra $5,000. Moreover, he could find no basis for such payment. He pointed out that when the City Council considered the protests arising out of the damage awards, the claim of the Dock Commission was discussed and denied, which indicates that the City also considered that the sum of $25,000 completed payment in full for both the office building and the boat landing. It was his thought that if the claim were a just one, then it should be paid, but the State's share should be limited to 40 per cent, or $2,000, on the basis of the Highway Commission's agreement with the City with respect to the Front Avenue Project. The State Highway Engineer submitted a written report on his version of the controversy. (See letter dated July 10, 1944, in general files for details.)

After considerable discussion, Commissioner Chessman suggested, inasmuch as the Commission's legal and moral responsibility is involved, that the matter be referred to the Engineer and the Attorney to discuss with the members of the Dock Commission in an endeavor to arrive at a solution that would be satisfactory from the standpoint of all parties concerned. He made a motion to that effect which was seconded by Commissioner Schaupp and unanimously carried by the Commission.

The Engineer presented a letter from Mr. H. R. Litel, Portland, which was referred to him by Governor Snell, stating a desire to purchase a small area of state-owned property situate adjacent to the McLaughlin Boulevard (Pacific Highway East), Portland, just south of its intersection with S. E. Rhone Street. He advised that this is a small area which is of no value for state highway purposes and suggested that it be sold to Mr. Litel if he will pay a reasonable price for the same and will relinquish direct access to McLaughlin Boulevard from the property. The Commission deferred a decision pending a written report from the Engineer on the matter.

The Commission discussed its proposed inspection trip of highways in western Oregon and decided unanimously to make such a trip during the week commencing Monday, July 24, 1944.

The Commission considered and signed agreements, etc., as follows:

Extension of lease agreement with the O. W. R. & N. Company and the Union Pacific Railroad Company for private crossings of the railroad at Corbett and at Oneonta.

Agreement with Chris J. Jorgenson covering control of commercial advertising signs on private property adjacent to the Steiwer Hill-Santiam River Section of the Pacific Highway East.

Agreement with Carrie Hochspeier covering control of commercial signs, advertisements, etc., on the Steiwer Hill-Santiam River Section of the Pacific Highway East.

Agreement with Arthur C. White covering control of commercial signs, advertisements, etc., on the Steiwer Hill-Murder Creek Section of the Pacific Highway East.

Contract with J. F. Johnston for repairing the Wilson River Bridge on the Wilson River Highway in Tillamook County.

There being no further business to come before the Commission at this time, the meeting adjourned at 3:15 p.m.

JUL 12 1944

12113

Inspection Trip, July 24-28 incl., 1944.

During the period of July 24 to 28 inclusive, 1944, the State Highway Commission inspected state highways in western Oregon to ascertain at first hand how well highway surfaces are standing up under heavy wartime trucking and depleted maintenance personnel.

Present on such inspection trip were the following:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary.

Also present were W. H. Lynch, District Engineer and T. M. Davis, Senior Highway Engineer of the Public Roads Administration; Ralph Watson, representing the "Journal", and Wayne Pettit, representing "The Oregonian". Hon. James W. Mott, Salem, Congressman, 1st District, and Hon. Harris Ellsworth, Roseburg, Congressman, 4th District, also accompanied the Commission during a portion of the trip.

The following highways were inspected by the Commission:

(1) Oregon Coast Highway (US101) between Astoria and Coquille
(2) Corvallis-Newport Highway (Oregon 26) between Newport and Philomath
(3) Alsea Highway (Oregon 34) between Philomath and Waldport
(4) Coos Bay-Roseburg Highway (Oregon 42) between Coquille and the junction with the Pacific Highway (US99)
(5) Pacific Highway (US99) between Roseburg and Ashland
(6) Green Springs Highway (Oregon 66) between Ashland and Klamath Falls
(7) Portions of the Klamath Falls-Lakeview Highway (Oregon 66), Klamath Falls-Malin Highway (Oregon 39), and Hatfield Secondary Hwy (No. 426), en route Klamath Falls to the California State Line.
(8) A portion of The Dalles-California Highway (US97) and the Willamette Highway (Oregon 58), en route Klamath Falls to Eugene.
(9) Pacific Highway East (US99 and US99E), Halsey-Sweet Home Highway (Oregon 228), Santiam Highway (US20), and McKenzie-Bend Highway (US20), en route Eugene to Bend.

In addition to the above, Chairman Banfield inspected the Lower Columbia River Highway (US30), Portland to Astoria, and portions of The Dalles-California Highway (US97), Warm Springs Highway No. 53, Wapinitia Highway (Oregon 50), and Mount Hood Highway (Oregon 50), en route Bend to Portland. Commissioner Chessman also viewed the North Santiam Highway (Oregon 222) en route Bend to Salem.

The following special inspections were made by the Commission during the progress of the trip:

JUL 24 1944

(1) Proposed sidewalk construction along Oregon Coast Highway through the communities of Ocean Lake, Delake, Nelscott and Taft, with particular reference to the situation in Taft, heretofore requested by the North Lincoln County Chamber of Commerce.

(2) Proposed sidewalk construction along Winchester Avenue and the Oregon Coast Highway between the business center and Scholfield River Bridge at Reedsport, requested by the City of Reedsport.

(3) The old Coos Bay ferry landing at North Bend, which the Weyerhaeuser Timber Company desires to purchase in connection with the development and use of its properties at this location.

(4) Proposed preservation of myrtle tree groves adjacent to the Coos Bay-Roseburg Highway between Coquille and Myrtle Point, as suggested by the Chambers of Commerce in this district.

(5) Proposed improvement of the North Umpqua County Road connection with the Pacific Highway at Roseburg.

En route from Myrtle Point to Roseburg, on Tuesday afternoon, July 25, 1944, the Commission disposed of the following routine matters; also present at that time were the State Highway Engineer and the Secretary:-

(1) Request of the City of Reedsport for state cooperation in the construction of a sidewalk along Winchester Avenue between the city's business district and Scholfield River Bridge. The Commission decided unanimously not to contribute toward the construction of such sidewalk between the business district and the intersection of Winchester Avenue with the Oregon Coast Highway, about 400 feet northeast of the Scholfield River Bridge, inasmuch as Winchester Avenue is not on the state highway system; however, the Commission approved an expenditure of state funds, estimated by the Engineer at about $500.00, for the construction of an extension to the city's sidewalk between said intersection and the bridge, if and when such sidewalk is constructed by the City. The Commission ordered that the City be informed accordingly.

(2) Request of the Weyerhaeuser Timber Company to purchase the old Coos Bay ferry landing at North Bend. Chairman Banfield reported briefly the results of his conversation with Mr. R. P. Conklin, Engineer for the Weyerhaeuser Timber Company, in North Bend, following inspection of the landing. He advised that according to Mr. Conklin, the Weyerhaeuser Timber Company had as yet made no definite plans for the use of the property, in fact it appears that the company will not need it for perhaps four or five years, so there is no particular need for immediate action on the company's request. It seems, he said, that the thing uppermost in the company's mind is to know whether or not it can obtain the property from the state if necessary for their purposes. He further advised that he told Mr. Conklin that the State

Highway Commission does not care to dispose of or sell the property, but if it is absolutely needed by private interests, in connection with industrial development, the Commission would give the matter very careful thought from that standpoint because it does not want to hold up such development, but it will not dispose of the property under any other circumstances. Chairman Banfield also stated that Mr. Conklin was unable to advise as to the plans of the company to provide ingress to and egress from the company's plant area, which is situate just below the old ferry landing. After discussion, the Commission voted unanimously not to take action in the matter until the company advises definitely whether or not the property is essential in connection with its operations, and as to its plans for traffic access to and from the company's plant site.

(3) Proposed relocation of the Upper Columbia River Highway through the town of Hood River. The Secretary presented a letter from the Hood River Chamber of Commerce advising that with few exceptions the people of Hood River feel that the community would be better served by a relocation of this highway on a water grade north of the town, than directly along one of the few city streets that are available. The Engineer explained the situation with respect to alternate routes and suggested that he be authorized to make a survey for a new location. The Commission decided not to approve the relocation survey at this time, however, authorized the Engineer to make a preliminary investigation to determine how much it will cost, and to discuss the matter with the local people.

(4) Request of the City of Cascade Locks for authority to use the state scales at this place for weighing trucks for license purposes. During the discussion of this matter, it was pointed out that the former Commission granted such privilege in two or three instances because commercial scales were not available and it appearing that if the state's scales were not made available it would be necessary for truck owners to drive their trucks many miles to have them weighed. A decision in this matter was deferred by the Commission pending a report on the number of localities in which this privilege has been granted, and the reasons for granting the same.

(5) The Engineer requested authority to submit to the Public Roads Administration postwar survey and plan projects as follows:

Route No.	County	Location and Termini	Length	Contemplated Construction	Est. cost of Construction
101	Curry	Gold Beach	0.56	Gr. & Pav.	$103,000
66	Klamath	Klamath Falls (6th St.)	1.75	Gr.& Bit.Mac.	395,000
11	Umatilla	Milton-Washington State Line	5.56	Gr., Bit.Mac & Pav.	308,000
					$806,000

JUL 24 1944

He explained that the surveys have already been made and that his object in requesting authority to submit the projects to the PRA at this time is simply to expedite the securing of federal aid to pay for the right of way if and when the Commission authorizes the acquisition of the right of way. Unless such approval has been obtained in advance, he said, there are possibilities of delays occurring when construction is ready to proceed. In view of the Engineer's explanation, and the desire of the Commission to expedite the postwar work as much as possible, the Commission approved the Engineer's request unanimously.

(6) Claim against Dependable Transportation Company, Portland, for damage to the Tanner Creek Bridge on the Upper Columbia River Highway at M.P. 41.13. The Engineer advised that the accident occurred on January 21, 1944, when one of the company's trucks crashed through the banister of the bridge and severely damaged the side-wall and sidewalk, necessitating repairs costing about $350.00. The company alleges, he said, that the pavement was frosty and slippery, and for that reason the accident was unavoidable; also that the insurance company denied the claim for the same reason. A report from the section foreman in charge of this portion of the highway, he added, indicates that the pavement was not frosty or slippery when the highway was inspected at 8:30 A.M. and at noon on the day the accident occurred, although it is possible that some frost formed in the meantime. He further stated that the Attorney has requested instructions whether or not to press the claim, pointing out, however, that in his opinion if the accident were unavoidable then he did not believe that he could prove it in an attempt to collect damages by court action. Commissioner Schaupp gave as his opinion that the courts would hold that damages cannot be recovered in case of an unavoidable accident. After discussion, the Commission decided unanimously to let the matter drop, in view of the uncertainty of the facts involved. This action was confirmed by the Commission at Klamath Falls on the following day, after consulting with the Attorney with respect to details.

(7) Preservation of myrtle groves along Coquille-Myrtle Point section of Coos Bay-Roseburg Highway. The Commission inspected the groves en route to Roseburg, in company with Mr. George E. Oerding, Coquille, who represented the parties interested in the matter. Chairman Banfield advised that from information given by Mr. Oerding, it appears that the project is considerably larger than was first reported to the Commission, and that it now seems that the sponsors want the State to clear up the premises around the trees and to plant new trees where necessary, in order to fill out certain areas, which will result in a much costlier project than was first anticipated. Due to the uncertainty as to just exactly what is wanted by the sponsors, the Commission decided to defer action in the matter. The Commission ordered that definite information in that regard be secured from the sponsors, and that a report be rendered on the cost to do the things that the sponsors want.

(8) A letter was presented from the City of Ashland relative to the construction of a syphon across the Pacific Highway to serve the Ashland Airport. The Engineer advised that when the highway was constructed at this point in 1935, the plans for the improvement included provision for a syphon which was estimated to cost $520.20, based upon prices prevailing at that time. However, during the course of construction it developed that the City considered it unnecessary to place the syphon and for that reason it was not built. He estimated that it would cost about $750.00 to build the syphon today, because of the general increase in price levels. He recommended, in view of the fact that the Commission was obligated to build the syphon at one time, that the State now contribute the sum of $520.20, the amount of the original obligation, toward the cost of the syphon provided the City of Ashland will pay the balance and will construct the syphon in conformity with the original plan and under the supervision of the State Highway Department. The Commission approved the recommendation by unanimous vote.

(9) Disposition of logs dumped on highway right of way. The Engineer reported that the dumping of logs on highway rights of way seems to be on the increase, and that the owners are not very particular about removing them within the time limit specified by the Commission. In some cases, he said, the logs are left for several weeks and there is no evidence that the owners intend to remove them. He suggested that the Commission might dispose of the logs as it sees fit after giving the owners reasonable notice, and inquired as to the Commission's attitude with respect thereto. The Commission deferred action pending receipt of an opinion from the Attorney as to its authority to dispose of the logs.

(10) The Engineer reported that in conformity with the authority previously granted him by the Commission, he awarded to E. C. Hall Company, on July 24, 1944, the contract for the construction of the Foster-Canyon Creek Section of the Santiam Highway in Linn County, on which bids were received on July 12, 1944, this company being the low bidder on the project, the conditions of the award having been satisfied. The Commission confirmed the award of the contract as reported.

(11) Proposed agreement with Ostrander Timber Company for truck hauling logs across two secondary highways at grade, near Molalla. The Commission discussed this matter with the Engineer and the Attorney on the following day in Klamath Falls. The Attorney advised that the Company has licensed all of its trucks, so has legal authority to operate them on or across public highways in this state. In view of the circumstances, the Commission decided unanimously to let the Company operate the trucks over the two secondary highways in question temporarily, subject to certain conditions which are to be specified by the Engineer and the Attorney. The matter is to be covered by a written agreement between the Commission and the Ostrander Timber Company.

(12) Proposed channelization project in Roseburg. The Engineer explained the following arrangement for financing this project:

Federal funds	$15,600
State funds	22,400
Douglas County	7,000
City of Roseburg	7,000
Total	$52,000

He advised that the State's cooperation would be limited to improvements within the Pacific Highway right of way and to engineering; that the County's obligation, in addition to the cash payment, would include the furnishing of a portion of needed right of way and the assumption of maintenance of the north unit (C) outside of the highway right of way; and that the City's obligation, in addition to its cash payment, would include the furnishing of right of way for the south units (A and B), certain maintenance outside of the highway right of way, and the assumption of responsibility for damage claims, other than those against the contractor, which might arise. He gave as his thought that this is a fair arrangement, and suggested, if the Commission approves, that the arrangement be covered by written agreement among the parties concerned, which agreement shall provide that the City and the County pay their respective shares and furnish right of way in advance of the award of the contract. He requested authority, subject to the Commission's approval, to negotiate an agreement with the County and the City on such basis and to advertise the project for bids when the agreement has been signed. After discussion, the Commission approved the arrangement by unanimous vote and authorized the Engineer to advertise the project for bids when the arrangement has been accepted by the City and the County in writing.

(13) Monthly pay roll report. The Engineer submitted a pay roll report covering the month of June, which the Commission discussed briefly and approved by unanimous vote.

(14) A letter, under date of July 21, 1944, addressed to R. H. Baldock, State Highway Engineer, signed by the Secretary of the Oregon State Employees Association, asking for endorsement by the State Highway Commission of proposed legislation setting up a retirement plan for state employees, was read aloud by the Engineer, who presented a copy of the letter to each member of the Commission. The Commission took no action on the request.

(15) The Commission had under discussion the setting of a date for its next regular meeting; however, deferred action pending a report from the Engineer as to when it will be possible to advertise for bids for the Roseburg channelization project.

There being no further business to come before the Commission at this time, the meeting was declared adjourned at 5 P.M.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

Portland, Oregon, September 11, 1944

The State Highway Commission met in regular session at 9:00 a.m., in the Stock Exchange Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary.

Bids, as follows, for highway construction work, ferry operation, and sale of property were opened and read in conformity with previously published notices, following which Chairman Banfield announced that the award of contracts, etc., would be made at 11:30 a.m. With respect to the sale of obsolete equipment and scrap materials, Chairman Banfield announced that the Commission has referred the bids to the Engineer for tabulation and with authority to sell the several items to the highest bidder in each instance, provided the bid price is satisfactory.

PAINT EXTERIOR OF DIVISION OFFICE BUILDINGS
MILWAUKIE DIVISION HEADQUARTERS, PORTLAND, OREGON

SALE OF USED TELEGRAPH LINE MATERIALS

Bids received for used telegraph line materials, salvaged from a retired section of the Western Union and Southern Pacific telegraph lines in Eugene, Oregon. (For details see proposals in files in Room 321.)

SALE OF OBSOLETE EQUIPMENT AND SCRAP MATERIALS

Bids received for obsolete equipment and scrap materials at the highway department shops at Salem, Coquille, Klamath Falls and La Grande. (For details see tabulation of bids filed in general files.)

The Engineer discussed briefly with the Commission matters concerning which delegations are to appear before the Commission at this meeting.

Messrs. E. L. Gray, F. C. Robison, Paul Stege and Herbert Gordon, representing the North Lincoln County Chamber of Commerce, appeared before the Commission with regard to the construction of sidewalks and curbs along the Oregon Coast Highway through the Delake, Ocean Lake, Nelscott and Taft communities. The Commission's Attorney advised that he has prepared a formal petition to be signed by local property owners concerned, wherein provision is made that objectors to this improvement will be forced to cooperate regardless of their attitude. However, there was insufficient time to fully circulate this petition prior to this meeting. Members of the delegation expressed approval of the form of petition. Chairman Banfield inquired whether or not the committee is of the same opinion as heretofore, with respect to this improvement, and if the committee feels that it can complete and fulfill its agreement with the Commission. The committee replied in the affirmative; whereupon Chairman Banfield advised that the award of the contract for construction will depend upon the success and ability of the local people to agree among themselves relative thereto. After discussion, the Commission decided to proceed with this project, and authorized the taking of bids for improvement at all or any one of the four places mentioned, as soon as plans and specifications have been prepared, provided all other requirements have been satisfied. The question arose as to the width of the sidewalk to be constructed and it was decided by mutual agreement that provision should be

made for a sidewalk eight feet wide. (This matter was reconsidered by the Commission on the following day en route from Prineville to Burns. See ahead for minute entry.)

Mr. Gray then brought up for discussion the question of ownership of a section of the old highway right of way in Nelscott, at a point where the highway alignment has been revised. The Commission referred this matter to the Engineer and the Attorney to check into the records with respect thereto.

Messrs. A. M. Orcutt, City Attorney, and Percy Croft, City Councilman, Roseburg, came before the Commission at this time relative to the securing of right of way for the Roseburg-North Umpqua County Road Project for which the Commission received bids at this meeting. Mr. Orcutt advised that the city is having difficulty in obtaining right of way and it appears necessary to condemn some of the property which will take about 90 days' time. He pointed out that under the state law the Highway Commission can take possession of property as soon as condemnation proceedings have been started, and in view thereof, suggested that the Highway Commission institute the proceedings so as to expedite the project. He estimated the cost of the right of way at $15,000 and advised that the city would pay the entire expense. The Commission's Attorney advised that there is a question whether or not the county can take possession of the right of way upon filing of a condemnation complaint. He gave as his opinion that it would take the city about 90 days to secure it, whereas the state could acquire it in about three weeks, and stated a willingness to help the city get it if the Commission approves. Commissioner Chessman stated that he has no objection to the state acquiring the right of way if the legal department has time to handle the case. Commissioner Schaupp concurred therein, adding that he considers it advisable to expedite the project as much as possible. Chairman Banfield also approved, stating that while the Commission is not particularly anxious to take on another law suit, it will do so in this instance simply to help out the city, but it should be clearly understood that this is strictly a city proposition and that the city is to pay all costs incident thereto. The Attorney was thereupon authorized by the Commission to condemn the right of way in the name of the state.

A delegation, representing the Oregon State Federation of Labor, including Messrs. James T. Marr, Executive Secretary, F. W. Griffith, L. E. Egan and D. F. Harland, was present and discussed briefly with the Commission the matter of including in State Highway contracts, provision for the payment of the wages prevailing in the communities in which the work is to be done. Mr. Marr headed the group. He requested the privilege of meeting again with the Highway Commission or a sub-committee of the Highway Commission at some future time to discuss the matter thoroughly. After a short discussion, the Commission advised that it would give the matter study. The Engineer was thereupon instructed to furnish the members of the Commission full information with respect to the subject so that each will be conversant with the facts when the matter comes up for further discussion.

A delegation from Rockaway, consisting of G. A. Sutherlin, City Recorder, and Ed. Bjornstad, City Councilman, came before the Commission in regard to the bids received for the construction of a culvert to replace an old bridge on Nehalem Avenue in the Town of Rockaway. They gave as their thought that the bids received for this project are too high and recommended that all of them be rejected and that the project be readvertised. The State Highway Engineer concurred in the recommendation. The recommendation was approved by the Commission by unanimous vote, whereupon the Engineer was instructed to readvertise for bids to be received at the next meeting.

A delegation from the Portland Chamber of Commerce, Recreational Resources Committee, including A. A. Loeb, Chairman, J. D. Carter, Thornton Munger of the U. S. Forest Service, and Walter H. Horning, Chief Forester, came before the Commission in regard to the establishment of a Myrtle Tree Lane along the Coos Bay-Roseburg Highway, between Coquille and Myrtle Point, and the establishment of a small state park at the intersection of the Willamette Meridian and Base Line just west of Portland. Mr. Loeb headed the group. He inquired as to the status of the Myrtle Tree Lane project. He was informed by Chairman Banfield that as a result of inspection the cost to maintain such a project is estimated to be much more than the Commission had in mind; the expense for the first year being estimated at $10,000 and the annual expense thereafter at $2,500. He further stated that the Commission is not ready to make a definite statement with respect to this project until it has consulted the State Parks Superintendent, who could not be present at this meeting on account of illness.

Mr. Loeb then brought up for discussion the establishment of a small state park just west of Portland, at the intersection of the Willamette Meridian and Base Line. He advised that certain timber interests have stated a willingness to clean up the premises before the property is turned over to the state so that the obligation of the state would be simply to maintain the property thereafter, which should not be costly because they are not asking for development. The State Highway Engineer suggested, in view of the fact that access to the property will be by trail only, that some provision should be made along Skyline Blvd. for the parking of automobiles belonging to people who wish to visit the park. It was his thought that the construction of such parking area is properly a county obligation and that the Board of County Commissioners should be asked to build it. He estimated the county's expense for such parking area at about $300, and the state's expense to construct the trail at about $300. In the further discussion of this matter, the Commission's Attorney advised that the deed conveying the property to the state should contain all of the restrictions desired by the Commission. He offered to prepare the deed if that is satisfactory. The Commission indicated a desire to cooperate and advised that it would accept the deed to the property in behalf of the state if the conditions of the conveyance are met. This concluded the conference. (The matter was discussed further on the following day en route from Prineville to Burns, at which time the Engineer was instructed to prepare a description of the property and the Attorney was instructed to prepare an appropriate deed of conveyance including the description to be furnished by the Engineer and the restrictions heretofore ordered by the Commission. As

to the parking area along the Skyline Blvd., the Commission considered this a county obligation. Chairman Banfield volunteered to discuss the matter with the Board of County Commissioners.)

The Commission discussed with the Engineer the bids received at this meeting for highway construction and sale of property. As a result thereof, contracts were awarded as follows:

Painting of the Division Office Buildings at 9200 S.E. McLoughlin Blvd., Portland; awarded to Johnston Painting Co., Portland, low bidder.

Nimrod-Alder Springs Rock Production Project on the McKenzie Highway in Lane County; awarded to Newport, Kern & Kibbe, Portland, low bidders.

Furnishing of ferry service across the Willamette River at Wilsonville; awarded to T. E. Bruck, Wilsonville, low bidder.

Bids for the following purchases were rejected by the Commission:

Repairing timber truss spans over the Nehalem River on the Fishhawk Secondary Highway near Jewell, Clatsop County; grading and paving the Roseburg Access Road Project on the Pacific Highway and North Umpqua County Road in Douglas County; replacing a timber bridge with 48" concrete pipe on Nehalem Avenue in the City of Rockaway in Tillamook County.

With respect to the bids received for the timber log bridge over Deer Creek on the Roseburg Access Road Project in Roseburg, the Commission considered the bid submitted by Harry I. Hamilton, Eugene, satisfactory. However, decided not to award the contract at this meeting because of the rejection of bids received for the grading and paving work on this access road. The Engineer was instructed to ascertain from Mr. Hamilton whether or not he would be willing to allow the bid to remain active longer than the thirty days provided for in the proposal so as to give the Commission sufficient time to receive and consider new bids for the grading and paving project. In the event Mr. Hamilton will not consent to do this, then his bid is to be considered rejected.

The Commission accepted the offer of William Van Fleet to purchase an old state-owned restaurant building in Bandon for the sum of $150.00; and the offer of H. Unger, Hood River, to pay $320.00 for the Lindsey Inn buildings. The Commission referred to the Engineer for tabulation bids received for the purchase of used telegraph line materials at Eugene and for the purchase of obsolete equipment and scrap materials located in Salem, Coquille, Klamath Falls and La Grande. He was authorized by the Commission to accept the offer of the high bidder in each instance if the bid is satisfactory. In this connection, the Attorney suggested, in order to conserve the Commission's time in the opening of bids for the sale of obsolete equipment and scrap materials, that it would be

advisable for the Secretary to take bids for the Commission several days in advance of the regular Commission meeting. The bids could then be tabulated at Salem and reported to the Commission at its next regular meeting with the recommendation of the Engineer. Such procedure, he said, would be legal and would conserve much time for the Commission to dispose of other more important matters at its regular session. The Commission tentatively approved the suggestion and instructed the Attorney to prepare a formal resolution covering the matter for consideration at the next regular meeting.

At 11:30 a.m., Chairman Banfield announced the awards of contracts and sale of materials as follows, in conformity with action previously taken by the Commission:

"Painting exterior of Division Office Buildings at the Milwaukie Division Headquarters, Portland. The low bid for this work was submitted by Johnston Painting Co., Portland, at $1,337.00. The second low and only other bid submitted was that of A. H. Alexander, Portland, at $1,500.00. The Commission has awarded this contract to Johnston Painting Co., at its bid price of $1,337.00.

"Repair existing timber truss spans over the Nehalem River on the Fishhawk Falls Secondary Highway, near Jewell, in Clatsop County. The Commission received only one bid for this project, being that of C. J. Eldon, Portland, at $25,660.32. The Commission has rejected this bid.

"Construction of a timber log bridge on concrete piers over Deer Creek on the Roseburg Access Road. The low bid received for this project was that of Harry I. Hamilton, Eugene, at $13,871. The next low bidder was Tom Lillebo, Reedsport, at $14,959.50. There were two higher bidders. The Commission has deferred the award of this contract pending the satisfaction of certain conditions.

"Grading and paving the Roseburg Access Road Project on the Pacific Highway and North Umpqua County Road in Douglas County. The Commission received two bids for this project, the low one being that of Salem Sand & Gravel Co., Salem, at $53,532.40. The other bid was submitted by Newport, Kern & Kibbe, Portland, at $54,837.00. The Commission has rejected both of these bids.

"Nimrod-Alder Springs Rock Production Project on the McKenzie Highway, in Lane County. The low bidder for this project was Newport. Kern & Kibbe, Portland, at $30,600.00. The next low bid was that of Rogers Construction Company, Dayton, Washington, at $33,840.00. There were five higher bidders. The Commission has awarded the contract to the low bidder, Newport, Kern & Kibbe, Portland, at their bid price of $30,600.00.

"Replacement of a timber bridge with a concrete pipe on Nehalem Avenue in the City of Rockaway, Tillamook County. The low bidder was Dolan Construction Co., Tillamook, at $2,087.00. Rogers Construction Co., Dayton, Washington, submitted the next low bid at $2,314.45. The only other bid was that submitted by Logan & Taylor, Portland, at $2,565.00. The bids

have been rejected by the Commission at the request of the City of Rockaway, which is financing the project.

"Ferry service across the Willamette River at Wilsonville, Clackamas County. T. E. Bruck, Wilsonville, submitted the low bid for furnishing this service, being at the rate of $1,535.00 per month. Portland Tug and Barge Co., Portland, submitted the next low bid at $1,988.00 per month. Leonard and Slate submitted the only other bid at $2,371.00 per month. The Commission has awarded the contract to the low bidder, T. E. Bruck, Wilsonville, at his bid price of $1,535.00 per month.

"Sale of restaurant building, formerly known as the "Koffee Kup Cafe" in Bandon. The Commission received only one bid for the purchase of this building, being that of William Van Fleet, Coquille, at $150.00. The bid is satisfactory and the Commission has sold the building to Mr. Van Fleet at the amount of his offer.

"Sale of the Lindsey Inn buildings at Lindsey Creek on the Columbia River Highway near Cascade Locks, Hood River County. Mr. H. Unger, Hood River, submitted the high bid for the purchase of these buildings at $320.00. Sullivan Wrecking Co., Portland, submitted the second high bid at $270.90. A. R. McWilliem, Hood River, submitted the only other bid at $200.00. The Commission has accepted the bid of Mr. Unger and has sold the buildings to him for $320.00.

"Sale of tract of land adjacent to the Corvallis-Newport Highway near Toledo, Lincoln County. The Commission received no bids for the purchase of this tract.

"Sale of used telegraph line materials stored at Eugene. The Commission has referred to the Engineer the bids received for this material with authority to sell the several items to the high bidder in each instance if the bid is satisfactory.

"Sale of obsolete equipment and scrap materials stored at the highway department equipment plants in Salem, Coquille, Klamath Falls, and La Grande. The Commission has referred all bids for the purchase of this material to the Engineer with authority to sell each item to the high bidder in each instance, if the bid is satisfactory."

County Judge D. N. Busenbark and County Commissioner H. B. Roadman of Douglas County came before the Commission in regard to the maintenance of county roads that are being damaged by heavy log hauling traffic. Judge Busenbark explained the county's position in the matter, advising that the county is not financially able to properly maintain the roads under its control. He asked the Commission to assist the county in this matter and particularly referred to the North Umpqua County Road which he asked the Commission to designate as a state secondary highway. Chairman Banfield said

that the maintenance of county roads is not a state obligation and it does not appear that the Highway Commission could do much for the county in that regard. However, the Commission will discuss it with the Attorney and Engineer.

The Attorney reported receipt of deed from Mr. Seneca Fouts, Portland, conveying to the state a parcel of land situate near Mitchell Point Tunnel on the Upper Columbia River Highway for use as a state park. He advised that the form of the deed is satisfactory and recommended its acceptance by the Commission. The Commission approved the recommendation unanimously.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Rogers Construction Company covering changes in Contracts Nos. 2668 and 2669 for the improvement of the I.O.N. Highway in Malheur County.

Agreement with the City of Portland covering the subject of right of way for the Front Avenue project.

Agreement with the City of Portland covering maintenance of streets and parkways.

Agreement with Bonneville Power Administration covering installation of power pole line crossing of the Albany-Corvallis Highway in Benton County.

Agreement with H. P. Andrus covering lease of stock pile site in Jefferson County.

Agreement with Deschutes Grain and Seed Company covering lease of stock pile site in Jefferson County.

Project agreement with Public Roads Administration covering construction of the Church-Lighthouse Section of the Cape Blanco Secondary Highway in Curry County, as an access road project.

Project agreement with Public Roads Administration providing federal funds for construction of Swan Island Access Road, Portland.

Modification of project agreement with Public Roads Administration providing increase in amount of federal funds for the improvement of Rice Hill-Turkey Hill Section of the Pacific Highway in Douglas County.

Modification of project agreement with Public Roads Administration providing for increase of federal funds for an advance engineering survey of the Front Avenue project in Portland.

Certificate acknowledging acceptance of Seneca Fouts State Park.

Quit claim deed conveying unto Roy R. McNees and wife 3945 square feet of land in Umatilla County. This deed is to correct a faulty description in deed heretofore given to the State by U. S. National Bank of Portland.

"Release" relieving Federal Government from damage claims arising out of use of Cape Arago State Park as a rifle range.

Due to the fact that there was insufficient time for the Commission to dispose of additional accumulated routine matters listed in the Agenda, before starting out on its Eastern Oregon inspection trip at 2:00 p.m., the Commission decided to defer consideration of such matters for a convenient time during the progress of the trip. The meeting adjourned at 11:45 a.m.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

En route Prineville to Burns,
September 12, 1944

Following an overnight stop at Prineville, the Highway Commission motored to Burns over the Central Oregon Highway, leaving Prineville at 8:00 a.m. Matters as follows were discussed by the Commission en route, the following persons being present during the discussion:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary.

The Attorney reported the successful conclusion of negotiations for the acquisition of an 80-acre addition to Silver Creek Falls State Park, as previously authorized by the Commission. He advised that the purchase was made through the cooperation and courtesy of Mr. H. R. Crawford, Salem, who is particularly interested in the State acquiring the property. Mr. Crawford, he said, was able to acquire the property for $5,000.00, the amount previously

approved by the Commission, but in connection therewith, incurred personal expense amounting to $80.00. He recommended purchase of the tract at the price quoted and that Mr. Crawford be reimbursed for his out-of-pocket expense, a total expense of $5,080.00. The Commission approved the recommendation unanimously upon motion by Mr. Schaupp, which was seconded by Commissioner Chessman.

The Engineer reported, on behalf of the State Parks Superintendent, an offer from B. B. Bennett, Portland, to sell to the State for park purposes a 30-acre tract of land situate on the south side of the Columbia River Highway at Latourelle, Multnomah County. He advised that the tract adjoins the Guy W. Talbot State Park on the east and is needed to fill out the park as well as to provide parking space for automobiles, which is not available at the present time. The Engineer advised that the Parks Superintendent desires authority to secure a six-month's option to purchase this property. The request was approved by the Commission by unanimous vote.

The Attorney reported receipt of a communication from the Marshfield Florist Company, advising that the company has sold its business in Marshfield to a Mr. J. D. Bergen, which involves the transfer of the company's lease rights to certain state property. The company, he said, is asking the Highway Commission to approve such transfer subject to the same conditions and terms of its existing agreement with the State Highway Commission. He recommended approval of the request. The Commission approved the recommendation unanimously.

The Commission, by unanimous vote, confirmed the telephonic authority previously given the Engineer to sell an old building near Roseburg, formerly used as a scale house, for the sum of $50.00.

The Secretary presented in behalf of the State Parks Superintendent a request from Mr. Henry Zorn for the renewal of his lease of a portion of Champoeg State Park, which he has been using for farm purposes for several years. The Commission voted unanimously to renew the lease subject to the conditions and rates mentioned in the previous lease.

The Attorney brought up for discussion the matter of renewing the insurance covering snow removal operations in the Columbia Gorge. He advised that the existing insurance was written by Lloyds of London, which has offered to renew it at this time, for a five-year period, for a sum of $4,500.00, and to give the State credit for the unused portion of the premium paid for the existing policy which still has one year to run. He further advised that there are some other companies who are interested in securing this business and have agreed to write the insurance on a five-year basis for a sum of $4,585.00, which is less than the premium heretofore paid for the same coverage. He requested instructions; however, recommended that the business be given to Lloyds of London as this company has given good service and was the only company that would take the business when it was first offered. The Commission decided unanimously to renew the insurance with Lloyds of London as recommended.

The Commission had under discussion a complaint from Mr. and Mrs. Chamberlain, donors of a small state park situate on Bolon Island in the Umpqua River, between Reedsport and Gardiner, concerning abuses that are allowed in the park. The Chamberlains allege that the park is not being maintained in the condition that was contemplated when it was presented to the State, that there is no caretaker employed at the park and as a consequence the park is being used for undesirable purposes. They desire the property to be reconveyed to them so they can put into effect some of the things that they have in mind in the way of development. The Engineer advised that it has not been possible to maintain a caretaker in the park on account of labor shortage and that the park has been maintained in the best possible manner under existing circumstances; also, that the State has invested considerable money in the park and it is planned to reinstate the park program as soon as possible after the war is over. The Attorney advised that due to the public money that has been invested in this place, the Commission is without legal authority to deed the property back to the Chamberlains. After discussion, the Commission decided not to relinquish the property. The Attorney was instructed to check the conditions of the deed and to advise the Chamberlains why the Commission cannot do what they ask.

The Attorney reported a request from the Springdale Volunteer Fire Department for assistance from the State Highway Commission in effecting the removal of a telephone pole which interferes with entrance to the fire station and bus terminal which they have recently constructed. He advised that the Commission has authority to order the removal of such poles or fixtures if it deems that expedient, and recommended that the Commission exercise its authority in this instance. The Commission approved the recommendation and thereupon authorized the Attorney to order the Columbia River Telephone Company, the owner of the pole, to reestablish the pole in a location that will not interfere with the use of the building.

The Commission by unanimous vote confirmed the deeding of certain state-owned property situate in Lane County, to the U. S. of America Forest Service and the signing of such deed by the individual members of the Commission on August 24, 1944 (this property consists of a strip of land 66 feet wide, extending across Devil's Elbow State Park from the Oregon Coast Highway and is to be used as right of way for a timber access road which connects with the Oregon Coast Highway at Cape Creek).

Consideration was given by the Commission to the granting of relief to the Federal Government (U. S. Army) from any claim for damages arising out of the use by the Army of the Cape Arago State Park property in Coos County as a rifle range. The Attorney advised that the State's property has not been damaged by such use and recommended that the relief requested by the Army authorities be granted. The Commission approved the recommendation.

The Attorney reported the results of a conference with the Portland Public Docks Commission relative to the Docks Commission's claim against the State in the amount of $5,000.00 for the moving of the municipal boat landing formerly located at the foot of Stark Street, Portland. He said that the En-

gineer and he met with Mr. A. D. Merrill and Mr. George LaRoche, Engineer and Attorney, respectively, for the Docks Commission, on August 28, 1944, in Mr. LaRoche's office, when this matter was fully discussed. He further advised that he stated at the conference that in his opinion the entire claim had been presented by the Docks Commission to the City Council as is evidenced by a letter dated November 8, 1940, addressed to the Mayor and Council over the signature of John H. Burgard, Chairman of the Commission of Public Docks. In view of which, together with the balance of the record and the action of the city council, he is unable to find any legal ground upon which the Highway Commission could approve the payment of the claim out of State Highway funds. He gave as his understanding, as a result of the conference, that the Docks Commission would abandon its claim. After some discussion of this matter, motion was made by Commissioner Schaupp that the Docks Commission's claim be denied. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission.

The Commission discussed the Attorney's written opinion with respect to the power of a public board or official to surrender control of a public highway to a private institution, and thus place the jurisdiction over the road or highway beyond the source to which the legislature delegated certain powers, involving exemption of the payment of road-users' taxes. (See copy of opinion dated August 10, 1944 in general files.)

The questions involved are as follows:

1. May a public official, commission or board vested by the legislature with jurisdiction and control over public highways, including city streets, enter into an agreement or agreements with a private individual or enterprise by which agreement or agreements the private individual or enterprise shall assume the obligation and responsibility for the construction, reconstruction and/or maintenance of a particular public highway and in consideration therefor be given the free and uninterrupted use of such highway for his or its own private business, and in connection therewith be permitted freely to operate over the highway motor vehicles without being required to pay a gasoline tax, plate or license tax, motor transportation tax or any other charge or fee imposed by law on users of public highways?

2. As an alternate to the foregoing question: May a public official board or commission vested with jurisdiction and control over public highways legally surrender his or its jurisdiction and control over such public highways and place such jurisdiction and control in a private individual or enterprise by agreement or agreements, whereby and pursuant to which ownership of and the right to use such highway or highways shall be so fixed in the private individual or enterprise as to relieve him or it of the statutory obligation to pay the above mentioned taxes, fees or charges?

3. To what extent may a public official, board or commission vested with jurisdiction and control over public highways legally permit the movement thereover of vehicles having a weight, size and/or length, and moving at a speed, in excess of the limitations fixed by law?

According to the Attorney's opinion, the answer to the first and second questions is "No". He advises, however, that the third question can not be so abruptly answered, for,under the laws of the State of Oregon, officials vested with jurisdiction and control over public highways are clothed with limited authority with respect to the granting of permits for the movement over public highways of vehicles, articles or things otherwise prohibited by law. Each of the questions, however, must yield to the same legal reasoning and each is challenged by the same statutes and the same court decisions.

The Attorney advised that this opinion was submitted to Mr. George Neuner, Attorney General, who concurs in the conclusions contained therein. During the discussion, the question arose whether or not the opinion should be made available to the several counties of the state. It was the unanimous opinion of the members of the Commission that the information should be placed in the hands of the county courts. The matter was thereupon referred to the Attorney to bring it to the attention of the county courts in a manner that he considers appropriate and proper.

The Commission discussed an opinion from the Attorney with respect to the Commission's authority to dispose of logs that have been left on the highway right of way by log haulers who refuse to remove them. (See letter from J. H. Devers to H. B. Glaisyer dated August 3, 1944, in general files.) According to this opinion, the powers given the State Highway Commission by the statutes are sufficiently comprehensive to sustain a rule or order of the Commission that logs dumped and left within the right of way of the state highway will be disposed of by the Commission if not removed by the owner within a reasonable length of time. In the concluding paragraph of the opinion the Attorney suggests that the owner of such logs be notified by registered mail and given a fixed period of time within which to remove the logs and that the owner be advised that if the logs are not removed within such period then the Highway Commission will dispose of them and will bill the owner for any cost or expense sustained in connection with such disposition. The Commission approved this suggestion as a trial proposition and instructed the Secretary to notify the owners of the logs in conformity therewith.

The Commission discussed briefly the claim of Mr. Ernfrid Johnson for injuries allegedly sustained as a result of falling in an open manhole situate on the right of way of the Pacific Highway near Oregon City. Action on this matter was deferred by the Commission pending detailed information which the Engineer was instructed to furnish at the next meeting.

The Engineer presented a proposed maintenance program as follows, for construction when the war is over:

12133

PROPOSED MAINTENANCE BUILDING PROGRAM

Proposed for First 3-yr. Post-war Period	Proposed for Following 3-yr. Period	Proposed for Later Construction
	DIVISION I	
Multnomah	Manning	North Portland
Troutdale		Government Camp
Newberg		
St. Helens		
	DIVISION II	
Mecanicum Junction	Clatskanie	Salem
Grand Ronde	Jewell	
Woodburn	Dallas	
Newport	Stayton	
	Eddyville	
	Sweet Home	
	DIVISION III	
Marshfield	Swisshome	Dexter
Caves Junction	Veneta	Broadbent
Prospect	Port Orford	Reedsport
Florence	Glendale Junction	Elkton
	Eugene	Green Springs
		Milo
		Eagle Point
	DIVISION IV	
Hood River	Parkdale	Dufur
Post	Shaniko	Ochoco Summit
Lapine	Sisters	Lakeview
Maupin	Beatty	
Moro	Fort Klamath	
	Keno	
	DIVISION V	
Hereford	Brogan	Fossil
Arlington	Hermiston	Heppner
Jordan Valley	Ukiah	Richland
	Harper	Snake River
	Elgin	Juntura
	Spray	

SEP 12 1944

ESTIMATE OF COST
PROPOSED MAINTENANCE BUILDING PROGRAM

1. Proposed for First
3-yr. Post-war Period

Sites - State owns 16 - has option for Marshfield Site -
Multnomah, Newberg and Maupin to be acquired

Size - 32' x 50' - at Post up to 36' x 90'
No District Offices required
Sectionmen Houses required at Prospect and Post only.

Estimated Cost:

4 Sites at $1500.00	$ 6,000.00	
20 Storage Sheds at $8,000.00 . . .	160,000.00	
4 Houses at $5,000.00	20,000.00	
		$186,000.00

2. Proposed for
Following 3-yr. Period

Sites - State own 5 sites - 19 to be acquired

Size - From 50' to 90' long
1 Office Building required at Eugene.
No Sectionmen Houses required.

Estimated Cost:

19 Sites at $1,000.00	$ 19,000.00	
23 Storage Sheds at $8,000.00 . . .	184,000.00	
1 Office Building at $10,000.00 .	10,000.00	
		$213,000.00

3. Proposed for
Later Construction

Sites - State owns 7 - 11 to be acquired

Size - Variable, but no District Offices required
Sectionmen Houses desirable at Government Camp,
Green Springs, and Ochoco Summit.

Estimated Cost:

11 Sites at $1,000.00	$ 11,000.00	
18 Storage Sheds at $8,000.00 . . .	144,000.00	
8 Houses at $5,000.00	40,000.00	
		$195,000.00
		$594,000.00

SEP 12 1944

PROPOSED CONSTRUCTION OF AUXILIARY REPAIR SHOPS

1. Proposed for First 3-yr. Post-war Period

Bend, Ore. Construction of 60' x 34' Shop Bldg.	$6,000.00	
Ontario, Ore. Alterations to Existing Bldg.	4,000.00	
Total for Period		$10,000.00

2. Proposed for Second 3-yr. Post-war Period

Burns, Ore. Construct Addition to the Existing Bldg. Estimated Cost	$5,000.00	
The Dalles, Ore. Alterations to Existing Bldg.	4,500.00	
Total for Period		$ 9,500.00

3. Proposed for Third 3-yr. Post-war Period

Grants Pass, Ore. Alterations and addition to Existing Bldg.	$5,000.00	
Astoria, Ore. Alterations and addition to Existing Bldg.	4,500.00	
Total for Period		$ 9,500.00
TOTAL FOR SCHEDULE		$29,000.00

He pointed out that the program has been divided into three parts, one of which covers the first three-year period following the war, when it is proposed to spend $186,000, plus an additional $10,000 for auxiliary repair shops; a second, which covers the second three-year period following the war, when it is proposed to spend about $213,000; and the third is for later construction, when it is proposed to spend about $195,000 for this purpose. He asked the Commission to authorize the preparation of plans for the buildings proposed for construction in the first three-year period, involving an expenditure of a proximately $200,000 of State Highway funds. He estimated the cost of preparation of plans at about 5% of the cost of construction, or about $10,000. The matter was discussed by the Commission at considerable length and as a result thereof the Commission authorized the Engineer to proceed with the preparation of plans as requested. The Commission wished it understood, however, that it is making no commitments whatsoever as to construction. Motion to that effect was offered by Commissioner Schaupp, seconded by Commissioner Chessman, and received the unanimous vote of the Commission.

The Engineer reported on the request of the City of Cascade Locks for permission to use the state-owned scales at Cascade Locks for the purpose of weighing trucks for the securing of licenses. He advised that as ordered by the Commission at the previous meeting, the records have been

searched to ascertain if the Commission previously granted such permission in other localities and it has been found that the scales at Toledo are now being used for such purpose under authority from the former Highway Commission; also, that similar authority was granted in several other localities as a temporary expedient provided those in charge of the scales are not required to make special trips to the scales. He pointed out that according to law (Chapter 223, Laws of Oregon, 1943, Section 115-105 OCLA) it is not absolutely necessary that a truck be weighed in order to secure a license from the Secretary of State, inasmuch as such law provides that the Secretary of State may use the manufacturer's chassis weight of such vehicle, plus 25% in addition, as a basis for determining the fee to be paid by the applicant. After discussion and in view of this law, the Commission decided to deny the request of the City of Cascade Locks. The Secretary was instructed to convey such information to the City and to state the reasons for such action.

The Engineer reported a dangerous situation existing along the Oregon Coast Highway through the Town of Gardiner and in the vicinity of the Schofield Creek Bridge, just south of Reedsport, caused by the parking of automobiles on the highway shoulders. He exhibited photographs showing the situation and recommended that the Commission adopt an order prohibiting the parking of vehicles on the west side of the highway in Gardiner, for a distance of about 575 feet south of Pitt Street intersection; also prohibiting the parking of vehicles on the west side of the highway for a distance of 500 feet both north and south of the Schofield Creek Bridge and on the easterly side of the highway for a distance of 300 feet north of the bridge. The Commission approved the recommendation and instructed the Attorney to prepare an appropriate resolution covering the matter for adoption at the next meeting.

The Commission again discussed the proposal to construct concrete sidewalks and curbs along the Oregon Coast Highway through the Delake, Ocean Lake, Nelscott and Taft communities, which was the subject of discussion with the delegation representing the North Lincoln County Chamber of Commerce on the previous day. In this connection, the Engineer reported on the cost to acquire extra right of way as may be needed and to move back certain buildings that are situate thereon. He explained that the extra right of way is needed in order to provide four 10-foot lanes for moving traffic, one 10-foot lane on each side of the highway for a parallel parking of cars at the curb line, an 8-foot strip on each side for sidewalks and a 2-foot strip on each side between the sidewalk and curb for public utility poles. Such arrangement is necessary, he said, in order to eliminate traffic congestion that occurs in these places during certain times of the year. He asked the Commission to approve the plan and to authorize the Attorney to secure options for the right of way in accordance with the decision reached on the previous day. Following discussion, the Attorney was instructed to proceed with the taking of options in accordance with plan outlined by the Engineer. The Commission confirmed the authority given the Engineer on the previous day to advertise for bids for the construction of sidewalks and curbs at any or all of the four localities as soon as the right of way has been acquired and all other conditions have been satisfied.

The Commission, by unanimous vote, confirmed the action taken on the previous day relative to the establishment of a small state park to preserve a stone monument at the intersection of Willamette Meridian and Base Line, just west of Portland. The Engineer was instructed to prepare a description of the property for use by the Attorney in preparation of the deed of conveyance, which deed is also to contain certain restrictions heretofore specified by the Commission. The question of providing a parking space for automobiles along Skyline Boulevard was also mentioned. The Commission reiterated that in its opinion the construction of such parking area is an obligation of Multnomah County. Chairman Banfield volunteered to discuss the matter with the Board of County Commissioners.

The Engineer discussed briefly with the Commission the provisions of the agreement with the Rogers Construction Company covering certain necessary changes in the specifications of two contracts, Nos. 2668 and 2669, for the improvement of the I.O.N. Highway in Malheur County. The agreements as prepared were approved and signed by the Commission.

A petition, signed by a number of mill owners, merchants and other users of the Tiller-Trail Highway in Douglas County, requesting the improvement of this highway between Milo and the Douglas-Jackson County line, had the attention of the Commission.

The Engineer reported in detail on the condition of this road and the volume of traffic that it carries. He gave as his thought that it would not be possible to satisfactorily improve the road throughout its entirety in the postwar program, although tentative plans provide for its improvement between Milo and Tiller, a distance of about 15 miles; and there is a possibility that the Public Roads Administration will improve the section above that point with Forest Highway funds. There is a question, he said, whether or not either improvement can be undertaken at that time, in view of the probability that anticipated funds will not materialize and that the Commission will have more important obligations for the monies available.

He suggested that the petitioners be advised that the Commission is not in a position to make any statement with respect to the road at this time, but will give it consideration in the formulation of the postwar program. The Commission approved the suggestion.

A petition was presented from residents of Oklahoma Hill, Clatsop County, in which the Commission was asked to construct a suitable school bus station on the state-owned stock pile site adjacent to the Lower Columbia River Highway, one-half mile west of Taylorville, as an accommodation to school children who are obliged to wait at this point each school day for the school bus. The Attorney advised that the Commission does not have legal authority to spend State Highway funds to construct such building, but it does have authority to allow the local people to construct its own building on the premises if it so desires.
